London Borough of Enfield

Report Title	Budget Report 2026/27 and Medium-Term Financial Plan 2026/27 to 2030/31
Decision Taker/ Committee	Council
Report Author	Neil Goddard, neil.goddard@enfield.gov.uk
Ward(s) affected	All
Key Decision Number	KD5949
Classification	Part 1 Public
Reason for exemption	N/A
Date Decision taken	26 February 2026

Purpose of Report

1. This report presents to Council for approval, the General Fund revenue budget for the next financial year (2026/27) along with the 5-year Medium Term Financial Plan (MTFP) covering the period 2026/27 to 2030/31.
2. The report also presents the proposed Council Tax levels for the 2026/27 financial year including the Greater London Authority (GLA) precept.
3. The Council has a statutory obligation to undertake an annual budget process and to set a balanced budget for the forthcoming financial year.
4. The report also ask for approval of the Schools' (Dedicated Schools Grant) Budget.
5. The Budget has been developed alongside the Ten-Year Capital Strategy and Capital programme 2026/27 to 2035/36 and the Ten-Year Treasury Management Strategy 2026/27 to 2035/36; these are both separate reports on this agenda.

Recommendations

6. Council is recommended to:

   i. Set the Council Tax Requirement for Enfield at £184.874m for 2026/27 as set out in the Statutory Budget Determination in Appendix 1 to the report.

   ii. Set the Council Tax at Band D for Enfield Council for 2026/27 at £1,757.16.

   iii. Note that the Band D property rate in 2026/27 for Enfield will be £1,757.16. This includes a 2.99% general Council Tax increase and a 2.00% Adult Social Care Precept and represents an increase of £1.60 per week.

   iv. Note the Council will levy a Council Tax of £510.51 at Band D on behalf of the Greater London Authority which is a 4.10% increase: equivalent to an increase of 39p per week for a Band D property.

   v. Note that the combined increases will lead to a Band D property total of £2,267.67, a 4.79% increase on the 2025/26 level, equivalent to an increase of £1.99 per week for a Band D property.

   vi. Note the Council's Section 151 Officer's statutory Section 25 Statement at Appendix 2 which provides their opinion on the robustness of the budget and the adequacy of the Council's reserves when making final decisions on the 2026/27 budget.

   vii. To agree to the proposed General Fund Net Revenue Budget of £438.969m for 2026/27.

   viii. Agree in principle the final list of efficiencies and savings proposals for 2026/27 totalling £11.960m, as set out in Appendix 9, noting also that final decisions on these savings or income proposals will be subject to equality impact assessment, consultation and formal decision making in the usual way.

   ix. Approve the latest General Fund Medium-Term Financial Plan estimates for 2026/27 to 2030/31 set out in Table 3 and to note the estimated budget gap of £34.5m at the end of that period.

   x. Note the forecast levels of Council usable reserves as set out in Appendix 11b.

   xi. Approve the planned transfers to and from reserves in setting the budget for 2026/27 as set out in out paragraph 66.

   xii. Agree the Reserves policy for 2026/27 as set out in Appendix 11a

   xiii. Agree the proposed Fees and Charges set out in Appendix 12 and the continuation of the flexibility introduced in 2021/22 for these to be varied in year where appropriate.

   xiv. Approve the Flexible Use of Capital Receipts Policy as at Appendix 13 and to approve that any in-year changes required to the Flexible Use of Capital Receipts Policy is delegated to the Chief Finance Officer in consultation with the Cabinet Member for Finance and Procurement and reported to Cabinet in the quarterly Revenue Monitoring reports.

xv. To note the feedback from the Budget Consultation at Appendix 14a.

xvi. To note the minutes of the Overview and Scrutiny Committee Meeting on 19 January 2026 following its consideration of the draft budget which are set out in Appendix 14b of this report.

xvii. Agree the schools (DSG) Budget for 2026/27 as set out in paragraphs 94 to 112 and Appendix 15.

Executive Summary, Background and Options

7. The government has fundamentally changed the way funding is allocated to councils through the Fair Funding 2.0 review, reflecting longstanding lobbying by elected members and officers for funding that better aligns with levels of deprivation and need. Following a consultation during the summer, the detailed funding outcomes have now been published in the Final Local Government Finance Settlement.

8. The significant increase in core funding and the council's disciplined financial approach, has been able to protect frontline services, with no reductions to the essential support our residents rely on being proposed in this budget.

9. The Council's funding is forecast to increase by £65m between 2025/26 and 2026/27 - £54.6m increase in government funding and £10.3m increase in Council Tax income.

10. After core funding increases for 2026/27, the net revenue budget is proposed to increase by £90.2m from £348.7m in 2025/26 to £438.9m in 2026/27 (£65m increase in funding and council tax income, and £21m due to realigning our methodology of calculating net revenue budget in order to bring it closer to the way the government calculates Core Spending power).

11. This growth is funding significant and increasing demand for social care and homelessness support which is being experienced across the sector.

12. The most significant growth areas and pressures for 2026/27 are forecast to be:

- £19.3m Adult Social Care from demographic demand, inflation, and Bad Debt Provision
- £6.0m Children's Social Care from inflation and demand for external care purchasing
- £7.4m for pay award
- £5.4m for increased demand in Temporary Accommodation
- £1.6m for Capital Financing
- £2.5m for NLWA and Concessionary Fare levies
- £5.0m to recognise risk of further demand service increases
- £2.5m for contract inflation

13. The Children's, Families & Youth Grant funds new long term investment into Children's Social Care to strengthen support for children, young people and families, with a focus on prevention, reducing inequalities, and improving life chances and help people facing financial crisis.

14. The £7.4m per annum Crisis & Resilience Fund provides Enfield with funding to deliver preventive support and help residents facing financial shocks, replacing the Household Support Fund and Discretionary Housing Payments.

15. The first multi-year Settlement in a decade gives local authorities like Enfield the certainty to plan for investment in longer term early intervention measures that tackle the causes of deprivation. The Medium-Term Financial Plan reflects that the Council will have a balanced budget for the next three years but a gap £34.5m remaining in years four and five. The settlement, however, does not immediately undo years of underfunding, the council must keep financial discipline to protect front line investment.

16. The Council is now in a far stronger position to manage future pressures but recognises that the next three years must be utilised to transform and prepare for future challenges. This settlement is a once in a generation opportunity to do that.

17. As set out in the Council's Financial Resilience Framework (Appendix 3), attaining "resilient" status is within reach but only if the Council continues with its current financial discipline. The Council's current financial resilience remains classed as "vulnerable", with the aim of moving to "stable" during 2026/27.

18. It is imperative that the Council delivers the current and proposed savings programme and future efficiency targets have been built in to achieve a balanced budget over the 3-year settlement period.

19. The Council is required to undertake a budget consultation which commenced in December and closed in early January. The feedback received has been incorporated into this final budget.

20. The Council's Section 151 Officer (CFO) is required by law to give their professional opinion on the robustness of the budget proposals and the adequacy of reserves given the financial risks that the Council is facing. Members should have due regard for this Section 25 statement, attached at Appendix 2, when making their decision.

21. The proposed General Fund Revenue Budget for 2026/27 has been developed alongside the ten-year Capital Strategy, together with the proposed capital programme 2026/27 to 2035/36 to support the strategy. The proposed budget incorporates the revenue impacts of the proposed capital budget for 2026/27.

22. The report also presents the Schools Budget for 2026/27 for recommendation for approval to Council. The Department for Education (DfE) provided the Dedicated Schools Grant (DSG) settlement on the 17 December. The allocations are used in the schools' budget allocation model which is based on the National Funding Formula to allocate individual school budgets. The schools' budgets are reported to the Schools Forum in January prior to submission to the DfE and the final allocations are confirmed in February.

23. Whilst the DSG deficit does not directly impact on the Council's revenue reserves, the deficit still requires cash, which is in effect taken from other reserves. i.e. the DSG deficit either reduces cash surpluses available to invest or increases external borrowing. Conservatively, a yield or interest cost of 3.85% and a circa £23m deficit will cost the council £0.9m in interest over a full year.

24. The government announced in the final settlement a new High Needs Stability grant that will fund 90% of DSG deficits subject to conditions. This new grant will significantly reduce the financial risk that the Council was facing when the DSG deficit statutory override was due to cease in March 2028.

Setting the 2026/27 budget

25. The proposals within this report are the culmination of the 2026/27 Revenue and Capital budget planning process and provide information on:

- the financial outlook for the local government sector and the Council specifically;
- the details of the Local Government Finance Settlement and changes to the Council's funding;
- changes to the budget since the December draft budget report;
- the outcome of the recent budget consultation exercise;
- the proposed Council Tax levels;
- the Medium-Term Financial Plan providing financial best estimates for the next five years;
- the Council's level of reserves to underpin its continued financial sustainability.

26. The robustness of the savings and estimates have been tested as part of the budget cycle including via Executive Management Board, Scrutiny and Cabinet and Cabinet Member briefings.

27. The key objective of the Council's Medium Term Financial Plan is financial resilience and protecting the services which are providing support to the most vulnerable in the Borough.

Review of Overall Funding, Spending Assumptions and Savings Proposals

Funding Assumptions

28. The final budget as proposed is based on the announcement of the final Local Government Finance Settlement in February 2026 and finalised Council Tax and Business Rates estimates for 2026/27.

29. The proposed General Fund revenue budget for 2026/27 assumes that the Council increases Council Tax by the threshold level before a referendum must be held. For 2026/27, the threshold level allowable is 4.99% (2.99% core council tax and 2.00% for the Adult Social Care precept).

30. In line with statutory requirements, Members are required to approve the proposed Band D Council Tax for 2026/27 of £1,757.16, and to note the Mayor's GLA precept of £510.51 which will be added to this amount.

31. The government settlement for 2026/27 is the first multi-year settlement in a decade. Along with the funding allocations for 2026/27, indicative funding levels have also been provided for 2027/28 & 2028/29.

32. The outcome of the Fair Funding Review has been very positive for Enfield, where the government estimated that the borough has had the second highest increase in core spending power in the country and the highest in London. This fundamental shift in resources finally recognises the needs of the borough and provides a certainty in the level of funding over the next three years, though it is still expected that the government will confirm the allocations for 2027/28 and 2028/29 on an annual basis. This does provide some uncertainty, and the council has asked the government to strengthen its commitment to the published allocations for these future years.

33. In addition, the government has sought to reduce the volume of individual grants that authorities receive. More detail on the changes can be found in Appendix 7.

34. The government's assessment of the Council's core spending power includes an estimate of our business rates income and similarly an estimate of our council tax income (with an assumption that the maximum 4.99% increase is applied). The Council's actual council tax income included for 2026/27 is calculated using local data, whilst the business rates income is derived from the statutory NNDR1 return that was submitted to government by the 31 January 2026 deadline.

35. The estimated funding levels for 2026/27 Council Tax were presented to Council on 21 January 2026 within the tax base report.

36. The final LGFS announced a core spending power total of £442.8m which includes the Council's Fair Funding Allocation (FFA), Local Authority Better Care Grant, Council Tax requirement, Homelessness, Rough Sleeping and Domestic Abuse grant, Families First Partnership Grant and the Recovery Grant.

37. Our FFA can be further broken down into the Baseline Funding Level (BFL) which represents the *minimum amount of funding* a local authority is guaranteed to receive from the national business rates system, before taking into account how much business rates it actually collects locally. This will be made up of the Council's Business Rates Baseline and top up grant. The government's assumptions for BFL are £50.2m for Business Rates and £91.1m top up for a total BFL of £141.3m. Revenue Support Grant of £75.3m is then added to arrive at the FFA figure of £216.6m.

38. It is important to note that the government makes its own assumptions on the Baseline Funding Level and Council Tax requirement which are used as a guide but are replaced with local knowledge on what is actually happening within the borough.

39. The Council's Net Revenue Budget (NRB) has been set to align with the core spending power assessment with revised estimates for BFL and Council Tax.

40. In addition to core spending power, the government also announced other grant funding allocations for 2026/27, namely the consolidated Public Health grant, the Crisis Resilience Fund and Children's, Families and Youth Grant. Plus, the Council has received notification for two other grants, those being the Housing Benefit Subsidy Admin grant and the Extended Producer Responsibility grant. Further details of all of the grants can be found in Appendix 7.

41. Overall, the Council has seen an increase of £54.5m in FFA and grants funding. Note that £21.3m of the change in the Net Revenue Budget is due to the reclassification of service and core grants.

Table 1: Funding Summary 2025/26 to 2026/27

	2025/26 £m	In Year Savings £m	Council Tax £m	FFA £m	Grant Increases/ Decreases £m	Grants (Core ↔ Service) £m	2026/27 £m
SFA/FFA: BFL & RSG	121.6			94.9			216.5
Council Tax	174.5		10.3				184.9
Core Grants	52.6			(40.9)	4.5	21.3	37.5
Use of Reserves	5.0	(5.0)					0.0
CSP = NRB	**353.7**	**(5.0)**	**10.3**	**54.0**	**4.5**	**21.3**	**438.9**
Service Specific Grants	63.2			(11.0)	7.0	(21.3)	37.9
Total Funding	**416.9**	**(5.0)**	**10.3**	**43.0**	**11.5**	**0.0**	**476.8**

42. The budget is balanced over the next three years, actual business rates performance can fluctuate, and the government's safety net protection reduces from 100% in 2026/27 to 97% and then 92.5% in 2027/28 and 2028/29 respectively. Therefore, actual performance will continue to be monitored regularly, and the plan adjusted accordingly in future years.

43. Further detail on each funding source and the changes to funding assumptions in the MTFP are summarised in Appendix 7.

Investment, Inflation, Pay Award, Demography Spending Assumptions

44. Growth and investment spending assumptions for 2026/27 were estimated in the February 2025 Council Report to be £23.6m. These have since been reviewed and updated and now total £79.0m following the final Local Government Finance settlement (i.e. from increases in government funding, council tax and also efficiencies that are reinvested into services).

45. £24.8m of investment expenditure is proposed in the final budget. This includes

- £4.4m is being set aside for early intervention and prevention of deprivation with more detailed plans to be developed over the coming months,
- £5.5m for the Crisis & Resilience Fund (excluding the Discretionary Housing Payments element).
- £6.7m for children's social care transformation
- and confirms funding for Summer University, investment in Waste Services and Trading Standards, as well as improvements to cyber security and various IT systems for costs relating to the Council's ERP system upgrade.

46. £16.3m of the above relating to new expenditure related to ringfenced grant conditions for the First Families First Partnership grant, Public Health grant, Homelessness & Rough Sleeping grant, Extended Producer Responsibilities and the Crisis Resilience Fund (see Investment to Address Deprivation and Support Vulnerable Residents section below). In addition, to increase the amount of capital receipts available to reduce the Council's level of debt, expenditure previously planned to be to be financed through the flexible use of capital receipts is being replaced with permanent base budget funding. This includes £2.0m for the Digital Portfolio and £1.0m for transformation (which includes existing invest to save schemes).

47. Demand pressures are continuing to increase. £54.2m of growth is forecast for 2026/27 when compared to the 2025/26 budget.

