The Royal Borough of Kensington and Chelsea

KEY DECISION

Report Title: REVENUE BUDGET, CAPITAL PROGRAMME AND COUNCIL TAX 2026/27

Date: 10 February 2026

Decision Maker	Leadership Team
Reporting Officer	Mike Curtis – Executive Director of Resources
Key Decision	KD1012893
Access to information	Public (part A)
Wards	All

1. EXECUTIVE SUMMARY

1.1 This report is a key part of the strategic financial planning process for the Council. It builds on the reports considered by Leadership Team on 12 November 2025 and 13 January 2026.

1.2 It sets out the latest position on the revenue budget for 2026/27 before Full Council sets the Council Tax and Budget for 2026/27 at its meeting on 25 February 2026.

1.3 This report concerns the General Fund budget and Capital Programme. The Housing Revenue Account (HRA) is ring-fenced from the general fund. The proposed 2026/27 budget for the HRA and the revised 30-year Business Plan are reported separately on this agenda.

1.4 In July 2025, the Council published its Medium Term Financial Strategy which set out an update on the four-year financial position and the framework for spending plans in line with Council Plan priorities. At that time this showed a budget shortfall of £40.8m in 2026/27 and then an overall shortfall of £117.6m by 2029/30.

1.5 All Local Authorities have a statutory requirement to set a robust and balanced budget and since July work has been underway to close the budget gap for 2026/27. This report is for Leadership Team to make recommendations to Council on 25 February 2026.

1.6 The robust and balanced budget position for the General Fund in 2026/27 includes a significant amount to fund inflation, service demand and other pressures. This includes £5.0m specifically for temporary accommodation,

£1.5m for adults and £1m for children's social care, £2.2m other demand pressures and growth items in other services (a full breakdown is in Appendix 4), £9.8m for contract inflation and £3.8m for the 2026/27 pay award.

1.7 The budget also includes the implementation of £21.1m of new savings proposals from departments and corporate workstreams.

1.8 The budget allows for a Council Tax increase of 2.99% for 2026/27 and a 2% increase in respect of the Adult Social Care Precept. The overall increase is below the 5% referendum threshold outlined by the Government for 2026/27 in the Local Government Finance Settlement.

1.9 To help manage financial risks in addition to the above the budget includes a £3.7m corporate contingency budget to deal with in-year budget risks and unforeseen pressures and a £1.2m contingency budget specifically to manage unforeseen pressures within adults and children's social care.

1.10 A general fund working balance of £10m will be maintained in line with the Council's agreed policy and a prudent but appropriate level of earmarked reserves is being maintained.

1.11 Over the period 2025/26-2028/29, the Council will invest general fund capital expenditure of £186.2m in the borough's housing needs, schools and early years provision; highways, transport, environment and open space; and Council buildings and digital infrastructure.

1.12 In addition, £430.5m will be invested into the Council's housing stock through the Housing Revenue Account. Full details of the Capital Programme are set out in Section 17 and for the HRA within the revised Business Plan which is reported elsewhere on this agenda.

2. RECOMMENDATIONS

2.1 The Leadership Team is recommended to:

(i) Approve the revenue budget estimates for submission to Council as summarised in Appendix 1 of this report,

(ii) Note the findings of the budget consultation with residents, local businesses, the voluntary sector, the Select Committees and Overview and Scrutiny Committee as set out in Appendix 6 and Appendix 7**,**

(iii) Note the risks and uncertainties relating to the 2026/27 budget as set out in Section 18,

(iv) Approve the increase in fees and charges as set out in Section 12 and Appendix 15,

(v) Approve the revised Capital Programme and Capital Pipeline for the period 2025/26 to 2028/29. Full details are set out in Appendix 12 and Appendix 13,

(vi) Delegate the decision for the funding of the Capital Programme to the Section 151 Officer to fund the programme in the most cost-effective way for 2026/27 and all future years. The indicative assumed funding is set out in Table 12 and Table 13,

(vii) Note the allocation of the Dedicated Schools Grant to the schools, High Needs and Early Years Budget as set out in Section 0,

(viii) Agree the planned use of reserves as set out in Section 18,

(ix) Note the advice of the Executive Director of Resources, who is the Council's Section 151 Officer on the level of reserves and robustness of estimates in setting the budget as required by Section 25 of the Local Government Act 2003 (Section 24 of the report),

(x) Agree that the Executive Director of Resources continues to be given delegated authority to make transfers to and from earmarked reserves up to £100,000,

(xi) Agree that the Executive Director of Resources continues to be given delegated authority, following consultation with the Lead Member for Finance, Digital and Efficiency, to make transfers to and from earmarked reserves from £100,000 up to £250,000 in each instance,

(xii) Apply a 100% premium for second homes for 2026/27 onwards **(from 1 April 2026)**,

(xiii) That the Council continues with the same additional premium as agreed for the financial year 2025/26 for long term empty properties on top of the standard Council Tax for properties which have been empty for more than 1 year as detailed in Paragraphs 8.5 and 8.6.

(xiv) Agree the Council Tax resolution as set out in Appendix 8.

(xv) Agree that delegated authority be given to the Executive Director of Resources to make any necessary amendments to the budget, following consultation with the Leader and the Lead Member for Finance, Digital and Efficiency. This will take account of final levies and precepts including Garden Square special expenses, and to make any necessary amendments to the statutory determinations and Council Tax bands to take account of those changes and for these

amendments to be submitted and therefore recommended to Council at its meeting on 25 February 2026.

(xvi) Note the Dedicated Schools Grant (DSG) allocations totalling £141.742m and agree that the schools block, after the 0.5% transfer to the high needs block (in accordance with the Council's DSG deficit management plan) of £92.808m is allocated to schools using the local formula agreed by RBKC Schools Forum which moves 10% closer to the National Funding Formula factor values and meets DfE requirements.

2.2 The Leadership team is asked to recommend to Council.

(i) A Council Tax requirement for 2026/27 of £123.136 million including Garden Squares special expenses.

(ii) A basic amount of Council Tax for 2026/27 at Band D of £1,132.93 excluding Garden Square special expenses as set out in Appendix 10. The headline figure including Garden Square special expenses is £1,156.14.

(iii) Garden Square special expenses of £2.472m as set out in Appendix 9

(iv) Council Taxes for all bands in all areas for 2026/27 as set out in Table 6 and Table 7 of this report and Appendix 10.

(v) Total Council Tax including the Greater London Authority precept for all Bands in all areas for 2026/27 as set out in Appendix 11.

(vi) The Council's medium term financial position for the next four years as set out in Appendix 1, noting that there is an estimated budget gap of around £101m for the period 2027/28 to 2029/30.

(vii) The Capital Programme and Capital Pipeline as set out in Appendix 12 and Appendix 13.

(viii) The continuation of the use of flexible capital receipts strategy detailed in the report.

(ix) **To apply a 100% premium for second homes for 2026/27 onwards (from 1 April 2026)**

(x) The continuation of the 100% discretionary Council Tax discount for care leavers up until their 25th birthday.

3. REASON FOR DECISION

3.1 The Council is legally required to set a robust and balanced budget and Council Tax levels for each financial year.

4. BACKGROUND

4.1 The draft revenue budget and four-year capital programme set out in this report have been developed within the framework of the financial strategy previously agreed by Leadership Team. The Council Plan 2023 to 2027 sets out the overarching ambition to Become the Best Council for a Borough that is Greener, Safer, Fairer.

4.2 The Council, like all other local authorities, continues to operate within a wider financial climate of risks and uncertainty.

4.3 The recommendations made in this report:

- Are in line with the Council's approach to setting the budget for 2026/27 as set out in the Medium-Term Financial Position published in July 2025,
- Formalise and confirm the proposals set out in the Council's budget proposals for 2026/27 as reported to Leadership Team on 12 November 2025 and which were subject to consultation between 13 November 2025 to 9 January 2026,
- Are consistent with the Council's policy on reserves (Section 18 and Appendix 2),
- Takes into account consultation with residents, local businesses, the voluntary sector, individual Select Committees, and Overview and Scrutiny Committee on the proposed 2026/27 Council and service budgets (set out in Appendices 6 and 7),
- Takes into account the equalities impact assessment as detailed in Appendix 14,
- Takes into account 2026/27 spending and income pressures that have been estimated as part of the budget process, and
- Takes into account final figures on the Council Tax base, the Collection Fund and London Wide levies from outside bodies.

4.4 **The final Local Government Finance Settlement for 2026/27 was published on 9 February 2026 and the budget being presented is based on this. Changes from the Provisional Settlement included £236k of additional Homelessness & Rough Sleeping Grant and the confirmation of Public Health Grant allocations for 2026/27.**

5. DRAFT REVENUE BUDGET 2026/27- EXPENDITURE

5.1 In November 2025, Leadership Team agreed a series of budget proposals to be launched for consultation. The feedback has been considered in preparing the draft budget for next year and is summarised in Appendices 6 and 7. As a result of this feedback, there are no planned changes to the budget reductions that were proposed.

5.2 Of the 433 respondents to the consultation, most were supportive of savings proposals that related to reviewing our property portfolio (91%), to simplifying and improving processes (76%), to changing staff levels and conditions (74%), to changing service models to meet needs earlier or in new ways to avoid higher cost later (73%) and to generating additional income (71%).

5.3 They were least supportive of reviewing the level and range of services (54%), raising fees and charges (59%), and using alternative funding streams (67%).

5.4 Responses to the council tax proposals were mixed with 48% supporting the proposed increase but 33% opposing. 60% of respondents supported the proposed 100% council tax premium for people with second homes whilst 26% opposed it.

5.5 Budget reductions of £22.3m in 2026/27 were launched for consultation in November 2025 of which £5.8m were proposed from cross-cutting workstreams, £0.9m from corporate budgets, £3.5 million from the voluntary redundancy scheme and £12.1m were proposals to reduce service budgets or increase income within departments (including some savings proposed at previous budget rounds).

5.6 This final savings proposed for 2026/27 are £21.1m. The difference relates to £700k of savings being delayed into 2027/28 as a result of the cyber incident, and a reduction in the general fund saving from the voluntary redundancy scheme as £866k of related payroll savings relate to savings on non-general fund revenue budgets such as the HRA. These were slightly offset by an increase in the savings proposed from the capital review. More detail on these savings can be found in Appendix 5.

5.7 Some examples of the savings committed to for 2026/27 are:

- Increasing prevention initiatives in Adult Social Care to increase the focus on helping people live more independently.
- Reducing and redirecting some public health funded initiatives such as stopping an oral health care home pilot, roles to support employment and reducing the budgets in services such as air quality and physical inclusion.

- Using reserves and other sources as funding as efficiently as possible to ensure reduced General Fund pressure.

- Acquiring properties to provide our own supported accommodation and temporary accommodation to avoid reliance on costly third-party providers.

- Reviewing our packages of care for individuals with disabilities to ensure that they are as cost effective as possible.

- Increase advertising income on Council-owned assets.

- Increased parking income following national revision of Penalty Charge Notice (PCN) levels.

- Reduced energy consumption by investing in LED street lighting and improvements to the lighting in the Town Hall.

- Focus on moving on residents from high-cost Temporary Accommodation (TA) placements and reducing the reliance on nightly lets.

- Renting out new operational space across the Council's operational estate, as well as generating new long-term income across the existing commercial property portfolio.

- Efficiencies across the Council's facilities management contracts.

- Tighter staff pay controls such as increased scrutiny around the application of honoraria and more robust salary expectations for new starters.

5.8 Setting a reliable and robust budget means estimating spending pressures and budgeting for them accordingly. The proposed 2026/27 budget allows for £9.7m of additional budget to cover demand and other pressures including £5m specifically for temporary accommodation and £2.5m for demographic and demand growth in adult (£1.5m) and children's (£1m) social care. A full breakdown is shown in Appendix 4.

5.9 The current level of CPI inflation is 3.4% (December 2025). This has fallen sharply compared to the 11.1% recorded in October 2022 but is still above the Government's target rate of 2%. As part of budget setting, the Council has undertaken a detailed review of all contracts and has calculated around £9.8m of contract inflation is likely to be required in 2026/27.

5.10 Inflation for services provided within adult social care is expected to be higher than overall CPI rates, with the key drivers for inflationary pressures here driven by increases to the National Living Wage (4.1% increase),

London Living Wage (6.9%), and rent inflation for care services. £4.2m has been included in the budget as a result of these pressures.

5.11 The remaining £5.6m of contract inflation provision is for other social care and non-social care services. This provision will be held centrally for services to draw down if/when these costs materialise.

5.12 The 2026/27 pay award is not yet known. A provision of 3.2% (£3.8m) has been built into the budget and will be held centrally until agreement is reached. At the time of writing the Council does not know what the pay award will be. If it is more than this then departments will be asked to absorb this through their existing budgets. Officers are confident this will be achievable through natural delays in recruitment and vacancies.

5.13 Taking account of spending pressures, budget reductions and other adjustments described above, in 2026/27, the Council will spend £691m on the day to day running of services to deliver the priorities that are set out in the Council Plan. This includes Housing Benefit payments of £114.7m (which the Council administers on behalf of Government), Dedicated Schools Grant of £79.4m (which the Council passports directly to schools) **and £26.9m of Public Health funding that was recently announced as part of the Final Local Government Finance Settlement.** Details are summarised in Table 1 and set out in full by service in Appendix 3.

Table 1 2026/27 Gross Expenditure Budgets

Expenditure Source	**Gross Expenditure £'000**	**%**
Adult Social Care	94,384	14%
Public Health	**26,931**	4%
Children's Services	74,117	11%
Schools – Dedicated Schools Grant	79,350	11%
Environment and Neighbourhoods	110,042	16%
Housing and Social Investment	85,877	12%
Resources and Customer Delivery	30,421	4%
Chief Executive Services	17,177	2%
Housing Benefit	114,735	17%
Grenfell Support Programme 2024-2028	10,500	2%
Support for delivery of Grenfell work	1,227	0%
Grenfell Corporate Costs	1,098	0%
Corporate Contingency	3,700	1%
Social Care Contingency	1,217	0%

Expenditure Source	Gross Expenditure £'000	%
Social Care Related Inflation Pressures	4,241	1%
Corporate Savings to be allocated	(689)	0%
Other Contract Inflation	5,603	1%
Pay Award	3,800	1%
External Interest (excludes revenue costs relating to capitalisation direction)	9,028	1%
Depreciation	(14,804)	-2%
Minimum Revenue Provision (MRP) (excludes revenue costs relating to capitalisation direction)	8,625	1%
Revenue costs relating to capitalisation direction (funded from civil claims reserve)	6,049	1%
London Wide Levies	13,393	2%
Additional Household Prevention Grant announced in final settlement transferred into Contingency Reserve	**236**	0%
Prior year safety net payment transferred back into Collection Fund Reserve	4,726	1%
Total	**690,982**	**100%**

5.14 Spending in 2026/27 also includes £71.212m of General Fund capital investment as part of a four-year capital programme that will invest £186.150m (excluding HRA) on the borough's highways, environment, open spaces, schools and early years provision, buildings and digital infrastructure. Further details are set out in the individual service sections that follow and summarised in Section 17. Further information on capital investment in the borough's social homes is set out in the HRA Business Plan published separately elsewhere on the agenda.

5.15 A detailed breakdown of service expenditure is set out in Appendix 3.

6. DRAFT REVENUE BUDGET 202627- FUNDING

6.1 The £691m of spending in 2026/27 will be funded through a number of different sources - Government grants, Council Tax, Business Rates, Fees and Charges and rental income. The full breakdown is set out below.

Table 2 2026/27 Gross Income Budgets

Income Category	Gross Income £'000	%
Government Grants (in Services)	**(52,215)**	8%

Income Category	Gross Income	%
Housing Benefit	(114,735)	17%
Other Grants (Services)	(15,028)	2%
Dedicated Schools Grant	(79,350)	11%
Parking Income	(65,400)	9%
Other Income (services)	(14,079)	2%
Other customer receipts	(99,676)	14%
Other Internal Trading Income	(10,751)	2%
Investment Income	(2,536)	0%
Transfer from Reserves - Other	(310)	0%
Transfer from Reserves - Civil Claims Reserve	(6,049)	1%
Provision for Grenfell Support 2024-2028	(3,000)	0%
Other Contributors to Grenfell Support 2024-2028	(8,417)	1%
Business Rates	(6,666)	1%
Council Tax	(123,136)	18%
Revenue Support Grant	(69,669)	10%
Funding Floor and Adjustment Support grants	(19,966)	3%
Total	**(690,982)**	100%

6.2 **Government has also announced that there will be a new ringfenced Crisis Resilience Fund (CRF) from 2026/27. This is made up of Discretionary Housing Payments and the existing Household Support Fund (HSF). It is expected that the grant will match any expenditure that is incurred. The expenditure and income figures in the tables above exclude the CRF as we await further details.**

7. GOVERNMENT FUNDING

7.1 The 2026/27 Provisional Local Government Finance Settlement covering three years from 2026/27 to 2028/29 was announced on 17 December 2025 **and confirmed on the 9 February 2026.**

7.2 Full details of the Provisional Settlement were given in the Medium-Term Financial Strategy (MTFS) and 2026/27 Budget Setting report that was presented to Leadership Team on the 13 January 2026.

7.3 The Settlement covered three years with any decisions beyond that being subject to a future national Spending Review. For the purposes of this year's budget setting though, the Council has extrapolated figures for 2029/30 using the 2028/29 data from Government's Settlement to remind members of the potential for a significant shortfall in that year.

Table 3 Grant Funding Announced in the Settlement for 2026/27 to 2028/29

Grant Name	2025/26 Funding £'000	2026/27 Funding £'000	2027/28 Funding £'000	2028/29 Funding £'000	2029/30 Draft Funding £'000
Grants Held Centrally					
Retained Business Rates	(63,255)	(6,666)	(6,819)	(6,957)	(6,957)
Revenue Support Grant	(12,963)	(69,669)	(44,330)	(9,212)	(9,212)
Funding Floor Grant	0	**(19,876)**	**(33,668)**	**(47,074)**	0
Adjustment Support Grant	**0**	**(90)**	**0**	**0**	**0**
Local Authority Better Care Fund	(9,452)	(9,452)	0	0	0
Other Grants Rolled in	(32,738)	0	0	0	0
Ringfenced for a Particular Purpose					
Homelessness, Rough Sleeping & Domestic Abuse	(11,107)	**(5,879)**	**(5,518)**	**(4,880)**	**(4,880)**
Families First Partnership	(1,080)	(1,348)	(1,348)	(1,151)	(1,151)
Total	**(130,595)**	**(112,980)**	**(91,683)**	**(69,274)**	**(22,200)**

7.4 As part of the Settlement, Government published what are called Core Spending Power figures which are their measure of the resources available to local authorities to fund service delivery.

7.5 The Core Spending Power for Kensington and Chelsea is set out in Table 4. It is important to note that there are a number of assumptions made by Government in this measure around Business Rates but especially Council Tax (projected Council Tax Base, full use of the 4.99% referendum limit and an additional £150 in 2027/28 and 2028/29). It should be remembered though that the latter two, however, are still subject to local decision making at a later date and the Council is not assuming this additional £150 Council Tax increase in any of its financial plans at the current time.

Table 4 Core Spending Power

	2026/27	2027/28	2028/29	2029/30
	£'000	**£'000**	**£'000**	**£'000**
Government Grant Funding (as per Table 3)	**(106,314)**	**(84,864)**	**(62,317)**	**(15,243)**
Retained Business Rates	(6,666)	(6,819)	(6,957)	(6,957)
Settlement Funding	**(112,980)**	**(91,683)**	**(69,274)**	**(22,200)**

	2026/27	2027/28	2028/29	2029/30
	£'000	**£'000**	**£'000**	**£'000**
National assumption around Council Tax Requirement	(114,484)	(135,614)	(157,954)	(165,852)
Core Spending Power as per Government Calculation	**(227,464)**	**(227,297)**	**(227,228)**	**(188,052)**

7.6 As can be seen, the Council's Core Spending Power is the roughly the same across the three years of the settlement reflecting Government's policy of a funding floor in 2026/27 followed by cash flat settlements thereafter **(the differences being due to additional grant for Homelessness announced recently at the Final Settlement stage).** Again, it should be remembered that no figures have been provided for 2029/30. In a similar way to grant funding, Council Tax has been extrapolated from the 2028/29 working assumption of a 0.5% in increase in the base and a continuation of the 5% Council Tax referendum limit.

8. COUNCIL TAX 2026/27

8.1 Council Tax income is derived from the number of domestic properties in the Borough multiplied by the level of Council Tax set for each property according to their banding.

Council Tax Base

8.2 The Council Tax base is the number of properties in Bands A to H (adjusted for discounts, exemptions and premiums) in the borough expressed as an equivalent number of Band D units.

8.3 Two new Council Tax measures have been factored into the Council Tax Base calculation in 2026/27: that the Council Tax Reduction Scheme is reduced by 10% and a 100% Second Homes Premium is applied in the Borough.

8.4 At its meeting on 13 January 2026, Leadership Team agreed a revised local Council Tax Reduction Scheme for Kensington & Chelsea. The changes meant that awards under the previous scheme are to be reduced by 10%, i.e. claimants would therefore be required to pay at least 10% of their Council Tax charge from April 2026. The scheme was subsequently approved by full Council on 28 January 2026.

8.5 The Levelling Up and Regeneration Act 2023 allowed councils to apply premiums to Council Tax after a property has been empty for one year. The Council has previously implemented this and financial plans assume the Council will continue to charge this premium in 2026/27.

8.6 This legislation also gave Councils the power to apply a premium of up to 100% of the Council Tax to owners of second homes in the Borough. The Council has already made the resolution confirming this intention (more than 12 months prior to the financial year in which the changes will come into effect). The budget proposals released for consultation by Leadership Team following its 12 November 2025 meeting included a 100% Second Homes Premium. The Council Tax Base that has been calculated to set Council Tax in this report confirms it is being applied from April 2026 **at 100%.** These two decisions ensure residents make a positive contribution to the Council's budget, and, therefore, their services.

8.7 The Executive Director of Resources has now calculated the Council Tax Base under delegated authority on behalf of the Authority as being 106,506 for the year 2026/27. This is an increase of 7,900 from 98,606 in 2025/26 based on a collection rate of 96.50%.

Council Tax Band D Charge

8.8 Nationally, the referendum threshold detailed in the draft Local Government Finance Settlement allows for an increase of up to 2.99%. In addition, there will be a further 2% increase, for the element that is referred to as the Adult Social Care precept and the additional income raised will contribute towards meeting the demands for adult social care services.

8.9 For referendum purposes, when the Council's Band D charge is compared to last year's, the increase must be no more than 4.99% (otherwise the Council would be required to hold a referendum).

8.10 Kensington & Chelsea's council area also has Garden Square levies which are treated as special expenses as part of the Council's tax base and Band D Council Tax level for referendum purposes. There is only one Band D levy, so, to calculate the Council overall charge, the total Gardens Squares levy is spread across the whole of the Council's tax base and added to the Council's element to arrive at a Band D charge. In effect, if the Garden Squares set their levies above 4.99% then the Council's own Council Tax must be set below it to remain within the referendum limit.

8.11 The 2026/27 Garden Square levies total is £2.472million compared to £2.298 million for 2025/26. Actual council tax levels for properties liable for a garden square levy are shown in Appendix 10 and the amount residents actually pay will be the 4.99% increase plus their separate specific garden square levy.

8.12 The draft budget for the Council is based upon Council Tax being increased by 4.99%, the full referendum limit, and this is what was included in the Budget consultation.

8.13 Although the decision to increase Council Tax is difficult, implementing the full increase will enable the Council to generate an additional £5.5m of income to help protect the services our residents value and rely on. Despite this increase, Council Tax levels will remain in the lowest quartile in London.

Council Tax Income

8.14 As said above Council Tax income to be included in the Council's budget is of the Council Tax Base multiplied by the Band D charge.

8.15 The average Band D charge including Garden Squares will increase from £1,101.21 to £1,156.14, an increase of £54.93 (£1,079.08 and £1,132.93 respectively excluding Garden Squares).

8.16 Full details are set out in Appendix 10 which sets out the increase for each band.

9. GREATER LONDON AUTHORITY PRECEPT 2026/27

9.1 In addition to Kensington and Chelsea, the Council Tax Base is also used by the Greater London Authority (GLA) to set their budget as well. The GLA Band D Council Tax figure for 2026/27 has been published for consultation as £510.51, which is a 4.10% increase or £20.13. The final 2026/27 precept will be issued after the London Assembly meets on 26 February 2026.

Table 5 Greater London Authority Precept

Council Tax Band	Greater London Authority 2025/26	Greater London Authority 2026/27	Increase from 2025/26 to 2026/27	% of Dwellings in Band
A	£326.92	£340.34	£13.42	1.63%
B	£381.41	£397.06	£15.65	3.69%
C	£435.89	£453.79	£17.90	10.54%
D	**£490.38**	**£510.51**	**£20.13**	15.83%
E	£599.35	£623.96	£24.61	15.00%
F	£708.33	£737.40	£29.07	13.67%
G	£817.30	£850.85	£33.55	22.32%
H	£980.76	£1,021.02	£40.26	17.32%

9.2 The total Kensington and Chelsea Council Tax rates for each Band along with the percentage split of each Band are shown in the two tables below. The spread of dwellings across the bands is different to the London average and although the Council Tax level is expressed as a Band D equivalent, for Kensington and Chelsea, Band G has the highest percentage. Band G and

Band H together account for almost 40% of dwellings. Full details of Council Tax due, including the Garden Square levies, are set out in Appendices 8, 9, 10 and 11.

9.3 The Council Tax figures in Table 6 have been calculated including £2.472m for the total garden squares precept.

Table 6 Council Tax including garden squares

Band	Kensington and Chelsea	Greater London Authority	Total	% Dwellings in band
A	£770.76	£340.34	£1,111.10	1.63%
B	£899.22	£397.06	£1,296.28	3.69%
C	£1,027.68	£453.79	£1,481.46	10.54%
D	**£1,156.14**	**£510.51**	**£1,666.65**	15.83%
E	£1,413.05	£623.96	£2,037.01	15.00%
F	£1,669.97	£737.40	£2,407.38	13.67%
G	£1,926.89	£850.85	£2,777.74	22.32%
H	£2,312.27	£1,021.02	£3,333.29	17.32%

Table 7 Council Tax excluding garden squares

Band	Kensington and Chelsea	Greater London Authority	Total	% Dwellings in band
A	£755.28	£340.34	£1,095.62	1.63%
B	£881.16	£397.06	£1,278.23	3.69%
C	£1,007.05	£453.79	£1,460.83	10.54%
D	**£1,132.93**	**£510.51**	**£1,643.44**	15.83%
E	£1,384.69	£623.96	£2,008.64	15.00%
F	£1,636.45	£737.40	£2,373.85	13.67%
G	£1,888.21	£850.85	£2,739.06	22.32%
H	£2,265.85	£1,021.02	£3,286.87	17.32%

9.4 Leadership Team is asked to recommend to Council on 25 February 2026, subject to receipt of final precepts and levies including Garden Squares special expenses the final budget figures and the Council Tax resolution (**Appendix 8**) and that delegation to be given to the Executive Director of Resources to take account of any changes arising from these.

10. BUSINESS RATES

10.1 Business Rates are set nationally. The value of business premises is determined by the Valuation Office and the Government set the multiplier which specifies the pence per pound paid in tax. From April 2026 the rateable value of all non-domestic properties in England was updated to reflect the property market as at 2024.

10.2 The Chancellor announced during her Budget Statement that for 2026/27 the number of Business Rates multipliers would increase from two to five with a new retail, hospitality and leisure (RHL) multiplier set 5p below the relevant national multipliers for qualifying properties with rateable values below £500,000, funded by a high-value multiplier 2.8p above the national standard multiplier for properties with rateable values of £500,000 and above.

10.3 The threshold between the standard and small multipliers (less than £51,000 Rateable Value (RV)) will not change. The aim is to provide long-term stability for the high street, removing the temporary RHL relief scheme.

10.4 The Non-Domestic Rating Multipliers for 2026/27 will be as follows in the pound:

- Small business RHL multiplier: 38.2p
- Small business non-domestic rating multiplier: 43.2p
- Standard RHL multiplier: 43.0p
- Standard non-domestic rating multiplier: 48.0p
- High-value non-domestic rating multiplier: 50.8p

10.5 Business Rates in Kensington and Chelsea are expected to generate £376.1m in 2026/27. After deducting Central Government's and the GLA's share (33% and 37% respectively), the budget assumes the Council will receive £112.9m in business rates but retain just £6.7m after a tariff payment is made to Government (this is calculated by Government as being how much the Council needs to keep for providing services to its residents).

11. COLLECTION FUND

11.1 The Collection fund is a separate account which receives the income collected from Council Tax and Business Rates payers and then makes payments to the Council, GLA and Government. The Local Authorities (Funds) (England) Regulations 1992 (as amended) require an annual projection of the balance on 31 March each year. This is because precepting authorities share surpluses/deficits and need to take account of these when setting their budgets.