48. The most significant growth areas and pressures for 2026/27 are forecast to be:

    - £19.3m Adult Social Care from demographic demand, inflation, and Bad Debt Provision.
    - £6.0m Children's Social Care from inflation and demand for external care purchasing.
    - £7.4m for pay award.
    - £5.4m for increased demand in Temporary Accommodation.
    - £1.6m for Capital Financing.
    - £2.5m for NLWA and Concessionary Fare levies
    - £5.0m addition to the central contingency has been added since the draft budget.
    - £2.5m for contract inflation

49. There are several reasons driving the gap, notably pay award, inflation, demography, homelessness, children's and adult social care services cost pressures. The latest spending assumptions in the MTFP are summarised in Appendix 8.

Investment to Address Deprivation and Support Vulnerable Residents

50. The Crisis and Resilience Fund (CRF) will be established to provide targeted support to residents and communities in the borough who are experiencing acute hardship or are at risk of crisis. This will build on the Council's experience of administering previous schemes such as the Household Support Fund, but with a renewed focus on both immediate crisis intervention and longer-term resilience. The CRF will be designed to ensure that those most in need receive timely and effective assistance, while also strengthening the borough's capacity to respond to future shocks.

    A key principle that will underpin the CRF will be the integration of crisis support with preventative measures. By embedding resilience-building activities within the Fund, the Council aims to reduce the recurrence of crisis and promote sustainable outcomes for vulnerable households.

New Savings & Income Proposals

51. Departments have been formulating efficiency plans and income proposals. Proposals totalling £12m for 2026/27 are being put forward in this report. The breakdown of the new efficiencies by category is set out below.

Table 2 – New Savings & Income Generation proposals 2026/27 - 2030/31

	2026/27 £m	2027/28 £m	2028/29 £m	2029/30 £m	2030/31 £m	Total £m
Income Generation	2.2	0.5	0.1	0.0	0.0	2.8
Cost Reductions	9.8	7.8	5.9	6.0	6.0	35.5
Total	**12.0**	**8.3**	**6.0**	**6.0**	**6.0**	**38.3**

52. Appendix 9 provides the full list of the proposals being put forward in this report for approval. Note that the savings proposals set out in this report are being recommended for approval subject to consultation and assessment of the equality implications where relevant. To maximise the financial benefit of these proposals it is recommended that, where applicable, they are implemented as soon as feasibly possible, which could mean that some could help mitigate the 2025/26 forecast overspend and the consequent draw on reserves.

53. Since the December Cabinet report, the following amendments and additions have been made:

    - Two new invest to save proposals are put forward for approval, these being the introduction of padel courts in the borough and the insourcing of repairs to parks equipment.
    - The removal of two proposals put forward in the draft December budget following further due diligence totalling £0.2m.
    - Revised the saving adjustment to provide greater resilience of optimism bias and slippage in 2026/27.

- Recategorisation of the net benefit of Extended Producer Responsibility grant into the funding section.

54. Some of these savings' proposals will be subject to public consultation and responses, which will be considered and factored into the final budget proposals. Further due diligence is also being undertaken to ensure that these proposals are robust and deliverable.

55. Whilst robust due diligence has been undertaken, the risk exists that the identified savings may not be delivered due to circumstances beyond the Council's control and for the first time a savings adjustment has been built into the budget to mitigate optimism bias and slippage into future years. There are also initiatives that have been put in place to mitigate budget pressures, and these are also dependent on external factors. For example, the availability of properties for temporary accommodation (either acquisition or rented) and the levels of private market rents and the costs of building new homes.

Equalities Impact Assessments

56. The Council is committed to its responsibilities under the Public Sector Duty of the Equality Act 2010. These duties are set out in the Equalities Impact Implications section later in this report (paragraphs 136 to 141 below).

57. For 2026/27 there are 35 individual savings and income proposals, and these have all been evaluated to determine whether an Equality Impact Assessment (EQIA) is required and there is paperwork in place to support this evaluation.

58. Of the 35 proposals 7 have required a full EQIA.

Final budget proposals

59. Appendix 10 sets out the departmental net budgets for 2026/27. A summary of the final proposed budget is provided in Table 3 below, with further detail on all elements provided in the relevant sections of the report.

Table 3: Summary Position for 2026/27 to 2030/31

	2026/27 £m	2027/28 £m	2028/29 £m	2029/30 £m	2030/31 £m

* Pay Awards and Employers Pension Contribution saving have been notionally split over service areas

Contingencies, Balances and Reserves

61. Cabinet has previously agreed a high-level methodology to set minimum and target risk reserves. The Council has made good progress towards reaching the minimum threshold balance for risk reserves. For 2026/27 the minimum threshold balance for risk reserves is calculated as £42.9m (because the General Fund Balance is higher, so risk reserves can be lower) and the target balance is £90.6m. The target risk reserve balance has not been revised for the impact of the new High Needs Stability grant at this time because as per government guidance the eligible deficit will only be determined following an assessment by the Department of Education and MHCLG. The Council reserves strategy can be found in Appendix 11a.

62. With the final settlement being better than the 'favourable' scenario, the budget over the life of the MTFP allows the council to strengthen its reserves position and maintain the General Fund balance at a minimum of 5% of the net revenue budget. Annual contributions to reserves have been built in which should enable the Council to reach Target Risk Reserves in three years, if there are no overspends in any of the years from 2026/27 onwards. The 5-year plan allows for an ongoing contribution of £5.0m per year beyond 2030/31.

63. The Council's policy will continue to be one of containing spending within the budgets set for each department, without recourse to the central contingency other than in exceptional circumstances. The budget includes a central contingency for unforeseen circumstances and, in view of the level of risks and benchmarking against other London Boroughs, it is recommended that the central contingency be increased to £8.0m for 2026/27 i.e. circa 1.7% of the net revenue budget. The Council also holds centrally a few contingent items relating to spending requirements that are expected to arise at some point in the budget year but about which there is some uncertainty regarding the timing or magnitude of the financial impact. These will be allocated to services during the year.

64. The future years gaps for 2029/30 and 2030/31 currently projected in the MTFP are expected to be met through savings, income and funding changes and will therefore not require a draw upon reserves.

65. Earmarked reserves are held to meet the cost of specific one-off projects or specific risks. A list of the Council's Earmarked Reserves and the purposes for which they are held is set out in Appendix 11a. Planned movements in the reserve balances over the period of the MTFP are shown in Appendix 11b. These are split between revenue and capital projects which are included in the MTFP and Capital Programme respectively.

66. The planned transfers to and from reserves in setting the budget for 2026/27 are:

    - £4.1m to increase the General Fund balance to £21.8m for 2026/27, in line with the policy of maintaining the balance at 5% of the net revenue budget.
    - £4.3m contribution to the Risk Reserve in line with the Council's policy of rebuilding its risk reserves and annual progress towards achieving the target risk reserve level.

- £0.8m contribution to the Energetik shareholder reserve as set out in the Treasury Management Strategy.
- £1.1m contribution to the Collection Fund equalisation reserve to mitigate against future fluctuations in collection fund performance and reductions in the government safety net for business rates funding. This £1.1m is the forecast 2025/26 surplus on the Collection Fund.

Risks and Uncertainties

67. Whilst the budget has been balanced this is not without significant risk, and numerous factors could easily cause an overspend in 2026/27 or create a budget gap in the future, which the council will need to manage.

68. The table below summarises the key Enfield specific factors that are most likely to impact on the budget gap.

Table 5: Key factors likely to impact the budget gap

Risk Factor	Mitigation
Level of Funding:	
Published 2027/28 and 2028/29 funding levels are reduced.	The Council has responded to the government consultation of the PLGFS requesting that the commitment to the published numbers is strengthened.
Funding levels for 2029/30 and beyond are uncertain.	Investment in prevention, intervention and transformation enabled by the settlement to reduce future demands.
Funding for homelessness	The Council continues to lobby to lift the TA subsidy cap which accounts for £10m of the pressure and the raising of LHA to the 30% of the market on an ongoing basis.
Social Care:	
Further increases in demand for services and complexity of need in Adults and Children's Social Care.	Demand management, contract reviews, workforce planning, placement sufficiency strategy, care leaver support, cost control panels.
£16.3m net growth in budget already assumed for ASC	ASC Transformation programme.
£6.0m net growth for Children's	
Homelessness:	
Increasingly challenging position emerging for 2025/26 and future risk of rental expenditure increases.	Prevention and early intervention activity.
	National placement policy.
£5.4m net growth in budget for 2026/27.	Long lease programme.
Meridian Water	
The next phase of the project's impact on capital financing budgets.	Meridian Water update is set out in a separate paper presented to February 2026 Cabinet.
New savings/income proposals	

Certainty that the proposals will be achieved and within the required timelines.	Additional due diligence and review to ensure proposals are robust and subject to Department Directors and EMT reviews and approval. A risk factor relating to the delivery of savings has been included in the budget proposals.
Collection Fund Changes in collection rate performance could create a deficit which will need to be resolved in future years budgets.	Collection policy and customer support e.g. Support scheme. Digital and automated services. Regular monitoring of performance.
Bad Debt Provisions £1.2m addition already built into budget but further deterioration of collection could increase this further.	Regular monitoring of performance.

69. There are also key inherent risks that are not unique to Enfield, and which most London boroughs will face in setting their budgets, although the level of risks for each can be very different:

    i. Macro-economic factors - assumptions are built into the forecast for inflation and interest rates but these could change.

    ii. Energy costs inflation.

    iii. Pay award (currently assumed at 3.2%).

    iv. Optimism bias on savings identified and capacity to deliver the volume of savings, though an adjustment has been made to allow for the possibility of deferrals into future years.

    v. Demand increases beyond forecasted levels.

70. The Government plans to establish two new negotiating bodies - the School Support Staff Negotiating Body (SSSNB) for non-teaching school staff and the Adult Social Care Negotiating Body (ASCNB) for adult social care workers - through the Employment Rights Bill introduced on 10 October 2024. These bodies, which fall outside current national agreements (NJC and JNC), are set to begin in the 2027/28 academic year (SSSNB) and in 2028 (ASCNB). It remains unclear whether pay and other terms from these bodies will be fully funded or how any unfunded costs may affect councils and providers.

71. The budget process for 2026/27 has sought to identify the financial risks facing the Council currently and where possible to also quantify them. Identification is one of the key steps in managing risk and this will be supplemented by regular review.

Fees and Charges

72. The departmental fees and charges were reviewed by Cabinet in December, with one addition presented to Cabinet in February.

73. Cabinet has recommended all 2026/27 fees and charges for approval by Council, subject to any necessary consultation and EQIAs. Full details are included in Appendix 12 of this report.

Flexible Use of Capital Receipts

74. With effect from 2016/17 the Government provided a general capitalisation directive to all councils, enabling them to utilise new capital receipts to finance projects that are designed to generate ongoing revenue savings in the delivery of public services and/or transform service delivery in a way that reduces costs or demand for services in future years for any of the public sector delivery partners.

75. The Local government finance policy statement 2025/26 (published on the 28 November 2024) stated that the government will extend the flexible use of capital receipts to 2030. The government will also remove the restriction with respect to redundancy costs, imposed from April 2022, that limits the use of the flexibility to statutory redundancy costs only.

76. Local authorities must produce a strategy which discloses the individual projects that will be funded, or part funded, through capital receipts flexibility and this must be approved by full Council or the equivalent. As a minimum, the strategy should list each project that plans to make use of the capital receipts flexibility and provide details, on a project-by-project basis, of the expected savings or service transformation that will result. The strategy should report the impact on the local authority's Prudential Indicators for the forthcoming year and subsequent years.

77. The Council remains mindful of over reliance on, and sustainability of this one-off funding, and is focused on longer term solutions to fund any ongoing pressures and make the budget more robust. To this end, £3m permanent revenue budgets have been built into the budget for Digital portfolio and transformation, replacing the capital receipts funding arrangements previously in place. It is proposed to utilise £9.4m of capital receipts to:

    - support the on-going asset disposal programme.
    - to fund expenditure related to Statutory redundancy and pension costs when they are a result of restructures that generate savings that pay back within three years.
    - Support the AI & Digital strategy, specifically transformation related projects.
    - Deliver the Council's new Finance and HR system (ERP).

78. Council is asked to approve the latest strategy for 2025/26 which has been updated to reflect latest plans.

79. Appendix 13 sets out the strategy for consideration and approval by Council. The strategy includes details of the proposed schemes for

2026/27, along with an update on the 2024/25 outturn and the latest plan for 2025/26.

80. To facilitate decision making it is recommended to delegate authority for amending the Flexible Use of Capital Receipts strategy to the Chief Finance Officer, in consultation with the Cabinet Member for Finance and Procurement, with any changes to be reported through the quarterly Revenue Monitoring to Cabinet during the year.

Budget Consultation

81. The Council's 2026/27 Budget Consultation was open from 11 December 2025 to 11 January 2026 with a questionnaire which was designed to:

    i. Seek views on how respondents prioritise the wide range of services provided by the Council and on the Council's approach to addressing the budget gap.

    ii. Ask for information on age, gender, ethnicity, and religious beliefs of respondents to help segment the results. The sharing of this information was entirely optional for respondents.

82. The budget consultation was advertised on the Council's website, posted on social media (Facebook, X, Instagram and Nextdoor), promoted through various e-newsletters and on electronic notice boards across the housing estates.

83. In total, 101 responses were received. Most responses were from individual residents, but responses were also received from the following organisations:- Carers and Parents of adults with learning disabilities in Enfield (CAPE) and Enfield Food Partnerships.

    <u>Results of the Budget Consultation</u>

84. Highway Maintenance (97%), Refuse and recycling (95%) and Street cleansing (95%), were the top priorities where respondents thought it was important (either fairly or very) to continue prioritising spend. Ranking just below these came Parks, open spaces & playgrounds (89%) and Community Safety (88%).

85. Regarding the question on the Council's approach to addressing the budget gap, the response was almost equal, with 35% agreeing and 36% disagreeing with the approach which may reflect the difficult decisions the Council has to make, since a wide range of services are considered as priorities for many residents.

86. Detailed analysis and themes from the budget consultation is included in Appendix 14a of this report.

Overview & Scrutiny Committee

87. The draft budget was presented to the Overview and Scrutiny Committee Budget Meeting on 19 January 2026. A constructive session took place with OSC. The minutes and recommendations of the OSC Budget Meeting are set out in Appendix 14b of this report and should be considered as part of this report.

Summary of Budget Proposals and Impact on Council Tax

88. Table 6 sets out the Council's budget position and Council Tax Requirement after considering the proposed changes detailed above.

Table 6: Budget Position & Council Tax 2026/27

	2025/26 £000	2026/27 £000
Net revenue budget		
Other Services (base budget)	318,530	348,729
	318,530	**348,729**

Tax Base (Band D equivalents)	104,291	105,212
Council Tax (Band D)	**£1,673.64**	**£1,757.16**

[1] Previously known as Settlement Funding Assessment Includes Revenue Support Grant and Business Rates Income (Baseline Funding Level).

Medium Term Financial Plan – estimates and outlook

89. Many factors affect the Council's future financial position which can be estimated with some degree of confidence for the first year of the plan but become increasingly uncertain for later years. It is therefore essential to test the sensitivity of the plan to changes in the main assumptions. The figures in the following table illustrate the extent to which the plan would be affected by such changes:

Table 7: Sensitivity Indicators

Item	Budget Impact £m
1% Change in pay	2.0
1% Increase in departmental price inflation across income and expenditure	0.6
1% Increase in Adult Social Care - care purchasing costs	1.0
1% Increase in Children's Social Care external care placements & in-house fostering	0.3
1% Increase in numbers requiring temporary accommodation	0.5
1% Increase in demand for SEN transport	0.1
1% Change in FFA based on final Local Government Finance Settlement	2.2
1% increase in Council Tax Support claimants	0.2
1% reduction in businesses chargeable for business rates	0.5
1% increase in interest rates impact on Capital financing loans on renewal	1.3

90. Recognising that not all pressures can easily or immediately be quantified, the MTFP has built in provision for unknown/unquantified pressures for years 2027/28 to 2030/31. As new pressures emerge or existing ones become clearer, the Council will reduce the provision for unknown pressures, therefore mitigating the impact on the budget gap over the life of the MTFP.

91. Throughout the budget process, officers have kept under review the key risks, uncertainties and opportunities that could have implications for the Council's financial position in 2026/27 and over the medium term. The systematic review, particularly of risks and mitigating actions is a key part of the budget setting process.

92. Prevention, intervention and transformation and the continued focus on reducing expenditure and mitigating cost pressures are key actions to preserve the Council's level of reserves and ensure the long-term financial resilience of the Council. The following table summarises the MTFP position over the coming five years and the current forecast of the budget gaps for the period of the MTFP (2026/27 to 2030/31):

Table 8: Reconciliation of Council Tax requirement 2026/27 to 2030/31

	2026/27 £m	2027/28 £m	2028/29 £m	2029/30 £m	2030/31 £m	Total £m

93. A mid-year review of the Medium-Term Financial Plan will be undertaken and presented to Cabinet in the summer of 2026.

Dedicated Schools Grant (DSG) and the schools Budget

94. The 2026/27 DSG settlement was published on 17 December 2025, confirming the initial DSG allocations. The DSG continues to be funded via four blocks as previously:

- Schools block – costs of primary and secondary mainstream education for pupils up to age 16 in maintained schools and academies
- Central schools' services block (CSSB) – costs of some services for schools delivered by the Council
- High needs block – educational costs of provision for children and young people with special educational needs and disabilities (SEND), from ages 0 to 25, and alternative provision (AP) for children of compulsory school age, who, because of exclusion, illness, or other reasons, cannot receive their education in mainstream schools
- Early years block – the educational costs of early years provision

95. The main DSG funding changes made by the Government in 2026/27 were:

- National high needs funding formula (NFF) has been suspended for 2026/27, with the DSG high needs block funding based on the 2025/26 allocation
- Incorporation of the school budget support grant (SBSG), National Insurance contributions (NICs) and core schools budget grant (CSBG) funding into the DSG allocations

96. The total DSG allocation before recoupment and other adjustments for Enfield is £483.4m for 2026/27 as summarised in table 9.

Table 9: DSG 2025/26 to 2026/27

DSG Block	2025/26 £m (Nov 25)	2026/27 £m (Dec 25)	Changes £m	Changes %
Schools Block	331.624	338.741		
Add: Additional Grants*	9.955			
Schools Block (Inc grants)	**341.579**	**338.741**	**(2.838)**	**(0.83%)**
Central School Services Block	2.563	2.601	0.038	1.48%
High Needs Block**	84.033	89.331	5.298	6.30%
Early Years Block	44.461	52.715	8.254	18.56%
TOTAL DSG* **	**472.636**	**483.388**	**10.752**	**2.27%**

** The 2025/26 NICs and CSBG grant payments rolled into the Schools NFF baseline in the APT*
*** 2026/27 funding includes the incorporation of the 2025/26 Core Schools Budget Grant (CSBG)*
**** Before recoupment and deductions for NNDR and direct funding of high needs places by DfE*

97. Members of Schools Forum were updated on the DSG settlement for 2026/27 at the January 2026 meeting along with the proposed DSG budget, school funding formula and draft individual school budgets. The Council is required to consult annually with the Schools Forum on amendments to the school funding formula.

School block

98. The Enfield Schools Block DSG allocation before recoupment and other adjustments is £338.7m, an overall decrease of £2.8m or 0.83%, after the impact of overall pupil number reductions.

99. The DSG schools block allocation is calculated using the pupil numbers from the previous October school census, summarised in the table below.

Table 10: Pupil Numbers

Pupil Numbers	2025/26 (Nov 25)	2026/27 (Dec 25)	Changes	Changes %
Number of pupils in primary schools	27,996	27,040	(956)	(3.41%)
Number of pupils in secondary schools	19,464	18,971	(493)	(2.53%)
Total Pupils	**47,460**	**46,011**	**(1,449)**	**(3.05%)**

100. The total schools block allocation is calculated based on primary and secondary units of funding, premises funding and growth funding. In addition, grant funding has been rolled into the school national funding formula in 2026/27.

101. The Schools Forum approved the transfer of 0.5% of the schools' block allocation to the high needs block at the meeting on 3 December 2025. The remainder of funding is allocated to mainstream schools through the school funding formula.

102. The draft school funding formula and budget has been calculated using the pupil and school characteristics from the 2026/27 Department for Education (DfE) Authority Proforma Tool (APT), based on the October 2025 census dataset and the National Funding Formula unit rates. No changes were made to the principles and methodology applied in 2025/26. This resulted in an affordability gap of £3.1m. which has been addressed by adjusting the Basic Entitlement formula rates in line with the methodology previously discussed with the Schools Forum and Council's DSG Board and prior years approach.

103. The Schools Forum was consulted on the funding formula at the 14 January 2026 meeting. Schools' Forum members raised concerns at the meeting that the level of funding allocated nationally was insufficient and advised that they could not support the agreement of the budgets.

104. The Council is responsible for making the final decisions on their formula, which has been agreed internally by the Council's DSG Board based on the DSG schools block funding available, national funding formula rates and previously agreed principles and methodology.

Central School Services Block (CSSB)

105. The 2026/27 Enfield CSSB DSG allocation is £2.6m, an overall increase of £0.04m or 1.49%.

106. The CSSB funding is allocated to the Council to carry out central functions on behalf of maintained schools and academies, based on ongoing

responsibilities and historic commitments (funding continues to be reduced annually by 20%).

High needs block

107. The 2026/27 Enfield high needs block DSG allocation, before estimated deductions for direct funding of high needs places by the DfE is £89.3m, an overall increase of £5.3m or 6.3%. This increase is due to the incorporation of previous grant funding allocations into the DSG funding allocation in 2026/27, so in effect there is no increase to the amount of funding received by the Council for high needs.

108. Enfield's high needs budget continues to experience ongoing budget pressures due to increases in costs, demand and complexity of needs with a cumulative DSG deficit forecast of £23.0m reported as at quarter 3. There is a risk that the deficit will increase significantly in 2026/27 as there has been no increase in the baseline high needs funding allocation.

109. The Government has confirmed that it will review the methodology for allocating high needs funding following the wider reforms to the SEND system, which are expected to be set out in early 2026, to support SEND reforms.

Early years block

110. The 2026/27 early years block DSG allocation is £52.7m, an increase of £8.3m or 18.57% compared to 2025/26. This is an estimated allocation, with funding moving to a termly funding system for all early years funding streams for the 2026/27 financial year.

High Needs Stability Grant

111. This new funding was announced in the final settlement, where the grant will cover 90% of eligible high needs deficit at the end of 2025/26. The eligible deficit is yet to be determined and will only cover the high needs (not all blocks) based on an assessment of statutory returns i.e. S251 and Revenue Outturn and dependent on the submission of a Local SEND reform plan.

112. Funding will be received in the autumn of 2026 and will need to be put in reserve until the DSG deficit statutory override ceases to have effect in March 2028. The government recognises SEND reform will take time to fully embed and that local authorities will need further support. For deficits that arise in 2026/27 and 2027/28, local authorities can expect that Government will continue to take an appropriate and proportionate approach, though it will not be unlimited.

Council Subsidiary Companies

113. The Council holds significant investments in two wholly owned trading companies: Energetik and Housing Gateway Ltd (HGL). Energetik, operating under the Lee Valley Heat Network, building heat network infrastructure, while HGL aims to reduce the council's homelessness

pressures. These investments align with the Council's strategic goals of promoting environmental sustainability and addressing housing needs.

114. The Council has made available significant loan facilities to both Energetik and HGL. The loan agreements have been set up so that the subsidiary meets the interest cost to the Council of any loans advanced and make principal repayments at least equal to the cost of the Minimum Revenue Provision which would otherwise be chargeable to the Council's revenue budgets. Further details are available in the Treasury Management Strategy report that appears elsewhere on the agenda.

115. It is important that the appropriate risk management and scrutiny of the companies' progress against approved Business Plans and financial health is undertaken to ensure that there is no risk to the companies servicing their associated debt costs.

Preferred Option and Reasons for Preferred Option

116. To set the Council's Budget Requirement and level of Council Tax for 2026/27 within the timescales set out in legislation. The Council has a statutory duty to approve a balanced budget for 2026/27 along with consideration of the finances over the medium term and the Council's reserves and balances. It is essential that there is a clear understanding of the anticipated income and expenditure flows for the Council, despite the uncertainties, and for savings proposals to ensure full delivery from 1 April 2026 wherever possible to maximise their contribution to addressing the financial pressures in 2026/27 and beyond.

Alternative Options Considered

117. The Council operates a budget planning and consultation process during which a wide range of options are considered in detail before recommendations are made. Issues raised and discussed have contributed to this report including information from the Budget Consultation exercise set out elsewhere in this report. As part of its planning for both 2026/27 and future years the Council has considered future levels of Council Tax. Further formal decisions may be required in respect of certain savings, incomes and fees and charges proposals and, where necessary, such decisions will be subject to consultation and equality impact assessments.

Relevance to the Council Plans and Strategies

118. The primary purpose of the development of the Budget and Medium-Term Financial Plan is to direct resources to deliver the priorities set out in the Council's Plan 2023-26:

- Clean and green places
- Strong, healthy, and safe communities
- Thriving children and young people
- More and better homes
- An economy that works for everyone

119. As part of this, one of the principles of the Council Plan 2023-26 is financial resilience.

120. The Plan emphasises the need for financial resilience and moving to a position where we are less reliant on central government funding and instead resourced more by funding generated in-borough (e.g., our Council Tax base and National Non-Domestic Rates), and through inward investment using levers such as our Local Plan.

Financial Implications

121. The Local Government Act 2003 places a duty on the Chief Finance Officer to report to Council as part of the budget process on the robustness of the estimates and the adequacy of the proposed financial reserves. Statutory guidance in this area is provided by Local Authority Accounting Panel (LAAP) Bulletin 77 (Nov 2008) and is the basis on which the Chief Finance Officer's annual financial risk assessment has been updated in the Council Budget report. A full statement of robustness is provided at Appendix 2.

122. The 2026/27 budget has been prepared considering the following:

    (i) Specific cost pressures set out in paragraphs 44 to 49.

    (ii) The final local government finance settlement.

    (iii) Provision for legislative change and changes to the Council's statutory responsibilities; and

    (iv) The estimated impact of underlying cost pressures, as evidenced by financial monitoring reports in the current year.

Legal Implications

123. Under section 31A of the Local Government Finance Act 1992, budget calculations must be made before 11th March, although they are not invalid if made after that date. Any delay in setting the Council Tax could have serious financial consequences for the Council and tax payers, although no sum is payable for Council tax until 14 days after the posting of bills.

124. The setting of the budget is a matter for the Council, having considered recommendations by the Cabinet. The Council's budget-setting process is set out in the Constitution. Before the final recommendations are made to the Council, an Overview and Scrutiny Committee must have been given an opportunity to scrutinise the proposals and the Cabinet must have taken any comments of the OSC into account when making these proposals.

125. The amount of Council Tax must be sufficient to meet the Council's legal and financial commitments, ensure the proper discharge of its statutory duties and lead to a balanced budget. Members should be mindful of their fiduciary duty to ratepayers when adopting a budget and setting a Council Tax.

126. The Council is required by section 33 of the Local Government Finance Act 1992 (the Act) to calculate for each financial year the basic amount of its Council Tax. The basic amount of Council Tax must be calculated from the Council Tax base. This base is created by applying a prescribed formula under the Local Authorities (Calculation of Council Tax Base) Regulations 2012.

127. The Council is required to submit its Council Tax base to the GLA between 1 December and 31 January in the financial year preceding the financial year for which the calculation of Council Tax base is made. If the Council does not submit its Council Tax base to the Greater Local Authority (GLA), then the GLA is required to determine the calculation for itself, in the manner prescribed in the above Regulations.

128. Members are obliged to consider all relevant considerations and disregard all irrelevant considerations in seeking to ensure that the Council acts lawfully in adopting a budget and setting Council Tax. Members should note that where a service is provided pursuant to a statutory duty, the Council cannot fail to discharge it properly. Where there is discretion as to how to discharge duties, that discretion should be exercised reasonably.

129. The Council is obliged by section 151 of the Local Government Act 1972 to make proper arrangements for the management of its financial affairs. It is consistent with sound financial management and the Council's obligation under section 151 for the Council to adopt and monitor a Medium-Term Financial Strategy as this informs the budget process and is viewed as a related function.

130. Under section 25 of the Local Government Act 2003 the Chief Finance Officer is required to report to the authority on the robustness of the estimates made for the purposes of the calculations required to be made by the Council and the adequacy of the proposed financial reserves.

131. The Council is required to carry out appropriate budget consultation. In particular there is a duty to consult with representatives of Non-Domestic Ratepayers about the proposed revenue and capital expenditure before the council tax requirement is calculated. Feedback from the consultation has been taken into account in the preparation of the proposed budget and is reflected in this report. Further consultation and assessment of any equality impacts will be undertaken where necessary and further formal decision making will then follow. In the event that any savings or income proposals indicated in this report are not pursued further then alternative proposals will need to be developed, consulted and approved in order to remain with the agreed budget framework.

132. In considering the budget for 2026/27, the Council must have due regard to its ongoing duties under the Equality Act 2010. The Equality Act 2010 requires the council in the exercise of its functions to have due regard to the need to avoid discrimination and other unlawful conduct under the Act, the need to promote equality of opportunity and the need to foster good relations between people who share a protected characteristic and those who do not (the public sector equality duty). The Council should consider how its decisions will contribute towards meeting these duties, against other relevant circumstances such as economic and practical considerations. The relevant departments should undertake detailed impact assessments of major proposals to ensure that any proposals for savings are reasonable and meet Equality Act duties.

133. Notice of the amount set for Council tax must be published in at least one newspaper within 21 days of the Council's decision.

134. Members' attention is also be drawn to the effect of the Local Authorities (Standing Orders) (England)(Amendment) Regulations 2014. Where any

vote is taken at a budget decision meeting of the authority, the minutes of the meeting must record the names of all Councillors present at the vote and how each Councillor voted (for or against) or the fact that they abstained from voting).

135. Finally, Members should have regard to s106 of the Local Government Finance Act 1992 which provides that members who are in arrears on their Council Tax for two or more months must disclose the fact of their arrears (though they are not required to declare the amount) and may not vote on matters concerning the level of Council Tax or the administration of it. Members should also consider whether they have any pecuniary or non-pecuniary interests in the report and should seek advice from the Monitoring Officer if necessary. Advice will be provided to all members prior to the Council tax meeting.