11.2 The projected in-year surplus (Council share) on the collection fund at the 31 March 2026 is confirmed as being £1.386m.

12. FEES AND CHARGES

12.1 Income from fees and charges and rental income in 2026/27 will provide around a quarter of the Council's total funding. The full set of proposed fees and charges for 2026/27 were presented to Leadership Team on 12 November 2025 and then launched for external consultation. 59% of respondents supported the proposals put forward to raise fees and charges.

12.2 Since November, the only change is that leasehold fees and charges, previously omitted from the schedule, are now included for completeness. Appendix 15 shows the full schedule.

13. SUMMARY BUDGET CHANGES

13.1 In previous sections, this report has set out the changes in the different elements of the Council's budget, and these are now summarised in Table 8 which sets a robust and balanced budget. The full 2026/27 budget and Council Tax levels can be seen in Appendix 1.

Table 8 2026/27 Budget Movements

£'000	**2026/27**
Budget Pressures	9,732
Inflation	10,887
Pay Award	3,800
Capital Financing	2,539
Collection Fund Reserve drawdown falls out	2,000
Increase in Council Tax Base	(766)
Fees and Charges uplifted	(2,819)
Change in Employer Pension Fund Contributions	(7,598)
Reduction in concessionary fares assumption	(552)
Total Savings	(21,068)
Impact of Funding Reform	17,395
Additional HPG announced in final settlement	236
Budget Gap after savings proposals before decisions on Council Tax	**13,786**
5% increase in Council Tax	(5,429)
Reduction in Local Council Tax Support Scheme	(441)
Introduction of Second Homes Premium	(7,916)
Budget Gap after current assumptions on Council Tax	**0**

14. LOOKING FORWARDS – BEYOND 2026/27

14.1 The Medium-Term Financial Strategy was published in July 2025. The aim of the strategy is to:-

14.2 Plan the Council's finances over the period 2026/27 to 2029/30, taking account of both the local and national context.

14.3 Provide the financial framework for the Council's priorities and ensure that these priorities drive the financial strategy and the allocation of financial resources; and,

14.4 Manage and mitigate future budget risks by forward planning and holding reserves as appropriate.

14.5 The Council's medium term financial position is by necessity fluid and responds to reflect the changing circumstances faced by the Council, updated priorities and ambitions, the latest budget position and a range of external factors such as economic conditions and Government legislation. The position will likely continue to change as assumptions are updated in light of new information ahead of budget setting in the years ahead.

14.6 Although a robust and balanced budget is being proposed for 2026/27 subject to approval by Council on 25 February 2026, the financial position beyond 2026/27 is extremely challenging due to the announcements in the Government's Fair Funding Review. At present the Council's overall budget planning position indicates a forecast budget gap for 2027/28 of around £21.1m. This does not include any assumption of the Council levying additional Council Tax above and beyond the usual Council Tax referendum limit as allowed by Government in the Settlement.

14.7 The financial position remains subject to a number of uncertainties (although some of these have been removed due to the 3 year Settlement) and a number of factors could change the position both in a favourable and adverse way. For example, if cost pressures in temporary accommodation and other services continue, inflation continues to remain elevated and previously committed savings are not achieved to plan this will adversely affect the Council's financial position.

14.8 The forecast for future years (2027/28 onwards) makes the following key assumptions:

- Transitional protection for the Council's Core Spending Power falls out in its entirety in 2029/30,
- Average contract inflation of 3% in 2027/28 and 2% each year thereafter,

- On average, fees and charges to be increased by 2% each year,
- Pay Awards of 2% per annum,
- A modest increase in the Council Tax base each year (on average a 0.5% increase in properties per annum),
- It is assumed that any reductions in service specific grants can and will be contained within service budgets,
- Spending pressures are recognised and risks have been highlighted in Section 18,
- All savings are achieved to plan,
- Council Tax and Adult Social Care Precept increases of 3% and 2% respectively,
- No planned use of reserves to balance the budget; and General Fund working balance remaining at £10m with no planned use,
- Empty Homes Premium continue to be levied at the same rate(s)
- Second Homes Levy continues at 100%.

Table 9 2027/28-2029/30 Budget Position

£'000	2027/28	2028/29	2029/30
Budget Pressures	3,260	3,111	3,000
Inflation	7,739	5,647	5,760
Pay Award	2,631	2,683	2,737
Capital Financing	933	933	933
Increase in Council Tax Base	(629)	(695)	(767)
Fees and Charges uplifted	(1,335)	(1,362)	(1,389)
Change in Employer Pension Fund Contributions	0	0	7,800
Settlement Funding Assessment uplifted by inflation	0	0	(1,539)
Total Savings	(6,972)	(1,551)	(1,363)
Impact of Funding Reform	**21,297**	**22,409**	**47,074**
Budget Gap after savings proposals before decisions on Council Tax	**26,924**	**31,175**	**62,246**
5% increase in Council Tax	(6,144)	(6,451)	(6,773)
Budget Gap	**20,780**	**24,724**	**55,473**

14.9 Since 2024, the Council has taken a more corporate, centralised approach to delivering savings across the Council to ensure greater coordination and alignment and established a Savings and Transformation Programme.

14.10 The programme provides corporate infrastructure to develop and track the development and delivery of savings, as well as additional drive to move programmes forward. It has support delivery of significant cross-cutting and departmental savings over the last few years, including the planned £21.1m for the 2026/27 financial year.

14.11 Executive Directors have led corporate workstreams to transform services against the following themes:

- Better ways of working,
- Being more businesslike,
- Changes to service delivery, and
- Using our money differently.

14.12 As well as this, “Budget Challenge” sessions took place to scrutinise existing spend and contributed towards the savings already committed for 2026/27 and beyond. At these meetings the relevant Lead Member and Executive Director discussed their budget proposals and were challenged by the Lead Member for Finance, Digital, and Efficiency, Section 151 Officer, and Chief Executive. This helped increase confidence further in savings proposed and that the budget the Council is setting will be robust.

14.13 This approach has enabled the Council to propose £31m of new savings over four years. This work will need to continue in order to ensure a balanced budget is set for 2027/28 and beyond.

14.14 During 2026/27, the Council is focused on developing a new targeted operating model that will guide how resources are prioritised across the Council. This will sit alongside a vision for the sort of council Kensington and Chelsea wants to be, which will help us review all services through the same lens and unlock longer-term transformation and savings.

14.15 We are developing a multi-year change programme to support the delivery of the target operating model, as well as supporting the work to rebuild and improve the Council’s digital infrastructure that has started as part of our Cyber recovery programme.

14.16 A full update of the Council’s Medium-Term Financial Strategy including indicative savings from this work will be published in summer 2026 and proposals for the 2027/28 budget will need to be developed by Autumn 2026 to begin consultation with both internal and external stakeholders.

15. OPTIONS, ANALYSIS AND PROPOSALS

15.1 This report represents the outcome of the budget review process for 2026/27 for recommendation to Full Council on 25 February 2026. However, at this point it remains the case that until Full Council sets the budget later this month, the 2026/27 budget has not been agreed, meaning that a range of alternative options remain open to Members, for both the capital and revenue budget.

15.2 The Leadership Team can amend the proposed revenue budget and Council Tax as set out in this report. However, any amendments to the budget must ensure that it continues to meet the Council's statutory requirement for a robust and balanced budget.

15.3 There are a number of areas where Leadership Team could choose to consider different scenarios for the budget and recommendations to Full Council, such as:

15.4 Increase/reduce the level of Council Tax for 2026/27. Increasing Council Tax above the currently assumed 4.99% (including the Social Care Precept) would require the Council to hold a referendum. This is not recommended. Setting Council Tax below 4.99% would mean further savings or additional income would be required to keep the 2026/27 budget in balance.

15.5 Deleting or reducing budget savings proposals, subject to considering the impact on the overall budget. There would need to be compensating offsetting proposals to deliver a balanced budget.

15.6 Considering and substituting alternative budget savings proposals, whilst taking into account the time constraints required to develop these, undertake public consultation (where necessary), and meet statutory deadlines for the setting of Council Tax.

15.7 Choose not to apply the 100% premium of Council Tax to owners of second homes in the borough **from 1 April 2026** and/or change the planned 10% reduction in the Council Tax Reduction Scheme. The budget includes £8.4m of additional income from these changes from 2026/27 onwards and any change in the assumption reducing the level of income generated would need to me offset by alternative savings or greater income generation.

15.8 Changing other assumptions within the financial plans such as assumptions about budget pressures, the use of reserves, the level of the centrally held contingency and inflation expectations. This could potentially provide a benefit to the 2026/27 budget, but this would be a one-off measure and could subject the Council to further risk and increase savings needed in future years.

16. TREASURY MANAGEMENT STRATEGY

16.1 The areas of Treasury Management and Prudential Borrowing are integral to consideration of the Council's Budget and also need to be considered so that Members can assess that capital investment plans are prudent, affordable and sustainable. Members' attention is drawn therefore to the Treasury Management Strategy for 2026/27 and details for Prudential Borrowing including the Prudential Indicators which are set out in a separate report elsewhere on the agenda.

17. CAPITAL PROGRAMME

17.1 The Capital Strategy was refreshed and approved by Council in July 2025 and provides a framework for the allocation of resources to fund capital projects. The Council's ability to prudentially borrow to fund future capital schemes is limited by the financial pressures which the Council continues to face. Information regarding the revenue implications of prudential borrowing is provided in the separate Treasury Management Strategy.

17.2 The total revenue cost of borrowing costs to deliver the Capital Programme in 2026/27 is expected to be approximately £15.1m (£9.0m external interest payable and £8.6m minimum revenue provision (MRP), partly offset by £2.5m investment income on the Council's general fund balances). Although this is an overall increase from the previous year this is £1.5m lower than had been assumed before review and subsequent revenue saving. These figures exclude the revenue impact of any borrowing relating to the capitalisation direction which will be funded by the Civil Claims Reserve.

17.3 The Council has been continuing to review its capital programme processes to improve its ability to prioritise the programme moving forward, to improve the accuracy of its forecasting through critically considering its capacity in terms of deliverability, and to therefore ensure the programme is deliverable and reflects the priorities in the Council Plan. The revenue impact of the Council's capital investment plans has been calculated predominately on the schemes in the capital programme and not the pipeline.

17.4 The Capital Programme Project Management Office (PMO) has continued its work to ensure a tight grip on projects and to control and schedule entry into the programme at the right time. This work continues to focus on an annualised bidding process and embedding the remit of both the programme and pipeline going forward.

17.5 The Capital Programme contains live projects which are currently being delivered and may span over several years. The Capital Pipeline is a schedule of future projects that are confirmed to have sufficient justification to proceed with project development but are not currently at a point

appropriate for delivery. There will be no assumption on any borrowing costs until these schemes are moved into the programme.

17.6 Only projects included within the Capital Pipeline should be considered for movement into the Capital Programme to ensure that appropriate governance measures are maintained and that projects are reviewed in the context of the whole programme.

17.7 Since the report to Leadership Team on 12 November there has been a detailed Lead Member Review of the General Fund Capital Programme which has resulted in a number of amendments that have now been included in the programme for this report. Table 10 below summarises all movements to the General Fund Capital Programme since the original budget was set in March 2025:-

Table 10 General Fund Movements arising from Monitoring and the Lead Member Capital Review

Description	2025/26 Forecast £'000	2026/27 Forecast £'000	2027/28 Forecast £'000	2028/29 Forecast £'000	Total 2025-29 Forecast £'000

Capital Programme as per 2026/27 Budget Setting	**75,239**	**71,212**	**36,539**	**3,159**	**186,150**

17.8 New capital investment is typically focused on investment into the borough's highways, transport and open spaces, housing, schools and early year's provision and Council buildings and digital infrastructure. This includes for

health and safety requirements, rolling maintenance programmes and support to deliver the Customer Access Strategy and Digital Strategy.

17.9 The total capital programme is £616.621m for 2025/26 to 2028/29, of which £186.150m relates to the General Fund for which details are included in this report and £430.471m relates to the Housing Revenue Account, details for which are set out in the revised 30-year Business Plan which is a separate report on this agenda.

17.10 Capital investment is summarised in Table 11 by Directorate and in full in Appendix 12.

Table 11 Capital Expenditure Programme 2025/26 to 2028/29

Service	2025/26 Budget £'000	2026/27 Budget £'000	2027/28 Budget £'000	2028/29 Budget £'000	Total Capital Programme £'000

17.11 The funding of the Capital Programme is delegated to the Executive Director of Resources as Section 151 Officer and Table 12 and 13 summarises the indicative funding sources of the programme. It will remain the responsibility of the Executive Director of Resources to fund the programme in year in the most cost-effective way and in line with the Capital Strategy.

External Funding:					
Capital Grants Reserve	0	0	0	0	**0**
Capital Grants & Contributions	(9,158)	(49,558)	(51,172)	(14,756)	**(124,644)**
S106/CIL Contributions	0	0	0	0	**0**
Earmarked Reserves	0	0	0	0	**0**
Capital Receipts Reserve	(3,447)	(12,271)	(12,234)	(10,748)	**(38,700)**
Major Repairs Reserve	(5,141)	(5,141)	(5,420)	(5,569)	**(21,271)**
Revenue Contribution to Capital	(11,804)	(18,968)	(22,263)	(20,908)	**(73,943)**
Borrowing Requirement	(33,141)	(27,003)	(40,234)	(71,535)	**(171,913)**
Total Funding Sources	**(62,691)**	**(112,941)**	**(131,323)**	**(123,516)**	**(430,471)**

17.12 Borrowing is regulated by the 'Prudential Borrowing Code'. The basic principle is that capital expenditure plans must be affordable, prudent and sustainable and that prudential indicators are used to support decision making. Further details are set out in the Treasury Management Strategy, including the Council's Minimum Revenue Provision Policy for 2026/27. The Minimum Revenue Provision is a charge that Councils are required to make in their accounts for the repayment of debt.

17.13 The role of the pipeline is to give a schedule of potential future projects that are confirmed to have sufficient justification to proceed to project development. The current draft Capital Pipeline is summarised in Table 14 below and detailed at Appendix 13.

Table 14 Capital Pipeline 2025/26 to 2028/29 and future years

Capital Pipeline	2025/26 Budget £'000	2026/27 Budget £'000	2027/28 Budget £'000	2028/29 Budget £'000	Total Capital Pipeline £'000
Capital Pipeline	2,727	50,218	155,134	25,840	**233,919**

17.14 The Capital Pipeline reflects the net impact of all the considerations arising from the work and consultation undertaken through the Lead Member Capital Review. Each year, there will be a requirement for some new capital investment into the Borough's assets, through the Capital Programme. All new scheme proposals are first held within the Capital Pipeline for development, prioritisation in line with the Council Plan and production of Business Case before proposals are agreed for transfer to the Capital Programme for delivery.

17.15 The proposed Capital Expenditure Programme 2025/26 to 2028/29 at Table 11 above is inclusive of the proposals for additions to the Capital Programme from the Capital Pipeline based upon using a framework that prioritised projects that demonstrate:

- a health and safety or statutory obligation,
- are in contract,
- are fully grant funded where that funding can only be spent on that project or have a strong spend-to-save business case, and are
- specifically referenced in the Council Plan.

17.16 The Capital reserves opening balance at 1 April 2025 was £114.071m. This position includes capital grants, S106 and CIL contributions, and earmarked reserves. At the end of 2025/26, the net forecast movement against reserves in-year is a decrease of £10.819m with a resulting balance of £103.252m. This position is based on a combination of assumptions relating to new capital grants and receipts, and the use of reserve balances to finance the capital programme, as summarised in Table 15 below. This position is however subject to change as the year progresses.

Table 15 Forecast 2025/26 Capital Reserve Balances

Reserve	Opening Balance £000	Forecast Net Movements £000	Forecast Closing Balance £000
Capital Grants Unapplied	118	0	118
Capital Grants & Contributions	(24,630)	5,203	(19,427)

Total	**(103,252)**	**(87,984)**	**(77,235)**	**(77,235)**

17.18 The 2015 Spending Review announced the flexibility for local authorities to use capital receipts from the sale of non-housing assets to fund revenue set up costs of service reform and transformation projects. This has been subject to a number of updates the most recent being 26 March 2025. Eligible projects are those which are designed to generate ongoing revenue savings in the delivery of public services and/or transform service delivery to reduce costs or demand for services in future years. In November 2024 the

Local Government Finance Policy Statement announced the extension of the flexible use of capital receipts to 2030.

17.19 To date the Council has not made use of this flexibility but potentially may do in future, as it could help alleviate some of the pressure on the revenue budget. Although any use would have to be considered in the context of reductions to the availability of resources to fund the capital programme. However, it could be an attractive option for funding implementation costs of schemes such as cloud-based IT systems which no longer qualify as capital expenditure. Any use of the flexibility will be reported through the quarterly finance monitoring reports to Leadership Team.

18. RISK MANAGEMENT

18.1 Although the overall position for 2026/27 is a balanced budget there are a number of inherent risks for next year and subsequent years.

Economic Factors

18.2 The state of the economy can affect Local Authorities in a number of ways. Currently the global and UK economy is going through challenging times with inflation remaining persistently high, higher interest rates, as well as minimal economic growth.

18.3 The Council's focus is the impact of economic conditions on the cost of services; this includes inflation and interest rates but also the demand for services such as social care and homelessness. Services continue to consider the potential of factors affecting the economic conditions.

18.4 Although inflation has been falling in recent years (but most recently it increased from 3.2% to 3.4% between November and December 2025) it is still above the Bank of England's target rate of 2%. The Council's financial plans assume inflation on pay and contracts being in line with that experienced in 2025/26 but reducing post 2026/27 towards 2%. If it remains higher this would be expected to impact on many of the Council's contracts and increase the budget gap in future years.

18.5 The Bank of England base rate was reduced to 4% at the August Monetary Policy Committee (MPC) meeting and again by 0.25% to 3.75% in December 2025. The MPC remains sensitive to heightened uncertainty in the economic environment, particularly around inflation expectations. Market consensus is for a small number of gradual reductions in 2026.

18.6 Forecasting Publics Work Loan Board (PWLB) rates (which track UK Government bond yields) is fraught with difficulty but they are expected to be fairly flat (5-6%) over the next three years. Prospects for global growth have weakened and this looks set to dampen medium-term UK government yields pending clarity on inflation trends. Offsetting this, long-term gilt yields are

considered to be elevated reflecting uncertainty over US economic, monetary and fiscal policy expectations, and potential increases in UK and global bond supply.

18.7 Higher rates increase the cost of borrowing and therefore there can be a revenue impact of the Capital Programme. However, it will also increase returns on the Council's cash balances which will be invested through applying the Treasury Management Strategy elsewhere on this agenda.

18.8 The UK economy has again endured a challenging year with the most recent figures showing growth currently being relatively flat at 1.5% with an average of the same level of growth expected each year 2026 to 2029.

18.9 The other main concern is the potential impact on the UK economy from escalating global instability. The uncertainty around the geopolitical situation in the Middle East, on-going war in Ukraine, the impact of the current administration in the USA, potential trade wars and the UK's trading relationship with the European Union could increase the volatility of both inflation and the ability of the UK economy to grow.

Local Authority Funding for Years Beyond 2026/27

18.10 Although now known, providing certainty for the next three years, the Fair Funding Review has had a significant detrimental impact on the Council's finances.

18.11 Transitional funding floor arrangements are in place but even with these the Council's budget in 2027/28 and 2028/29 is still likely to be in deficit by over £20m in these two years. It is not known whether any element of protection will remain at the end of the 3-year Settlement period (2029/30 onwards). In 2029/30, for prudence, it has been assumed at this stage that the transitional arrangements in the form of a Funding Floor Grant will fall out in its entirety.

18.12 The new funding formula now in place uses "notional" rather than actual Council Tax levels meaning councils that do not increase Council Tax by as much as the government expects are penalised by how the formula works. Given its low levels of Council Tax, Kensington and Chelsea has been given special dispensation to increase Council Tax higher than the current referendum limit in 2027/28 and 2028/29 (£150 each year at a Band D equivalent has been assumed by Government).

18.13 The MTFS does not currently assume these exceptional increases in its budget as this will be a decision for councillors in future who will have to weigh up the service needs of residents versus the impact of big increases of Council Tax on them.

Temporary Accommodation Pressures

18.14 The Council currently has just under 2,000 households in temporary accommodation. The available social housing stock in the borough is over 18,000 units, of which 7,000 are council owned.

18.15 Although the number of households in temporary accommodation has been relatively stable over the last few years, expenditure remains high largely due to the rising costs of landlord rents caused by limited supply (high mortgage rates and taxation changes could tempt landlords to leave the market) and competition from other local authorities and more lucrative holiday rental alternatives. Other comparatively small contributing factors include the void period between moves and costly storage and removal costs.

18.16 The service has focussed on prevention measures to reduce the pressure on Temporary Accommodation through the continued use of incentive payments to move households into cheaper private rented sector accommodation.

18.17 Growth of £2.5m was included in the 2025/26 budget. Further growth of £5m has been built into the Medium-Term Financial Strategy for next year in recognition of the cost pressures being experienced and reported as part of 2025/26's in-year revenue monitoring processes.

Demographic and Demand Pressures

18.18 These pressures particularly impact supporting vulnerable children and adults. They have been reviewed and forecast and the budget includes £2.5m for them (£1.5m in Adult Social Care and £1m in Children's Services). The estimates take account of historical trends, current intelligence, future forecasts, and external advice but there is a clear risk that circumstances will change and cost implications exceed expectations resulting in a budget shortfall. The budget therefore also includes contingency to help guard against these risks.

Delivery of Savings

18.19 The Council is in the position to set a balanced budget for 2026/27 in part as a result of £21.1m of planned budget reductions. Due diligence has been carried out so the Council is confident these can be achieved but will continually monitor the delivery of these through the year as part of the quarterly financial management reports to Overview and Scrutiny Committee and Leadership Team to ensure that any emerging risks can be identified early and action taken to mitigate them.

Dedicated Schools Grant (DSG) Deficit

18.20 The financial position of overall school funding is challenging. The DSG had a deficit carry forward from 2024/25 of £3.287m. This is expected to increase to £3.532m at the end of March 2026. The trend in increasing pupils with high needs and associated costs is likely to continue putting further pressure on high needs budgets.

18.21 It should be noted that DSG deficits are currently ringfenced from Local Authorities wider finances meaning that they do not have to cover any DSG deficit from their general fund resources, known as the "statutory override".

18.22 This ringfence has recently been extended to March 2028 (from March 2026). Government, in its November 2025 Policy Statement, promised to set out further details on its plans to support local authorities with their historic deficits in the Final Settlement.

18.23 **The Final Local Government Finance Settlement was published on 9 February 2026, and a new High Needs Stability Grant was announced that will cover 90% of the Dedicated Schools Grant (DSG) deficit as at 31 March 2026. It is expected that this will be circa £3m for Kensington and Chelsea. The grant will be paid in Autumn 2026 and is subject to verification of eligible costs and each local authority submitting and securing the Department for Education's approval of a local SEND reform plan.**

18.24 It is not known at this point, what, if any, support will be provided after this year so any further overspends on High Needs DSG could potentially detrimentally impact the Council's revenue budget or reserves position in future years.

18.25 The Council's last DSG Deficit Management Plan was produced in partnership with schools and agreed with the Schools Forum in January 2024. An update of the deficit management plan is on hold until the publication of the government's Special Needs White paper and the funding implications are understood.

Accounting and valuations of Pooled Investment Funds

18.26 From April 2018, local authorities were required to comply with the new standard IFRS 9. This would have meant that the gains and losses arising from the changes in the fair value of some categories of investment would consequently impact the general fund. The temporary statutory override that was brought in meant councils could transfer any gains or losses to an unusable reserve rather than charge Council Taxpayers through the revenue budget.

18.27 This override, which was due to expire 31 March 2025, has been extended to 31 March 2029.

18.28 The Council has one investment as part of the treasury management strategy which could be impacted by this. If the override does end in 2029 the Council would need to make up the loss funded from the contingency budget or a drawdown from reserves during 2029/30. The cost (or gain) for this in that year is dependent on market forces between now and then but the cost in the Council's latest Statement of Accounts as at 31 March 2025 was £1.5m.

Cyber Incident November 2025

18.29 Although the outcome of the government's funding proposals has had significant consequences on 2026/27 budget setting, other factors (which include the cyber incident) are also expected to affect the Council's finances in a material way.

18.30 The cyber incident which occurred on the 24 November 2025 has affected the whole of the Council's operations to varying degrees, but one particular piece of work has been severely impacted. The Residents Connect Programme was brought in to deliver savings to the Council by developing systems and processes such as document recognition and in parking. Systems access disruption and stakeholder availability has led to both the backlog of cases increasing at the same time as staff having to be re-deployed to deal with the cyber incident itself. It is estimated that around £700,000 of the saving anticipated will now not be achievable until 2027/28

18.31 The collection of Council Tax and Business Rates may also be impacted by the cyber incident depending on how quickly systems are up and running again. It is not possible to assess this at the present time.

18.32 Work to recover from the cyber incident is on-going and the full effects of it will not be known for some time. However, it will be made up of a combination of additional support to recover from the incident and then additional investment in new systems moving forward.

18.33 The Council's most recent reserves forecast has available around £22m of balances in our Budget Stabilisation, Budget Carry Forward, and Contingency reserves, some of which could be used to fund one-off costs relating to recovery and modernisation following the cyber incident.

Reserves

18.34 The nature of risks and uncertainties means it is therefore important that the Council takes a prudent approach to assumptions in both next year's budget and medium-term financial plans to hold sufficient levels of contingency funding within the budget for dealing with unforeseen circumstances in the

short term. Levels of reserves provide a safety net in the event of more significant negative impacts on Council funding in the medium term.

18.35 Section 25 of the Local Government Act 2003 requires the Chief Financial Officer to report the robustness of estimates and the adequacy of reserves when determining their budget and level of Council Tax. This report therefore includes the advice of the Executive Director of Resources as Section 151 Officer as set out in “Financial and Resource Implications” section.

18.36 Under the 2003 Act above, the Section 151 Officer has to be satisfied that the level of the General Fund working balance is adequate. It is proposed that the General Fund balance be maintained at its target level of £10 million for 2026/27, which is the same level as 2025/26.

18.37 The Executive Director of Resources has also reviewed all earmarked reserves (monies set aside for a specific purpose). Details of the latest estimated position and the forecast for the next three years is set out in Appendix 2.

18.38 The Executive Director of Resources following consultation with the Lead Member for Finance, Digital, and Efficiency, can approve all contributions to, and appropriations from, reserves up to £250,000. Any such approvals will be included in quarterly monitoring reports to Leadership Team for noting. Amounts in excess of £250,000 must be approved by Leadership Team, subject to any limitations set by the Council in the approved budget framework. Any such approvals will be included in quarterly monitoring reports to Leadership Team for approval.

19. CONTINGENCY AND CENTRALLY HELD BUDGETS

Contingency

19.1 Historically the Council has maintained a central contingency budget for any unforeseen one-off budget pressures, and this has been available to manage other risks should they materialise, such as slippage in delivery of savings, unexpected events or additional revenue costs of capital schemes and new burdens. In 2026/27 the Council has set aside £1.2m specifically for any unforeseen pressures within social care and £3.7m as a general corporate contingency budget.

19.2 Although the £3.7m corporate contingency budget can ultimately be used for any unforeseen pressures that may materialise during 2026/27, Table 17 below shows a breakdown of how the Council has broken down the estimate of it in total. The social care contingency will only be used to fund pressures in Adults and Children’s social care.

Table 17 Contingency Breakdown

Contingency Breakdown	**£'000**
Unforeseen Pressures	1,550
Change in economic conditions	500
Slippage in Savings	1,350
TMO Management Fee	300
Corporate Contingency	3,700
Social Care Contingency	1,227
Total Contingency	**4,927**

Centrally Held Budgets

19.3 Contract inflation remains a key area of concern given the current economic climate. As part of the budget setting process officers have undertaken a detailed review of all contracts by service and it is estimated around £9.8m will be needed to manage these pressures in 2026/27, of which £4.2m relates to pressures within social care. These will be held centrally with services drawing down these budgets during the year as required.

19.4 The remainder of the budgets held centrally are made up of provision for a 3.2% pay award (£3.8m) and corporate savings which are still to be allocated out to services.

19.5 Table 18 below shows the breakdown of this budget.

Table 18 Centrally-held Budgets

	£'000
Social Care related inflation pressures	4,241
Other contract inflation	5,603
Pay Award	3,800
New savings to be allocated	(550)
Previous savings held centrally	(139)
Total Centrally Held Budgets	**12,955**

19.6 The Council also holds additional usable unearmarked reserves, including the Budget Stabilisation Reserve and Special Projects Reserve. These are one-off in nature and therefore should not be used to fund ongoing budget pressures.

19.7 These various provisions will protect the Council's General Fund balance, for which the plan is to maintain at £10m, in line with Council's policy. Any contingency provision that is not needed will be added to one of the Council's reserves to deal with any future fluctuations.

20. LONDON-WIDE PAYMENTS

20.1 The Council contributes to a number of London-wide services and some of these contributions for 2026/27 have now been confirmed. As can be seen in Table 19, the total budget needed for London-wide levies is expected to be around £13.4m.

20.2 The most significant levy relates to concessionary fares and has been confirmed at £8.9m for 2026/27. The levy is based on journey numbers per London borough and is an increase of £776k compared to 2025/26. This increase for 2026/27 is a result of journey numbers continuing to return to pre-COVID numbers. This is £552k lower than had been assumed in the Council's original financial plans and this reduction has gone towards setting a balanced budget for 2026/27.

20.3 **The Garden Squares and the London Boroughs Grant Scheme have also confirmed their levies. The figures for the other bodies in the table though are based on estimates. As variations to the estimated numbers are not expected to be material, any levies being agreed above them can be comfortably managed in 2026/27 through the flexibilities outlined by the Section 151 Officer in Section 24 of the report.**

Table 19 London-wide Levies

Levy	**2026/27 £'000**
London Boroughs Grants Scheme	106
Environment Agency	245*
London Pensions Fund Authority	1,467*
Garden Squares	2,472
Taxi cards	254*
Concessionary fares	8,849
Total	**13,393**

***Due to the timing of publishing this report these are estimated figures which are to be confirmed by the levy authority before the start of the 2026/27 financial year**

21. SCHOOLS BUDGET

21.1 The total budget delegated to schools in 2026/27 is £92.8m (after the agreed transfer to the high needs block) which is an average 1.9% per pupil

increase. Every school is protected at 0% per pupil reduction compared to 2025/26 funding. Overall, there is a reduction of 49 pupils made up of 103 fewer pupils in primary schools and 54 more pupils in secondary schools. Schools will be supported in planning how to develop budget plans to deal with any reductions in pupil numbers.

21.2 The financial position of overall school funding is challenging. The trend in increasing pupils with high needs and costs is especially acute and continues to put further pressure on high needs budgets. The Dedicated Schools Grant deficit balance is covered in the risk section of the report, and a deficit management plan is in place to manage this.

22. CONSULTATION AND COMMUNITY ENGAGEMENT

22.1 This year's approach to the budget consultation aimed to ensure that residents, businesses and voluntary and community organisations had an opportunity to review and comment on the budget proposals. This is particularly important given the scale of financial challenge over the next few years so that all stakeholders could help shape the organisational implications of this.

22.2 The consultation was promoted via the Council's website and electronic noticeboards across the borough as well as through various channels of direct engagement such as the resident e-newsletter, business e-newsletter, VCS e-newsletter and statutory partners. Social media was also employed.

22.3 Full details were published on the Council's website which provided a link to the main on-line survey which ran for a period of 8 weeks from 13 November 2025 to 9 January 2026. A dedicated e-mail address (budget@RBKC.gov.uk) was set up for people to contact the Council if they wanted to ask questions or request any materials. Hard copies of the questionnaire and supporting information was also sent out on request.

22.4 Scrutiny Select Committees and the Overview and Scrutiny Committee formally scrutinised the budget proposals that related to their service areas at meetings in November and December.

22.5 This report was written with input from Senior Management but there was no requirement to consult more widely beyond the consultation already carried out as it mainly concerns assumptions and reporting on recent Government announcements.

22.6 As a result of the consultation steps above the Council received 433 responses to the budget proposals for 2026/27 and these are included in a separate report as Appendix 6 and members are recommended to consider the findings when making any final decisions.

23. LEGAL IMPLICATIONS

23.1 Section 25 of the Local Government Act 2003 requires the Council's Chief Financial Officer, to report on the robustness of the estimates made for the purpose of calculating Council Tax and the adequacy of council reserves.

23.2 The Council is required to set a balanced budget and the Local Government Finance Act 1992 requires the Council to make estimates of gross revenue expenditure and anticipated income, leading to a calculation of a budget requirement and the setting of an overall budget and Council Tax. The amount of the budget requirement must be sufficient to meet the Council's legal and financial obligations, ensure the proper discharge of its statutory duties, and lead to a balanced budget. The budget as proposed is balanced.

23.3 The Council should be satisfied that the proposals put forward are a reasonably prudent use of resources in both the short and long term, and that the interests of both Council Taxpayers and ratepayers on the one hand and the users of Council services on the other are both taken account of.

23.4 Under powers contained in the Localism Act 2011, the government can require compulsory referenda on Council Tax increases above limits it sets. For 2026/27, the provisional limit is 2.99%. The proposal is within the threshold, so, if it is approved, the Council will not be required to hold a referendum. The government has also provisionally announced an additional threshold of 2% for authorities with adult social care responsibilities.

23.5 Section 106 of the Local Government Finance Act 1992, applies to all Members where:

- they are present at a meeting of the Council, the Cabinet (Leadership Team) or a Committee and at the time of the meeting an amount of Council Tax is payable by them and has remained unpaid for at least two months, and,

- any budget or Council Tax calculation, or recommendation or decision which might affect the making of any such calculation, is the subject of consideration at the meeting.

23.6 If the above criteria apply, any Member shall, at the meeting and as soon as practicable after its commencement, disclose the fact that Section 106 applies to them and shall not vote on any question concerning the matter. Members are however still able to speak at the meeting. Failure to comply with these requirements constitutes a criminal offence, unless any such members can prove they did not know that Section 106 applied to them at the time of the meeting or that the matter in question was the subject of consideration at the meeting.

24. FINANCIAL, PROPERTY AND ANY OTHER RESOURCES IMPLICATIONS

24.1 These are addressed throughout the report. In addition, in setting the annual budget, Section 25 of the Local Government Finance Act 2003 requires the Executive Director of Resources (Section 151 Officer) to report to Members on the robustness of budget estimates and the adequacy of proposed financial reserves. The Executive Director of Resources comments that:

> "I am satisfied that the budget calculations are robust and that the 2026/27 budget takes account of all known liabilities and financial risks, but in particular it assumes that the Council will not rely on withdrawals from reserves to meet recurrent revenue commitments.
>
> For any unforeseen one-off pressures that materialise during 2026/27 a £3.7m corporate contingency budget has been set aside which will be able to fund these. Furthermore, there is £5.0m specifically for temporary accommodation, £2.5m for social care, £2.2m for demand pressures and growth items in other services, £4.2m for social care related inflation pressures, £5.6m for contract inflation in other services and £3.8m for pay inflation being held centrally that can be utilised.
>
> Current financial plans assume £30m of savings proposals including £21m in the 2026/27 budget alone. This level of savings is challenging although achievable and it is essential that these are delivered in full in 2026/27 for us to deliver on this balanced budget.
>
> The financial position of overall school funding is challenging with the Council's Dedicated Schools Grant (DSG) forecasting to have a deficit of £3.532m at the end of March 2026. Currently DSG deficits are ringfenced from Local Authorities wider finances and the government has confirmed this will remain the case until March 2028 **(along with a new High Needs Stability Grant being provided)**. However, if this changes, this could detrimentally impact the Council's 2028/29's revenue budget or reserves position.
>
> Section 18 of the report identifies the risks that potentially may impact the Council's budget. The effects for some of them are known (or at least can be estimated with some degree of accuracy and provided for) but some are less certain such as the final cost of the recent Cyber Incident.
>
> There are some significant costs arising from the cyber attack which affected the Council on 24th November 2025. There will be further costs in 2026/27, including from the cyber recovery programme. These costs have to be fully quantified, but it is planned that they will be met from Reserves.

I consider that current levels of unallocated reserves remain adequate. However, there are a number of demands on them including recovery from the cyber-attack on the Council and potentially also continuing costs arising from the Grenfell tragedy. In setting the level of general reserves and balances, account has been taken of the key financial assumptions underpinning the budget, the level of earmarked reserves and provisions, and the risks facing the Council over the medium-term. Financial Plans assume that over the planning period the Council is forecast to maintain a target of general balances of £10m. Maintaining general balances at this level is considered a minimum position.

Government's Fair Funding Review is now complete and factored into the 4-year forecast. This has a total impact of £108.5 reduction in external funding from government grants and retained business rates. The reduction is confirmed as £17.9m in 2026/27 and £61.3m over the three year Settlement period. Although I am only required to comment on the robustness of calculations and adequacy of reserves in 2026/27, large deficits are still currently forecast in 2027/28 and 2028/29 and will need to be brought under control in future budget rounds. Even though 2029/30's Fair Funding allocations are not yet known, transitional protection arrangements are due to fall out leaving the Council potentially with a much larger budget gap in that year. The Council and Government will need to work together to mitigate the impact of this on residents' services as these constitute extremely significant and challenging reductions in fundings."

25. HUMAN RESOURCES IMPLICATIONS

25.1 Several of the budget proposals including the voluntary redundancy scheme will have an impact on staff. Where they have there has been the appropriate consultation in line with the Council's HR policies.

26. EQUALITIES IMPACT ASSESSMENT AND IMPLICATIONS

26.1 The current cumulative impact of the proposed budget across all protected characteristics is assessed are as neutral overall. When jointly assessed against the individual protected characteristics, the proposals will have a neutral impact on all protected characteristics except for socioeconomic status and pregnancy and maternity which will be negatively impacted overall.

26.2 Of the 112 proposals the equalities impacts have been assessed as follows. The table in Appendix 6 provides more detail on each proposal's findings.

- 12 have been assessed by the service area as having a negative impact on our residents, services and staff.
- 19 as having a positive impact.

- 13 as a neutral impact.
- 46 have no equalities impacts.
- 22 have stated the equalities impacts are currently unknown.

26.3 This year the Council has had to make some difficult decisions on savings and therefore compared with previous years there are several proposals which will have a negative impact, primarily on socioeconomic status, age, disability and race. They will require close monitoring and mitigation as they include impacts on some of our most vulnerable residents living in deprivation.

26.4 The following proposals will have a negative impact or where the impact is currently unknown has the potential to have a negative impact:

26.5 Council Tax Reduction Scheme (CTRS) - The review of the CTRS could reduce financial support for low-income households, disproportionately affecting residents living in deprivation.

26.6 Introducing a self-funder administration fee for those receiving support from adult social care who use the Council's brokerage service may negatively impact residents with limited financial resources, particularly older adults and those with disabilities who already face high-care costs.

26.7 Reductions in digital inclusion initiatives risk increasing digital exclusion among residents who cannot afford devices or have sufficient internet access. This will disproportionately affect older people, residents with disabilities and those from lower socio-economic backgrounds.

26.8 Reduction in activities for young people. Although specific services have not yet been identified, reductions in youth provision are likely to impact young people from socio-economically disadvantaged backgrounds, who depend on local services for support and engagement.

26.9 Community Partnerships (Grants) – this proposal is currently consulting with partners to understand its full impact. It has been assessed as having a negative impact on residents due to reductions in services where alternatives cannot be found.

26.10 Community Partnerships (Rent Subsidy) – this proposal is also currently consulting with partners and again has the potential to negatively impact on residents where alternative funding cannot be found.

27. APPENDICES

27.1 Appendix One: Revenue Budget Summary 2026/27 and Medium-Term Financial Position 2026/27 to 2029/30.

Appendix 1 – Revenue Budget 2026/27 and Medium-Term Financial Position

This Appendix sets out a summary of the Council wide revenue budget for 2026/27 in the table that follows and also the forecast finance position for the following three years.

The Council aligns its financial strategy with its ambitions through a rolling four-year cycle of business planning. The current Medium Term Financial Strategy was published in July 2025 and can be found under the Leadership Team meeting agenda papers that month.

The aim of the financial strategy is to:-

- Plan the Council's finances over the next four years, taking account of both the local and national context;
- Provide the financial framework for the delivery of the Council's priorities and ensure that these priorities drive the financial strategy – allocating our financial resources whilst also responding to external factors (e.g. the Covid pandemic) both now and over the next few years; and
- Manage and mitigate future budget risks by forward planning and holding reserves as appropriate;

The MTFS is subject to continuous review and refinement in the light of latest information as it emerges. The budget position for the next four years, showing the latest resource projections and estimates of expenditure, is set out in the following table. The next update to the Medium-Term Financial Strategy will be in summer 2026.

*Part of impact of fair funding is reduction to service grants which has increased some net budgets. Appendix 3 shows how this is broken down

Appendix 2 - Reserves Policy 2026/27

Reserves are an important part of the Council's financial strategy and are held to create long-term budgetary stability. They enable the Council to manage change without an undue impact on Council Taxpayers and are a key element of its strong financial standing and resilience. The Council's key sources of funding face an uncertain future, so a limited number of un-earmarked and earmarked reserves and a working balance are held to mitigate future financial risks.

Reserves are formally reviewed and presented to Leadership Team for noting and approval as part of the quarterly financial reporting process. This involves scrutiny of balances to determine whether the original purpose for creating the reserve still stands, and whether there is scope to release the reserve balance in part or in full.

The terms of reference for usable reserves set out the conditions for use of existing reserves and new applications for funding, and this acts as a source of reference to support clear and transparent decision making.

The table below shows the 2024/25 closing /2025/26 opening reserve balances and the four-year forecast position at Quarter 2. The forecast will be further updated following the reporting of the Quarter 3 budget monitoring position to Leadership Team in March 2026. Further information on each reserve is also detailed below.

Budget Stabilisation

The Budget Stabilisation Reserve is used to manage the impact of uncertainties, such as changes arising from government funding. Estimates of known requirements will be set out in the annual Council Tax and Budget Setting Report, or the Quarterly Budget Monitoring Reports, where applicable.

Budget Carry Forward

The Budget Carry Forward Reserve includes balances set aside in previous years for which there may be planned use in future years. The reserve also provides the opportunity for resources to be mobilised swiftly to enable the Council to respond efficiently in the face of circumstances unforeseen at the time of budget setting. In the past, it has been used interchangeably with the Special Projects Reserve with a focus on meeting one-off, unbudgeted costs in the short-term. Funds have also been

committed to supporting Covid-19 recovery and, more recently, the Council's response to the cost-of-living crisis.

Covid-19 Recovery/Cost of Living

The Council has previously committed £8.0m to providing support with Covid-19 recovery, and for managing the response to the cost-of-living crisis and its impact on residents and local communities. Funds have been contributed equally from the Budget Carry Forward Reserve and Public Health Reserve, and the review process is overseen by the Cost-of-Living Financial Resilience Group.

The Covid-19 Recovery/Cost of Living Reserve is tabled separately, though it is not treated as a separate reserve in the Council's accounts.

Council Plan Implementation

This reserve was newly established in 2023/24 with an opening balance of £1.0m. Funds will be used to support delivery of the Council Plan and our transformation ambition to become the best Council for residents in a borough that is greener, fairer, and safer.

Council Plan Implementation – Ward Improvements

This reserve was newly established in 2023/24 with an opening balance of £1.0m to support delivery of the Council's cross-cutting ambitions and ward-based improvements. It will be used to kick start projects and address one-off and time-limited needs. Funding will also be one-off and time-limited in nature and may be spent on both revenue and capital schemes.

Special Projects

The Special Projects Reserve was established with a focus on meeting one-off funding requirements. Funds have been used to support service redesign and transformation, revenue costs associated with the delivery of capital schemes, and pump-priming for invest-to-save projects. With significant budget reductions still to be identified, further use will be required in the short-term to meet one-off costs and provide support with the identification and delivery of new savings.

Waste Initiatives

This reserve was created during 2025/26 funded by the Extended Producer Responsibility Grant. The grant is paid for by a charge levied by Government on packaging suppliers to help offset the cost to councils of subsequently recycling or disposing of the waste generated. Given its unpredictability, the grant was not budgeted in the Council's financial plans – it was set aside in a reserve instead. Although no firm plans for its use have currently been agreed, it is available to either implement new initiatives in waste collection and disposal, or to protect the Council's waste budget from higher levels of disposed material.

Contingency

The Council has historically maintained a central contingency budget to manage the impact of unforeseen, one-off budget pressures, unexpected events, and risks such as slippage in the delivery of savings. At the end of 2022/23, the contingency budget reported an underspend, and this surplus was used to establish the Contingency Reserve.

Some use of reserve is planned in 2025/26 to manage pressures that would ordinarily be funded from the £3.7m central contingency budget. Financial plans from 2026/27 assume this budget will be required again, but the reserve will continue.

Car Parking

The Car Parking Reserve holds the unapplied surplus generated by the Parking Service. There may be transfers to or from the reserve each year depending on the amount of eligible spend that is funded from the Parking surplus. The reserve is used to fund capital schemes and one-off projects that meet the criteria for spend, such as highways maintenance and local environmental improvements.

Civil Claims Settlement

The Civil Claims Settlement is being used to fund the revenue implications of the Council's claim for exceptional financial support to help cover the cost of resolving all claims that have been lodged since the Grenfell tragedy. It is being funded from savings generated by the temporary reduction to the Council's employer pension contributions in 2023/24 and 2024/25, following the triennial actuarial valuation of the pension fund.

Grenfell

In January 2019, the Council committed £50m of revenue funding to support delivery of the Grenfell Recovery Strategy over five years from 2019/20 to 2023/24. In December 2020, the Grenfell Recovery Resourcing Framework, building on the original strategy, set out plans to work with bereaved individuals, survivors, residents and community partners to shape the remaining three years of the programme. Unspent funds are carried forward each year, and delivery is now extending beyond the current year.

Insurance

These funds enable the Council to meet its retained self-insured liabilities (deductibles) up to the annual total cap of its financial liabilities. They represent the value of future unknown claims, in contrast to the insurance provision which is held to manage known liabilities at year-end based on the calculated self-funding value of outstanding insurance claims. The Insurance Reserve is also comprised of funds held to mitigate against the impact of unforeseen events and emergencies where no alternative budget provision exists.

Local Projects

An amount equal to the annual Council Tax from bereaved individuals and survivors of the Grenfell Tower fire will be paid into this reserve each year. Funds are ringfenced, focused on providing opportunities for disadvantaged young people and those needing support around employment and skills living in social housing in the borough. Decisions on how funds are to be spent across projects are taken in accordance with the Council's governance process and subject to Leadership Team approval.

Proceeds of Crime

The Proceeds of Crime Act 2002 (POCA) provides for the confiscation or civil recovery of the proceeds from crime and contains the principal money laundering legislation in the UK. POCA sets out the legislation for the recovery of criminal assets, with criminal confiscation being the most used power. The Asset Recovery Agency (ARA) was created alongside POCA to monitor financial recovery and use of funds. Deemed an incentivisation scheme, any confiscated or collected POCA funds were ringfenced and reinvested into crime prevention/reduction projects.

Recipients of POCA funds, including the Council, were required to complete an annual return detailing monies received and information on spend, to demonstrate a suitable use of POCA monies. The ARA was closed in 2008 and their powers and responsibilities passed to the National Crime Agency (NCA). Although returns have not been requested by NCA since pre-pandemic years, in accordance with the terms of the incentivisation scheme, a POCA reserve continues.

Public Health

Public Health funding supports delivery of the Council Plan, including a recurrent investment across the organisation. The grant terms allow the Council to hold a balance in its earmarked Public Health Reserve; spending plans are in place and have been agreed with the Office for Health Improvements and Disparities (OHID). These plans will reduce the reserve balance to around £1.8m by the end of the period, and this will be held as a contingency to manage the impact of future demand, any unplanned reductions to grant funding, and health protection mobilisation.

Public Health reserves have also been committed to supporting Covid-19 recovery and the Council's response to the cost-of-living crisis.

Reorganisation

The Reorganisation Reserve is used to manage transformation-related expenditure, and the impact of redundancy costs that cannot be contained within departmental budgets.

Street Trading

The surplus of Street Trading income over expenses is held in a ringfenced reserve for investment back into the markets. It is also used to manage the impact of unforeseen expenditure in line with the London Local Authorities Act 1990.

Troubled Families

This reserve is used to manage fluctuations in service delivery that may otherwise occur due to There may be transfers to or from the reserve, according to levels of service delivery.

Schools Reserve

The Schools Reserve is comprised of cumulative balances that are held on behalf of maintained schools across the borough. Based on current trends and known pressures, it is anticipated that the reserve will be utilised in full over the next five years. However, this position is subject to schools' funding levels and spend, and therefore likely to change.

Collection Fund

The Collection Fund is used to manage the surplus or deficit arising from the difference between actual and estimated Council Tax and Business Rates collected in monetary terms. Balances are subsequently recovered from, or paid back to preceptors (The Council, Central Government and the Greater London Authority) by forming part of the estimate for the following year.

Budget Pressures/Growth 2026/27 – 2029/30 Appendix 4

Directorate	Title of Growth	Description	2026/27 £000s	2027/28 £000s	2028/29 £000s	2029/30 £000s	Total £000s
	Adult Social Care and Public Health						
Adult Social Care and Public Health	Demographic Pressures: Adult Social Care	Large care support packages of children moving into adulthood and expected growth in service user numbers (especially Physical Support) have now been modelled to determine demographic growth needs in the budget.	1,502	0	0	0	1,502
	Chief Executive						
Chief Executive	Savings and Transformation Team	Capacity to drive the transformation programme and unlock savings opportunities.	200	0	0	0	200
	Children's Services						
Children's Services	Customer Delivery - Social Service Line (SSL)	This will help fund the Social Services Line which is there to offer support for families and to act as a point of contact for concerns about the welfare of children.	17	0	0	0	17
Children's Services	Demographic Pressures: Children's Services	Although the numbers of looked after children remain relatively stable, more placements are high cost. On top of any extra cases, costs in children's social care are also rising generally at a much higher rate than average inflation. The growth assumes a continuation of this trend in future years	1,000	0	0	0	1,000
	Environment and Neighbourhoods						
Environment and Neighbourhoods	Parks maintenance (Cremorne Wharf)	Following the transformation of Cremorne Wharf into a park for community use, the cost of maintenance has been estimated at £100k per annum to maintain on-going benefits for the local area.	100	0	0	0	100

Budget Pressures/Growth 2026/27 – 2029/30 Appendix 4

Directorate	Title of Growth	Description	2026/27 £000s	2027/28 £000s	2028/29 £000s	2029/30 £000s	Total £000s
Environment and Neighbourhoods	Cleanest Streets	Various measures are proposed to improve the service; Additional street cleaning operatives; Additional electric vehicles and drivers; One additional street wash vehicle and crew.	705	0	0	0	705
Environment and Neighbourhoods	Tree Service Contract	The Council's pledge to plant 400 trees by 2027 has been exceeded and delivered early so the tree maintenance budget needs to rise to reflect this.	88	0	0	0	88
Environment and Neighbourhoods	Emergency response on call roles - move to 'Green Book' (The National agreement on pay and conditions of service for Local Government)	This change will help harmonise pay structures across the Council in line with Equality Act & Equal Pay considerations.	50	0	0	0	50
Environment and Neighbourhoods	CCTV Fibre Contract	The budget for the CCTV fibre contract is being impacted by above inflation price increases. This growth will stabilise the budget whilst a longer-term wireless solution is explored as part of a capital bid.	23	0	0	0	23
Environment and Neighbourhoods	CCTV Programme Manager Post	A CCTV Programme Lead is required to manage/oversee all aspects of CCTV planning, implementation and delivery. The Lead will also provide strategic direction to the Service's transformation projects.	72	0	0	0	72

Budget Pressures/Growth 2026/27 – 2029/30 Appendix 4

Directorate	Title of Growth	Description	2026/27 £000s	2027/28 £000s	2028/29 £000s	2029/30 £000s	Total £000s
Environment and Neighbourhoods	Sustaining / Maintaining the Prevent Service	The Prevent Service works with our residents who are most vulnerable to being drawn into acts of extremism and terrorism. It is a 50/50 partnership between RBKC and LBHF which was previously funded by Home Office Grant. As this grant has now stopped base budget is required to continue with the service in future years.	155	0	0	0	155
Environment and Neighbourhoods	Waste and Recycling Container Crew	Existing crews are working at capacity. However, demand from new domestic and commercial properties means that additional crews are required at a cost of £319k p.a.	319	0	0	0	319
	Housing and Social Investment						
Housing and Social Investment	Temporary Accommodation Pressures	The demand and cost of providing temporary accommodation continues to rise for this legal duty of the Council.	5,000	0	0	0	5,000
	Resources & Customer Delivery						
Resources and Customer Delivery	Customer Access Strategy - Resident Connect Future Funding	Growth will replace current funding for Resident Connect Customer Access when it ends after 26/27 to ensure continued improvement and realisation of the benefits of customer-focussed systems.	0	235	111	0	346
Resources and Customer Delivery	Cyber Security	Extra funding to pay for basic security tools that the Council requires for its cyber security to ensure controls are robust against ever- increasing cyber security threats, such as ransomware attacks.	75	75	0	0	150
Resources and Customer Delivery	Cyber Security Zero Trust Architecture	To update our infrastructure/architecture from a traditional network security model to a less vulnerable Zero Trust (ZT) one which reduces the risk of falling	28	(50)	0	0	(22)

Budget Pressures/Growth 2026/27 – 2029/30 Appendix 4

Directorate	Title of Growth	Description	2026/27 £000s	2027/28 £000s	2028/29 £000s	2029/30 £000s	Total £000s
		victim to the persistent threat of a significant cyber-attack.					
Resources and Customer Delivery	Oracle Licensing and Cloud Service	The cost of the Council's Oracle platform has previously been covered under the change programme that approved its introduction. As this budget was time limited, growth needs to be agreed to meet our on-going contractual commitments with the provider.	398	0	0	0	398

Budget Savings 2026/27 – 2029/30 Appendix 5

Directorate	Workstream	Description	Narrative	2026/27 £'000	2027/28 £'000	2028/29 £'000	2029/30 £'000	Grand Total £'000
Adult Social Care and Public Health	**Commercialisation**	Self-funder administration fee	Subject to consultation, this proposal is to recover the cost of arranging care for people who ask the council for help setting up and monitoring their private arrangements.	(150)	0	0	0	(150)
Adult Social Care and Public Health	**Departmental Savings**	Enhanced Learning Disability Void Management	The proposal will maximise utilisation of our assets through enhanced management of existing voids and working with residents and families to ensure use of local provision.	(30)	0	0	0	(30)
Adult Social Care and Public Health	**Departmental Savings**	Flexible model for short breaks for mental health and learning disability service users	The short breaks offer is being re-modelled to help meet the Care Act needs of adults with learning disabilities more effectively, particularly with more use of planned short-breaks and a reduced need for unplanned ones.	(10)	0	0	0	(10)
Adult Social Care and Public Health	**Departmental Savings**	Ongoing review of processes and ways of working through recruitment panel	Each division in the directorate continuously reviews its processes and ways of working. As part of this they review staff resourcing, and a recruitment oversight panel is in place to ensure efficiency in agency spend, avoid duplications in functions, and provide prompt, responsive service delivery.	(134)	0	0	0	(134)
Adult Social Care and Public Health	**Departmental Savings**	Sheltered Housing: Extra Care	The proposals entail creating 65 new units of extra housing for residents at Lots Road. This will help prevent residents from requiring a residential care placement.	0	0	0	(750)	(750)
Adult Social Care and Public Health	**Departmental Savings**	Strategic review of workforce	In line with our ambitions to prevent escalation of needs and promote independence through closer working with Public Health, the VCS and the universal offer, we are considering how we could strategically develop our workforce and adapt vacant social worker roles into care navigators.	(100)	0	0	0	(100)

Budget Savings 2026/27 – 2029/30 Appendix 5

Directorate	Workstream	Description	Narrative	2026/27 £'000	2027/28 £'000	2028/29 £'000	2029/30 £'000	Grand Total £'000
Adult Social Care and Public Health	**Funding**	Ensure eligible residents receive NHS continuing healthcare (CHC) funding	The proposal is to continue working with the NHS to ensure those entitled to NHS-funded care receive it. The directorate has dedicated and specialist continuing healthcare (CHC) social workers who are trained to advocate for our residents. This proposal will ensure service users receive the right care at the right time in the right place.	(350)	0	0	0	(350)
Adult Social Care and Public Health	**Funding**	Public Health Grant	As part of the plans to meet the budget gap, the Council is considering redirecting some Public Health grant funding from existing activity to different cross council programmes directed at achieving Public Health outcomes. This would enable further General Fund savings. A planned total of £1.3m could be saved if the Council redirected: • £502,000 from core Public Health services; and • £800,000 from existing cross-Council activity currently funded from the core Public Health grant, some of which was projected to end in March 2026. The list below sets out £502k to be released from public health services and the associated public health risks. Reductions in public health funding include a package of efficiencies, reduction and ending of some initiatives. Efficiencies: • Removal of Contingency Budget (for demand-led activity volatility, e.g., Genitourinary Medicine Services)	(1,328)	(1,589)	(200)	0	(3,117)