Equalities Impact Implications

136. Local authorities have a responsibility to meet the Public Sector Duty of the Equality Act 2010. The Act gives people the right not to be treated less favourably because of any of the protected characteristics. It is important to consider the needs of the diverse groups with protected characteristics and other specialist characteristics already agreed by the Council to be considered alongside the protected characteristics when designing and delivering services or budgets so people can get fairer opportunities and equal access to services.

137. The Council aims to serve the whole borough fairly, tackle inequality and protect vulnerable people. The Council will promote equality of access and opportunity for those in our communities from the protected characteristic groups or those disadvantaged through socio-economic conditions.

138. The Council undertakes Equality Impact Assessment (EqIAs) to help make sure we do not discriminate against service users, residents and staff, and that we promote equality where possible.

139. An Equality Impact Assessment will be completed for individual budget/ savings proposals and any policy changes relevant thereto. These assessments will evaluate how proposals will impact on people of all protected characteristics and will identify alternative action or mitigating action where any adverse impact is identified. There will also be appropriate consultation and engagement with affected people and organisations as appropriate prior to any changes to policy or services or facilities.

140. The 2026/27 Budget consultation identified the potential impacts on the wider community of the Council's proposals to address the budget shortfall. To ensure communities from across the borough were able to participate, the Council produced an easy read version of a questionnaire for those with learning difficulties, details of the consultation activities were hosted online enabling the text to be translated, listened to and enlarged, and assistance was offered to those who felt they may otherwise have had issues participating.

141. Participants were able to submit their views on the overall approach taken by the Council. Equalities monitoring questions were asked to enable the data to be cross-referenced with the opinions expressed by participants.

Workforce Implications

142. Any proposal that is likely to impact on posts, structure changes and potential closure of services, will require the Council to conduct a meaningful and timely consultation with staff and the recognised trade unions. This will include consideration of alternative proposals put forward as part of the consultation process. The Council's HR policies and procedures for restructures should be followed. Any consideration for staff structural changes should ensure there is a resilient workforce to deliver on-going service requirements. Therefore, consideration of workforce planning should be included in the process.

143. Where redundancies are necessary, the appropriate HR policies and procedures will be followed. Redeployment options must be considered.

144. It is important that services engage with HR at the earliest opportunity.

Environmental and Climate Change Considerations

145. There are no specific environment or climate change implications arising from this report at this time, these will be considered alongside savings and income proposals in future.

Public Health Implications

146. The Council's core business is to maintain and enhance the wellbeing of the community. The financial climate has severely challenged its ability to do this. The MTFP outlines how the Council aims to meet its financial demands whilst minimising the effect of these pressures on the community.

Property Implications

147. There are no new specific property implications that arise from the proposals in this report. As savings and income proposals are considered, property implications will be considered as appropriate.

Safeguarding Implications

148. None arising from this report. Where there are service reductions across all services including Adult Social Care and Children's Social Care, officers are working through these to ensure there is no impact on the Council's safeguarding duties for vulnerable adults and children in the Borough.

Appendix 1

STATUTORY CALCULATIONS AND RESOLUTIONS

The calculation of the Council's Council Tax Requirement is governed by the Local Government Finance Act 1992 (the Act) as amended by the Localism Act 2011.

Subject to Members agreeing the budget in this report, the following formal resolutions will need to be considered by Council:

1) It be noted that at its meeting on 21st January 2026, Council agreed the number of 105,212 as its Council Tax base for 2026/27, in accordance with the Local Authorities (Calculation of Tax base) Regulations.

2) The following amounts be now calculated by the Council for the year 2026/27 in accordance with Section 31 to 36 of the Act as amended:

(a) **£1,279,795,000** being the aggregate of the amounts which the Council estimates for the items set out in Section 31A(2) of the Act (**gross revenue expenditure).**

(b) **£1,094,921,000** being the aggregate of the amounts, which the Council estimates for items set out in section 31A(3) of the Act **(revenue income including government grants).**

(c) **£184,874,000** being the amount by which the aggregate at (a) above exceeds the aggregate at (b) above **(net revenue expenditure)**, calculated by the Council, in accordance with Section 31A(4) of the Act, as its Council Tax requirement for the year.

(d) **£1,757.16** being the amount at (c) above, all divided by the Council Tax base of **105,212** (1 above) calculated by the Council, in accordance with Section 31B(1) of the Act, as the basic amount of Council Tax for the year 2026/27.

(e) Column 3 in the following table, being the amounts given by multiplying the amount at (d) above by the number which, in proportion set out in Section 5(1) of the Act, is applicable to dwellings listed in a particular valuation band divided by the number which in that proportion is applicable to dwellings listed in valuation Band D, calculated by the Council in accordance with Section 36(1) of the Act, as the amounts to be taken into account for the year in respect of categories of dwellings listed in different valuation bands.

f) It will be noted that, for the year 2026/27, the Greater London Authority (GLA) has stated the following amounts in precepts issued to the Council, in

STATUTORY CALCULATIONS AND RESOLUTIONS

accordance with Section 40 of the Local Government Finance Act 1992, for each of the categories of the dwellings, as shown in column 4 of the table below.

g) Having calculated the aggregate amount in each case of the amounts at 2(e) and 2(f) above, the Council, in accordance with Section 30(2) of the Local Government Finance Act 1992, sets the following amounts shown in column 5 of the table below, as the amounts of Council Tax for the year 2026/27 for each of the categories of dwellings shown below:

1	2	3	4	5
Valuation Band	**Proportion in relation to Band D**	**Enfield** **£**	**GLA** **£**	**Total** **£**
A	6/9	£1,171.44	£340.34	£1,511.78
B	7/9	£1,366.68	£397.06	£1,763.74
C	8/9	£1,561.92	£453.79	£2,015.71
D	9/9	£1,757.16	£510.51	£2,267.67
E	11/9	£2,147.64	£623.96	£2,771.60
F	13/9	£2,538.12	£737.40	£3,275.52
G	15/9	£2,928.60	£850.85	£3,779.45
H	18/9	£3,514.32	£1,021.02	£4,535.34

3) The Referendums Relating to Council Tax Increases (Principles) (England) Report 2026/27 sets out the principles which the Secretary of State has determined will apply to local authorities in England in 2026/27.

The Council hereby determines that its relevant basic amount of council tax for the financial year 2026/27 for the London Borough of Enfield element of the Council Tax is not excessive.

Section 25 Statement **Appendix 2**

Olga Bennet, Chief Finance Officer

1 Purpose

1.1 The Chief Finance Officer is required to make a statement on the adequacy of reserves and the robustness of the estimates made for the purposes of the calculations. This is a statutory duty under Section 25 of the 2003 Local Government Act.

1.2 This statement must be considered and approved by Full Council as part of the budget approval and Council Tax setting process. It covers all areas of the budget including the General Fund, Dedicated Schools Grant and Housing Revenue Account.

2 Conclusion

2.1 My view is that the proposals to strengthen reserves are adequate and that the estimates used in the budget are reasonable. Significant risks remain and will continue to be actively managed.

3 Adequacy of Reserves

3.1 The Council's reserves have progressed from a critically low position to a low but improved position. This budget allocates a proportion of the annual growth specifically to strengthen risk reserves, aiming to reach adequate levels within the next three years, after which time the ongoing budgets will be released to fund services in-year. Safeguarding and prioritising these reserves is essential to maintain the stability of statutory services and those relied upon by the community, especially in the face of future financial uncertainties and inevitable pressures.

3.2 The positive outcome for Enfield in the Provisional Local Government Settlement is an opportunity, in parallel with reinvesting in services that local people rely on, to move the organisation from a 'vulnerable' to a 'stable' financial position over the next year, and to 'resilient' over the next few years, and to take a longer term view. It will take ongoing financial discipline to ensure that this opportunity is grasped.

3.3 Cabinet has previously agreed a high-level risk reserves strategy and defined the Council's Minimum Threshold and Target risk reserves, which had been substantially eroded over the last five years. External auditors also underlined the importance of rebuilding reserves in their report to Full Council in November 2025.

3.4 As the Council's Core Spending Power increases over the next three years, the reserves scaled for the size of the local authority will reduce. Without action, Usable Reserves would fall into the bottom quartile of local authorities. This adds to the importance of fully implementing and enhancing the Reserves Strategy.

3.5 Risk Reserves are forecast to hit minimum threshold balances by 31 March 2026, and this budget prioritises proportionate action to replenish Risk Reserves over the medium term. I am satisfied that the proposals put forward at this time to strengthen the reserves position are adequate.

4 Robustness of Estimates

4.1 The 2026/27 budget has been developed through a comprehensive and multi-stage process, including the presentation of a draft budget in December. This has formed a sound basis for the estimates in this budget.

4.2 The assumptions detailed in the main budget paper (e.g. pay award 3.2% and inflation) are consistent with sector norms and current intelligence but remain subject to volatility, particularly around social care and temporary accommodation markets.

4.3 Key assumptions from prior years have been reviewed and, where appropriate, revised.

4.4 The annual corporate contingency has been increased to £8m (1.7% of net revenue budget), closer to other boroughs corporate contingency levels. This is to recognise the risk that demand services cost pressures could be higher than current forecasts and that it is likely that some additional risk will materialise in-year and it will not necessarily be possible to offset with in-year actions. This could be the result of the remaining risks detailed in the table below.

4.5 My judgement in reviewing assumptions material to the council's budget as a whole are listed below:

Key budget assumptions	Actions taken to improve robustness of estimates	Remaining risk to robustness of estimates remaining and next steps
Forecast Meridian Water capital receipts	Assumptions have been amended to significantly reduce the reliance on Meridian Water capital receipts over the next ten years.	There is significant risk with all complex long-term infrastructure and regeneration projects. External advisors are assisting with developing new, detailed forecasts, but ultimately the value of each piece of developable land will not be known absolutely until it is market tested.
Capital financing costs	A new treasury system (CIPFALive) has been implemented with CIPFA's support to ensure the robustness of capital financing forecasts. The system has been parallel-run with previous spreadsheet models to test the robustness of both.	The capital financing costs and debt level includes an assumption of £50m General Fund Capital receipts being achieved in 2026/27 to finance the in-year capital programme and transformation costs. There is a forecast residual balance of £12m of general fund capital receipts as at 31 March (if none are used to finance the in-year capital programme or repay additional debt) which could mitigate any slippage in the capital receipts programme.
Demand pressures	All budgets, the most sizeable of which is Adult Social Care, have been right-sized, building in significant growth.	The Council continues to experience significant demand and market pressures, especially in relation to adult social care and temporary accommodation. The forecasts included in this budget are the council's best estimates at a point in time.
Savings deliverability	A 'deliverability adjustment' has been built into savings, recognising that despite plans and commitment to deliver them, it's likely that a proportion of the savings are likely to achieve a part-year effect in 2026/27.	Some of the savings remain relatively high-level at this point with operating plans at varying stages of development, especially on departmental efficiencies. I am satisfied that the savings built into the budget are reasonable targets and their delivery will be monitored through quarterly financial monitoring.

Key budget assumptions	Actions taken to improve robustness of estimates	Remaining risk to robustness of estimates remaining and next steps
Dedicated Schools Grant	The capital financing impact of the existing DSG deficit (circa £0.9m) is implicitly taken into account by reducing internal borrowing balances.	The Dedicated Schools Grant remains under significant pressure, with the High Needs block forecasting an in-year overspend in 2025/26 of £5.6m, contributing to a projected cumulative deficit of £23m by 31 March 2026. Given the cash-flat DSG High Needs funding, and nation-wide SEND pressures, it is highly likely that an overspend will continue into 2026/27. The council's current estimate is that this pressure is £12.6m in 2026/27. This has not been budgeted for as the DSG is a ringfenced fund. It is not known at this point how much of the 2026/27 overspend is likely to be funded.
Energetik	Auditors have highlighted the risk of Energetik loan payments to the Council. The Energetik Shareholder Reserve is forecast to increase from £2.6m to £3.4m in 2026/27 which could help mitigate loan repayment risks if they materialise in-year.	The Council has on-lent £55.7m to Energetik to build heat network infrastructure in Enfield. The project is interconnected with the North London Waste Authority's £1.5bn Energy Recovery Facility construction (for the heat source) and Meridian Water (reliance on connection fees). Delays in these projects would have cash flow impacts on Energetik, and in turn on their ability to make loan repayments. Energetik are developing the next annual operating plan to be presented to Cabinet to detail the next phase of delivering the Business Plan.
Audit adjustments	I have considered the 2024/25 audit observations and recommendations from both the Value for Money and main audit report and am content that the council's approach to 2026/27 budgets in light of these comments remains appropriate.	The council is recovering from a period of very little external audit oversight. The 2024/25 accounts audit provides some assurance of in-year transactions, but the accounts remain 'disclaimed'. It therefore remains a risk that significant accounting adjustments may be required as part of the 2025/26 or future year audit which could impact the revenue and reserves position in 2026/27. Because of the year-on-year impact (if they go back over a number of years), these adjustments could be very significant.

Appendix 3: Enfield Council Financial Resilience Framework - February 2026

Following the Provisional Local Government Settlement, getting to 'resilient' is within reach—but only if the Council continues with the current financial discipline.

	Description		Indicators
🔵 1. Strong	Financially thriving with surplus capacity and strategic flexibility	☐ ☐ ☐ ☐	Target risk reserves maintained or exceeded; Clean external audit opinion with no material weaknesses; No net overspend – any overspends offset by underspends elsewhere; Capital receipts are used to pay off debt – no flexible use of capital receipts as transformation is funded by revenue budgets.
🟢 2. Resilient Aim: 2029/30	Well-positioned to absorb shocks and maintain service levels, invest in further early intervention and capital projects with prudent financial management.	☐ ☐ ☐ ☐ ✓ ☐ ☐	Target risk reserves reached; Minimal net overspend (<1% of net revenue budget); All Meridian Water interest funded in-year by revenue; Robust Meridian Water plan with capital receipts being realised; Sustainable Medium-Term Financial Strategy in place; Early warning systems for financial risks are active and effective; No reliance on one-off funding sources (including flexible use of capital receipts for annual spend eg redundancy payments)
🟡 3. Stable Aim: 2026/27	Operating within means, but with limited flexibility; requires ongoing vigilance.	✓ ✓ ☐ ☐ ✓ ☐ ☐	Balanced budget with no use of reserves or Exceptional Financial Support; Minimum Threshold risk reserves maintained; Good progress on savings delivery (>90% of planned savings achieved in-year); Service demand pressures are able to be contained within budgets or offset corporately to deliver balanced in-year position Robust savings identified for the next financial year Collection Fund on-track with collection targets System solution for robust management information and financial monitoring for budget holders
🟠 4. Vulnerable	Facing financial pressures that could impact sustainability without corrective action.	✓ ✓ ✓	General Fund Balance is secure and maintained at 5% of Net Revenue Expenditure; Balanced budget with use of reserves and/or EFS; Some reliance on short-term fixes (eg deferral of capital expenditure and spend that is essential in the medium term)
🔴 5. Critical	Immediate and significant financial risk; urgent intervention required to avoid service or solvency issues.		General Fund Balance (most restricted risk reserve) forecast to be used; Substantial recurrent service overspends (>10% Net Revenue Budget)

Medium Term Financial Plan Summary 2025/26 - 2028/29 **Appendix 4**

	2025-26 £'000	2026-27 £'000	2027-28 £'000	2028-29 £'000

Appendix 7 – Funding 2026/27 to 2030/31

Funding Assumptions

1. The outcome of the Government's Fair Funding Review 2.0 has seen a fundamental shift is resources to where it is most needed. Enfield has seen the second highest increase in the government's assessment of core spending power in the country (highest in London), with further significant increases in funding for the following 2 years also announced. Please note the government will be confirming following years' allocations on an annual basis.
2. In addition, the government continues to simplify the local government funding regime through the consolidation of several individual grants into the Revenue Support Grant (RSG) and the creation of four other consolidated grants. Further details on these grant blocks is provided from paragraph 21 onwards.
3. The changes to funding assumptions in the MTFP are summarised in the table below with some further detail provided in the following paragraphs.