Directorate	Workstream	Description	Narrative	2026/27 £'000	2027/28 £'000	2028/29 £'000	2029/30 £'000	Grand Total £'000
			• Off-set Agenda for Change (NHS employment terms and conditions) cost for School Nursing Services • Service Efficiencies (removing budgets for e.g. spending on delivering community-based training, events, printing, subscriptions, etc) Reductions: • Change frequency of North Kensington Health & Wellbeing Survey from annual to bi-annual (or less frequent • Mental Health training and promotion to staff, partners and residents Stopping • Oral health care home pilot – screening, data collection and workforce development. • Healthy Schools, Early Years & Domestic Abuse contract -support to schools and early years' settings to improvement the health and wellbeing of their communities • Change4Life Grants – support small-scale community projects that promote healthier lifestyles, especially for children, young people, and families at risk of inactivity and poor health. This may affect efforts to enhance health and wellbeing in schools and early years' settings, support community projects focused on healthier lifestyles, and childhood obesity and to address					

Directorate	Workstream	Description	Narrative	2026/27 £'000	2027/28 £'000	2028/29 £'000	2029/30 £'000	Grand Total £'000
			oral health in care homes. These impacts may lead to missed opportunities for early intervention in educational environments, decreased support for families, children and older people. We will be working to mitigate public health risks by redesigning services, exploring taking some responsibilities into the public health team, e.g., specialist health promotion support to schools, promoting digital educational resources to staff and settings. • The remaining £800k would involve ceasing or reducing Public Health contributions to the following projects: • Care home pilot - infection control • Employment initiatives • Staffing support to the VCS programme • Air Quality project in schools • Clinical waste collection • Ecology Service • Physical Activity – Inclusion Officers • Physical Activity – Inclusive cycling • Targeted Domestic Violence support in housing (the Council intends to sustain existing levels of Domestic Violence support by reprioritising other resources • Housing and employment team • Council staff - flu jabs Some of these changes are likely to have significant impacts on residents and staff, while others can be managed without a direct knock-on effect on service users. Further work is needed to					

Directorate	Workstream	Description	Narrative	2026/27 £'000	2027/28 £'000	2028/29 £'000	2029/30 £'000	Grand Total £'000
			consider the full implications of reducing the Public Health contribution to these services and a full equalities impact assessment will be required for any proposals taken forward. In the meantime, officers will work to identify other areas of General Fund spend which is directed to achieving Public Health outcomes and could potentially be supported with any funding released through this process.					
Adult Social Care and Public Health	**Funding**	Telecare	The proposal entails exploring the use of the Disabled Facilities Grant to fund the costs associated with telecare equipment.	0	(140)	0	0	(140)
Adult Social Care and Public Health	**Prevention**	Continuation of prevention initiatives	This entails using service users' annual reviews to increase the focus on helping people live more independently, achieve their outcomes and fulfil their aspirations.	(783)	0	0	0	(783)
Adult Social Care and Public Health	**Property Estate**	Specialist accommodation – Kingsbridge Road and St Helen's Gardens	Subject to prioritisation in the capital programme, the Kingsbridge Road and St Helene's Gardens sites could be further developed to provide in-borough supported living units for residents in out-of-borough placements.	0	0	(350)	0	(350)
Adult Social Care and Public Health	**Service review, reduction, transformation**	Contract efficiencies	The Council will review spend on preventative service contracts and identify opportunities to consolidate spend and reduce duplication.	0	(250)	(502)	0	(752)
Adult Social Care and Public Health	**Service review, reduction, transformation**	Increased nominations to General Needs	The proposal entails continuing work to support residents in supported living schemes into general needs housing to delay dependency on long-term institutional care.	(140)	0	0	0	(140)

Budget Savings 2026/27 – 2029/30 Appendix 5

Directorate	Workstream	Description	Narrative	2026/27 £'000	2027/28 £'000	2028/29 £'000	2029/30 £'000	Grand Total £'000
Adult Social Care and Public Health	**Service review, reduction, transformation**	Specialist cleaning	The proposal entails exploring the use of local specialist providers to address hoarding/ housing hazards, rather than care agencies.	(80)	0	0	0	(80)
Adult Social Care and Public Health	**Simplified Processes**	Digital Transformation in ASC	The proposal entails reducing the costs associated with missed or late cancellations of homecare appointments and re-designing existing contact centre processes to reduce the need for an agency worker.	(265)	0	0	0	(265)
Adult Social Care and Public Health	**Workforce Management**	Voluntary redundancy	Expressions of interest have been invited from staff members to apply for voluntary redundancy. Each application will be assessed by a Panel with the associated salary budget of accepted ones being taken as a saving towards the £4.5m target.	(449)	0	0	0	(449)
Adult Social Care and Public Health	**Workforce Management**	Starting salaries and Honoraria	The purpose of this savings proposal is for the Council to introduce increased scrutiny through our higher starting salary considerations when recruiting. This will be achieved through more robust salary expectations communicated at the time of advertising roles. Going forward higher starting salary requests will only be considered in exceptional circumstances through a business case process.	(63)	0	0	0	(63)
Centrally held budgets	**Commercialisation**	Add back underachievement in 25/26	Correction of the budget due to an underachievement of budget targets in 2025/26	200	0	0	0	200
Centrally held budgets	**Workforce Management**	HR - Travel Card	Reducing the use of travel cards for members of staff	(750)	0	0	0	(750)

Budget Savings 2026/27 – 2029/30 Appendix 5

Directorate	Workstream	Description	Narrative	2026/27 £'000	2027/28 £'000	2028/29 £'000	2029/30 £'000	Grand Total £'000
Chief Executive	**Commercialisation**	Museums and culture income opportunities	Increase income from museums through increasing the number of exhibitions, boosting footfall through marketing, reviewing price structures, and increasing the number of events taking place.	(175)	(100)	(75)	0	(350)
Chief Executive	**Departmental Savings**	Community Partnerships	The loss of £82m in government funding means there will not be as much funding for the Voluntary and Community Sector (VCS) as there once was. If we decide to protect project and service funding, there will be less money available to cover rental costs for some VCS organisations in the way we have done until now. Currently, the Communities department covers £300k of rent for some VCS organisations. This proposal would see this end with the relevant VCS organisations asked to cover their own rent.	0	(308)	0	0	(308)
Chief Executive	**Departmental Savings**	Community partnerships (grants)	The loss of £82m in government funding means there will not be as much funding for the VCS as there once was. If we decide to protect project and service funding, there will be less money available for core costs for the sector. A consultation exercise has started to explore how a potential 40-50% reduction to the Voluntary Sector Support Fund (VSSF) in the next round of provision (April 27-March 30) could work whilst still ensuring residents have access to the services they need.	0	(340)	(114)	(113)	(567)
Chief Executive	**Departmental Savings**	Leaders Office Restructure	Organic reorganisation of Leader's Office to create a smaller team, cut down on staffing costs, deliver better service to Members	(40)	0	0	0	(40)

Budget Savings 2026/27 – 2029/30 Appendix 5

Directorate	Workstream	Description	Narrative	2026/27 £'000	2027/28 £'000	2028/29 £'000	2029/30 £'000	Grand Total £'000
Chief Executive	**Funding**	Economic Development	Switch funding for the team away from general fund and instead using ring-fenced S106 monies that are for economic development where a reserve has built up.	(196)	0	0	0	(196)
Chief Executive	**Service review, reduction, transformation**	Changing funding arrangements for City Living Local life	City Living Local Life has built up a reserve due to annual funding not being spent. The proposal is to use up this reserve rather than funding the programme through the general fund. There will be no change to allocations or annual funding limits as part of this.	(204)	0	0	0	(204)
Chief Executive	**Service review, reduction, transformation**	Design team	Reduce the amount of work going out to agency, reduce the amount of work going to print that could be a digital only product. Indicative plans to offer part time work and/or reduce staffing costs triggered by retirement or exit.	(100)	0	0	0	(100)
Chief Executive	**Workforce Management**	Communities staffing	Staff turnover within the team has created a small number of vacancies which we can release one of without a significant impact to the team.	(50)	0	0	0	(50)
Chief Executive	**Workforce Management**	Grenfell Legacy and Corporate Strategy	Staff turnover within the team has created a small number of vacancies. A new team structure has been developed around the staff in place, delivering a saving to the Council.	(35)	0	0	0	(35)
Chief Executive	**Workforce Management**	Voluntary redundancy	Expressions of interest have been invited from staff members to apply for voluntary redundancy. Each application will be assessed by a Panel with the associated salary budget of accepted ones being taken as a saving towards the £4.5m target.	(139)	0	0	0	(139)

			robust salary expectations communicated at the time of advertising roles. Going forward higher starting salary requests will only be considered in exceptional circumstances through a business case process.					
Children's Services	**Commercialisation**	KC Co Works	Income Generation through K+C Co-Works at Kensington Central Library	0	(28)	0	0	(28)
Children's Services	**Departmental Savings**	Creation of an integrated Children with Disabilities Service	Staffing and other cost saving efficiencies will be achieved by bringing together several functions into an integrated Children with Disabilities Service that is better able to meet the needs of families.	(75)	0	0	0	(75)
Children's Services	**Departmental Savings**	Reductions in functions supporting the directorate	The Department is looking to rationalise its back-office support to create savings through alternative operational methods.	(50)	0	0	0	(50)
Children's Services	**Departmental Savings**	Repurposing accommodation to best support care leavers	Leadership Team has approved £2.5 million in capital funding to acquire and refurbish 12 properties for supported accommodation for young people. The initiative is expected to reduce reliance on costly third-party providers, generating annual savings of approximately £300,000.	(300)	0	0	0	(300)
Children's Services	**Departmental Savings**	Transfer responsibility to local primary schools (and reduce overheads) for delivering affordable	Clare Gardens and St Quintin day nurseries provide affordable childcare in North Kensington. In line with the strategy which has been successfully implemented for Cheyne and Violet Melchett day nurseries, we will be looking to move responsibility for delivery of these nurseries to local primary schools. This is in line with the government's	(80)	(80)	(100)	0	(260)

Directorate	Workstream	Description	Narrative	2026/27 £'000	2027/28 £'000	2028/29 £'000	2029/30 £'000	Grand Total £'000
		childcare at two in-house north Kensington day nurseries	national strategy for increasing school-based nursery provision.					
Children's Services	**Departmental Savings**	Virtual School & School Standards	Restructure Virtual School and a review of responsibilities for supporting school inclusion across the Education Service.	(136)	0	0	0	(136)
Children's Services	**Departmental Savings**	Youth	This saving will look to map non statutory services for young people across the Council to identify opportunities to streamline. This includes both commissioned services and internal staff teams.	(100)	0	0	0	(100)
Children's Services	**Prevention**	Bi-Borough Family Services	Efficiency savings can be achieved by providing elements of Family Services within the Bi-borough framework whilst also responding to the new national Social Care Reforms.	(336)	(557)	0	0	(893)
Children's Services	**Prevention**	Children and housing alignment	To aid their longer-term independence, a target of 7 additional care leavers will be supported to move into final stage accommodation. A saving is expected to be generated due to the difference between the cost of this and current Semi-independent Living arrangements.	(104)	0	0	0	(104)
Children's Services	**Prevention**	Contextual safeguarding	Reducing high-cost placements using alternative approaches to safeguarding children.	(180)	0	0	0	(180)
Children's Services	**Prevention**	High-cost placement panel	A review of cases across Adults, Children's and Housing to support residents and ensure joint up, improving resident experience and reducing costs overall.	(33)	0	0	0	(33)

Budget Savings 2026/27 – 2029/30 Appendix 5

Directorate	Workstream	Description	Narrative	2026/27 £'000	2027/28 £'000	2028/29 £'000	2029/30 £'000	Grand Total £'000
Children's Services	**Prevention**	Pathway for disabilities	A review of how packages of care for individuals with disabilities are put together will provide a more cost-effective solution for the Council. The review will focus on the transition from childhood to adulthood and making best use of available funding and grants in the interests of each child and young adult.	(540)	(400)	0	0	(940)
Children's Services	**Prevention**	Semi Independent Living for 16+	The Council has been expanding its in-house capacity for age 18+ Care Leavers in recent years. By extending this to 16- and 17-year-olds, a cost saving over privately commissioned accommodation is expected.	(100)	(150)	0	0	(250)
Children's Services	**Prevention**	Social Work for Families	Reducing the costs of care for Looked After Children and Care Leavers, including strengthening regional commissioning collaboration.	(350)	(350)	0	0	(700)
Children's Services	**Workforce Management**	Voluntary redundancy	Expressions of interest have been invited from staff members to apply for voluntary redundancy. Each application will be assessed by a Panel with the associated salary budget of accepted ones being taken as a saving towards the £4.5m target.	(171)	0	0	0	(171)
Children's Services	**Workforce Management**	Starting salaries and Honoraria	The purpose of this savings proposal is for the Council to introduce increased scrutiny through our higher starting salary considerations when recruiting. This will be achieved through more robust salary expectations communicated at the time of advertising roles. Going forward higher starting salary requests will only be considered in exceptional circumstances through a business case process.	(106)	0	0	0	(106)

Budget Savings 2026/27 – 2029/30 Appendix 5

Directorate	Workstream	Description	Narrative	2026/27 £'000	2027/28 £'000	2028/29 £'000	2029/30 £'000	Grand Total £'000
Environment and Neighbourhoods	**Commercialisation**	Bus Shelter Advertising	The Council's bus shelters contracts are currently performing above budget. This improved performance coupled with the expected benefits of a recently signed contract for the installation of digital screens will provide additional income of £400k pa.	(400)	0	0	0	(400)
Environment and Neighbourhoods	**Commercialisation**	Events in Parks	Working with parks to explore launching new high revenue yielding community events, delivered by third party companies.	(50)	0	0	0	(50)
Environment and Neighbourhoods	**Departmental Savings**	Improved performance in the Commercial Waste service.	The Commercial Waste service is generating income above budgeted levels. This improved performance will provide additional income of £100k pa.	(100)	0	0	0	(100)
Environment and Neighbourhoods	**Departmental Savings**	Leisure Contract Concession Model	Contract variation on Leisure concession contract includes moving to an Agency Model, where GLL are the Council's agent to deliver leisure services across the borough. This follows HMRC changing the VAT treatment of most leisure services for local authorities.	(200)	0	0	0	(200)
Environment and Neighbourhoods	**Departmental Savings**	Planning Community Infrastructure Levy (CIL) Charging and improved fee income.	The Growth and delivery team support infrastructure delivery in the borough. A review has taken place to ensure that this is fully charged to CIL. This review along with alignment of the wider planning budget to reflect increased fee income will deliver a general fund saving of £115k pa.	(115)	0	0	0	(115)
Environment and Neighbourhoods	**Departmental Savings**	Remove duplication of Victims Advocacy Service	The Council currently provides non-statutory independent advocacy, information and practical and emotional support to victims of crime. This service is also provided by MOPAC via Victim Support. This saving would remove the Council	(45)	0	0	0	(45)

Draft Budget Proposals 2026-27

Analysis of stakeholder consultation

January 2026

Consultation and Participation Team
The Royal Borough of Kensington and Chelsea
consult@rbkc.gov.uk

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Introduction

The Council delivers around 200 services – from keeping our streets clean and maintaining open spaces to providing vital services such as adult and children's social care and homeless prevention. Each year, we are legally required to set a balanced budget, ensuring that the money we spend does not exceed the income we receive from government grants, Council Tax, business rates, and charges for services we provide.

Between now and 2030, we expect to lose around £82 million in Government funding due to the Government's Fair Funding Review, which proposes changes to the way each council's grant funding is calculated in the future. On top of the funding we expect to lose from government, costs of delivering our services continues to go up from growing need and rising inflation. If the government's position doesn't change it will mean that we will need to find around £130 million in savings over the next four years.

This year's budget has been developed to support the priorities set out in our Council Plan 2023–2027, creating a Greener, Safer, and Fairer borough for all residents. However, the national financial situation continues to place significant pressure on local government finances. We must therefore scrutinise all areas of spending and ensure the sustainability of our services, with a focus on protecting essential services, operating efficiently, and continuing to support our most vulnerable residents.

We therefore sought resident and stakeholders' views. Feedback gathered will help shape our financial priorities and ensure we continue to deliver value for money for residents, businesses, and communities across Kensington and Chelsea.

The proposals were split between the revenue and capital budgets. The revenue budget refers to day-to-day expenditure and income for the Council, such as service delivery and staff costs, whereas capital budgets refer to expenditure used to acquire or improve assets for the long-term functionality of the Council.

All savings and growth proposals have been assessed through an Equalities Impact Assessment, which considers the potential effects on residents and communities to ensure our approach remains fair and inclusive.

Introduction

Consultation methodology

An online survey was promoted via various avenues, including the Council's Consultation and Engagement Hub, social media and e-newsletters. In total, 433 responded to the survey.

In addition, 97 residents from our Citizens' Panel attended an event to feedback their views on future budget priorities and feedback was also received at 'The Council Comes to You' events that took place during the consultation period . A summary of these activities is also included in this report.

Analysis approach and demographic differences

The results in this report show overall percentages for each survey question.

A form of AI called large language models (LLM) was used to assist theming comments made in the survey. All comments received have been read by a Council officer who also reviewed and amended themes where needed. The LLM is accessed through Azure Open AI - no data is shared with external entities and no data is used for future training of large language models (LLM)

Appendix

An appendix document is also available on request, containing data tables and all comments made by respondents to the survey.

Acknowledgements

The Council would like to thank all residents and stakeholders who took the time to provide feedback.

Stakeholder Survey

Below is a summary of feedback from the stakeholder survey which was responded to by 433 stakeholders.

Financial context

- The majority of respondents (84 per cent) indicated they understood why the Council are having to look at reducing services, making savings and increasing fees and taxes.

Council Tax proposals

Proposed increase in Council Tax

- Almost half (48 per cent) agreed with the proposed five per cent increase to Council Tax. However, a third (33 per cent) disagreed.
- The most common theme in comments made was in relation to *opposition to Council Tax increase due to affordability and fairness concerns*

Second home premium

- Six in ten (60 per cent) agreed with the proposed 100 per cent Council Tax premium for people with second homes in the borough. However, over a quarter (26 per cent) disagreed with this proposal.
- The most common theme in comments made was in relation to *opposition to 100 per cent Council Tax premium on second homes*

Revenue growth proposals

Maintaining existing service levels

- Almost half (47 per cent) supported, the growth proposals put forward to maintain existing service levels.
- However, over a quarter (29 per cent) opposed the proposals. The most common theme in relation to opposition was *concerns about temporary accommodation spending, management and welfare support*.

Providing new or better services

Results at a glance

- Almost two-thirds (65 per cent) supported the growth proposals put forward to provide new or better services.
- However, 15 per cent opposed the proposals. The most common theme in comments made was in relation to *environmental and street improvements with community involvement and cost efficiency*.

Revenue savings proposals

Staffing

- Almost three-quarters (74 per cent) supported savings proposals put forward related to changes to staff levels and conditions. The most common theme in comments made was in relation to *support for staffing cost reduction measures and efficiency improvements*.

Simplifying and improving processes

- Over three-quarters (76 per cent) supported the savings proposals put forward to simplify and improve processes. The most common theme in comments made was in relation to *Digital transformation and service quality.*

Level and range of services

- Over half (54 per cent) supported the savings proposals put forward to review services.
- However, over a fifth (21 per cent) opposed the proposals. The most common theme in comments made was in relation to *protecting vulnerable groups.*

Changing service models

- Almost three-quarters (73 per cent) supported the savings proposals put forward to change service models to meet need earlier or in new ways to avoid higher costs later
- The most common theme in comments made was in relation to *support for housing, early intervention, and vulnerable residents with safeguards and transparency*

Reviewing our property portfolio

- More than nine in ten (91 per cent) supported the savings proposals put forward to review our property portfolio.

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Results at a glance

- The most common theme in comments made was in relation to *Council property and energy efficiency optimisation*

Income generation

- Almost three-quarters (71 per cent) supported the savings proposals put forward related to income generation.
- The most common theme in comments made was in relation to *opposition to fee and tax increases*

Fees and charges

- Over half (59 per cent) supported the proposals put forward to raise fees and charges.
- However, 13 per cent opposed the proposals. The most common theme in comments made was in relation to *opposition to fee and tax increases*

Alternative funding

- Over two-thirds (67 per cent) supported the savings proposals put forward to make use of alternative funding streams.
- The most common theme in comments made was in relation to *alternative funding and parking enforcement with concerns on fairness and policy impact*

Capital investment proposals

- Over half (55 per cent) supported the capital programme proposals put forward.
- However, 16 per cent opposed the proposals.
- The most common theme in comments made was in relation to *concerns and opposition to specific capital projects and increased spending*

Savings and investment

Investment ideas

- The most common theme made in relation to areas the Council should invest more in related to *enhance community safety and enforcement and increase street cleanliness, environmental maintenance, and green space enhancement*

E ROYAL BOROUGH OF
ENSINGTON
AND CHELSEA

Results at a glance

Further savings

- More than seven in ten (71 per cent) felt that the Council should look at finding more efficiency savings to make further savings.
- Almost as many (69 per cent) felt the Council should generate more commercial income.

Equality implications

- When asked to detail anything the Council should be aware of in terms of how the proposed budget might impact adversely on people and how to reduce the impact, the most common theme was *protecting vulnerable and disadvantaged groups and promoting equality.*
- If the impact of the changes to funding is not as severe, almost two-thirds (65 per cent) supported, the suggested approach of limiting the direct impact on vulnerable residents.

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Citizens' Panel event

Summary of feedback from the event attended by 97 residents.

Priorities: What Success Looks Like (Next 5–10 Years)

Panel members want Kensington and Chelsea to be a safe, inclusive borough with high-quality, accessible services. They emphasise prioritising social care, housing, and community safety, especially for vulnerable groups such as the elderly, children, and those living in poverty. Education, youth services, libraries, green spaces, and cultural activities are seen as essential for community wellbeing.

Concerns include wasteful spending, poor contractor performance, disruption from roadworks, cuts to youth services and libraries, housing inefficiencies, and fears that vulnerable residents may be excluded. Panel members call for fair resource distribution, stronger oversight, and collaboration with neighbouring councils.

Digitalisation:

Panel members are cautiously supportive of greater digitalisation, recognising its potential to save money, improve efficiency, and modernise services. Many welcome online forms, digital communications, and even AI, provided these tools enhance rather than reduce service quality. Digital systems are seen as faster and more convenient, but residents stress that changes must not compromise fairness or human interaction.

Concerns focus on digital exclusion for older people, those with disabilities, and residents without access to technology. There are also worries about job losses, data security, and the reliability of automated systems. Trust in chatbots and AI is low, and Panel members call for a gradual, well-communicated transition.

Income Generation Ideas

Popular proposals included increasing Council Tax for second homes and empty properties, introducing tourist levies, and raising business rates for large companies. Many recommended monetising Council assets by renting out buildings, libraries, and parks for events, and hosting cultural festivals and ticketed attractions to draw visitors. There was strong support for partnerships with private organisations, sponsorships for major events, and benefactor schemes to fund libraries and cultural initiatives. Panel members also emphasised the need to secure additional funding from central government and the Mayor of London.

Analysis of survey responses

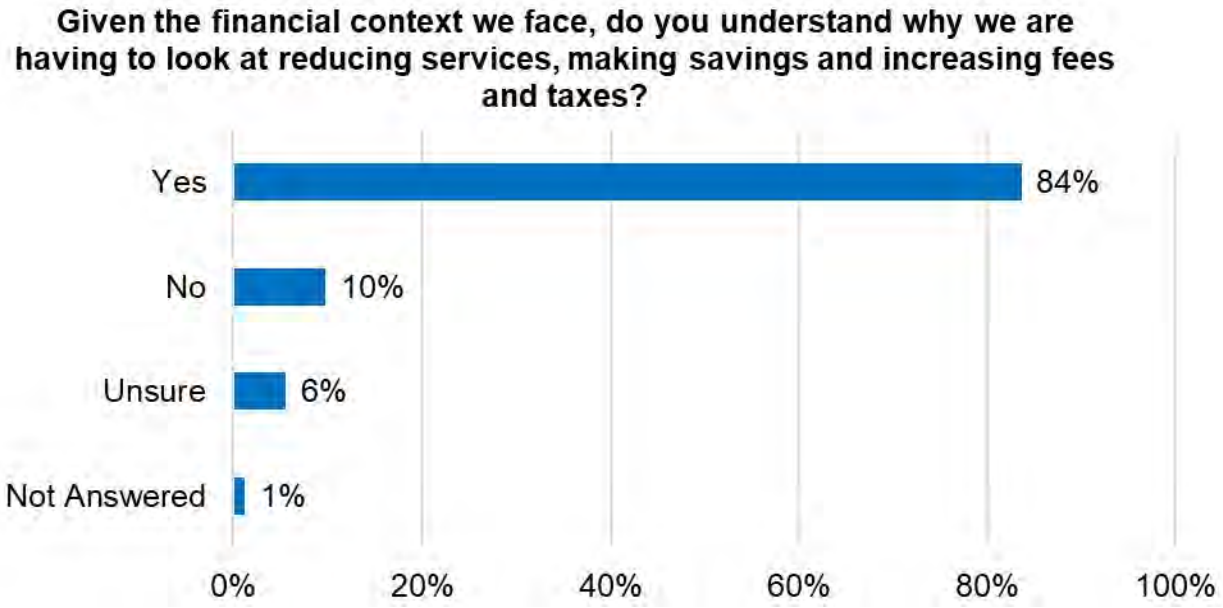

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Financial context

Given the financial context the Council is facing, respondents were asked if they understood why we are having to look at reducing services, making savings and increasing fees and taxes..

- **The majority** of respondents (84 per cent) indicated they understood why the Council are having to look at reducing services, making savings and increasing fees and taxes.

- However, **one in ten** (10 per cent) **did not agree**.

Base: All respondents (433)

Financial context

Respondents that did not understand why the Council is having to look at reducing services, making savings and increasing fees and taxes were asked to explain why. Comments made have been themed and are summarised in the table below.

The most common themes were: **Opposition to tax increases and service cuts** (21 comments) and **efficiency and service delivery improvements** (18 comments).

Examples of comments can be seen on the following page, with the full list of themes and comments found in the appendices.

Theme	Count
Opposition to tax increases and service cuts: Expresses concerns about the fairness and economic impact of tax increases and service reductions, opposing any increases in taxes or reductions in services to protect vulnerable groups and maintain community support.	21
Efficiency and service delivery improvements: Calls for improved efficiency in Council service delivery and internal operations, reduction of waste, and maintaining or enhancing service quality without unnecessary cuts. Focuses on optimising resource use to achieve better outcomes for the community.	18
Concerns about budget impacts, uncertainties, and comparisons: Highlights worries and uncertainties regarding Council Tax increases, Council reserves, enforcement of anti-social behaviour policies, and comparisons with tax levels of other councils. Reflects community apprehensions about financial management and policy effectiveness.	13
Transparency, accountability, and fairness in Council budgeting: Emphasises the need for clear, detailed information on Council spending and budget allocations, ensuring transparency and accountability. Highlights the importance of fairness in tax increases and budget management, targeting tax policies that do not disproportionately impact vulnerable groups, and building trust through informed understanding of government funding cuts and Council financial decisions.	12

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Financial context – Comment examples

Opposition to tax increases and service cuts:

"No, I do not believe a tax increase is justified. Spending on construction projects could be significantly reduced, given the large amounts invested in recent years across all local areas. In addition, some services such as paying external agents to monitor bin collection times are far from essential and should not be prioritised."

"It is already almost impossible for most low income households and small businesses to make ends meet. I myself have had to dispose/sell almost everything of any value I own just to keep my roof over my head."

"People chose to live here due to level of service, cutting it and rising the taxes makes it less fair. We pay crazy money to live here and prices of housing won't go fairer so why service will go down? Doesn't make sense."

Concerns about budget impacts, uncertainties, and comparisons:

"It appears that the council has been wasting money in non essential projects regardless of the government funding."

Efficiency and service delivery improvements:

"Do not see logic in both raising taxes and reducing services. Pick one or reduce and gain internal efficiencies and use supplier tenders more actively. Do not passively renew contracts."

"It is too easy to increase fees and taxes, You should work to reduce and rationalise costs."

"I understand why services need to be reduced and fees increased, however, it is not clear to me how the money is currently spent and where.

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

Security is a MUST and shouldn't suffer any cuts. Additional services and or benefits, should be reviewed and be the first thing to suffer cuts."

Transparency, accountability, and fairness in Council budgeting:

"It's not clear how the £82.25m Government funding reduction has been arrived at."

Revenue Growth Proposals

There are areas that require additional investment to keep up with rising demand and areas where we want to continue to invest to improve the local area. Where we are proposing to increase spend in any areas we have split this into whether it is additional spend to maintain existing service levels or whether it is to improve service areas.

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

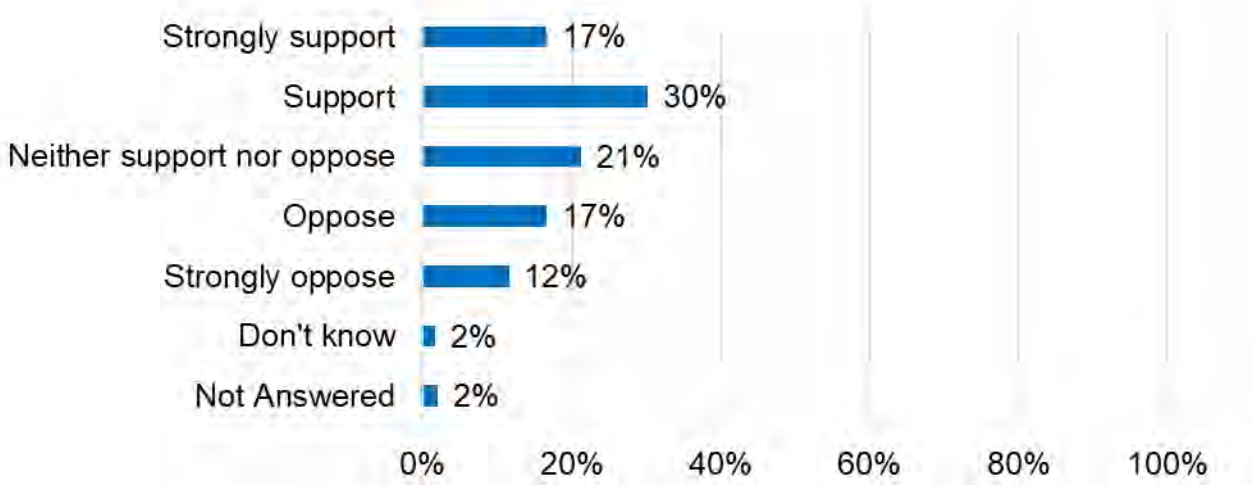

Maintaining existing services

Respondents were asked about proposals that require additional investment to keep up with rising demand and areas where we want to invest to improve the local area. The proposals included spend of £8.1 million to maintain existing services in 2026/27. This included: Adult Social Care (£1.5m extra), Children's Services (£1m extra) and Temporary Accommodation (£5m extra).

- **Almost half** (47 per cent) **supported**, to some extent, the growth proposals put forward to maintain existing service levels. This included **17 per cent** that **strongly supported this**.

- **Over a quarter** (29 per cent) **opposed**, to some extent, the proposals. This included **12 per cent** that **strongly opposed the proposals**.

Overall, how strongly do you support, or oppose, the growth proposals put forward to maintain existing service levels?

Base: All respondents (433)

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

Maintaining existing services

Respondents that did not support the proposals to maintain existing service levels were asked to explain why.

Theme	Count
Concerns about temporary accommodation spending, management, and welfare support: Widespread concern about high costs, inefficiency, lack of transparency, and justification of temporary accommodation spending, coupled with opposition to increased welfare and migrant support spending, with calls for cost reviews, alternative solutions, regulation, and prioritisation of UK citizens.	75
Concerns about fairness, service abuse, and Central Government funding responsibility: Issues raised about fairness in funding allocation, perceived abuse of social services, and belief that central government should bear responsibility for funding certain services to ensure equity and avoid duplication.	31
Opposition to Council Tax increases and advocacy for efficiency savings and cost control: Strong opposition to council tax increases with advocacy for efficiency savings, cost reductions, waste elimination, and use of technology to control spending rather than expanding budgets or raising taxes.	31
Support for maintaining and enhancing essential Social Services and Public Safety: Strong support exists for maintaining and increasing investment in key social services including children's services, adult social care, environmental health, public safety, and community environmental amenities, emphasising effectiveness, value for money, and community well-being.	28

Demand for transparency, accountability, clear budget justification, and understanding: Criticism focuses on lack of transparency, clear prioritisation, measurable outcomes, detailed cost justifications, and general budget understanding, leading to reliance on councillors and concerns about unallocated funds and service responsibility.	26

Comments made have been themed and themes with 26 or more comments are summarised in the table below.

The most common theme was: **Concerns about temporary accommodation spending, management, and welfare support** (75 comments).

Examples of comments can be seen on the following page, with the full list of themes and comments found in the appendices.

Maintaining existing services – Comment examples

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Concerns about Temporary Accommodation spending,

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

management, and welfare support:

"I am opposed to spending so much on temporary accommodation. We are a unique borough in central London. Temporary accommodation should be provided elsewhere in cheaper locations."

"I don't know who gets temporary accommodation so can't support this expenditure at the moment."

"I support the ambition to maintain existing service levels but I oppose spending £5m on temporary accommodation. If this figure is due to real estate costs within the borough, alternative temporary accommodation should be sourced elsewhere where costs are lower."

Opposition to Council Tax increases and advocacy for efficiency savings and cost control:

"The Council Tax is too high as it is. We should live within our means. Spending should be cut back across the board."

Concerns about fairness, service abuse, and Central Government funding responsibility:

"Central Government is already paying too much for welfare and related items. The borough should spend the minimum amount that is consistent with its legal obligations."

"Service levels have always been exceptional at K&C but there are also a great many people ready to exploit them in the borough and I'd like to see measures to address this. The Council Tax Reduction Scheme is completely unfair to those of us who work hard to pay our full Council Tax."

"I have a flat as a second home for work reasons and having to pay a premium would make this unaffordable. I would either have to sell the flat or rent it out and travel into work."

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

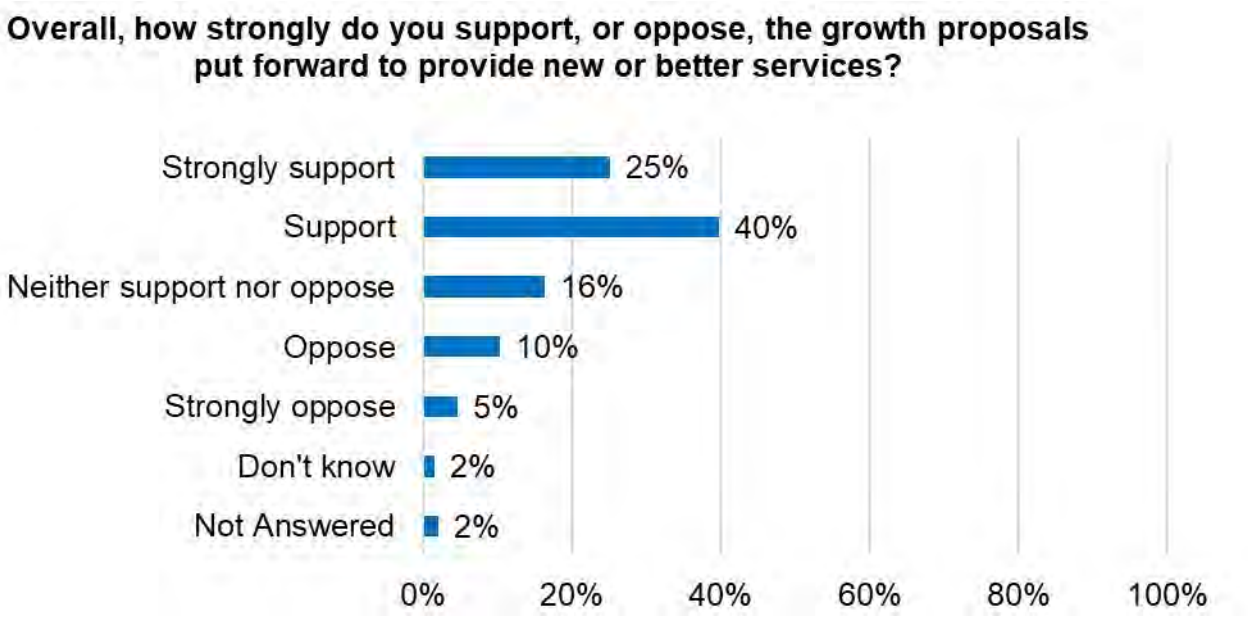

Support for maintaining and enhancing essential Social Services and Public Safety:

"Why is the lion share of the extra spending going to temporary accommodation? I agree with the other 2 areas of spending on adult social care and children services."

Providing new or better services

Respondents were asked about proposals to provide new or better services. The proposals included spend of £1.6 million to provide new or better service in 2026/27. This included: Improving our streets (£1m extra), maintaining new trees (£88k extra), maintaining Cremorne Wharf Park (£100k extra) and protecting against cyber and other security threats (£175k extra).

- **Almost two-thirds** (65 per cent) **supported**, to some extent, the growth proposals put forward to provide new or better services. This included **25 per cent** that **strongly supported this**.
- A total of **15 per cent opposed**, to some extent, the proposals.

Base: All respondents (433)

Providing new or better services

Respondents that did not support the proposals to provide new or better services were asked to explain why. Comments made have been themed and themes with 23 or more comments are summarised in the table below.

The most common theme was, **environmental and street improvements with community involvement and cost efficiency** (53 comments) .

Examples of comments can be seen on the following page, with the full list of themes and comments found in the appendices.

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

Theme	Count
Environmental and street improvements with community involvement and cost efficiency: Support for spending on street cleaning, tree planting, parks, and road improvements that enhance the local environment and economy, emphasising costeffectiveness, community involvement, and exploring alternative funding such as charitable donations and tax-efficient methods.	53
Opposition to Council Tax increases and demand for budget cuts and efficiency: Strong opposition to Council Tax increases and overall budget growth due to financial burdens on residents, especially those on fixed incomes, with calls for budget cuts, leaner operations, and better resource use.	32
Cyber security and public safety prioritisation: Importance of cyber security investment to protect the Council and community, balanced with prioritising street safety, crime prevention, and public safety measures over aesthetic or discretionary spending.	31
Maintaining existing services and fair prioritisation of spending: Emphasis on maintaining existing services, housing repairs, and core public safety measures, prioritising essential services and vulnerable residents over discretionary projects like parks and street beautification to ensure fairness in allocation.	24
Transparency, justification, and detailed information in spending: Calls for clearer evidence, measurable outcomes, cost-benefit analysis, and detailed information about budget proposals including financial impacts, project specifics, service quality, and delivery effectiveness to build trust and understanding.	23

Providing new or better services – Comment examples

Environmental and street improvements with community involvement and cost efficiency:

"I am always supportive of more funding for parks and trees as it has a clear noticeable improvement to everyone's day to day."

"I support the overall proposal but wonder if it is possible to trim some of the street improvement costs e.g. by changing contractors."

"Please consider more tree planting and green space improvement for those who cannot access private squares not just maintaining trees."

"Streets could manage with maintenance rather than improvement, half the budget. Trees can be maintained at longer intervals, half the budget.

Cremorne Wharf Park could be maintained at longer intervals, half the budget."

Cyber Security and Public Safety Prioritisation:

"Cyber security yes - it is very needed."

Opposition to Council Tax increases and demand for budget cuts and efficiency:

"I don't think we should be increasing council tax for all in order to do some of improvements above (like roads and trees) in the next few years. People are crunched with day to day inflation and cost of living - focus on steady state for now."

"The money is not spent effectively - far too much waste and bureaucracy; it is very inefficient."

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

"Need to cut some extra services. Maintain current expenditure. Locals have more rights they are paying the revenue."

Maintaining existing services and fair prioritisation of spending:

"RBKC Council would send absolutely the wrong message to Central Govt /the Mayor of London if it simply carries on with non essential proposals of this kind. It should concentrate rather on funding existing services and containing expenditure which is not essential."

Revenue Savings Proposals

In order to set a balanced budget we are putting forward £22m of savings proposals in 2026/27 rising to £31m by 2029/30. Any savings not taken forward will need to be replaced with alternatives on a £ for £ basis as the Council is required to set a balanced budget.

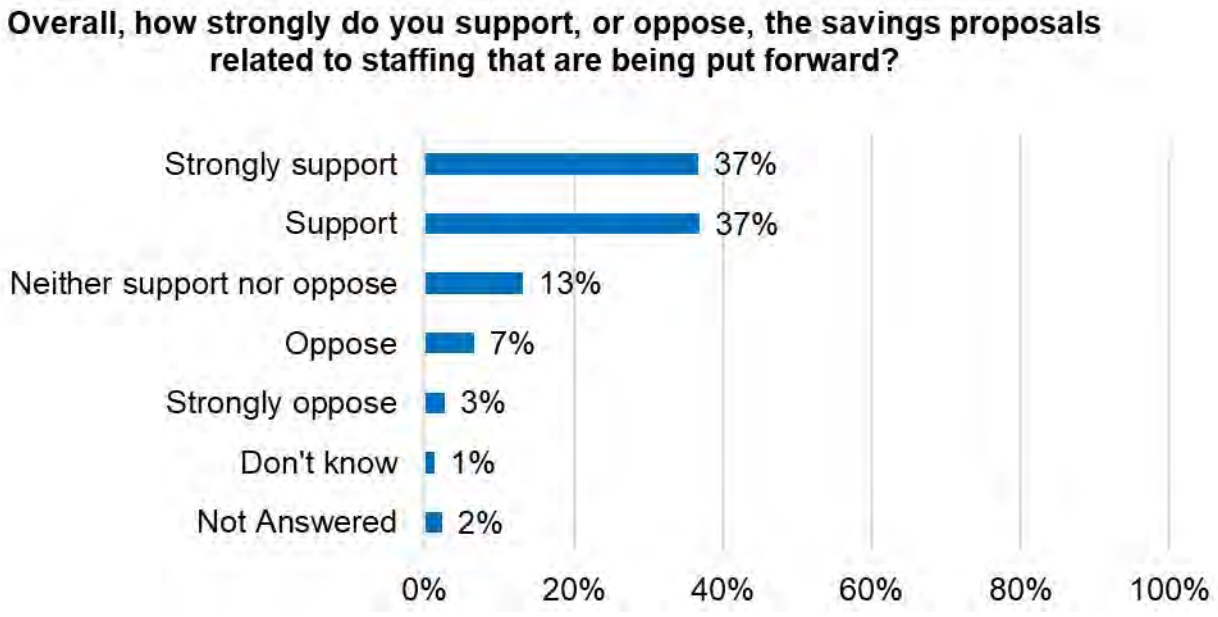

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Staffing

Respondents were asked about savings proposals related to changes to staff levels and conditions. The proposals included: Launching a voluntary redundancy scheme (saving £4.5m), restricting staff travel card use (saving £750k) and other salary controls (saving £500k)

- **Almost three-quarters** (74 per cent) **supported**, to some extent, the savings proposals put forward related to changes to staff levels and conditions. This included **37 per cent** that **strongly supported this**.

- However, **one in ten** (10 per cent) **opposed**, to some extent, the proposals.

Base: All respondents (433)

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Staffing

Respondents that did not support the proposals related to staffing were asked to explain why. Comments made have been themed and themes with 16 or more comments are summarised in the table below.

The most common theme was: **Support for staffing cost reduction measures and efficiency improvements** (57) comments).

Examples of comments can be seen on the following page, with the full list of themes and comments found in the appendices.

Theme	Count
Support for staffing cost reduction measures and efficiency improvements: This theme encompasses agreement with strategies such as voluntary redundancies, limiting staff travel card benefits, digitisation and automation for efficiency, salary controls, broader cost-cutting efforts emphasising transparency and fairness, and better staff utilisation and training to optimise resources.	57
Opposition to cuts in essential and vulnerable services: Strong disagreement with reductions affecting frontline, critical, and vulnerable services, highlighting concerns about fairness for low-wage workers, the need to maintain service quality, staff morale, and safeguarding vulnerable populations.	25
Demand for transparency, clarity, and accountability in budget proposals: Emphasises the need for detailed, transparent, and accountable budgeting processes, including clear explanations of specific proposals, thorough efficiency analysis before implementation, and addressing concerns about political motivations behind budget cuts.	22

Advocacy for alternative budget solutions and revenue sources: Support for alternative revenue sources like wealth taxes and commercial activities, opposition to redundancies, and calls for exploring diverse financial strategies to balance the budget without compromising essential services.	16

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Staffing – Comment

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

examples

Support for staffing cost reduction measures and efficiency improvements:

"I highly support both the voluntary reduction scheme and restricting staff travel card use."

"I support these staffing-related savings. The Council needs to prioritise core functions and reduce spending tied up in low-value initiatives and niche projects that offer little benefit to most residents. Resource needs to be concentrated on services with broad impact, not discretionary or ideological programmes. Staffing costs should reflect those priorities, and voluntary schemes and tighter controls are reasonable steps."

"The numbers of people employed is ridiculously high. The numbers must be reduced."

Demand for transparency, clarity, and accountability in budget proposals:

"Not enough information provided. What would be the impact of this on services? What roles would be eliminated? Would some of them be outsourced?" **Opposition to cuts in essential and vulnerable services**:

"Changing staffing to AI will just worsen things or make things more unsafe. You can vastly increase council tax on properties worth over £5 million and more for those over £10 million and even more for those over £20 million. Can also tax people whose properties are empty and who own more than one home. Vulnerable residents shouldn't suffer when so much money invested in empty houses in the borough (and for that matter houses shouldn't be left empty it's awful!)."

Advocacy for alternative budget solutions and revenue sources:

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

"Redundancy is expensive and does not utilise the skills that staff bring to the local area.

It would be better to use this money for training and upskilling."

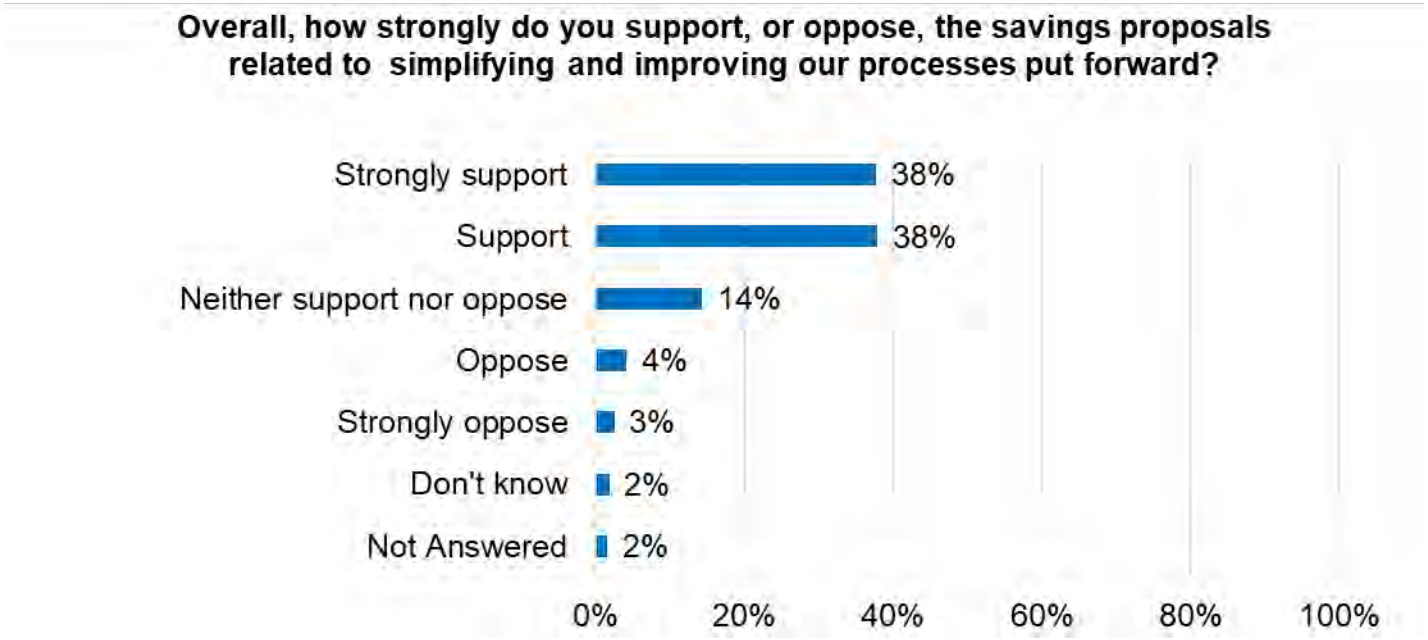

Simplifying and improving processes

Respondents were asked about savings proposals related to simplifying and improving processes. The proposals included: Introduction of more self service portals (saving £450k), Adult Social Care digital transformation (saving £265k) and new financial management and HR system (saving £150k)

- **Over three-quarters** (76 per cent) **supported**, to some extent, the savings proposals put forward to simplify and improve processes. This included **38 per cent** that **strongly supported this**.

- However, **seven per cent opposed**, to some extent, the proposals.

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Base: All respondents (433)

Simplifying and improving processes

Respondents that did not support the proposals related to simplifying and improving processes were asked to explain why. Comments made have been themed and themes with four or more comments are summarised in the table below.

The most common theme was: **Digital transformation and service quality** (55 comments).

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Examples of comments can be seen on the following page, with the full list of themes and comments found in the appendices.

Theme	Count
Digital transformation and service quality: Support for digital transformation and process simplification to improve efficiency and reduce costs, with emphasis on maintaining quality customer service, reducing reliance on costly agency staff, and ensuring digital inclusion by providing human support to prevent exclusion of vulnerable groups and maintain accessibility and inclusivity. Some scepticism exists about the effectiveness and benefits of digital transformation, citing past challenges and doubts about cost savings and demand reduction.	55
Community responsibility and financial efficiency: Suggestions to encourage community responsibility, improve financial efficiency through cost-effective payment methods, and better utilisation or sale of Council assets to generate funds.	6
Information clarity and proposal understanding: Insufficient information and detail about the proposals leading to unclear understanding, conditional support, or reservations about certain aspects.	5
Outsourcing and user cost responsibility concerns: Opposition to outsourcing Council services due to concerns about increased costs and reduced quality, alongside views that users should bear responsibility for costs related to missed appointments.	4

Processes – Comment examples

Digital transformation and service quality:

"Fine if its works – it's all about the implementation and the track record here isn't great."

"I support, as long as any service user access issues are fully addressed."

"I've contacted Noise Nuisance out-of-hours online recently, and it's a much better service than when I last contacted them by switchboard years ago so I strongly support your proposals here."

"There are definitely more opportunities to save by implementing digitalisation and AI"

"Because some services (like the ones mentioned) and some residents require human interaction."

"Alot of residents are not on line, nor have a computer. Don't make technical things too difficult for those who find technical things hard to understand."

Community responsibility and financial efficiency:

"I believe we need to stop being such a nanny state and we need to make our communities work at becoming a community, by contributing whether it's in keeping our streets clean or in not wasting resources by missing appointments. It's not only about benefits and rights. It's about responsibilities."

"Why not sell off the site of the town hall . It's enormous and always empty when I visit .

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

The library is good to keep but it's far too big and a smaller building with some houses in prime area in keeping with the area built and sold off."

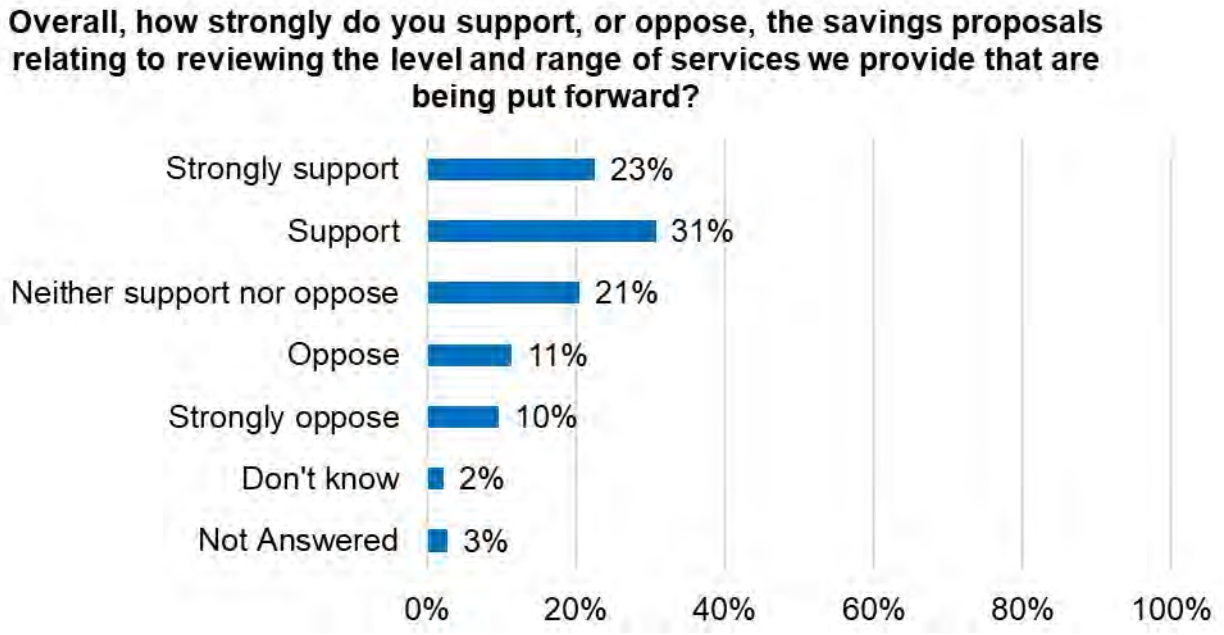

"We don't have enough info to analyse this. What is the current situation? How does it compare to best in class borough?"

Information clarity and proposal

Level and range of services

Respondents were asked about savings proposals related to reviewing the level and range of services. The proposals included: Reducing funding to the Voluntary and Community Sector (separate consultation taking place), opportunities to streamline services for young people (saving £100k), stopping delivery of victim advocacy service, redirecting some public hralth funding and acquisitions and development of properties to support service needs in temporary accomodation and adult's and children's supported living.

- **Over half** (54 per cent) **supported**, to some extent, the savings proposals put forward to review the level and range of services. This included **23 per cent** that **strongly supported this**.
- **Over a fifth** (21 per cent) **opposed**, to some extent, the proposals. This included **10 per cent** that **strongly opposed the proposals**.

Base: All respondents (433)

Level and range of services

Respondents that did not support the proposals related to reviewing the level and range of services were asked to explain why. Comments made have been themed and themes with 16 or more comments are summarised in the table below.

The most common theme was: **Protect vulnerable and disadvantaged groups** (79 comments).

Examples of comments can be seen on the following page, with the full list of themes and comments found in the appendices.

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

Theme	Count
Protect vulnerable and disadvantaged groups: Emphasise safeguarding services for vulnerable populations including children, youth, victims, and disadvantaged residents, with a focus on funding voluntary and community sectors and youth services to prevent future social inequalities and costs. Oppose cuts to public health funding, community wellbeing activities, and non-statutory services due to their long-term health benefits, cost savings, and importance for community life and cultural events.	79
Housing strategy and property asset management debate: Address mixed views on housing acquisition and development strategies, including calls for central funding, sustainable income approaches, and decisions on council property ownership versus leasing or selling assets to reduce costs.	19
Support efficient delivery of core statutory Council services: Prioritise Council efforts on core statutory services, improve efficiency, reduce non-essential programs, and explore alternative savings and revenue options to manage budget pressures without harming frontline services.	19
Demand clear information, community involvement, and robust alternatives: Require detailed information on budget proposals, increased community engagement, and ensure alternatives like signposting and community organisation support are available to mitigate service reductions.	16

Level and range of services – Comment

ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

examples

Protect vulnerable and disadvantaged groups:

"By reducing the VSA support this will most definitely have a negative impact on community projects."

"Community wellbeing is essential as it prevents further expense where there has been neglect in this area."

"Ensure you do a gap analysis with the services you intend to stop funding, to ensure you do not create gaps in provision. We are an obscenely rich borough, cutting services to the most disadvantaged is cruel and will create more social ills, e.g. lure of gang like to disadvantaged kids. Let's not make more poverty, but re distribute better."

Demand clear information, community involvement, and robust alternatives:

"This sounds worrying. Not clear what you really want to chop."

Housing strategy and property asset management debate:

"I support these initiatives as they are nice to have as opposed to must have. If any real estate acquisitions and development in relation to temporary accommodation are required, please consider cheaper areas to keep acquisition costs down."

"Youth clubs other services you provide don't cut but look at your assets to sell. No need now for such a large town hall. Look and see if other council owned buildings can be sold off or amalgamated."

Support efficient delivery of core statutory Council services:

"Youth and community services are urgently needed and must be protected and invested in as need

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

increases, that is why it's vital to reduce spending on RBKC staff."

"Obviously these are all items we generally support, but do not have the money and a bit of realism must prevail."