Collection Fund

4. The Business Rates and Council Tax assumptions in 2025/26 were prudent, given the uncertainty around Council Tax collection rates with the changes made to the Council Tax Support scheme, the cost-of-living crisis and high levels of inflation that were being experienced.
5. Performance of the Collection Fund is routinely monitored throughout the year and latest forecasts as of December 2025 indicate an overall surplus position of around £3.8m, Enfield's share of which is forecast to be £1.1m. This surplus will be a revenue benefit in 2026/27 and will be put into the Collection Fund equalisation reserve to mitigate against future fluctuations in collection fund performance and reductions in the government safety net for business rates funding.
6. The Council Tax Base report approved by Council on 21 January 2026 provides full details on how the tax base has been estimated and set for 2026/27. The following are key points from the tax base report.

Council Tax including ASC Precept

7. The provisional local government finance settlement confirmed that the core council tax referendum principles will continue the same as in 2025/26. The Core Band D threshold will be 2.99%, and the Adult Social Care Precept a further 2.00%. It is proposed to increase the council tax by the threshold level without requiring a referendum which is estimated to generate

£8.7m. The balance of the increase in Council Tax in the table below relates to tax base and collection rate changes, bringing the total additional Council Tax income to £10.3m.

8. The statutory calculations of the proposed Council Tax level for each property band and the formal Council resolutions required under the 1992 Local Government Finance Act are set out in Appendix 1.

9. On 21 January 2026, the Council agreed a Council Tax Base of 105,212 Band D Equivalent properties for 2026/27 (104,291 in 2025/26) based on a collection rate of 95.0%. Total estimated income from council tax in 2025/26 is £184.9m.

10. The government assessment within Core spending power also assumes a 4.99% increase, in addition to its own assumptions on taxbase growth. The government assessment of taxbase growth is based on a 5-year rolling average of the council taxbase growth. The changes to the council tax support scheme made in 2024/25 skew this rolling average, hence the Government's assumptions are overstated and therefore the Council applies its own judgement on the taxbase.

11. The Adult Social Care (ASC) Precept is designed to help local authorities with responsibility for Adult Social Care to meet the increasing care needs of their population. The additional council tax raised from this precept must be used for Adult Social Care. Enfield has made use of this facility since 2016/17. Enfield are applying the 2.00% ASC Precept permitted for 2026/27 which equates to £4.1m of the £10.3m additional Council Tax funding.

Council Tax Charge for Second Homes

12. The Government has provided councils with the power to charge a premium of up to 100% on second homes where the property has no resident and is substantially furnished with effect from 1 April 2025 and an estimate for these has been included in the taxbase.

Local Referendums on Council Tax Increases

13. The Localism Act requires councils to hold a referendum for proposed Council Tax increases more than the threshold set annually by the Secretary of State for Communities and Local Government. The thresholds for 2026/27 should not exceed an increase of greater or equal to 3.00% for basic amount of Council Tax and 2.00% for the Adult Social Care Precept.

14. For 2026/27 Enfield Council has chosen to increase the general Council Tax by 2.99% and raise a 2.00% ASC Precept to support the costs of ASC demand pressures. This increase is not excessive as it is within the thresholds set by the Secretary of State.

Greater London Authority (GLA) Precept

15. The GLA Assembly reviewed the mayor's draft consolidated GLA budget on 29 January 2026 with the final draft budget due to be agreed by the London Assembly on 26 February 2026. This will be after the publication of the budget report to Council and so any changes to the GLA precept will be reported as revised statutory calculations and resolutions for approval by Council. The GLA budget was recommended with an increase in the Band D precept from £490.38 to £510.51.

Band D proposed charge

16. The Band D Council Tax payable by Enfield residents for 2026/27 based on the budget proposals (including GLA precept) is £2,267.67 as set out in Table 1 below:

Table 1: Council Tax Band D Charge 2026/27

	2025/26	2026/27	Change	Change[1]
	£	£	£	%
Core Council Tax	1,408.05	1,458.10	50.05	2.99%
Adult Social Care Precept	265.59	299.06	33.47	2.00%
London Borough of Enfield Total	**1,673.64**	**1,757.16**	**83.52**	**4.99%**
Greater London Authority	490.38	510.51	20.13	4.10%
Total	**2,164.02**	**2,267.67**	**103.65**	**4.79%**

Baseline Funding Level: Business Rates

17. The Baseline Funding Level (BFL) is the *minimum amount of funding* a local authority is guaranteed to receive from the national business rates system, before considering how much business rates income it collects locally. This will be made up of the Council's business rates baseline, top up grant, and safety net payment. The government's assumptions for BFL are £50m for Business Rates and £91m top up for a total BFL of £141m.

18. The Government have made some significant changes to Business Rates, and Business Rates Retention in 2026/27:

- Revaluation 2026
- New and revised relief schemes

[1] The percentage change shown is calculated in reference to the 2025/26 LBE Total Band D charge of £1,673.64 not the individual elements shown.

- New business rates multipliers
- Move to a gross rates system
- Revised s31 grant accounting for the collection fund
- Business Rates Reset meaning that there are new targets within the system for each authority
- Revisions to levy and safety net

19. The Council's forecast for business rates has been reviewed alongside advice from our collection fund advisors. The latest forecast as reported in the Council's NNDR 1 return for 2026/27 is a total of £141.3m, made up of the retained element £49.2m, top up £91.1m and 100% safety net payments £1m ensuring the Council's resources align with the overall government assumptions for BFL.

Eight Authority Business Rates Pool

20. The Council has benefited from membership of the 8 Authority London Business Rates pool for the last three financial years. However, it is not proposed to continue the pooling arrangements for 2026/27, since the business rates reforms and the upcoming 2026 revaluation mean there is no financial advantage in doing so.

Government Grants

21. From 2026/27, the Government is simplifying over 36 separate funding streams into a smaller number of larger, multi-year grants. The aim is to give councils more certainty, reduce administrative burdens, and allow more strategic long-term planning.

Table 2: Key Grants over the MTFP Period

Grant allocations per year	2026/27	2027/28	2028/29	2029/30	2030/31
	£m	£m	£m	£m	£m
Homelessness, Rough Sleeping and Domestic Abuse Grant	9.838	9.150	8.016	8.016	8.016
Children, Families and Youth Grant: Supporting Families	8.979	8.979	7.669	7.669	7.669
Revenue Support Grant (RSG)	75.254	126.715	164.477	166.002	167.557
Recovery Grant	4.293	4.293	4.293	0.000	0.000

Local Authority Better Care Fund (transfers to RSG in 2027/28)	14.466	0.000	0.000	0.000	0.000
Core Spending Power Grants	**112.830**	**149.137**	**184.455**	**181.687**	**183.242**
Public Health Grant	23.026	23.439	23.868	23.868	23.868
Children, Families and Youth Grant: Holiday Activity Fund + Post-16 Pupil Premium Plus Programme	1.801	1.737	1.737	1.737	1.737
Crisis Resilience Fund	7.384	7.381	7.364	7.364	7.364
Housing Benefit Admin Support Grant	0.965	0.865	0.765	0.665	0.565
Extended Producer Responsibilities	4.715	4.715	4.715	4.715	4.715
Service Grants	**37.891**	**38.137**	**38.449**	**38.349**	**38.249**
Total	**150.721**	**187.274**	**222.904**	**220.036**	**221.491**

Revenue Support Grant

22. Alongside the four consolidated grants, 18 additional funding streams are being absorbed into the Revenue Support Grant, totalling £75.3m. The increase in 2026/27 is predominantly due to the rolling in of existing funding totalling circa £52m. This includes areas like:

- Social care support
- Temporary accommodation funding
- Housing and planning new burdens funding
- Business rates compensation
- Market sustainability funding
- Share of Business Rates pooling gains (phased out over 2026/27 and 2027/28).

23. This streamlining aims to simplify council finances and reduce the number of separate grants. The Revenue Support Grant forms a core part of the Fair Funding Allocation (FFA) alongside the Baseline Funding Level.

Homelessness, Rough Sleeping and Domestic Abuse Grant

24. This £9.8m grant supports the Council to prevent homelessness, reduce rough sleeping, and meet statutory duties to support victims of domestic abuse in safe accommodation. This was previously treated as a service specific grant but has now been brought into core grants because this forms part of the Government's assessment of core spending power. It brings together funding for:

    - Homelessness prevention (including staffing and prevention/relief work)
    - Rough sleeping services and accommodation programmes
    - Support for victims of domestic abuse and their children in safe accommodation

Children, Families and Youth Grant

25. This £10.8m grant strengthens support for children, young people, and families, with a strong focus on prevention, reducing inequalities, and improving life chances. It brings together funding for:

    - The Families First Partnership (previously Supporting Families)
    - Early support to prevent children entering care
    - Holiday Activities and Food (HAF) programmes supporting children during school holidays
    - Support for post-16 looked-after children through Pupil Premium Plus

26. £9.0m of the grant relating to the Families First Partnership is now fully brought into core funding because this forms part of the Government's assessment of core spending power and represents a £4m increase in grant funding compared to 2025/26 funding allocations. A further £0.1m increase has been announced for the Holiday Activities and Food (HAF) programmes.

Public Health Grant

27. This £23m grant funds local public health services that improve and protect residents' health and is a £0.4m increase on 2025/26 allocations. The grant now includes:

    - Drug and alcohol treatment and recovery funding
    - Stop smoking services and vaping-swap schemes
    - Employment support for people with health-related barriers

- Existing public health responsibilities (e.g. health visiting, sexual health services, health improvement programmes)

Crisis Resilience Fund

28. This £7.4m grant helps people facing financial crisis and supports longer term community resilience. This is a £5.5m increase on the funding allocation for 2025/26 and is ringfenced to provide targeted support to residents and communities in Enfield who are experiencing acute hardship or are at risk of crisis. It brings together:

    - Household Support Fund
    - Discretionary Housing Payments

Recovery Grant

29. The Local Government Finance Settlement announced the continuation of the Recovery Grant for the 3-year settlement period 2026/27 to 20028/29. This £4.3m grant was introduced in 2025/26 and had previously been assumed one off but will now continue at the same level as in 2025/26. This grant is distributed to places with greater need and demand for services.

Local Authority Better Care Fund

30. This £14.5m grant is to support the integration of health and social care services, ensuring that people receive coordinated, person-centred care that helps them live independently and reduces unnecessary hospital admissions. This is listed as a separate grant for 2026/27 but from 2027/28 onwards will be consolidated into the Revenue Support Grant.

Extended Producer Responsibilities

31. New funding first announced in 2025/26 to assist the achievement of Net Zero targets through the implementation of the Extended Producer Responsibility scheme as part of the Collection and Packaging Reform Programme. Enfield's allocation for 2026/27 is £4.7m, an increase of £1.5m on the budgeted funding for 2025/26. This grant will be classified as a service specific grant for 2026/27 because it does not form part of the Government's assessment of core spending power.

Housing Benefit Administration Grant

32. The grant for 2026/27 will be £0.965m, a reduction of £0.437m which is reflected in the MTFP funding assumptions. Future years are estimated to reduce by £0.100m per year from 2027/28. This grant will be classified as a service specific grant for 2026/27 because it does not form part of the Government's assessment of core spending power.

33. The Local Government Finance Settlement has confirmed that the Council will receive additional grant funding of circa £52m when compared to year-on-year allocations. However, given that the MTFP had assumed that Children's Social Care, Extended Producer Responsibility, and the Recovery Grant were one offs for 2025/26 only, the impact on the budget and closing the gap is an increase of £62m. The changes are summarised in the table below:

High Needs Stability Grant

34. This new funding was announced in the final settlement, where the grant will cover 90% of eligible high needs deficit at the end of 2025/26. The eligible deficit is yet to be determined and will only cover the high needs (not all blocks) based on an assessment of statutory returns i.e. S251 and Revenue Outturn and dependent on the submission of a Local SEND reform plan.

35. Funding will be received in the autumn of 2026 and will need to be put in reserve until the DSG deficit statutory override ceases to have effect in March 2028. The government recognises SEND reform will take time to fully embed and that local authorities will need further support. For deficits that arise in 2026/27 and 2027/28, local authorities can expect that Government will continue to take an appropriate and proportionate approach, though it will not be unlimited.

Table 3: Funding Changes 2026/27 – 2030/31 (incremental figures)

Appendix 8 – Growth, Investment and Pressures in the MTFP 2026/27 to 2030/31

Inflation

Inflation has continued to vary over the last 12 months but is fluctuating above the government's target of 2% (December 2025 CPI being 3.4%). This remains an area of risk for 2026/27, and the additional budget built into the MTFP for inflation for 2026/27 is £10.4m, of which £2.2m is contract inflation. A further £0.6m has been included for energy cost inflation. Social Care inflation accounts for a further £7.5m (Adults £7.0m and Children's £0.5m) and reflects specific factors such as both national and market developments and predicted wage inflation including National Living Wage.

Pay Awards

The Council has allowed for a 3.2% pay award increase in 2026/27 within the budget. If the actual pay award is more than this budget provision, then in-year savings will be required to manage the pressure from within existing resources. This is an area of risk for the Council's budget and dependent on the final resolution of the pay award negotiations. The 2025/26 pay award has been agreed and implemented for most staff (NJC & JNC grades).

Investment

The new investment of £1.0m included in the draft budget remains as was and this covers initiatives such as the Summer University, investment in Waste Services and Trading Standards, as well as improvements to cyber security and various IT systems for costs relating to the Council's ERP system upgrade. Since the publication of the local government finance settlement a further £24m has been added to the plan for investment. This includes £16m relating to new expenditure related to ringfenced grant conditions for the First Families First Partnership grant, Homelessness, Rough Sleeping & Domestic Abuse grant, Public Health grant, Extended Producer Responsibilities and the Crisis Resilience Fund.

In addition, to increase the amount of capital receipts available to reduce the Council's level of debt, expenditure previously planned to be financed through the flexible use of capital receipts is being replaced with permanent base budget funding. This includes £2m for the Digital Portfolio and £1m for transformation (which includes existing invest to save schemes).

And finally, £4.4m is being set aside for early intervention and prevention of deprivation with more detailed plans to be developed over the coming months. This investment is intended to transform the way the Council provides services and to reduce future demand pressures.

Demography

The demographic growth of £15.3m covers provision for ongoing demand in 2026/27 for Adults and Children's Social Care and Special Education Needs Transport. This is a £1.8m increase since the draft budget presented to Cabinet in December 2025, reflecting the ongoing and increasing demand pressure being forecast in 2025/26.

The most significant demographic pressure in Children's Social Care is £5.5m required for external care purchasing due to both an increase in demand and the level of support required. This area has been a significant pressure since the end of 2023/24.

£9.2m is required in Adult Social Care to reflect the increasing demand for services (in addition to the inflationary impacts described above). This reflects the need to support more people, which in turn means that a greater number of financial assessments will be undertaken. Part of the financial assessment includes working with people to maximise the benefits to which they are entitled. Therefore, with increased cost pressures comes increased income expectations and these are reflected in the new savings and income proposals put forward.

The estimated growth for SEN Transport has been calculated at £0.6m in 2026/27 and approximately £0.4m per annum for the following years of the MTFP rising with inflation over the period.

Homelessness

Through the Homelessness actions and mitigations put in place, the forecast overspend is £2.7m for 2025/26, reflecting a worsening position. This has had an impact on the pressure for 2026/27 resulting in a total of £5.4m being added to the budget for next year. The settlement has now provisionally confirmed the allocations for 2026/27 with the existing funding of £19.1m now being split. The Temporary accommodation element of existing funding has been rolled into the Revenue

Support Grant, whilst the prevention funding remains in the new consolidated Homelessness, Rough Sleeping and Dometic Abuse grant.

NLWA

The estimated 2026/27 levy for the North London Waste Authority is estimated to be £14.1m. This reflects an increase of £1.3m on the 2025/26 levy. However, a £1.6m increase had been forecast for 2026/27 when the 2025/26 budget was set in February 2025, so there has been an improvement of £0.3m. Forecasts over the medium term have been updated since the December 2025 draft budget report, reflecting the revised timescales for the North London Heat and Power project to be completed. These types of situations were envisaged in the December draft budget where provision had been allowed for unknown and emerging pressures. A corresponding reduction in the unknown pressures provision has been made resulting in a neutral budget gap impact over the five years.

Concessionary Fares

Forecasts for Concessionary Fares over the medium term are based on estimates received from London Councils. Next year's estimate is currently £12.8m, which means an additional £1.2m being required to add to the current cost of £11.6m. This is the status at the time of writing this report, but London Councils have stated that this figure is the maximum settlement and is thus likely to reduce once finalised.

Capital Financing

Budget growth proposed in the MTFP in financial years 2026/27 and 2027/28 was circa £4m in each year, driven by the costs of debt replacement and supporting capital expenditure for which borrowing is required and included an element for contingency. A review of the Council's borrowing requirement, replacing the use of flexible use of capital receipts, plus the removal of any exceptional financial support application has resulted in further reductions in the revenue capital financing costs. The result being that £2.4m of this growth can be removed from the base budget for 2026/27.

In addition, the savings put forward include targets for disposals of assets which reduce the capital financing budget by a further £0.6m in 2026/27.

Central Contingency

A review of the central contingency has been undertaken, benchmarking the Council against other local authorities. An increase of £5m to the central contingency to increase it to circa 2% of the net revenue budget is planned for 2026/27.

Rebuilding Reserves

As stated in the December draft budget report, if the settlement was more favourable than assumed then circa one third of any additional funding would be used to rebuild reserves. The final budget updates the planned reserves and balances increases proposed. These increases will ensure that the General Fund Balance remains at 5% of the net revenue budget and that risk reserves are rebuilt in line with the Council's reserves strategy and target level of risk reserves.

Other pressures

Welfare payments and the welfare team have been funded via a contribution from the Household Support Fund (HSF) and earmarked reserves. The £1.5m pressure in 2026/27 reflects the strategy of phasing out the use of reserves and grant funding and establishing a permanent base budget.

Increases totalling £1.2m have been made to the Council's Bad Debt Provisions (£1m Adult Social Care and £0.2m Sundry) reflecting collection rates of income.

A Council wide increase in both the volume and value of insurance claims is creating a pressure of £1m.

Appendix 11a - Enfield Council General Fund Reserves Policy

Background

1. Sections 32 and 43 of the Local Government Finance Act 1992 require councils to consider the level of reserves when setting a budget requirement. Section 25 of the Local Government Act 2003 requires the Chief Financial Officer (Section 151 Officer) to report formally on the adequacy of proposed reserves when setting a budget requirement. The accounting treatment for reserves is set out in the Code of Practice on Local Authority Accounting.
2. Like all local authorities, Enfield Council continues to face financial challenges because of sustained underfunding from central government over many years, huge increases in demand for many of our services from residents impacted by the cost-of-living crisis, and rising costs.
3. Reserves are one-off money. The Council aims to avoid using reserves to meet ongoing financial commitments other than as part of a sustainable budget plan and one of the Council's financial principles is to stop the use of one-off funding to support the base budget.

What are reserves?

4. CIPFA states in the Financial Management Code that "the aim of the authority's financial reserves are to provide funding for investment in future activities and to act as a safety net in case of short-term financial challenges."
5. Reserves are an important part of the Council's financial strategy and are held to create long term budgetary stability. They enable the Council to manage change without undue impact on the Council Tax and are a key element of ensuring the Council's financial standing and resilience.
6. The risk of unforeseeable events and uncertainties remains high, and as part of a response the Council may need to consider using general reserves as a short term measure while making the necessary sustainable adjustments to spending over the medium term including replenishing the reserves used as short-term expedience.
7. When establishing reserves, there needs to be compliance with the Code of Practice on Local Authority Accounting and in particular, the need to distinguish between reserves and provisions. The split of reserves into different categories is helpful because each category has its own nature, purpose and planned usage that can be used to determine the required level of reserves.

Why do we have reserves?

8. The Council plans its finances over the short, medium and long term so that it has adequate resources to deliver services for the residents of the borough. As a large, complex organisation, there will always be variations between our actual spending/income and our plans due to variations in demand, demographic change, changes in costs and the funding decisions of third parties as well as the need to deliver projects and investments spanning more than one financial year.

To ensure we can manage these financial risks, whilst being able to maintain services, requires that the Council holds funds in reserve to meet these costs as and when they arise and to deal with any emergencies that may occur.

Types of Reserve

9. When reviewing the medium term financial plans and preparing the annual budgets, the establishment and maintenance of reserves should be considered. These can be held for various purposes as set out below:

    - General Fund Balance - the General Fund Balance is essentially a risk reserve to cover unforeseen expenses, which should only be used in exceptional circumstances.
    - Risk Reserves - these are essential for managing financial pressures and uncertainties that may arise during the execution of projects or operations. They provide a contingency sum to cover potential pressures to ensure that the Council can continue to operate sustainably within an uncertain economic environment.
    - Meridian Water reserve - this reserve holds funds received as part of the development agreement for the Meridian One scheme.
    - Companies Reserves – holds resources to offset against possible credit losses associated with loans to Energetik in the future.
    - Insurance Reserve - the internal insurance fund provides cover in full for tree root damage claims, burglary and “all risks” on specified equipment. The fund also meets the cost of all claims within the external policy excesses for general building fire damage (including housing properties), motor, cash, and public and employer liability claims. In addition, there is a potential liability with a former insurer of the council which would be a call on this fund.
    - Service Specific Reserves – these are balances held for specific reasons e.g. the local election reserve accumulates a balance to finance the local elections which take place every 4 years.
    - Grants & Contributions – these will be balances received through external grant funding or other contributions to fund expenditure for specific purposes e.g. the Public Health reserve.
    - Schools’ balances - the balance represents the accumulated revenue balances held by schools.

How are the level of reserves set?

10. The level of the General Fund Balance is a matter for the Council to determine having had regard to the advice of the S151 Officer. The level of the reserve will be a matter of judgement which will take account of the specific risks identified through the budget setting process. It will also take account of the extent to which specific risks are supported through earmarked reserves. The Council aims to hold a general fund balance equating to 5% of the Net Revenue Budget.

11. Enfield's risk reserves are low and have been substantially eroded by overspends over the last four years. The current risk reserves are too low, and this leaves Enfield in a precarious financial position. The Council's strategy is to return the risk reserves to a target level which will provide greater financial resilience.
12. The target risk reserves should allow the authority to manage through realistic financial pressures. Target risk reserves set too high would present a lost opportunity to council taxpayers. Target risk reserves set too low threaten the sustainability of the local authority.
13. The Authority recognises that, given the starting point, it will take time to reach the 'ideal' risk reserves position.
14. In the interim, the Minimum Threshold risk reserves are set by taking into account:
    i. the highest two years of overspends over the last five years.
    ii. the next two years of 'risk assessed reserves' (as detailed in the February budget reports) and the General Fund balance, which is the most protected risk reserve.
15. The Council has a cumulative Dedicated Schools Grant (DSG) deficit. This is considered in the target risk reserve level because it is a negative reserve balance. Current rules have extended the DSG override until March 2028. However, as things stand, at that point the DSG cumulative overspend would have to be covered from revenue reserves.
16. Target risk reserves will be set as Minimum Threshold Risk Reserves plus DSG deficit and school deficit balances and exclude the General Fund Balance. This is because the General Fund Balance being used signals an authority in potential financial distress, with risk reserves becoming critically low.
17. As part of the MTFP for 2026/27, the Council has created an ongoing budget for replenishing risk reserves. This was made possible by the positive outcome for Enfield of the Government's Fair Funding Reforms.
18. If risk reserves were ever to be entirely exhausted and the Council was required to use any of the General Fund balance, it is likely that a S114 notice will be required as the Council's spending is likely to exceed its resources. The Council would apply for additional Exceptional Financial Support before this point – but this would not be a sustainable solution.

Management and Governance

19. Each reserve must be supported by annual justification, stating the planned use over the life of the MTFP completed by the relevant budget holder (with Finance support where required). These will be reviewed by the relevant Head of Finance before being approved by the Chief Finance Officer or delegated Director of Finance.
20. Justifications should clearly identify contributions to and drawdowns from reserves, and these will be built into the Medium Term Financial Plan (MTFP) and presented within the budget report for approval by Council.

21. Reserves set for specific projects/schemes e.g. unused grant reserves should have an end date, and at that point any balance should be transferred into the general reserves. If there is a genuine reason for slippage, then the protocol will need to be updated.
22. The creation of new reserves is subject to the same approval process set out above for the annual justifications.

Monitoring

23. The level of all reserves is kept under continuous review. This is achieved through revisions to the Medium Term Financial Plan and the quarterly budget monitoring reports provided to Cabinet. The planned level of reserves will be reported to Council annually via the Budget Report.
24. The Council will maintain useable revenue reserves at 20% of core spending power as a minimum.

Use of Reserves

25. The maintenance and use of reserves play a key role in long-term financial sustainability. Just as the creation and maintenance of reserves arises in a structured way through the Council's financial planning process, so the release of reserves needs to be subject to a similarly planned and controlled process.
26. Contribution to, from, and between reserves must be approved by the Chief Financial Officer or delegated Director of Finance and from 2025/26 this process is managed through the Financial Control Board.
27. When appropriate, details of any contribution to, from, and between reserves will be taken in a timely manner throughout the year and these will be reported to Cabinet through the quarterly revenue and capital finance updates.

Table 1: 2026/27 Thresholds

	2026/27 Minimum Threshold Balance	**2026/27 Target Balance (if different)**	**2026/27 Forecast Opening Balance**	**2026/27 Budgeted Closing Balance**
General Fund Balance	£21.8m (5% of Net Revenue Budget)	-	£17.7m	£21.8m
Risk Reserves	£43m	£91m	£41.7m	£46.0m

Usable Revenue Reserves	£87m 20% of Core Spending Power	£139m 32% of Core Spending Power	£57.4m	£60.5m
Capital Receipts	£2.4m 25% of next year's Flexible Use of Capital Receipts planned usage	£4.7m 50% of next year's FUCR planned usage	£12.2m	£52.7m

28. The Council will review the Reserves Policy, particularly Table 1 above on an annual basis.

Earmarked Reserves Summary

This summary explains the purpose of the Council's main earmarked reserves. Comments regarding the adequacy of the reserves held are set out below while Appendix 12b summarises the forecast use and commitment of the reserves over the period of the Medium Term Financial Plan.

Risk Reserves	
Risk Reserve	Set aside as a contingency sum to provide financial funding over the period of the Medium Term Financial Plan for potential pressures.
Temporary Accommodation Reserve	This reserve is to mitigate the risk of an increase in demand for services and uncertainty in government funding particularly related to Temporary accommodation housing benefit subsidy loss impact.
Collection Fund Pooling receipts	This reserve holds the receipts the Council has received from being a member of the 8 local authority Business Rate Pool. These are then allocated to the general fund to smooth deficits on the Collection Fund in future years.
Service Specific Reserves	
Companies Reserve	This reserve holds resources to fund Energetik shareholder costs and offset against possible credit losses associated with loans to Energetik in the future.
North London Waste Authority and Waste Projects Reserve	Funding set aside to cover potential future costs of the NLWA contract arising from the building of the new waste treatment facility. In addition, this has been expanded to cover all waste related projects and levies.
Meridian Water	This reserve holds funds received as part of the development agreement for the Meridian One scheme.
Borough wide tennis and netball courts	These are funds built up through annual contributions to enable sufficient balances to invest in replacement of courts in the future.
Welfare Reforms & Hardship Fund	The changes in the benefit regimes and cost of living crisis increases the risk of residents being unable to pay council tax bills and additional costs relating to the new benefit administration and regulations. This reserve will be available to meet pressures in Emergency Support, Council Tax Hardship and Discretionary Housing payments.