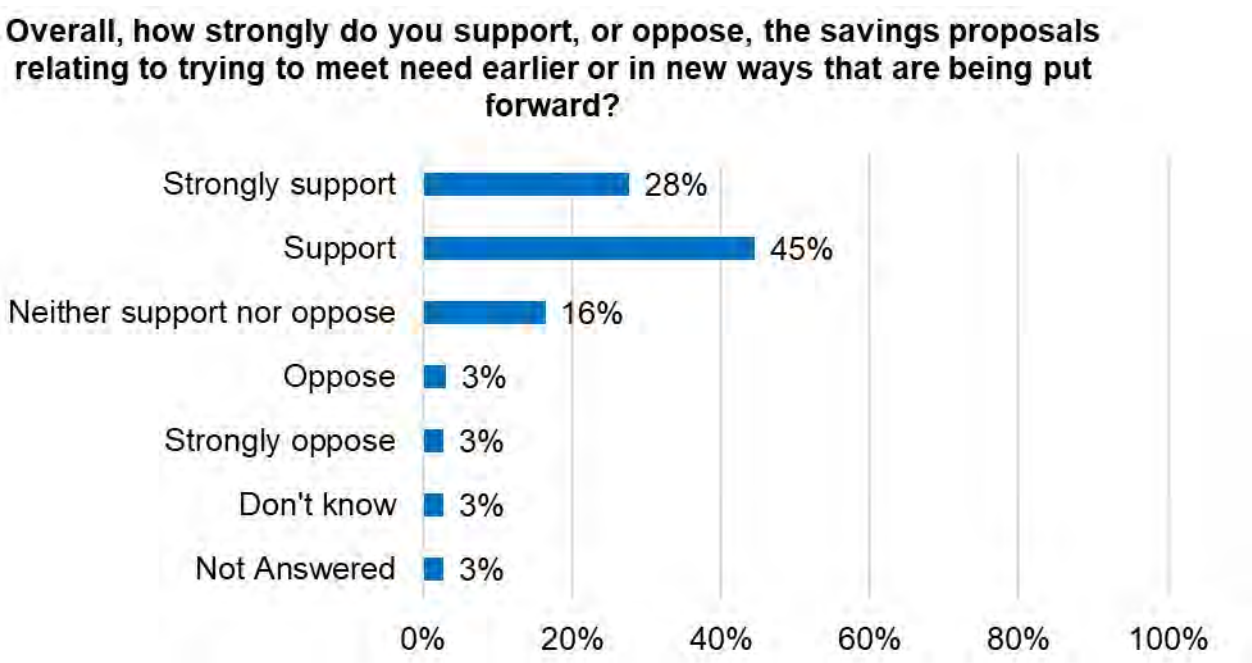

Changing service models

Respondents were asked about savings proposals related to changing service models to meet need earlier or in new ways to avoid higher costs later. The proposals included: Aligning housing and social care practices to help care leavers (saving £104k), helping adults live more independently for longer (saving £783k), reviewing pathways for people with disabilities (saving £540k) and saving on temporary accommodation costs (saving £1m)

- **Almost three-quarters** (73 per cent) **supported**, to some extent, the savings proposals put forward to change service models to meet need earlier or in new ways to avoid higher costs later. This included **28 per cent** that **strongly supported this**.

- A total of **six per cent opposed**, to some extent, the proposals.

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Base: All respondents (433)

Changing service models

Respondents that did not support the proposals related to changing service models were asked to explain why. Comments made have been themed and are summarised in the table below.

The most common theme was: **Support for housing, early intervention, and vulnerable residents with safeguards and transparency** (26 comments).

Examples of comments can be seen on the following page, with the full list of themes and comments found in the appendices.

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Theme	Count
Support for housing, early intervention, and vulnerable residents with safeguards and transparency: Agreement on investing in housing solutions, early intervention, and services supporting independence, contingent on careful implementation and safeguards to protect vulnerable residents. Includes concerns about proposal effectiveness, transparency, timing, and social impact, emphasising the need for clear communication and consultation to understand impacts on vulnerable groups.	26
Opposition to pension fund use and cuts to Housing and Social Support Services: Disagreement with using the Pension Fund for temporary accommodation and with cuts to housing and social support services due to risks to vulnerable populations and the fund's intended purpose.	11
Calls for alternative funding and prioritisation of local needs: Advocacy for alternative funding sources such as property taxes and prioritising support for local vulnerable citizens over other groups.	10
Need for more information: Reflects the lack of adequate information to form a clear opinion on the budget proposals.	6
Support for housing, early intervention, and vulnerable residents with safeguards and transparency: Agreement on investing in housing solutions, early intervention, and services supporting independence, contingent on careful implementation and safeguards	3

Changing service models – Comment examples

Support for housing, early intervention, and vulnerable residents with safeguards and transparency:

"Housing needs are not currently being met so it's hard to see how reducing funding for these area will pan out."

"I agree with the notion of helping the elderly to live more independently. We need more developments for the elderly, offering sheltered independent accommodation, but with easy access to communal services."

"I am ok with the £1m saving in buying properties but all the other savings are signs that the council does not care about the most vulnerable in society."

"I support these proposals. Shifting to service models that reduce long-term dependency and avoid higher future costs is sensible. Supporting people to live more independently, improving transition pathways and reducing expensive temporary accommodation pressures all help control structural costs. These approaches are practical, targeted and reduce the need for broader tax rises or continued expansion of high-cost services."

Opposition to pension fund use and cuts to Housing and Social Support Services:

"I question whether RBKC Pension Fund should be used for this purpose even if it is extremely well funded. There may, on the other hand, be plenty of scope to cease pension contributions for the time being."

"I support most of the above apart from the last section concerning TA and the use of RBKC Pension Fund investment. Maybe I don't know enough about the LG pension pots etc. but if there is a risk in using the

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

LGP for this then I strongly oppose it as investments can obviously go up and down and I wouldn't like to see a situation where your pension pot is compromised. However if there is no risk to the above I would support it."

Calls for alternative funding and prioritisation of local needs:

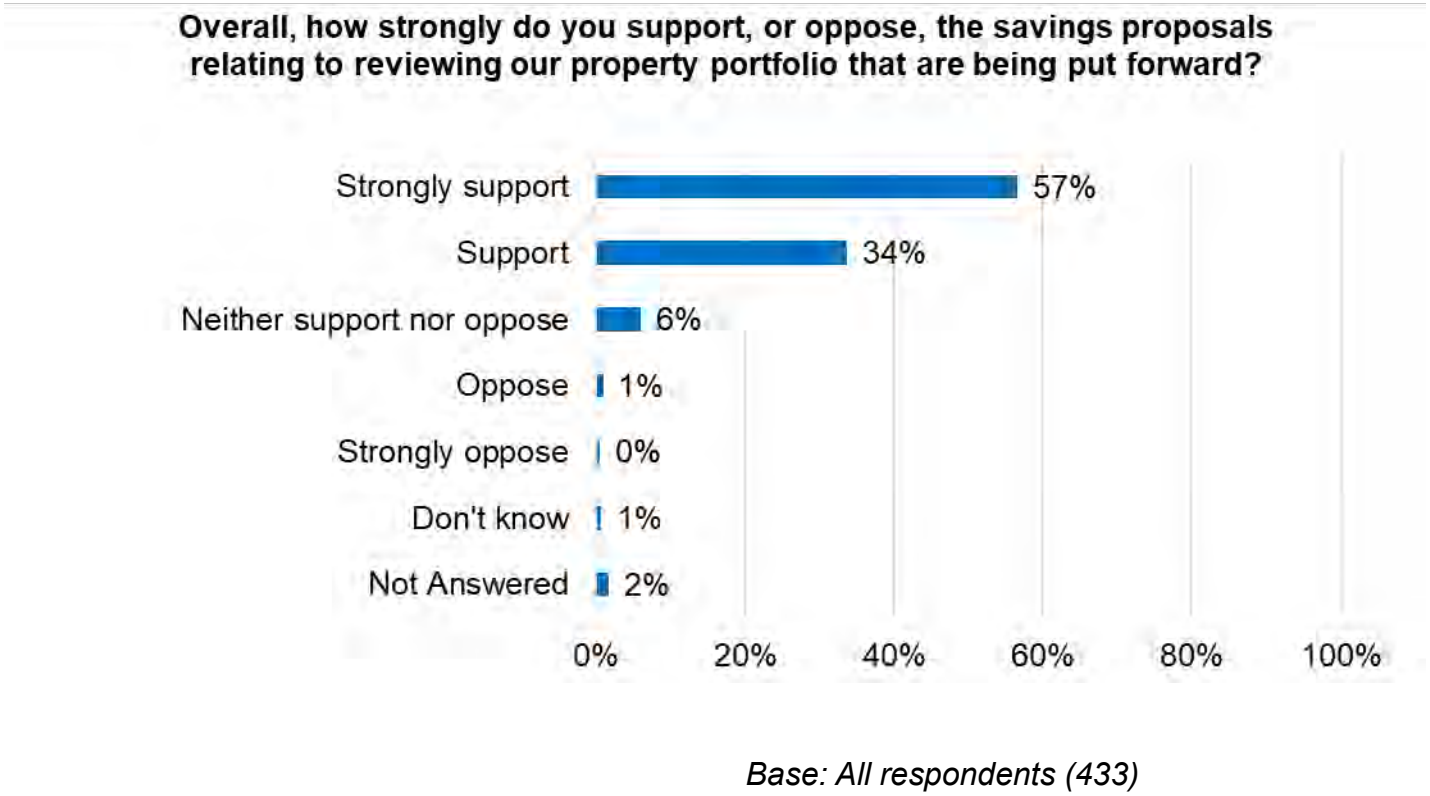

"See my earlier comment about applying the 100% premium to council tax for second homes being much preferable to cutting important services for the vulnerable."

Reviewing our property portfolio

Respondents were asked about savings proposals related to reviewing our property portfolio, optimising use of our buildings and minimising costs. The proposals included: Making better and more efficient use of office space (saving over £1m) and saving over £800k through a more efficient contract to maintain our buildings and replacing lighting in the Town Hall.

- **More than nine in ten** (91 per cent) **supported**, to some extent, the savings proposals put forward to review our property portfolio, optimising use of our buildings and minimising costs. This included **57 per cent** that **strongly supported this**.

- Just **one per cent opposed** the proposals.

Base: All respondents (433)

Reviewing our property portfolio

Respondents that did not support the proposals related to reviewing our property portfolio were asked to explain why. Comments made have been themed and summarised in the table below.

The most common theme was: **Council property and energy efficiency optimisation** (30 comments).

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Examples of comments can be seen on the following page, with the full list of themes and comments found in the appendices.

Theme	Count
Council property and energy efficiency optimisation: Support for reviewing and optimising the Council's property portfolio through better office space use, energy-efficient upgrades, improved maintenance contracts, flexible working arrangements, and calls for clearer information and more creative, effective energy solutions beyond current proposals.	30
Concerns about inefficiency, waste, and poor project planning: Issues raised include inefficient office space use, wasteful practices, scepticism about cost-effectiveness, poor contractor management, and immature budgeting and planning for projects.	13

Reviewing our property portfolio – Comment

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

examples

Council property and energy efficiency optimisation:

"As previously mentioned there should be substantial opportunities for savings on Council properties given the appetite council employees have for flexible working, and the voluntary redundancy packages proposed."

"Change the bulbs. Why wasn't this done ages ago. Everybody knows you can save money through lighting costs. What about other green and cost savings in all your buildings."

"I support these proposals. Maximising the use of Council buildings and driving down running costs is basic financial discipline. More efficient office space, better maintenance contracts without reducing core services for the majority. These measures should be prioritised ahead of any additional charges to tax paying residents."

"Excellent proposals. Please investigate if possible to do on a larger scale / in other areas to increase savings."

Concerns about inefficiency, waste, and poor project planning:

"Efficiency is to be supported. The council is probably currently guilty of wastage of resources and inefficiency."

"This should have been done years ago. The Town Hall lights are on day and night; the building is heated far too much compared to individual homes in this cold weather - easy when other people are paying of course."

"I don't understand this. Why are you using office space inefficiently? Why are you not already using LED lights?"

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

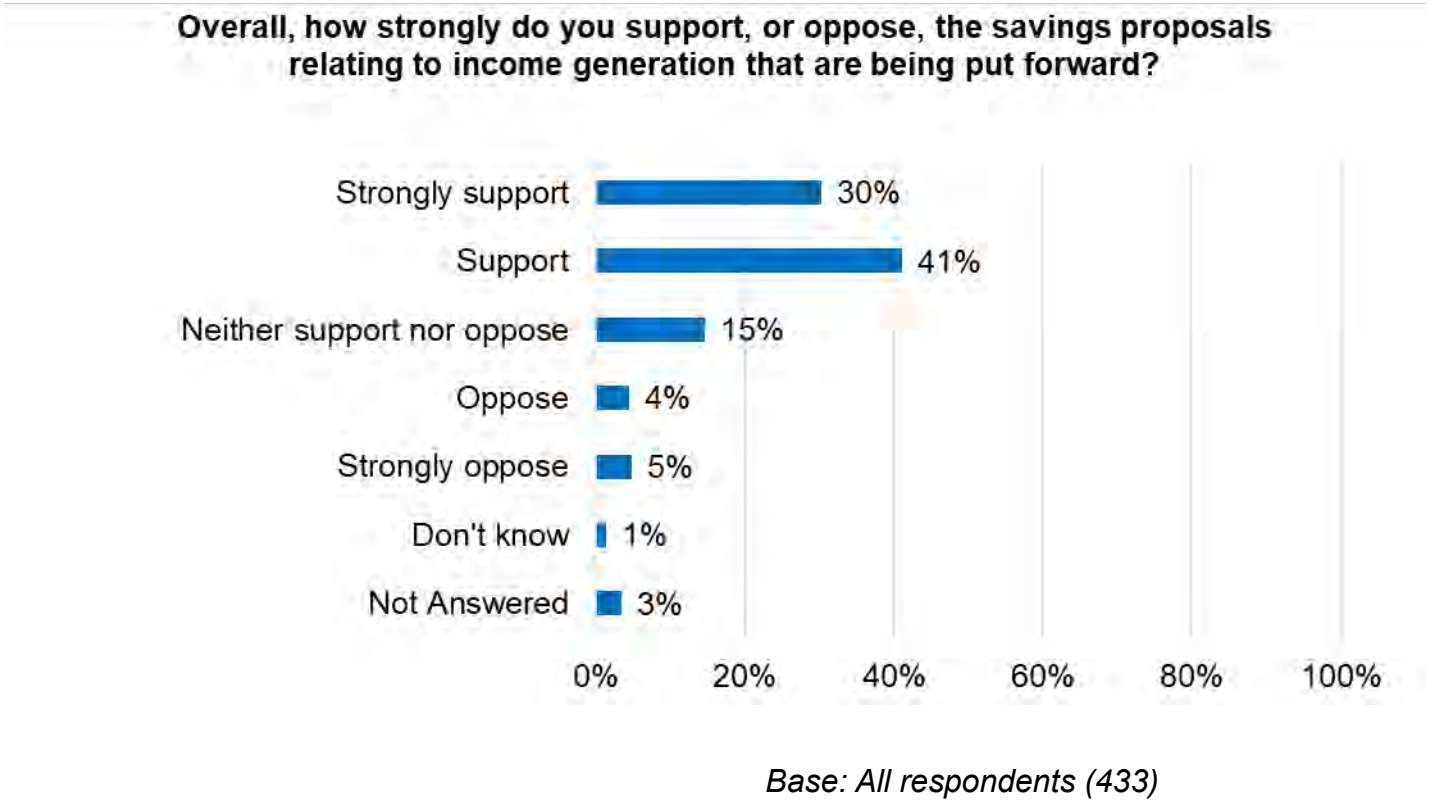

Income generation

Respondents were asked about savings proposals related to income generation through being more commercial. The proposals included: Generating more income through advertising (additional £750k), generating additional income through commercial property (additional £300k) and raising fees and charges by five per cent

- **Almost three-quarters** (71 per cent) **supported**, to some extent, the savings proposals put forward related to income generation through being more commercial. This included **30 per cent** that **strongly supported this**.

- However, **nine per cent opposed**, to some extent, the proposals.

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Base: All respondents (433)

Income generation

Respondents that did not support the proposals related to income generation were asked to explain why. Comments made have been themed and are summarised in the table below.

The most common theme was: **Opposition to fee and tax increases** (43 comments).

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Examples of comments can be seen on the following page, with the full list of themes and comments found in the appendices.

Theme	Count
Opposition to fee and tax increases: Concerns about affordability, negative impacts on lowincome residents and local businesses, and specific objections to certain fees and advertising expansion, reflecting resistance to raising fees or taxes.	43
Ethical and transparent income generation: Support for generating income through advertising, commercial activities, vehicle charges, fines, and innovative ideas, emphasising ethical management, transparency, and sensitivity to vulnerable groups, while considering alternative methods and addressing mixed opinions and concerns about local access and specific fees.	29
Cost cutting and efficiency improvements: Preference for prioritising cost cutting, improving efficiency, and better management within the council before considering any increases in fees or taxes.	12

Income generation – Comment examples

Opposition to fee and tax increases:

"Five percent increase in fees and charges is unacceptable, with current state of the council and crime rate. We have to pay more for insurance and security in our buildings due to continuous robberies, so to pay you 5% more when because of your lack of focus on security we have to invest more to protect our homes is ridiculous."

"Do not increase advertising - it downgrades the borough and the gain is not worth the damage."

"I am against the increase, as there are other ways to find the necessary funding, such as reducing expenses and services."

"Some of the suggestions are sensible and I agree with charging higher commercial rates for advertising and for commercial providers. But for the charges that have direct impact on local people when cost of living is already so high and when we pay council tax, I oppose.
E.g. there should be some free access to the local museums for local people."

Ethical and transparent income generation:

"Charge cars on size and weight. Charge tourists that impact on the quality of the day to day life of residents."

"Excellent initiatives especially expansion of advertising. Please investigate if there are other similar areas in which the borough can generate more income."

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

Cost cutting and efficiency improvements:

"First, improve the council's efficiency. The working from home idea hasn't worked in the residents' favour or the Council's efficiency. Then perhaps there'd be no need to raise fees?"

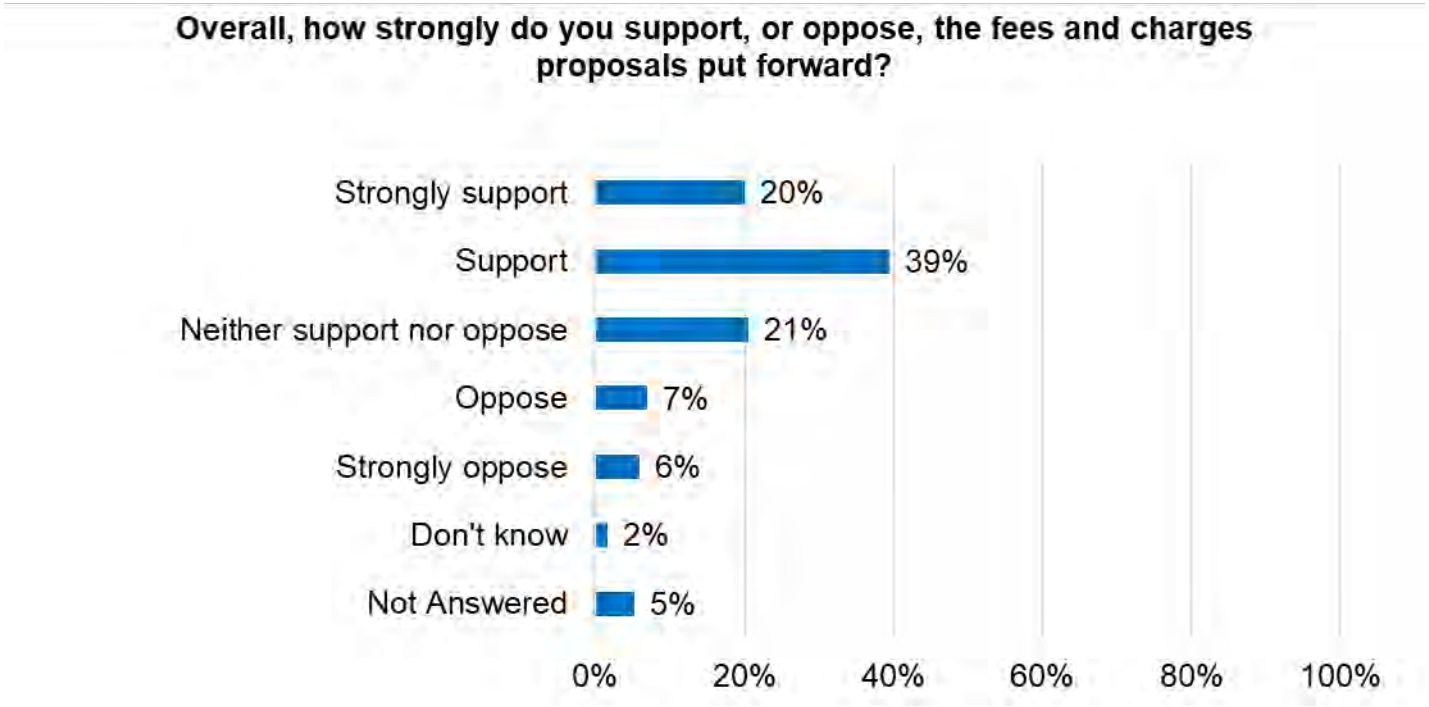

"Proposing increases of 5% and more is inappropriate. It's beyond inflation and would lead to higher inflation. The council needs to address its inefficiencies and staff performance to become a leaner, high performing org."

Fees and charges

Respondents were asked about proposals related to raising fees and charges by five per cent

- **Over half** (59 per cent) **supported**, to some extent, the proposals put forward to raise fees and charges. This included **20 per cent** that **strongly supported this**.
- However, **13 per cent opposed**, to some extent, the proposals. This included **six per cent** that **strongly opposed the proposals**.

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

Base: All respondents (433)

Fees and charges

Respondents that did not support the proposals related to fees and charges were asked to explain why. Comments made have been themed and are summarised in the table below.

The most common theme was: **Balanced approach to fee increases and financial burden** (45 comments).

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

Examples of comments can be seen on the following page, with the full list of themes and comments found in the appendices.

Theme	Count
Balanced approach to fee increases and financial burden: Includes support for modest, targeted fee increases aligned with inflation and user-pays principles, opposition to broad fee and tax hikes due to financial strain especially during the cost of living crisis, and concerns about fairness to vulnerable groups to avoid undue hardship.	45
Concerns about Council spending and resource management: Encompasses scepticism about Council spending efficiency, calls for better resource management instead of fee hikes, and some trust in appropriate fee setting.	15
Support for maintaining community services and considering consequential costs: Emphasises the importance of sustaining services like libraries and accounting for consequential costs such as increased fly-tipping when setting fees and charges.	7
Need for more information: Reflects the lack of adequate information to form a clear opinion on the budget proposals.	3

Fees and charges – Comment examples

Balanced approach to fee increases and financial burden:

"A 16% increase in residents parking permits is too much. For most people this is not a nice to have but a necessity, unlike most of the other items which are getting smaller increases."

"Everyone is finding it difficult to manage the rising costs. Please don't make it worse."

"I believe those are reasonable given the stretch. Nevertheless the Council should think very carefully about this. A large percentage of our residents, particularly elderly will already be significantly burdened by the new property tax proposals."

management:

Concerns about Council spending and resource

"I think the money should come from savings and no extra taxes. The tax burden for those who pay them is at a multi decade high."

"We strongly oppose RBKC's intentions to raise the prices on fees and charges by 5 per cent for next year. From what we can see every day RBKC's spending is often wasteful and is not done in the interest of the residents. One example being an ultra costly redevelopment of the playground in Holland Park that turned a previously excellent playground into a hazardous, nonfunctioning, unsustainable place."

Support for maintaining community services and considering consequential costs:

"I think that fees for parking permits for SUVs should be much higher than cars to reflect the additional burden to the streets."

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

"This is already one of the most expensive boroughs to The super rich won't feel the pressure at all, but and the wealth gap already hugely visible here will widen."

"I understand the necessity to raise prices. However please consider a lower increase on activities which support health and wellbeing. Access to sport and other activities is a long term investment and will reduce health related costs in the years to come."

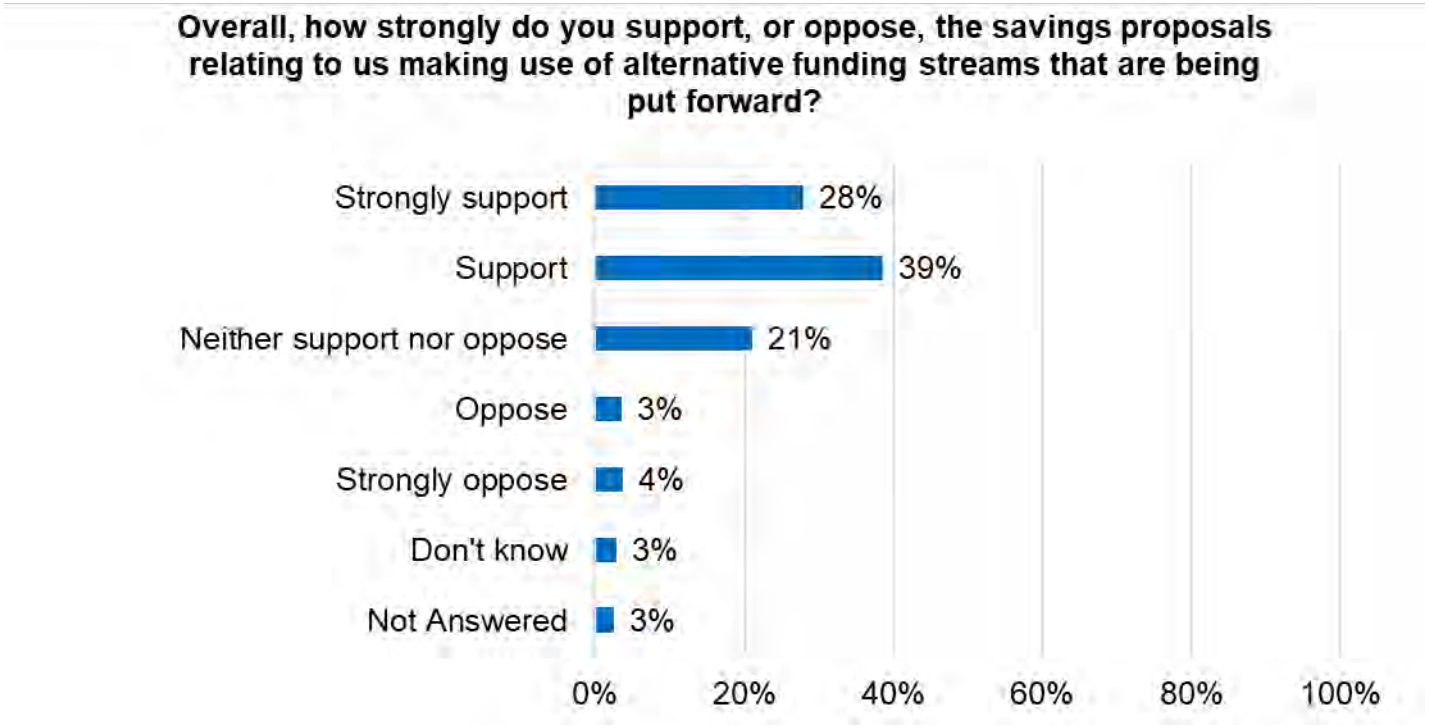

Alternative funding

Respondents were asked about savings proposals related to making use of alternative funding streams. The proposals included: Increasing income from fixed penalty notices (increased income of £2m), redirecting Public Health funding (additional £1.3m) and reviewing how we fund our capital programme (saving £900k)

- **Over two-thirds** (67 per cent) **supported**, to some extent, the savings proposals put forward to make use of alternative funding streams. This included **28 per cent** that **strongly supported this**.

- However, **seven per cent opposed**, to some extent, the proposals.

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

Base: All respondents (433)

Alternative funding

Respondents that did not support the proposals related to alternative funding were asked to explain why. Comments made have been themed and summarised in the table below.

The most common theme was: **Alternative funding and parking enforcement with concerns on fairness and policy impact** (36 comments).

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

Examples of comments can be seen on the following page, with the full list of themes and comments found in the appendices.

Theme	Count
Alternative funding and parking enforcement with concerns on fairness and policy impact: This theme covers support for exploring alternative funding streams such as increased parking fines and capital financing, while expressing concerns about fairness, excessive fines, opposition to using fines primarily as revenue sources, criticism of Council enforcement practices, scepticism about the viability of alternative financing, concerns about complicated parking zoning, and negative views on central government policies impacting local finances.	36
Public Health funding, opposition to cuts with conditional support for maintaining outcomes: This theme reflects opposition and concern about redirecting or cutting public health funding due to potential harm to essential services, alongside conditional support if public health outcomes are maintained.	20
Transparency, governance, and safeguards in budget proposals: This theme emphasises the need for transparency, detailed information, strong governance, and safeguards to ensure alternative funding streams and budget changes are clear, fair, and effective.	12
More information needed	2

Alternative funding – Comment

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

examples

Alternative funding and parking enforcement with concerns on fairness and policy impact:

"Do not believe in the exploitation of motorists for financial gain by local government. Parking fines are already high."