Parking Development Fund (PPRA)	This reserve was created when surpluses were made from the Parking Places Reserve Account (PPRA). The balance represents sums set aside for expenditure on future parking and projects as permitted by legislation.
Local Election Reserve	Council elections are held every four years. To smooth out the cost, a contribution is made into the reserve each year so that sufficient funding is available every fourth year to fund the local elections.
Property Projects	This reserve fund was generated from unspent dowry relating to the perpetual upkeep of Mossops Park, including the Mossop Creek and Delta respectively.
Local Plan Reserve	This balance has been created to supplement the revenue base budget cost of developing the Council's Local Plan.
NEXUS	The NEXUS Project aims to tackle Youth Violence. £500k was provided in the MTFP in both 2019/20 & 2020/21. This balance represents unspent funding from those original allocations which is being used to continue this important work.
Private Rented Sector Licencing	Income through licences is generated which is then required in future years to cover the cost of running the scheme.
Schools PFI Smoothing reserve	Schools PFI funding is received in advance of the costs incurred. The reserve is required to holds balances to cover the costs in later years.
Property Reserves	
Repairs Fund for private sector housing leased to Council	This funding is set aside to cover the cost of repairs to PSL properties when the leases come to an end and the properties are handed back to their owners. It is "routine" business, with a low risk, and this reserve acts as a buffer to support the repairs work.
Montagu Dry Lake Maintenance Fund	This funding is set aside to cover future maintenance costs of a flood storage facility (dry lake).
Other Grant Reserves	
Grant Reserve	These are a collection of smaller earmarked reserves with very specific grant restrictions which limit their use.
Section 106 Receipts	S106 agreements are issued on development proposals and require developers to make contributions to support infrastructure. These are like CIL arrangements which are an update on S106.
Community Infrastructure Levy Reserve	The Community Infrastructure Levy (CIL) is a charge which can be levied by local authorities on new development in their area. It is an important tool for local authorities to use to help

	them deliver the infrastructure and other community projects needed to support the new development. In accounting terms, CIL is used to help fund the Capital Programme.
Neighbourhood Community Infrastructure Levy Reserve	This is a smaller specified element of the CIL set aside to support the demands being placed on their communities because of development.
Public Health	From April 2013 local authorities took on responsibility from the NHS for improving the health and well-being of their local population and reducing health inequalities. The Authority has been awarded ring-fenced grant since 2013/14 with specific grant conditions including the carry forward of underspends to future years.
Troubled Families Grant	The Council managed to achieve the maximum Payment by Results grant available and the reserve has helped to fund the extension of the programme as the funding from MHCLG in 2020/21 was not enough to cover the cost of the team. The remaining balance on the reserve is planned to be used when the grant funding ends to pay for resources within Early Help to continue for another year or until the pressure is potentially managed through the MTFP process.
Rough Sleepers Accommodation Programme 2 Revenue Grant	This is the revenue element of the RSAP 2 programme and will need to cover future revenue costs. The balance is meant to cover 30 years' worth of revenue expenditure, circa £50k per year forecast usage.
TfL Risk Pot (Mini Holland legacy)	TfL Mini Holland legacy funding to complete the implementation of the Cycle Enfield schemes.
Southbury Synthetic Pitches Maintenance Fund	Balance held for maintenance of the sports pitches at Southbury leisure Centre – grant conditions apply.
3G Football Pitch Replacement Fund	Balance held for future replacement of sports pitches. This is a Football Association Grant and is subject to grant conditions in how it is used.
Children's Social Care Prevention Grant	This grant is for direct investment in additional prevention activity for children and families through the implementation of Family Help and Child Protection reforms. It will also fund local authorities to deliver against the planned new legislative duty to offer Family Group Decision Making (FGDM) meetings to all families at the pre-proceedings stage. This will be held in reserve pending agreed expenditure plan.
Insurance Reserves	
Insurance Fund	The internal Insurance Fund provides cover in full for tree root damage claims, burglary and "all risks" on specified equipment. The Fund also meets the cost of all claims within the external policy excesses for general building fire damage (including housing properties), motor, cash, and public and employer liability claims. In addition, there is a potential

	liability with a former insurer of the council which would be a call on this fund.
Property Insurance Settlements	Insurance Settlement receipts relating to Sloemans Farm to be reinvested into Rural portfolio as per pay out conditions.
General Fund Balances	
General Fund Balances	This is a general contingency fund set aside for emergencies or to cover any unexpected costs that may arise and is set at 5% of the Council's Net Revenue Budget.
Schools and DSG Reserves	
Schools Balances	The balance represents the accumulated revenue balances held by schools.
Dedicated Schools Grant Reserve	The DSG is a ring-fenced specific grant, provided outside the local government finance settlement. It should be used in support of the schools' budget for the purposes defined in the School and Early Years Finance (England) Regulations.

London Borough of Enfield: Flexible Use of Capital Receipts Strategy

Our approach to Efficiency and the Use of Capital Receipts

With effect from 2016/17 the Government has provided a general capitalisation directive to all councils. This enables the utilisation of new capital receipts to finance projects that are designed to generate ongoing revenue savings in the delivery of public services and/or transform service delivery in a way that reduces costs or demand for services in future years for the Council and any of the public sector delivery partners.

The Government has announced that the capital receipts flexibility will be extended until 2030. This Strategy reports on how capital receipts were used to fund investment in 2024/25 as well as how they are planned to be used to fund investment in 2025/26 and 2026/27.

Within the Capital Strategy, the Council has set out its approach for 2026/27 and beyond. The capital receipts disposals target for the next 5 years is £130m, with a target of £50m set for 2026/27, of which £42.6m is earmarked for debt repayment and £7.4m to be applied under this Flexible Use of Capital Receipts policy.

Capital receipts are therefore available to fund transformational expenditure that will deliver revenue savings to the Council to assist in bridging its current budget gap or to fund any future Exceptional Financial Support applications which may be required.

Impact on the Prudential Indicators

The Prudential Indicators are set out in the Treasury Management Strategy Report, also on this agenda. These demonstrate that Enfield's capital investment plans are affordable, prudent, and sustainable, and that treasury management decisions are taken in accordance with good professional practice. The indicators take account of the proposals for the use of capital receipts set out in this strategy.

Based on the current capital programme, if the capital receipts were to be applied to fund capital expenditure, this would have the estimated impact of reducing the **annual** interest and minimum revenue provision in future years by £70k on average for each £1m of applied capital receipts. This is based on an asset with a forty-year life discounted on a 3.50% rate on an annuity basis in accordance with the Council's MRP Policy and a 4.5% borrowing interest rate i.e. the equivalent of a 7% return for 40 years.

Use of Capital Receipts in 2024/25

The table below shows how we used capital receipts in 2024/25.

Service Area	Plan £m	Final outturn £m	Planned savings and demand reductions
Property	1.042	0.560	Various external fees directly attributable to, and essential for, the disposal of property assets to deliver capital receipts. There will be no ongoing costs associated with each property asset disposal upon completion of each sale. There will also be reduced MRP and interest charges if the receipts are used to repay borrowing. In addition, there are residual revenue costs associated with the Civic Centre moves (initially funded by the Invest to Save reserve) that now form part of the new strategy. The moves freed up space in B Block South which will result in reduced energy costs for 2024/25.
Digital Investment Programme	4.236	1.005	The digital investment programme covers four themes which collectively enable the Council to enhance its use of technology to deliver its corporate priorities: • Cyber-security, maintaining the Council's cyber-security in an increasingly hostile online environment. • Modern infrastructure, that is reliable, resilient and responds to the changing needs of the Council. • Modern applications that provide colleagues and residents with the tools they need to work effectively and efficiently. • Transformation through technology, embracing and exploiting established and emerging technologies. £0.2m are residual costs from projects started in 2023/24, and up to £1.2m is set aside for the programmes described above.
Future Invest-to-Save	2.000	0.104	£2m set aside to fund Invest to Save proposals being put forward in 2024/25 to generate savings to contribute to mitigating current year or future years' budget gap.
Redundancy and pension strain	2.000	1.856	Statutory Redundancy and pension strain costs related with the delivery of the 2024/25 savings programme as set out in the Council's Medium Term Financial Plan for 2024/25.
Housing Benefit Subsidy loss team	0.550	0.253	In response to the forecast Housing Benefit Subsidy loss, the Council plans to invest in a Council wide team including Housing Officers, Fraud Investigators, Financial Assessment Officers as one of the interventions to address this material financial issue, whilst utilising the existing Welfare Benefits Advice team to maximise benefits if they are not being claimed.

Planning Apprentices	0.111	0.110	This Invest to Save project creates additional capacity to manage Planning backlogs and therefore mitigate the risk of lost income, whilst also generating additional income for the service.
Consultation on Libraries Strategy	0.075	0.035	The Council is under a duty to provide a comprehensive and efficient library service. In light of the Council's funding pressures, the Council needs to consider whether the library service can be delivered in a more efficient way, while ensuring that it continues to meet people's needs and is comprehensive.
Transformation	0.023	0.019	These are the residual costs of the Transformation team that were delivering a portfolio of programmes delivering corporate and customer facing change across the organisation to reduce demand failure, improve customer experience, cost prevention and create efficiencies through improved processes and enhanced technology. Individual programmes may have specific MTFP savings targets. Cost prevention projects & programmes are designed to reduce demand prior to incurring costs.
TOTAL	**10.037**	**3.942**	

Planned Use of Capital Receipts in 2025/26

The table below shows how we plan to use capital receipts in 2025/26.

Service Area	Original Plan £m	Latest Plan £m	Planned savings and demand reductions
Property	1.000	1.000	Various external fees directly attributable to, and essential for, the disposal of property assets to deliver capital receipts. There will be no ongoing costs associated with each property asset disposal upon completion of each sale. There will also be reduced MRP and interest charges if the receipts are used to repay borrowing.
Digital Investment Programme	4.000	2.973	The digital investment programme covers four themes which collectively enable the Council to enhance its use of technology to deliver its corporate priorities: • Cyber-security, maintaining the Council's cyber-security in an increasingly hostile online environment. • Modern infrastructure, that is reliable, resilient and responds to the changing needs of the Council. • Modern applications that provide colleagues and residents with the tools they need to work effectively and efficiently. • Transformation through technology, embracing and exploiting established and emerging technologies.
Enterprise Resource Planning system (ERP)	0.000	3.521	Replacing the Council's current ERP with a modern, secure, cloud-based platform to maintain and improve Finance, HR, Payroll, Procurement and Exchequer capabilities, enabling service performance, financial sustainability, workforce experience and governance.
Invest-to-Save: Redundancy Projects	 2.000 2.000	 2.000 0.775	£4m set aside to fund Invest-to-Save proposals being put forward in 2025/26 to generate savings to contribute to mitigating current year or future years budget gaps. This will include the statutory redundancy and pension strain costs related to restructures where these pay back in 3 years or less and deliver ongoing savings. Four specific projects have already been approved and savings proposals submitted which are contributing to balancing the budget for 2025/26, these projects are: • Reducing energy consumption and cost by installing LED lighting in four corporate buildings • Expanding Adult Social Care inhouse day provision • Increasing food waste recycling • Council transformation programme support

Revenues & Benefits transformational activity	0.000	0.291	Resources to deliver a range of transformation projects within the Revenue & Benefits services including: • Insourcing of revenues and benefits telephony support contract and integrating into the contact centre. • Increasing efficiency and service capacity through channel shift by enhanced online enquiry management.
Business Analysts	0.000	0.011	This fixed term 6-month contract post costing £33k is required to support the service redesign workstream which forms part of the Revenues and Transactional services transformation programme, conducting a specific piece of service redesign work, producing a recommendations paper and support implementation where required. This is expected to span both 2025/26 (2 months) and 2026/27 (4 months).
Schools' capital programme feasibility studies	0.000	0.050	Funding to undertake feasibility studies, enabling the service to explore every viable opportunity to repurpose underutilised spaces across the education and corporate estate. Where feasibility studies do not lead to a capital project, the associated costs will be absorbed by the capital receipts. However, if a scheme progresses to delivery, the feasibility study costs will be incorporated into the overall capital programme. £50k allocated for 2026/27 and further allocations of £100k for the next two financial years.
People department transformational activity	0.000	0.193	Resources to deliver a range of transformation projects within the People department including: • Developing shared services with other local authorities • Implementation of inhouse children's homes • Driving a digital approach to the delivery of more efficient children's services transforming use of Liquid Logic • Implementation of Stepping Stones transformation delivering more cost-effective arrangements for leaving care accommodation
Community House	0.000	0.493	This will accommodate the works to Community House, which are dedicated to improving utilisation of the property and increase the footfall and support it brings to the community in Edmonton and the wider Borough.
Residual cost of 2024/25 strategy Housing Benefit Subsidy Loss team	0.000	0.076	In response to the forecast Housing Benefit Subsidy loss, the Council invested in a Council wide team including Housing Officers, Fraud Investigator, Financial Assessment Officers as one of the interventions to address this material financial issue, whilst utilising the existing Welfare Benefits Advice team to maximise benefits if they are not being claimed.
TOTAL	**9.000**	**11.383**	

Planned Use of Capital Receipts in 2026/27

The table below shows how we plan to use capital receipts in 2026/27.

Service Area	Plan £m	Planned savings and demand reductions
Property	2.000	Various external fees directly attributable to, and essential for, the disposal of property assets to deliver capital receipts. There will be no ongoing costs associated with each property asset disposal upon completion of each sale. There will also be reduced MRP and interest charges if the receipts are used to repay borrowing.
Digital Investment Programme	2.000	The digital investment programme covers four themes which collectively enable the Council to enhance its use of technology to deliver its corporate priorities. • Modern infrastructure, that is reliable, resilient and responds to the changing needs of the Council. • Modern applications that provide colleagues and residents with the tools they need to work effectively and efficiently. • Transformation through technology, embracing and exploiting established and emerging technologies.
Enterprise Resource Planning system (ERP)	3.381	Replacing the Council's current ERP with a modern, secure, cloud-based platform to maintain and improve Finance, HR, Payroll, Procurement and Exchequer capabilities, enabling service performance, financial sustainability, workforce experience and governance.
Invest-to-Save	2.000	£2m set aside to fund the statutory redundancy and pension strain costs related to restructures where these pay back in 3 years or less and deliver ongoing savings to contribute to mitigating current year or future years budget gaps.

2026-27 Budget consultation

Summary report
Appendix 14a

Produced by the Research & Insight Team

ENFIELD Council

Details

Overall objective

To capture views on the Council's proposed approach to addressing the budget gap

Method

Online questionnaires hosted on the Have Your Say section of the Council website (www.enfield.gov.uk/haveyoursay)

Accessibility

Online questionnaire can be used with translation and speaking plug-ins/applications, as well as re-sized

Number of responses

101 (median time of completion: 6.9 minutes)

Organisations who submitted views

These include Carers And Parents of adults with learning disabilities in Enfield (CAPE) and Enfield Food Partnerships

This report is a written summary. It does not include all data. The full datasets, including all verbatims, has been shared with senior leaders for them to consider all responses.

Promotional activities

Campaign period: 11 December 2025 – 10 January 2026

Social media activity (25 posts)

- **X (formerly Twitter)** - 7 posts
- **Facebook** - 9 posts (total reach 4.4k)
- **Instagram** - 6 posts (total reach 2.3k)
- **Nextdoor** - 3 posts

E-newsletters promoting the consultation (with link to webpage)

- Voluntary and Community Sector newsletter (sent to approx. 800 organisations)
- Faith Forum members
- *News from the Council*

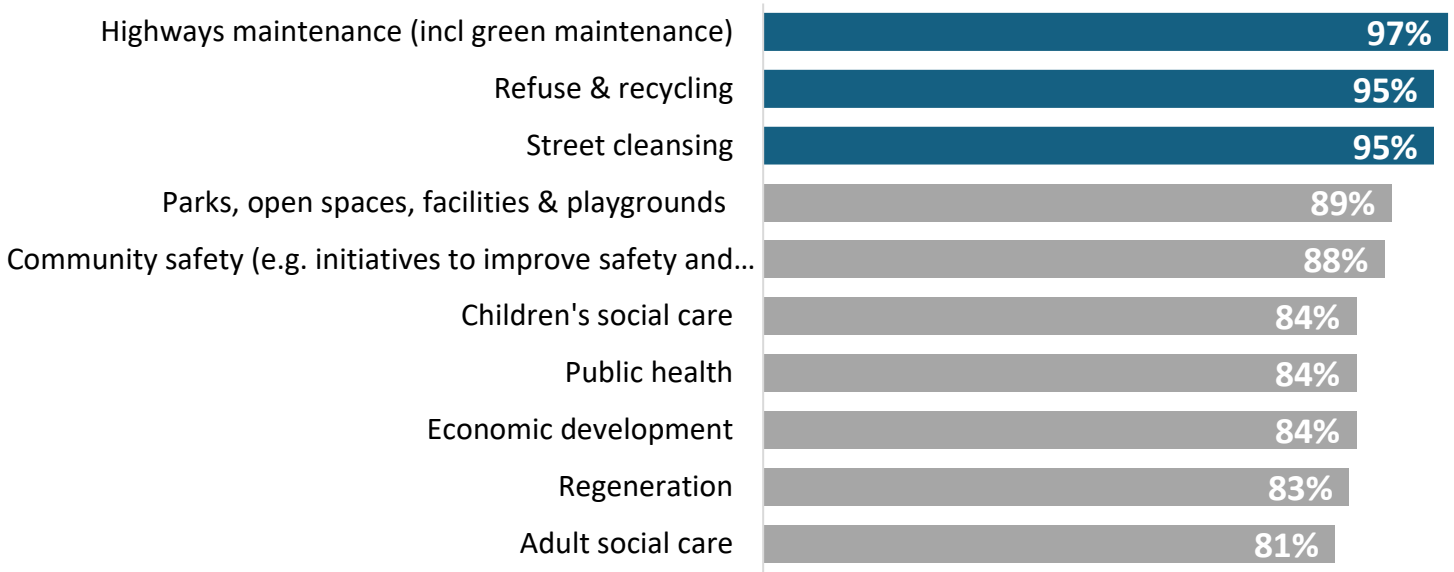

Electronic noticeboards

Consultation information displayed on **48 noticeboards** across housing estates for the full duration of the consultation period

Priorities for limited Council resources

Over 90% of respondents consider **refuse & recycling**, **highways maintenance** and **street cleansing** top priorities for increasingly limited council spending

Q2. How important do you think it is that we prioritise our increasingly limited resources on each of the following areas? *All respondents (very important or fairly important). Ten highest scoring*

Highways maintenance, refuse & recycling and street cleansing being the highest priority service areas are consistent with findings from previous budget consultations.