"I strongly oppose the increase in the level of fixed penalty notice fines for vehicle parking violations. This a dishonest and deceitful way of raising revenue."

"Parking enforcement is already very strict. If you make it any worse there is a danger that it will discourage car visits from neighbouring boroughs with a knock on effect for local businesses. Remember how the extension of the Congestion Charge under Mayor Livingstone crippled businesses on Holland Park/Notting Hill Gate?"

"FPNs are already excessive."

Public Health funding, opposition to cuts with conditional support for maintaining outcomes:

"Again, redirecting public health funding is fine if it doesn't result in a reduction of vital services."

"Depends what redirecting public health funding to 'different cross council programmes actually means in a practical sense."

Transparency, governance, and safeguards in budget proposals:

"Without any evidence of specifics or detail of what and how, this is impossible to judge. "Achieving health outcomes" for instance, is careful phrasing, omitting words such as

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

'better', 'quicker' , 'at least as good' or 'slightly slower', 'less effective' and so on. Similarly, what is the capital programme? What alternative source of financing is available and how much would it cost?"

Capital Investment

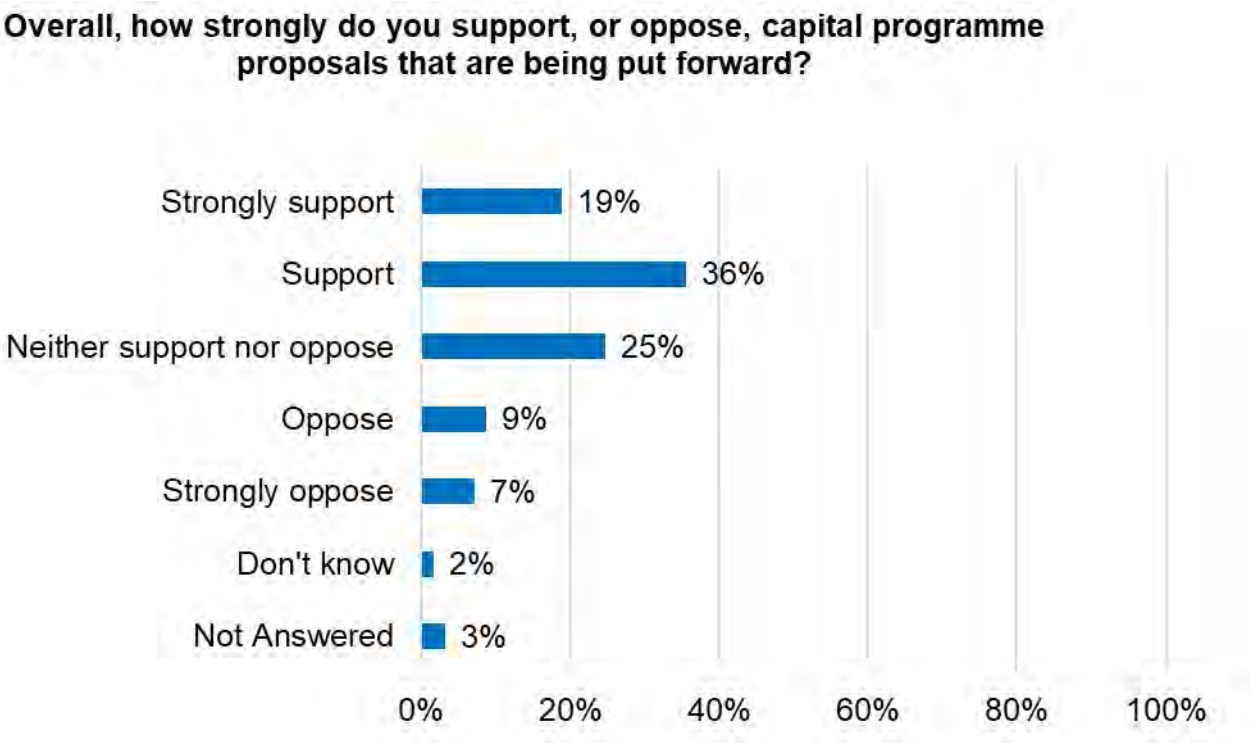

The consultation also focuses on new capital proposals recommended for inclusion in the Council's ongoing Capital Programme

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Capital investment

Respondents were asked about new capital proposals recommended for inclusion in the Council's Capital Programme. The proposals included: £2.2m investment in street lighting which will improve road safety, reduce crime and aid the nighttime economy.

- **Over half** (55 per cent) **supported**, to some extent, the capital programme proposals put forward. This included **19 per cent** that **strongly supported this**.
- However, **16 per cent opposed**, to some extent, the proposals. This included **seven per cent** that **strongly opposed the proposals**.
- In addition **a quarter** (25 per cent) responded neutrally

Base: All respondents (433)

Capital investment

Respondents that did not support the proposals related to capital investment were asked to explain why. Comments made have been themed and themes 18 or more comments are summarised in the table below.

The most common theme was: **Concerns and opposition to specific capital projects and increased spending** (61 comments).

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

Examples of comments can be seen on the following pages, with the full list of themes and comments found in the appendices.

Theme	Count
Concerns and opposition to specific capital projects and increased spending: There is disagreement and concern about the high cost, necessity, location, and value for money of the Pembroke Road depot future-proofing project, with calls for more clarity. Opposition exists to large capital expenditures and council tax increases during economic uncertainty, with preference for delayed or cautious spending focused on essential needs.	61
Uncertainty and questions about capital programme priorities and management: Questions exist about the prioritisation of capital programmes, project management, depot consolidation, and materials used, indicating a need for clearer strategic direction.	23
Support for prudent and justified capital investments with transparency: Support exists for capital investments that are prudent, cost-effective, and deliver long-term value, including energy-efficient lighting, community assets like libraries, and essential infrastructure. There is a strong demand for clearer communication, detailed explanations, and transparency regarding capital spending proposals, including project benefits, prioritisation, and supporting data, with caution urged on borrowing and large projects.	19
Mixed views on street lighting proposals and safety measures: Opinions are mixed on street lighting upgrades, with support for safety benefits contrasted by concerns about effectiveness, environmental impact, fairness in prioritisation, and calls for alternative safety measures.	18

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

Capital investment – Comment examples

Concerns and opposition to specific capital projects and increased spending:

"Do not support £17.5m on "future proofing" the depot. Seems a lot. What are the benefits?"

"Given fiscal constraints, now is not the time to spend these sums."

"Half a million on CCTV and 17 million on a depot - where do these Monopoly money numbers come from? We build temporary villages for 60,000 people for 2 million total."

"Not in favour of work at Pembroke Road depot - is this necessary?"

"Spending on the depot at Pembroke Road is way too high! If it cannot be managed by the Council at much lower levels of outgoings, it needs to be privatised. I am not sure where you want to invest into street lighting as everywhere there is plenty of lighting. This needs to be dropped, until at last the economy improves."

Support for prudent and justified capital investments with transparency

"I support these capital proposals. Investment in street lighting is a practical use of capital funding with clear benefits for safety, crime reduction and the evening economy. Futureproofing operational sites like the Pembroke Road depot is also sensible asset management that avoids higher replacement or emergency costs later. Capital spending should continue to prioritise essential infrastructure rather than discretionary estate projects."

"I am concerned about the amount of borrowing involved but I do support the proposals."

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

Uncertainty and questions about capital programme priorities and management:

"The Pembroke Road proposal is difficult to assess without a link to the expected benefits."

"Suggest Pembroke Road future proofing costs could be phased over a longer period. Proposal references savings by reducing need for alternative temporary depots. Would be helpful to see net cost after savings."

Council Tax

The Council has always been proud of maintaining one of the lowest Council Tax levels in the country, but the Government's funding proposals have forced us to consider some extremely difficult decisions for 2026/27. Although the government has indicated these funding reductions will be phased over the next four years it has suggested this offer is dependent on us increasing Council Tax by five per cent each year.

We have therefore reluctantly included this assumption in our financial plans. Alongside this, we are now reluctantly considering charging a 100 per cent Council Tax premium on second homes within the borough as well as potential reductions to our Council Tax Reduction Scheme

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

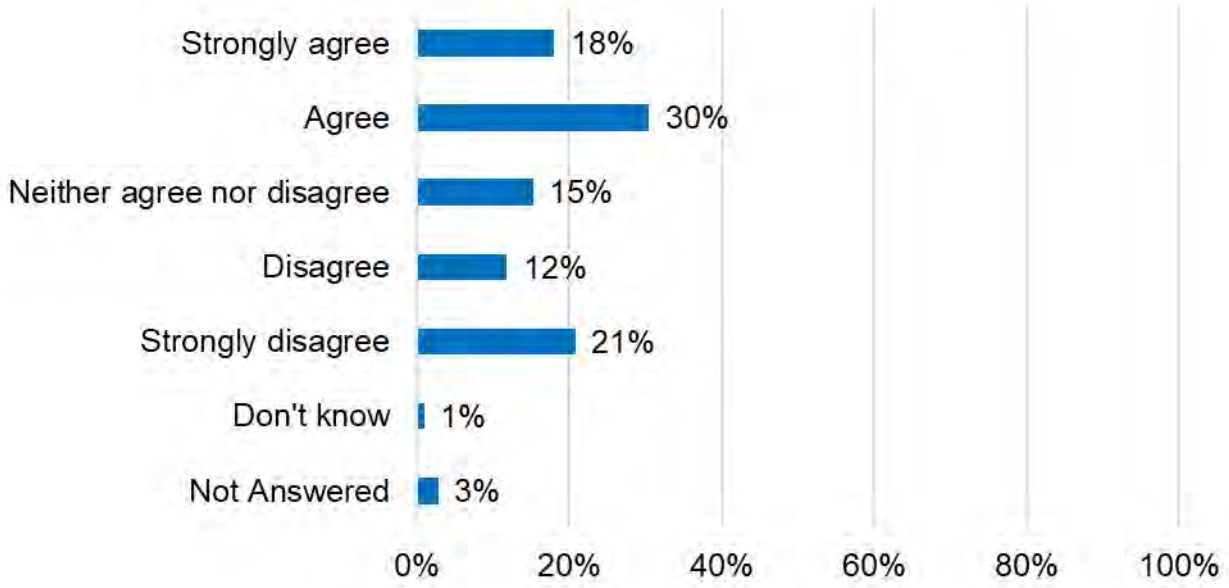

Council Tax

Respondents were asked given the financial challenges the Council is facing, how strongly they agreed with the proposed five per cent increase to Council Tax.

- **Almost half** (48 per cent) **agreed**, to some extent, with the proposed five per cent increase to Council Tax. This included **18 per cent** that **strongly agreed to this**.

- However, **a third** (33 per cent) **disagreed**, to some extent, with this proposal. This included **21 per cent** that **strongly disagreed**.

Given the financial challenges the Council is facing, how strongly do you agree or disagree with the proposed five per cent increase to Council Tax?

Base: All respondents (433)

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Council Tax

Respondents were asked to explain their response to the proposed five per cent increase in Council Tax..

Theme	Count
Opposition to Council Tax increase due to affordability and fairness concerns: The five per cent Council Tax increase is unaffordable and unfair, especially for vulnerable, low-income households, and working families facing financial strain amid a cost of living crisis, necessitating a more graduated or targeted taxation approach based on property value and income.	66
Conditional support for Council Tax increase with protections and cost-cutting: Support for a five per cent Council Tax increase is acceptable if it maintains essential services, protects vulnerable residents including pensioners and low-income households, ensures fairness in taxing second homes and high-value properties, includes Council cost-cutting measures, and avoids cuts to Council Tax Reduction Schemes that aid vulnerable groups.	46
Divided views on taxing second homes and empty properties: Increasing Council Tax on second homes and empty properties is seen as either a fair measure or an unfair penalty to long-term residents, reflecting a split opinion.	33
Opposition to tax increase without spending cuts and demand for efficiency: Council Tax should not be increased without first implementing spending cuts, improving efficiency, and exploring alternative revenue sources to ensure better value for money.	28

Need for fairer Council Tax system and property revaluation: A fairer Council Tax system requires property revaluation and equitable tax apportionment based on property size, value, and ownership to ensure just tax burdens.	16

Comments made have been themed and themes with 16 or more comments are summarised in the table below.

The most common theme was: (66 comments). **Opposition to Council Tax increase due to affordability and fairness concerns**

Examples of comments can be seen on the following page, with the full list of themes and comments found in the appendices.

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Council Tax – Comment examples

Opposition to Council Tax increase due to affordability and fairness concerns:

"Council tax is already too high in my opinion and raising it further would certainly hit me hard as a pensioner."

"For those living is relatively small flats and low incomes the council tax is a huge sum."

"I strongly disagree. A further 5% rise adds to an already heavy burden on working households. Core services should be prioritised and cost pressures controlled before turning to higher taxation. Spending growth in non-essential areas is driving avoidable budget pressure, and residents should not be expected to absorb continual increases."

Opposition to tax increase without spending cuts and demand for efficiency:

"I am against the increase, as there are other ways to find the necessary funding, such as reducing expenses and services."

"More efficiency savings should be sought first."

Conditional support for Council Tax increase with protections and cost-cutting:

"I am accepting of the proposed five per cent increase in Council Tax, given the financial constraints imposed by central government and the need to maintain core statutory services. While regrettable, this increase is preferable to further erosion of frontline provision.

Overall, I support an approach that prioritises fairness, protects vulnerable residents, and ensures that those who choose to hold additional properties in the borough contribute proportionately to its costs."

Divided views on taxing second homes and

"I do not support doubling council tax on 2nd homes."

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

"I would support an even bigger Council tax premium on second homes and on empty property. At least. 200%."

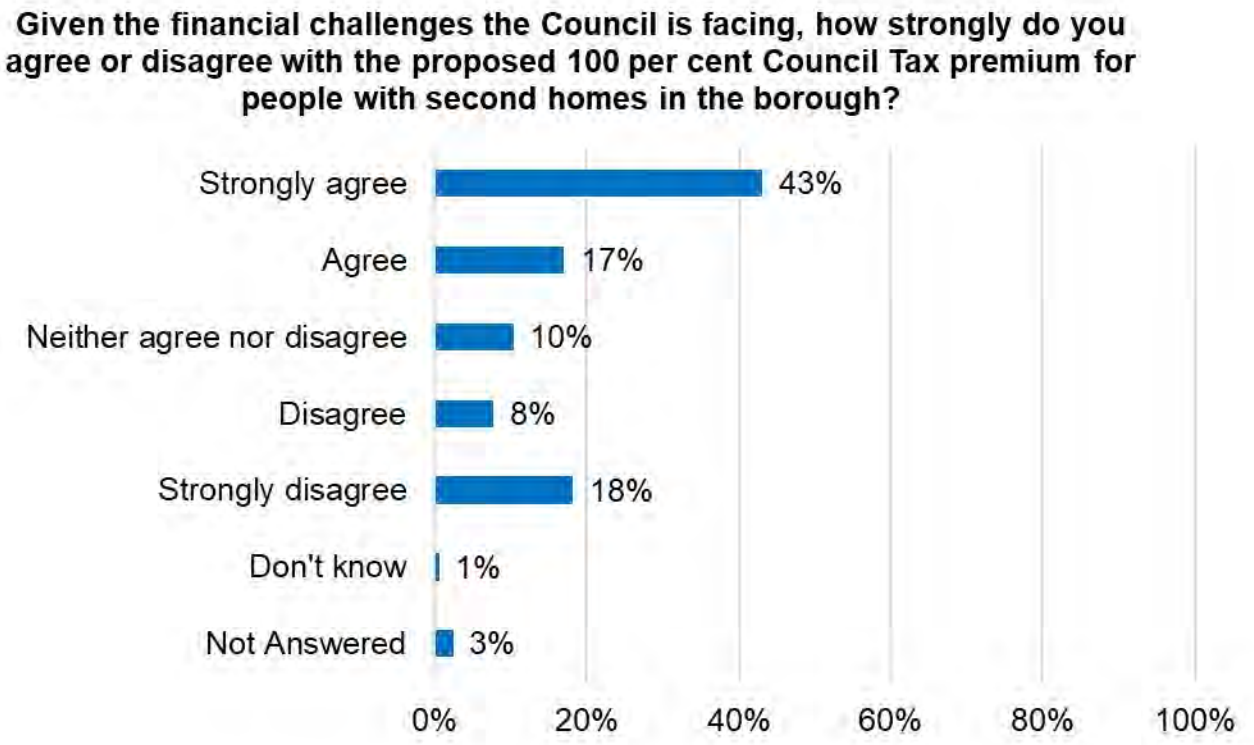

Second homes

Respondents were asked given the financial challenges the Council is facing, how strongly they agreed with the proposed 100 per cent Council Tax premium for people with second homes in the borough.

- **Six in ten** (60 per cent) **agreed**, to some extent, with the proposed 100 per cent Council Tax premium for people with second homes in the borough. This included **43 per cent** that **strongly agreed to this**.

- However, **over a quarter** (26 per cent) **disagreed**, to some extent, with this proposal. This included **18 per cent** that **strongly disagreed**.

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Base: All respondents (433)

Second homes

Respondents were asked to explain their response to the proposed 100 per cent premium for second homes in the borough. Comments made have been themed and summarised in the table below.

The most common themes were: **Opposition to 100 per cent Council Tax premium on second homes** (88 comments) and **support for 100 per cent Council Tax premium on second homes** (55 comments).

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

Examples of comments can be seen on the following page, with the full list of themes and comments found in the appendices.

Theme	Count
Opposition to 100 per cent Council Tax premium on second homes: Critics argue the premium is excessively high, unfairly punitive, difficult to enforce, risks harming the local economy and housing market, and unjustly penalises legitimate second home uses and essential workers. Concerns include economic impact and fairness.	88
Support for 100 per cent Council Tax premium on second homes: Advocates endorse a premium on second homes to alleviate housing shortages, encourage renting or selling of these properties, and generate funds for social services. Suggestions include even higher premiums and targeted policies for empty or investment properties to maximise impact.	55
Need for nuanced implementation of Council Tax premium: Calls for refined approaches such as exemptions, variable premiums based on property usage, alternative taxation methods, and clear enforcement mechanisms to ensure fairness and effectiveness of the policy.	33

Second homes – Comment examples

Opposition to 100 per cent Council Tax premium on second homes:

"Agree that it should be higher but 100% seems steep."

"Council tax is levied to meet the cost of services which will not be used more by virtue of a property being a

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

second home and are likely to be used less. The burden should not exceed the benefit and individuals should not be penalised for owning homes elsewhere in order to subsidise those who don't. It is plain wrong - a fine for owning another home..”

“Full time residents in the borough should be given significantly better treatment. Nevertheless; it does seem quite draconian. Perhaps a fixed charge may be appropriate as residents of high value properties will already be paying so much more.”

“I do not have a second home but disagree with such policing by the Government. They want to dictate how people live. If someone wants to live, for example, in a small flat in Kensington and Chelsea and a small flat in the country, why should they be penalised?”

Support for 100 per cent Council Tax premium on second homes:

“A second home is a luxury. There are too many empty expensive homes in the borough, there are areas where you never see the lights on in the houses! It's like a ghost town in the winter! The amount should be calculated against the amount of people you have registered as homeless!”

“If people can afford a second home, they should be able to afford the council tax for their second home.”

“Such people able to afford a second home in RBKC are likely to be wealthy, well able to afford this premium, and its imposition alone is unlikely to deter them from continuing to maintain the second home here.”

Need for nuanced implementation of Council Tax premium:

“There are more pressures being put on second homes through the changes in rental laws and taxes so it might be mean even more people considering seeking and might lead to a sudden hike in properties for sale. A more gradual increase might be preferable.”

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

Savings and investment ideas

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Investment

Theme	Count
Enhance community safety and enforcement: Investment in community policing, crime reduction, pedestrian and traffic safety, enforcement of public order fines, street lighting, and CCTV to improve overall community safety and security.	56
Increase street cleanliness, environmental maintenance, and green space enhancement: More street bins, better rubbish collection, stricter penalties for dog fouling and fly tipping, maintenance of parks and green spaces, tree planting, and pollution control to improve environmental quality and community wellbeing.	56
Improve Council efficiency, financial transparency, and spending accountability: Reduce waste, cut administrative costs, impose financial controls, outsource services, enhance transparency, publish spending reviews, combat corruption, and clearly communicate investment priorities and impact measurement to ensure responsible use of funds and public trust.	40

Fund community facilities, social inclusion, and recreational programmes: Support community centres, libraries, local festivals, social inclusion projects, youth and children's clubs, recreational facilities, and education programmes to promote community wellbeing and engagement.	31

Respondents were asked to detail any areas they thought the Council needs to invest more day to day spending in, keeping in mind the financial challenges. Comments made have been themed and themes with 31 or more comments are summarised in the table below.

The most common themes were: **Enhance community safety and enforcement** and i**ncrease street cleanliness, environmental maintenance, and green space enhancement** (both 56 comments.

Examples of comments can be seen on the following page, with the full list of themes and comments found in the appendices.

Investment – Comment examples

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Enhance community safety and enforcement:

"Community policing especially for anti social behaviour."

"Crime reduction, penalise fly tippers; improve health and wellbeing outcomes."

"Public safety. Crime is disregarded, people do not feel like their safety or belongings matter. But on the flip side, the road cameras and traffic wardens are keen to dole out parking tickets left and right."

"The fly tipping situation is terrible and more cameras are needed in hotspots especially in North Kensington. Also more fines for dog walkers who do not clean up after themselves."

Improve Council efficiency, financial transparency, and spending accountability:

"Department should merge, become leaner, train staff to be flexible and share the department budget and stop waste. This also means that they shouldn't unnecessarily dig up the road in order for them to get the money next year. Money should be used where it is necessary and sustainable projects and goals should be a focus for the council."

Increase street cleanliness, environmental maintenance, and green space enhancement:

"Cleanliness in our streets should be a top priority - rubbish collections, road sweepers etc. to keep health hazards down to a minimum."

"Environmental issues such as community gardens are important and should receive adequate funding as they promote health, help the environment and prevent burdens on social and care services."

"There is so much rubbish on the streets across the council. I sometimes cannot believe we are supposed to be one of the richest countries in the world.

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

I beg you to improve the cleanliness of the council and overall up keeping some parts seems so ran down."

"I would just like to see the current level of spending on libraries, recreation facilities and community centres maintained."

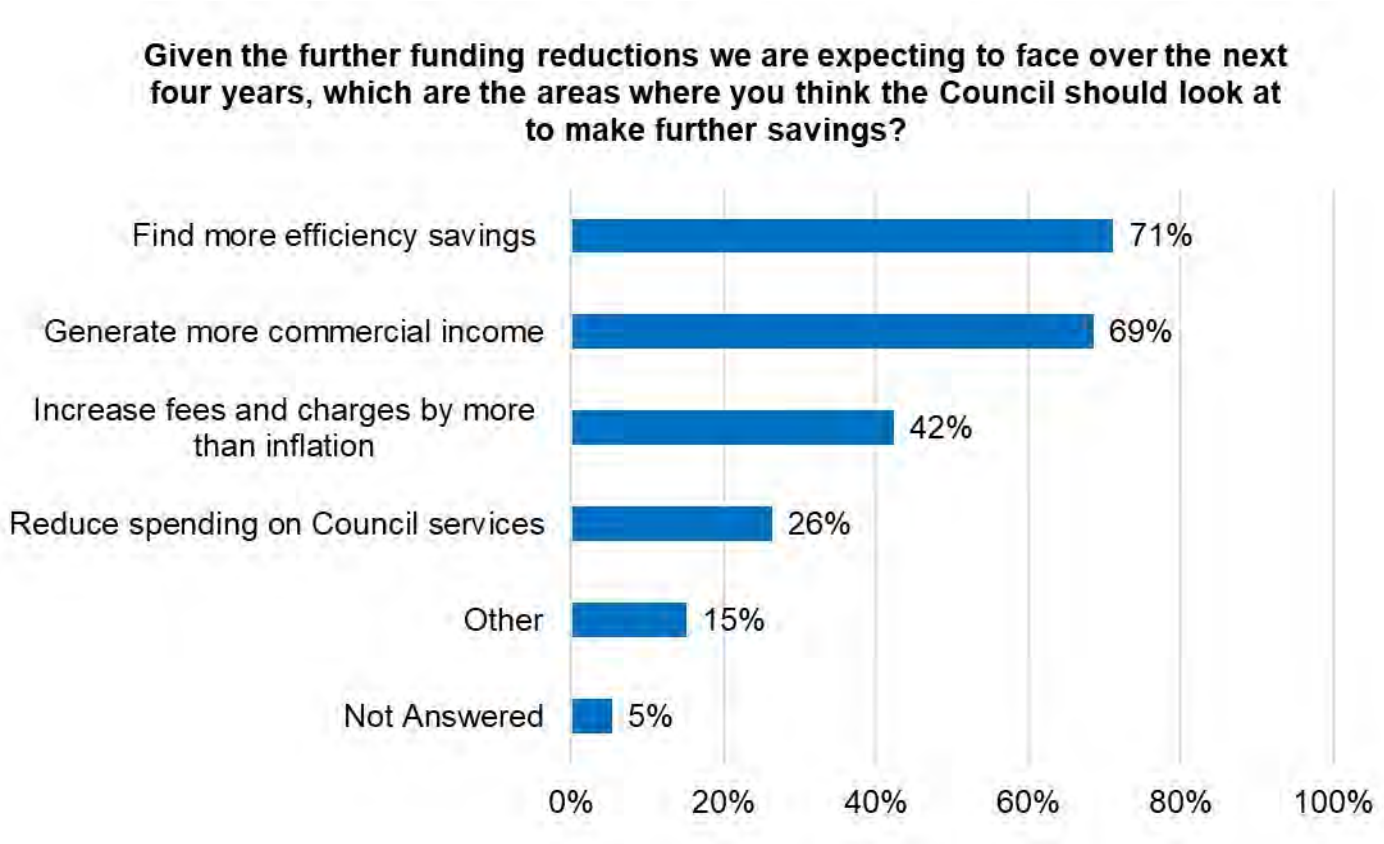

Fund community facilities, social inclusion, and recreational programs:

Further savings

Respondents were asked given the further funding reductions expected over the next four years, which areas the Council should look to for further savings.

- **More than seven in ten** (71 per cent) felt that the Council should look at **finding more efficiency savings** to make further savings**.**
- **Almost as many** (69 per cent) felt the Council should **generate more commercial income.**
- A total of **42 per cent** felt the Council should **increase fees and charges by more than inflation.**
- A total of **15 per cent** suggested **other** ideas, these are explored on subsequent pages.

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

Base: All respondents (433)

Further savings

Respondents that gave an 'other' answer were asked to explain further. Comments made have been themed and themes with 14 or more comments are summarised in the table below.

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

The most common theme was: **Reducing spending on non-essential services, events, vanity projects, and internal inefficiencies (50 comments)**

Examples of comments can be seen on the following page, with the full list of themes and comments found in the appendices.

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Theme	Count
Reducing spending on non-essential services, events, vanity projects, and internal inefficiencies: Suggestion to cut funding for non-essential programmes, fringe groups, costly events, vanity projects, reduce inefficiencies from high staff turnover, eliminate middle management layers, cut overly generous wages and pensions, and pay better salaries to fewer managers.	50
Revenue generation through enforcement, fines, penalties, and tax reforms: Advocacy for stricter enforcement and higher fines for anti-social behaviours and offences, raising fees and taxes on luxury vehicles, second homes, Airbnb rentals, non-resident properties, parking permits, business licenses, council tax reform for equity, exploring new revenue streams like tourist taxes, and auditing councillor expenses.	46
Technology, automation, and digital solutions for efficiency and cost reduction: Support for using AI, automation, and digital self-service to reduce administrative costs and improve productivity, while acknowledging concerns about digital access, fraud risks, and scepticism due to past ineffective spending.	15
Community engagement, volunteer support, resident responsibility, and spending priorities on cleanliness, safety, and social housing: Emphasis on encouraging residents to take responsibility for cleanliness and safety, increasing volunteer involvement, engaging the community in wellbeing and environmental programmes, and prioritising cleanliness, safety, and social housing in budget considerations.	14

AND CHELSEA

Equality implications

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Equality implications

Theme	Count
Protecting vulnerable and disadvantaged groups and promoting equality: Emphasises safeguarding disabled, elderly, low-income, ethnic minority populations, and youth services from budget cuts, while recognising education's role in addressing inequalities and promoting opportunity.	31
Ensuring fairness, equity, and transparency in taxation, services, and budgeting: Advocates for non-discriminatory service delivery, fair taxation targeting wealthy individuals and businesses, transparency in budget savings and plans, improved partnerships, and effective communication for informed decision-making.	25
None/don't know or more information needed	17
Protecting core public services and Council spending priorities: Supports maintaining statutory services, scrutinising discretionary spending to avoid waste, implementing innovative cost-saving measures, and addressing concerns over staff pay, morale, recruitment, and perceived overpayment on non-essential projects.	17

Addressing risks of digital exclusion and proposals for additional revenue generation: Warns against digital exclusion due to increased digitisation and reduced printed materials, and includes ideas for additional revenue like extending parking permit hours, restricting travel card perks, charging foreign visitors, and increasing bike parking fees.	7

Respondents were asked to detail anything they thought the Council should be aware of in terms of how the proposed budget might adversely/unfairly impact on people and how to reduce the impact. Comments made have been themed and themes with seven or more comments are summarised in the table below.