Base: All respondents (101). Rating scale used: Very important/Fairly important/Not very important/Not important at all/Don't know

Services that matter most

Three out of 10 or more consider **refuse & recycling**, **highways maintenance**, **street cleansing** and **community safety** to be service areas that matter most to them

Q3. ..Which service areas matter most to you. *All respondents. Ten highest scoring*

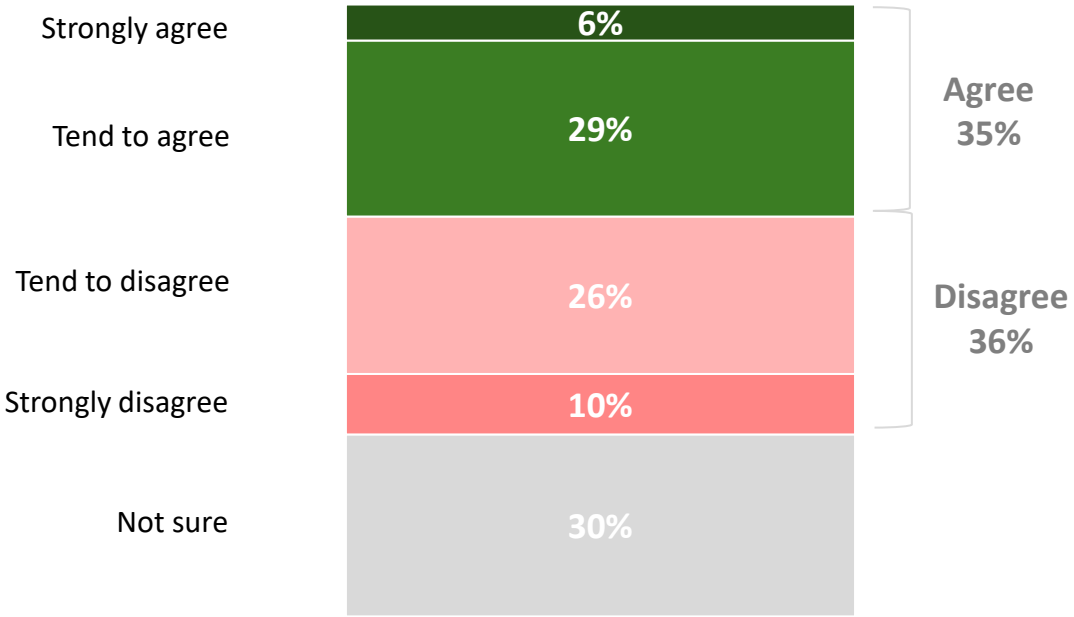

Refuse & recycling, highways maintenance, and street cleansing again top the list, with 30–44% selecting them as highest priority. Thus, reinforcing their status as essential, everyday services. Residents value a broad range of services, but their strongest preferences lie with those that directly impact their daily environment.

Base: All respondents (101). Responses limited to up to three service areas. Randomised order was to reduce order bias. The services listed often contained further explanations for clarification

Council's approach to addressing the budget gap

Approximately the same number agree (35%) and disagree (36%) with the Council's proposed approach, and a significant proportion are unsure (30%)

Q5. Overall, to what extent do you agree or disagree with our proposed approach for addressing the budget gap?

With roughly equal numbers agreeing and disagreeing and a significant proportion stating *not sure*, this may reflect the difficult decisions the Council has to make. With reference to the previous slide, it is a wide variety of services are priorities and matter to respondents.

Respondents were asked to provide details of why they disagree with the proposed approach. These details are provided in the following slide (see next slide).

Base: All respondents (101)

Reasons for disagreeing with Council's approach

There were a wide range of responses, although percentage scores were low for each. Key themes (based on frequency of reference) detailed below

Perceived waste or mismanagement of Council spending

Money is being spent on the wrong things (e.g. benches, road-narrowing schemes and large regeneration projects) and budgets are poorly managed overall

Concerns about Council Tax and charges increasing

Above-inflation Council Tax rises, parking charge increases and the belief that residents are being asked to pay more while services decline

Belief that savings should be found elsewhere within the Council

Reducing senior salaries, cutting contractors, reviewing management structures and improving efficiency rather than raising income or cutting services.

Disagreement with spending priorities, especially around social care and benefits

Too much spent on adult social care and benefits, while others argue social care is already underfunded and facing hidden cuts

Lack of trust or confidence in the Council's approach

Scepticism about assumptions in the budget, concerns about long-term impacts, a sense that residents' views are not being listened to and doubts about whether proposed savings are realistic

Q5a. Please tell us the main reason(s) why you disagree. 31 participants responded to this question

Further comments

Participants were asked to add any further comments they wanted the Council to consider. A broad range of views were submitted. Below is a written summary of the most referred to issues

Frustration with services

Council services are difficult to access, communication is unclear and feedback is not meaningfully acted upon

Concerns about financial management

Perceived wasteful spending, high management costs, and a lack of focus on core services

Local environment and infrastructure issues

Dissatisfaction with street cleanliness, waste services, road layouts and the growth of certain types of business

Social care and housing pressures

Concerns about cuts to social care and ongoing challenges accessing affordable, suitable housing

Q6. Please tell us the main reason(s) why you disagree. 47 participants responded to this question

MINUTES OF THE MEETING OF THE OVERVIEW & SCRUTINY COMMITTEE HELD ON MONDAY, 19 JANUARY 2026

COUNCILLORS

PRESENT	Nicki Adeleke (Chair), Nawshad Ali (Vice-Chair), Maria Alexandrou, Kate Anolue, Lee Chamberlain, Hivran Dalkaya, James Hockney, Michael Rye OBE and Eylem Yuruk
STATUTORY CO-OPTEES:	1 vacancy (Church of England diocese representative), vacancy (other faiths/denominations representative), vacancy (Catholic diocese representative), Alicia Meniru & 1 vacancy (Parent Governor representative) - Italics Denotes absence
OFFICERS:	Perry Scott (Chief Executive), Olga Bennet (Chief Finance Officer), Tony Theodoulou (Executive Director, People), Brett Leahy (Executive Director of Environment & Communities), Joanne Drew (Executive Director of Housing & Regeneration), Sol Otchere (Director of Finance, Capital & Comm), Neil Goddard (Head of Finance Strategy) and Stacey Gilmour (Governance & Scrutiny Officer).
Also Attending:	Cllr Ergin Erbil (Leader of the Council) Cllr Tim Leaver (Deputy Leader of the Council
Observing:	Cllr Ian Barnes

1
WELCOME & APOLOGIES

The Chair welcomed everyone to the meeting and introductions were made.

Apologies for absence were received from Annette Trigg (Director of Finance, Corporate).

2
DECLARATIONS OF INTEREST

There were no declarations of interest received regarding any item on the agenda.

3
MINUTES OF PREVIOUS MEETING

The minutes of the Overview & Scrutiny Committee business meeting held on 19 November 2025 were **AGREED.**

4
BUDGET CONSULTATION FOR MEMBERS

The Leader of the Council, Cllr Ergin Erbil, introduced the report, providing an overview of the Council's Medium-Term Financial Plan (MTFP) 2026/27 to 2030/31 together with the specific draft budget proposals for 2026/27 which were considered by Cabinet on 10 December 2025 for approval to commence public consultation.

Members were advised that this was the first year in which the Council had received a three-year Local Government Finance Settlement, which was issued by Government in December 2025. Due to statutory timescales and the budget-setting process, the draft budget had been prepared using the best information available prior to receipt of the settlement. Officers emphasised that the budget remained a live document, reflecting information available up to 10 December 2025, and would continue to be refined ahead of consideration by Cabinet and Council in February. Public consultation was ongoing.

The net revenue budget for 2025/26 was set at £354m, with an indicative draft budget of £374m for 2026/27, as set out in Appendix A(ii) of the report. The budget was underpinned by a five-year financial plan.
Officers explained that two funding scenarios had been modelled during budget development: a "low" scenario and a "favourable" scenario. The proposals presented reflected the favourable scenario, following confirmation of a better-than-anticipated settlement after a prolonged period of austerity. It was noted that the government's estimate was that settlement was expected to provide approximately £200m of additional funding over five years, although some of this funding would be ring-fenced and the first year has already been received.

Members were advised that significant budget pressures continued to affect the Council, particularly in relation to:

- Temporary Accommodation,
- Adult Social Care, with a projected pressure of £16m in 2026/27,
- Children's Social Care, with a projected pressure of £7m,
- Pay awards estimated at £7m, and
- Capital financing costs and contributions to the North London Waste Authority.

Officers confirmed that these pressures were already reflected within the budget assumptions and were not new or unforeseen. A contingency had been built into the budget to manage emerging pressures, particularly in areas historically prone to overspend.
Officers also outlined a proposed "rule of thirds" approach to the use of any funding received above expectations, whereby:

- one third would be invested in new or enhanced services, particularly those addressing deprivation,
- one third would be allocated to strengthening reserves, in line with statutory and audit advice, and
- one third would be used to finance transformational spend currently financed by capital receipts (which would reduce ongoing capital financing costs and debt).

Questions and Comments were invited from Members

In response to Members' questions regarding service investment, Officers highlighted proposals to invest significantly in Children's Services, particularly in prevention and early years support. This was described as an unprecedented level of investment aimed at rebuilding frontline services that had experienced sustained reductions over the past 14 years. Officers emphasised the importance of early intervention, drawing on learning from the Sure Start programme, to reduce future demand for high-cost statutory interventions.

Members queried the Council's approach to Temporary Accommodation and housing pressures**.** Officers explained that work was underway to increase the supply of Council-owned temporary accommodation in order to reduce exposure to market volatility. A new 10-year leasing model was being developed with private landlords to improve stability and value for money, alongside preventative measures to reduce demand and diversify the Council's housing offer.

In response to questions on funding transparency, Officers acknowledged the complexity of the settlement, which included rolled-in grants and changes to business rates. Some elements of funding had yet to be fully confirmed, although certain ring-fenced grants — including those for Children's Social Care and the Crisis and Resilience Fund — had been announced. Members requested clearer breakdowns distinguishing core grant funding from other funding streams, together with indicative timescales for receipt of funding, which Officers undertook to provide as information became available.

Members raised questions regarding Council Tax assumptions. Officers confirmed that the draft budget assumed annual increases of 4.99%, which reflected the ongoing demand cost pressures and were in line with government assumptions on Core Spending Power. It was noted that, despite these increases, Enfield's Council Tax levels remained comparatively lower than those of neighbouring boroughs.

In response to concerns about savings proposals, the Leader of the Council clarified that not all savings represented service reductions. Some reflected efficiencies or technical adjustments, such as reduced pension contributions

due to strong fund performance, reduced Housing Benefit subsidy losses, and the effective packaging of grant income.

Members questioned the Council's reserves position and financial resilience**.** Officers referred to the fact that Cabinet set minimum threshold risk reserve level at £43m and a target risk reserve level of £83m for the current financial year. Under the favourable funding scenario, the Council anticipated increasing reserves from the current level (forecast to be £47m by the end of the 2025/26 financial year) to the recommended level over a four-year period, reaching the target by 2029/30.

Officers also explained the use of Exceptional Financial Support (EFS) to manage historic overspends, with £20m applied in 2024/25 and £10m planned for 2025/26. Senior Officers provided assurance that future growth in government funding would not be used solely to replenish reserves after recent overspends, but would contribute to support service investment, financial resilience, and long-term sustainability.

The Committee **NOTED** the update on the draft 2026/27 budget and Medium-Term Financial Plan and **AGREED** that its comments be reported to Cabinet as part of the budget-setting process.

5
TREASURY MANAGEMENT STRATEGY

Officers introduced the Treasury Management mid-year update for 2025/26, outlining the Council's current debt position, affordability metrics, and compliance with the approved Treasury Management Strategy.
Members were advised that the Council's external debt stood at approximately £1.34bn. This is forecast to cost the General Fund around £12m in interest in 2025/26 and approximately £19m is set aside for Minimum Revenue Provision (MRP). Officers confirmed that the General Fund capital financing costs as a proportion of the Net Revenue Budget was forecast to be 8% for 2025/26, which was within the Council's target range of 10–12% and therefore considered prudent and sustainable.

Officers drew attention to the findings of the Council's external auditors, who had recommended continued and enhanced scrutiny of specific large-scale capital programmes, particularly Meridian Water, Housing Gateway, and Energetik. Members were advised that further detailed actions and updates in response to these recommendations would be reported to Cabinet in February.

Officers confirmed that treasury indicators, targets and ratios would continue to be kept under active review, particularly in light of the prevailing economic climate and interest rate environment.

Questions and Comments were invited from Members

Members sought assurance regarding the scale of borrowing and long-term affordability, particularly in relation to major regeneration and energy projects. Officers reiterated that the current debt financing ratio remained within agreed limits and that debt costs were closely monitored through the Treasury Management framework.

In response to questions about Meridian Water and other significant schemes, Officers confirmed that the impact of debt on these projects was being actively monitored, and that further analysis and updates would be brought forward to Cabinet in February, in line with auditors' recommendations.

Members welcomed the emphasis on workforce development and asked how training would support resilience within the Treasury function. Officers explained that the use of AAT and CIPFA apprenticeships was intended to build long-term capacity, reduce reliance on external expertise, and ensure succession planning within the service.

Members raised concerns about the timing of government finance information, particularly the impact of late settlements on effective financial planning and scrutiny. The Chair proposed that correspondence be sent to central government, including the Treasury and MHCLG, highlighting the challenges posed by late settlement announcements and requesting earlier clarity to support future budget planning cycles.

The Committee **NOTED** the Treasury Management mid-year update for 2025/26.

It was **AGREED** that:

- Officers would continue to monitor and report on the impact of debt, particularly in relation to Meridian Water and other identified projects, with a further update to Cabinet in February.

6
WORK PROGRAMME 2025/26

NOTED the Overview & Scrutiny Committee Work Programme 2025/26.

7
DATES OF FUTURE MEETINGS

NOTED the dates of future meetings as follows:

OSC Provisional Call-In dates (if required)

Monday 26 January 2026
Monday 23 February 2026
Tuesday 24 March 2026

OSC Business Meeting
Wednesday 11 February 2026
Tuesday 10 March 2026