The most common theme was: **Protecting vulnerable and disadvantaged groups and promoting equality** (31 comments).

Examples of comments can be seen on the following page, with the full list of themes and comments found in the appendices.

Equality implications – Comment examples

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Protecting vulnerable and disadvantaged groups and promoting equality:

"Given significant savings it is difficult not to adversely impact certain groups of people. There will be some negative impact but try to minimise it."

"Keep children and school services please. This is the only reason we live here and pay crazy rent."

"Ring fence prioritise and improve services for children from disadvantaged homes or the care system so they make constructive use of their time, are able to do well at school, are given a wide range of opportunities for different jobs, apprenticeships careers and interests, and are encouraged to take part in sports and fitness and taught about healthy eating and food preparation."

Protecting core public services and Council spending priorities:

"Stop vanity projects."

Ensuring fairness, equity, and transparency in taxation, services, and budgeting:

"Council tax reduction is a big help to single people and any changes should be thought through carefully."

"The borough is full of very rich people. Don't target these people with unreasonably high and punitive penalties or they will go and then we will suffer financially."

Addressing risks of digital exclusion and proposals for additional revenue generation:

"You could make life easier for residents and raise extra revenue by increasing the hours when local

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

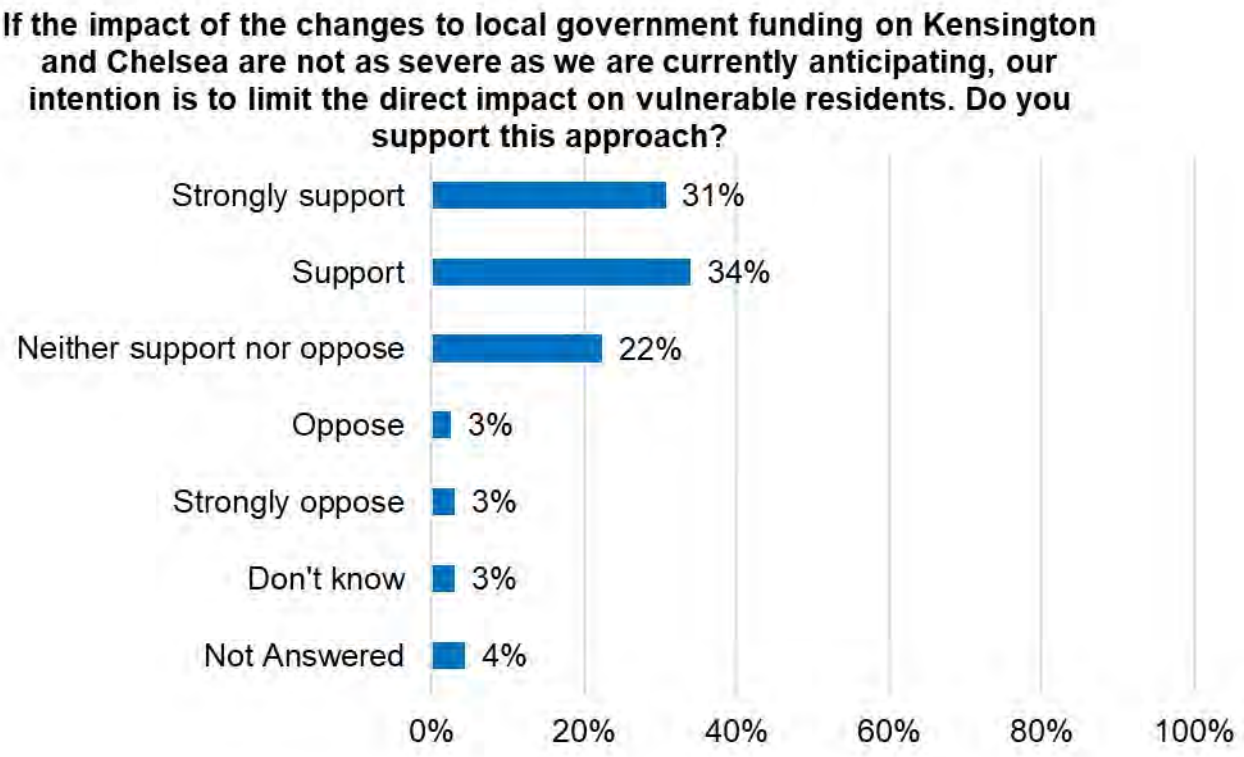

resident parking permits apply. For example, on a Saturday and Sunday." *"Don't sabotage the quality of your staff by paying them less, recipe for disaster. Tax second homes and everything that gravitates around that."*

Vulnerable residents

Respondents were asked, if the impact of the changes to local government funding in Kensington and Chelsea are not as severe as anticipated, the Council intends to limit the direct impact on vulnerable residents, if they supported this approach.

- **Almost two-thirds** (65 per cent) **supported**, to some extent, the suggested approach of limiting the direct impact on vulnerable residents. This included **31 per cent** that **strongly supported this**.

- However, **six per cent opposed**, to some extent, this proposed approach.

Base: All respondents (433)

Vulnerable residents

Respondents were asked to explain their answer. Comments made have been themed and summarised in the table below.

The most common theme was: **Support for targeted protection of vulnerable residents** (42 comments).

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

Examples of comments can be seen on the following page, with the full list of themes and comments found in the appendices.

Theme	Count
Support for targeted protection of vulnerable residents: Prioritise support for vulnerable groups such as children, elderly, and disabled with means testing to ensure fairness and prevent abuse or undue burden on other residents, while ensuring clarity and ongoing review of vulnerability criteria to address social polarization and adapt policies as needed.	42
Opposition to broad vulnerability definitions and targeted support: Question the fairness and efficiency of prioritising vulnerable residents, criticise welfare systems, and emphasise shared responsibility among all residents.	32
Other	6
More information needed	1

Vulnerable residents – Comment examples

Support for targeted protection of vulnerable residents:

"Clearly they need more help than others."

"Especially children and the elderly."

"If funding pressures ease, focusing protection on genuinely vulnerable residents is reasonable. This must not become a route for expanding discretionary projects or duplicating services already provided by national systems. Any improved position should stabilise essential statutory functions only, while keeping firm control of wider spending."

"It's most important to look after and protect the most vulnerable."

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

“Vulnerable individuals need support and often

Profile of respondents

reducing it below the level they are deemed to need will not only impact them but everyone around them."

Opposition to broad vulnerability definitions and targeted support:

"All residents need to be supported, not the same few constantly."

"Everyone should be treated in the same way."

"It depends on what is you definition of vulnerable? Those who have always worked hard, contributed to the society and the borough, and now are struggling to make ends meet, OR random people who never contributed to anything in the borough?"

"The term vulnerable is used too widely and indiscriminately. Each group needs to be considered in isolation and decided upon separately. We all get old, some are born with disabilities or have an accident and are deserving. Others are just bone idle, make deliberate poor decisions on a daily basis and just want to scrounge and so are less deserving."

Citizens' Panel event

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Attendees: 97 residents from the Citizens' Panel with representation from across the borough

The event began with a short presentation outlining the Council's current financial challenges, followed by table-top discussions facilitated by Council Officers. These discussions provided residents with an opportunity to share their views on future priorities, digitalisation and income generation.

Q1 Priorities: What Success Looks Like (Next 5–10 Years)

Panel members want Kensington and Chelsea to be a safe, inclusive borough with high-quality, accessible services. They emphasise prioritising social care, housing, and community safety, especially for vulnerable groups such as the elderly, children, and those living in poverty. Education, youth services, libraries, green spaces, and cultural activities are seen as essential for community wellbeing.

Transparency, accountability, and genuine consultation are considered critical, alongside building a thriving local economy and sustainable sources of income.

Concerns include wasteful spending, poor contractor performance, disruption from roadworks, cuts to youth services and libraries, housing inefficiencies, and fears that vulnerable residents may be excluded. Panel members call for fair resource distribution, stronger oversight, and collaboration with neighbouring councils.

Citizens' Panel event 19 November 2025

Positive Priorities	Key Concerns
• Social care for elderly, children, and vulnerable groups. • Community safety and better policing. • Education, lifelong learning, and youth services. • Green spaces, leisure, and cultural events. • Digitalisation for efficiency and improved services. • Transparency, accountability, and resident engagement.	• Wasteful spending and poor contractor performance. • Roadworks disruption and housing inefficiencies. • Cuts to youth services and libraries. • Inequality and neglect of certain areas. • Distrust over financial management (e.g., Grenfell). • Risk of excluding vulnerable residents.

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Citizens' Panel event 19 November 2025

Q2 Digitalisation:

Panel members are cautiously supportive of greater digitalisation, recognising its potential to save money, improve efficiency, and modernise services. Many welcome online forms, digital communications, and even AI, provided these tools enhance rather than reduce service quality. Digital systems are seen as faster and more convenient, but residents stress that changes must not compromise fairness or human interaction.

Concerns focus on digital exclusion for older people, those with disabilities, and residents without access to technology. There are also worries about job losses, data security, and the reliability of automated systems. Trust in chatbots and AI is low, and Panel members call for a gradual, well-communicated transition.

To make digital changes inclusive, Panel members suggest a hybrid approach that retains physical options alongside digital services. They recommend local hubs in libraries and community centres, training for vulnerable groups, and partnerships to support digital literacy. Strong data protection, user-friendly design, and consultation with residents are considered essential.

Overall, while digitalisation is seen as a better way to save money than cutting services, Panel members emphasise the need to maintain transparency, protect personal data, and preserve the human side of service delivery.

Citizens' Panel event 19 November 2025

Themes in Favour of Digitalisation	Themes Against Digitalisation
• Digital services are faster, more convenient, and can streamline processes. • Seen as a better way to save money compared to cutting services. • Support for AI, automation, and improved technology. • Potential for better record-keeping, progress tracking, and responsiveness. • Reduced paper use and more sustainable operations. • Ability to offer online profiles and personalised digital experiences.	• Risk of isolating residents without access to technology. • Concerns about reduced face-to-face contact and personal support. • Fear that staff roles will be cut significantly. • Low confidence in chatbots and AI, as well as worries about system failures. • GDPR compliance, hacking, and privacy concerns. • Suggestions made for user-friendly design and involving residents in this. • Concerns about expensive in-house development and reliance on consultants.

Q3 Income Generation Ideas

Panel members suggested a range of ways for the Council to generate income while protecting essential services. Popular proposals included increasing council tax for second homes and empty properties, introducing tourist levies, and raising business rates for large companies. Many recommended monetising Council assets by renting out buildings, libraries, and parks for events, and hosting cultural festivals and ticketed attractions to draw visitors. There was strong support for partnerships with private organisations, sponsorships for major events, and benefactor schemes to fund libraries and cultural initiatives. Panel members also emphasised the need to secure additional funding from central government and the Mayor of London.

Alongside revenue generation, Panel members stressed the importance of reducing wasteful spending, improving procurement processes, and addressing housing voids to cut temporary accommodation costs.

Innovative ideas included digital advertising, social media campaigns, and investment in green energy to modernise income streams.

Overall, Panel members believe a mix of targeted taxes, commercial ventures, cultural initiatives, and collaborative partnerships can help maintain vital services without disproportionately impacting vulnerable groups.

More details of the suggestions made can be found in the appendix document.

Your Council Comes to You meetings

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Your Council comes to you

As part of the Council's commitments from the Grenfell Inquiry, 'Your Council comes to you' events have been organised across the borough to give residents the opportunity to meet members of the Council Leadership Team and Senior Officers, ask questions and provide feedback.

During the budget consultation period two events took place:

- Abingdon and Queen's Gate, 13 November 2025
- Earl's Court, 25 November 2025

The following feedback was received from individuals in relation to budget proposals and savings:

- A resident recognised that we pay less Council Tax than most other boroughs so the resident was happy to contribute if local services are maintained
- A resident indicated that they were happy to apply increased second homes tax, as they felt if you own a second home they can afford the extra tax
- A resident felt the Council needs to look at staffing on a top-down basis as often there are too many managers in major organisations
- A resident felt one way of raising money is tackling illegally rented properties. They are not paying any tax on these earnings, and this money could help the budget deficit being faced
- A resident felt statutory services need to be the priority, making sure we help those who need it the most

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

LEADERSHIP TEAM MEETING – 10 FEBRUARY 2026

COVER REPORT OF THE SCRUTINY MANAGER

1. EXECUTIVE SUMMARY AND RECOMMENDATION

1.1 Attached as Appendix One, is the Budget Working Group Report which is being referred to the Leadership Team by the Overview and Scrutiny Committee.

2.1 The Leadership Team is recommended to:

- Acknowledge and provide a formal written response to each of the four recommendations contained in the Budget Working Group Report, including whether they are accepted or rejected.

FOR DECISION

Jacqui Hird
Scrutiny Manager and Statutory Scrutiny Officer

Contact officer: Jacqui Hird, Scrutiny Manager and Statutory Scrutiny Officer (M) 07870 803891 (E) jacqui.hird@rbkc.gov.uk

Appendix One

REPORT OF THE BUDGET WORKING GROUP

Chair's Foreword

Firstly, thank you to all the members of the BWG for their respective contributions to this report. Additionally, I would like to thank the scrutiny and select committees, the Lead Members and the officers.

Councillor Preety Hudd

Chair of the Budget Working Group

1 Background

1.1 The process of agreeing the annual budget is one of the few decisions that is reserved to the full Council, typically before 11 March each year. The Council should consider advice from the Chief Finance Officer, the Chief Executive and the Monitoring Officer. It is the responsibility of the Leadership Team to propose a draft budget for public consultation and scrutiny, before agreeing a final proposal for consideration by the Council.

1.2 Councils are legally required to set a balanced budget for each financial year. A balanced budget is one that is fundable from available resources, which may include the use of reserves or one off funding as part of a sustainable budget strategy. Setting a balanced budget will mean identifying savings and ensuring all anticipated cost pressures are adequately funded, including the revenue consequences of capital spending. Provision should also be made for risk.

1.3 Effective scrutiny should be challenging and constructive and add value including by providing and important level of assurance to residents. Budget scrutiny does not mean reviewing service budgets line by line.

1.4 Budget scrutiny is an opportunity to:

- Examine how the Council spends its money, challenging whether it is achieving good value for money.
- Ensure the budget is in line with strategic priorities and objectives as set out in the Council Plan and that funding is resulting in desired outcomes.
- Consider the level of funding awarded to different services and priorities.

1.5 The Budget Working Group (BWG) report for the Council Budget 2025-26 contained nine recommendations, eight of which were accepted, and one part accepted. The BWG recommended that all scrutiny and select committees receive a report with details of statutory and discretionary services to further enhance budget scrutiny. A template was developed for the Environment Select Committee meeting in June 2025. The other four scrutiny and select committees considered reports during the November / December cycle of meetings with the budget papers.

2 Methodology

2.1 During November and December each scrutiny and select committee scrutinised a report with the budget proposals for services within its terms of reference. As scrutiny at committees takes place in a public forum, it provides a level of assurance to residents.

- Environment Select Committee – 24 November 2025
- Adult Social Care and Health Select Committee - 26 November 2025
- Housing and Communities Select Committee - 8 December 2025
- Family Services Select Committee – 11 December 2025
- Overview and Scrutiny Committee - 17 December 2025

2.2 The Overview and Scrutiny Committee has carried out in-year monitoring of the financial outturn reports and the Medium Term Financial Strategy.

2.3 The BWG reports to the Overview and Scrutiny Committee (OSC). It is chaired by Councillor Preety Hudd and the members are Councillors Mary Weale, Emma Dent Coad, Greg Hammond, Will Pascall, Stephanie Petit, Claire Simmons and Linda Wade.

2.4 The Local Government Funding Settlement and Fairer Funding Formula were unavailable in time for scrutiny to consider the effect on the draft budget at the meetings. The draft Council Budget 2026-27 will be included in the OSC Agenda of 29 January for pre-decision scrutiny in advance of the Leadership Team meeting on 10 February.

3 Key themes

Theme One – Budget Proposal Reports (growth and savings) 2026-27 to scrutiny and select committees

3.1 Scrutiny contributes to the development of the draft budget by providing constructive and robust challenge and looking at outcomes, particularly the effect and impact on services to residents.

3.2 Although budget proposals are in draft form, a level of detail is required to facilitate effective scrutiny so that members can:

i. Test assumptions to determine whether proposals are realistic and sustainable.
ii. Identify the risks and challenges in delivery and any mitigations.

iii. Consider whether growth bids fully identify all costs.
iv. Review whether savings proposals are achievable and deliverable and whether any delivery costs have been factored into the budget.
v. Consider whether savings proposals in one part of the Council will have unintended consequences for other services.
vi. Review linkages with the strategic priorities and outcomes contained in the Council Plan.
vii. Examine outcomes, with an emphasis on the effect and impact of proposals on services to residents.
viii. Review transformation plans, including the intentions and outcomes, and whether they are achievable.

3.3 Some budget proposals lacked the detail required for members to assess whether they were sufficiently robust, and further information and assurance were requested at the meetings.

- The Adult Social Care and Health Select Committee asked about the proposal relating to savings from redirected public health funding spanning three years.
- The Housing and Communities Select Committee asked about the proposal for managing high cost temporary accommodation placements.

3.4 The reports followed a standard format with details of the operating context, budget out-turns and whether previous savings proposals had been delivered. There was limited information about transformation and how this would be used to deliver efficiencies and better outcomes for residents.

- The Adult Social Care and Health and Family Services Select Committees suggested the reports presented to the committees did not reflect the breadth of transformation work being carried out.
- The Environment Select Committee asked for and received information about how technology was being used to improve processes.
- The Housing and Communities Select Committee asked about progress with the proposal to use the Pension Fund to acquire properties to use as temporary accommodation.

3.5 Greater clarity and transparency was required on cross-cutting savings and how these were allocated across the organisation and the effect on services to residents. OSC observed the Voluntary Redundancy scheme proposal did not set out which directorates or departments were losing staff; thus it was impossible for members to identify if there had been any duplication.

3.6 The BWG discussed the importance of data in the development of budget proposals. Long term forecasting and growth bids, especially for demand-led services, was dependent on accurate and timely data. Members understood the Oracle system would have a significant role in developing the Council's data strategy.

3.7 The BWG resolved to make a recommendation on the quality and detail of reports due to their importance in supporting scrutiny and achieving its objectives of constructive and robust challenge with a focus on outcomes.

Recommendation 1a

The Leadership Team is recommended to revise the reports provided to scrutiny and select committees for the Council Budget 2027-28 to further enhance scrutiny and transparency by the inclusion of:

- More detailed information on savings and growth proposals.
- Greater clarity and transparency on cross-cutting savings, and how these are allocated across the organisation.
- Statistical, transactional and performance data, highlighting how it will help the Council achieve efficient and cost effective transformation and improved services for residents.
- More detailed information on transformation, including contribution to improving processes, and outcomes and services for residents.

Recommendation 1b

The Leadership Team is recommended to bring a report to the Overview and Scrutiny Committee on the impact of the Voluntary Redundancy Scheme.

3.8 The scrutiny function should improve its work programming process so members are well informed at an early stage of the Municipal Year. This would include briefings for scrutiny members on key issues including the budget and achievement of savings as well as the transformation programme. This idea will be developed as part of the scrutiny induction programme.

Theme Two – savings delivery record

3.9 The Centre for Governance and Scrutiny and Cipfa recommend scrutiny takes place throughout the year and is not confined to the annual budget development process. The Council has adopted this approach with OSC as the lead committee.

3.10 During the Municipal year, OSC carried out in-year monitoring of saving proposals when scrutinising the quarterly finance reports. Although the majority of savings were achieved, OSC identified a consistent failure to deliver around 10% of planned savings across the Council.

3.11 The record of savings delivery was an area of focus for the BWG. This was a relevant factor when considering whether the proposals put forward for the Draft Budget 2026-27 were realistic and achievable. There should be analysis of common themes relating to unachieved savings and accountability mechanisms. Officers confirmed a more robust approach had been implemented two years ago to monitor the achievement of savings.

3.12 The BWG questioned whether Directorates were on occasion over-optimistic when estimating income generation.

Recommendation 2

The Leadership Team is recommended to further develop analysis and scrutiny of unachieved savings (including income generation) and develop appropriate mitigations

Theme Three - Partner organisations

3.13 The Council works collaboratively with partners across the public sector to deliver services. Some of these services are demand driven and it may be that 'silo working' and budget pressures in another public sector organisation affect the Council.

3.14 A major reorganisation of the North West London Integrated Care Board (ICB) will be implemented by April 2026. The ICB is required to identify and implement efficiency savings and this may have consequences for the Council for this budget and future budgets.

3.15 The BWG echoed comments made at the select committees that it was important to be alert to and not accept any responsibilities being transferred to the Council by other public sector organisations without the necessary resources to deliver them.

Theme Four– Procurement

3.16 The BWG identified procurement as central to achieving savings. Members recognised the strong correlation between procurement and transformation as the Council explores alternative ways of delivering services. It may also involve sharing best practice with other organisations in the Bi-Borough arrangement and across London.

Recommendation 3
The Leadership Team is requested to review and develop its systems for assessing the effectiveness and benefits of the Council's new procurement arrangements, including making sufficient use of frameworks.

4 Statutory and Discretionary Services

4.1 The BWG Report 2025-26 recommended all scrutiny and select committees be provided with a report giving details of statutory and discretionary services within the terms of reference. The BWG considered these were useful reports due to the scale of the financial challenges facing the Council.

4.2 The BWG agreed a report on statutory and discretionary services should be included in committee agendas with the reports on the draft Council Budget 2027-28. The report template should be refined to further enhance its usefulness to scrutiny members. For example, the heading 'uncontrollable budget' is a recognised accountancy term but it is not generally used. It was not explained that this was a reference to charges for central services. The BWG considered whether scrutiny should carry out an in-depth review of central recharges. Details of funding sources including external funding, for example, grants, should be included in the report. Members felt it would be helpful to involve the BWG in the next iteration of the report.

4.3 The BWG concluded this report was important not only to scrutiny but also the Leadership Team, particularly in the context of the transformation programme.

Recommendation 4

The Leadership Team is requested to :

- Review the content and structure of the information provided to scrutiny on statutory and discretionary services.
- Confirm how analysis of statutory and discretionary services will be used to inform the Transformation Strategy.

APPENDIX 8 - COUNCIL TAX RESOLUTION (provisional)

Statutory Determination of Council Tax 2026/27

by the Royal Borough of Kensington and Chelsea

The Council is recommended, in accordance with the *Local Government Finance Act 1992*, to:

1) Note that the Executive Director of Resources, acting under delegated authority, has calculated its Council Tax Base for the year 2026/27:

   i) for the whole Council area as **106,506** in accordance with the relevant regulations; and

   ii) as set out in column 3 of **Appendix 9** (Garden Square Levies) for those parts of its area to which one or more special items relate, as calculated under the relevant regulations.

2) Notes the estimated Collection Fund surplus (Council's share) of £1.386m at 31 March 2026.

3) Note the statements in **Sections 23 and 24 of the report** regarding the robustness of budget estimates and adequacy of reserves relating to the 2026/27 budget,

4) Agree the following amounts be calculated for the year 2026/27 in accordance with Sections 31A, 31B and 34 to 36 of the Act:

   i) **£690.982 million** as the aggregate of the amounts that the Council estimates for the items set out in Section 31A(2)(a) to (f) of the Act, taking into account the special items issued to the Council; this refers to the Council's gross expenditure as per table 1 in the main body of the report.

   ii) **£567.846 million** as the aggregate of the amounts that the Council estimates for the items set out in Section 31A(3)(a) to (d) of the Act; this refers to the Council's gross income as per table 3 in the main body of the report except for income to be received from Council Tax.

   iii) **£123.136 million** as the Council Tax Requirement in accordance with Section 31A (4) of the Act, being the amount by which the aggregate at 4i) above exceeds the aggregate at 4ii) above; this is the difference between the Council's gross expenditure and gross income and will be met by Council Tax in order for the Council to set a balanced budget.

   iv) **£1,156.14** as the basic amount of Council Tax for the year, being the Council Tax Requirement at 4iii) above, divided by the Council Tax Base set out at 1i) above, in accordance with Section 31B (1) of the Act;

   v) **£2.472 million** being the aggregate amount of the special items under Section 35 of the Act for the purposes of Section 34 of the Act; this is to fund Garden Square special expenses as set out in **Appendix 9.**

vi) **£1,132.93** as the basic amount of Council Tax for dwellings in the parts of its area to which no special items apply, being the Council Tax Requirement at 4iv) above less the result of dividing the aggregate of the special items at 4v) above by the Council Tax Base set out in 1i) above, in accordance with Section 34(2) of the Act; and

vii) the amounts set out in column 6 of **Appendix 9** (Garden Square special expenses) for each garden square, being the basic amount of Council Tax for a dwelling in each area to which one or more special item applies, calculated by adding to the amount set out in 4vi) above, the result of dividing the special items for each area, set out in column 4, by the Council Tax Base for each area, set out in column 3, in accordance with Section 34(3) of the Act.

5) Note that **Appendix 10** (Royal Borough of Kensington and Chelsea Council Tax) sets out the amounts of Council Tax for 2026/27 for each part of its area and for each of the categories of dwellings excluding precepts payable to other authorities.

6) Note that for the year 2026/27, the Greater London Authority has issued precepts to the Council in respect of the functional bodies under its control, in accordance with Section 40 of the Local Government Finance Act 1992, for each of the categories of dwellings as shown below:

Table- GLA Council Tax Rates

Council Tax Band	Greater London Authority 2026/27
A	£340.34
B	£397.06
C	£453.79
D	**£510.51**
E	£623.96
F	£737.40
G	£850.85
H	£1,021.02

7) Agree that the Council, in accordance with Sections 30 and 36 of the Act, hereby sets the aggregate amounts of Council Tax for 2026/27 for each part of its area and for each of the categories of dwellings as shown in **Appendix 11** (Total Council Tax).

8) The Council has determined that its relevant basic amount of Council Tax for 2026/27 is not excessive in accordance with principles approved under Section 52ZB Local Government Finance Act 1992.

As the billing authority, the Council has not been notified by the major precepting authority (the Greater London Authority) that its relevant basic amount of Council Tax for 2026/27 is excessive and the billing authority is not required to hold a referendum in accordance with Section 52ZK Local Government Finance Act 1992.

Appendix 14 CUMULATIVE EQUALITY IMPACT ASSESSMENT OF THE 2026/27 BUDGET PROPOSALS

1. Executive Summary

1.1 This paper provides an update on progress on the cumulative equality impact assessment for the 2026/27 budget.

1.2 The current cumulative impact of the proposed budget across all protected characteristics is assessed as Negative. Some proposals have positive impacts and mitigations are being put in place where changes are expected to have negative impacts. However, given the scale of the financial challenges the Council faces and the subsequent changes to services it is likely there will be a major impact on residents. When jointly assessed against the individual protected characteristics, the proposals will have a negative impact on age, disability, race, pregnancy and maternity and socioeconomic status. Even though some of the proposals will have positive impacts, these are not currently enough to outweigh the negative impacts of these proposals.

1.3 The impact on all other protected characteristics has been assessed as neutral. This is partly due to the lack of data and information. The table in the Appendix provides a summary of each proposal and an assessment against the protected characteristics that are impacted for each proposal.

1.4 The most significant proposals that have a negative impact on residents include:

- Council Tax Reduction Scheme (CTRS) - The reduction of the CTRS will reduce financial support for low-income households, disproportionately affecting residents living in our most deprived wards. The mitigations to reduce this impact include, strengthening hardship support, ensuring discretionary hardship funds are available and accessible for households most affected by any reduction in CTRS support, and using detailed caseload data to monitor the impact across protected characteristics and adjusting mitigation measures as needed.
- Introducing a self-funder administration fee for those receiving support from adult social care who use the Council's brokerage service may negatively impact residents with limited financial resources, particularly older adults and those with disabilities who already face high-care costs. The mitigations to reduce the negative impact will be to ensure that the price will be competitive with the open market, ensuring they will pay less by continuing to use Council services.
- Reductions in digital inclusion initiatives risk increasing digital exclusion among residents who cannot afford devices or have insufficient internet access. This will disproportionately affect older people, residents with disabilities and those from lower socio-economic backgrounds. There are currently no mitigations in place should this programme end. Discontinuing the service would halt or diminish efforts to support digitally excluded people, leading to increased inequality for already disadvantaged populations.

- Reduction in activities for young people. Although specific services have not yet been identified, reductions in youth provision are likely to impact young people from socio-economically disadvantaged backgrounds, who depend on local services for support and engagement. Mitigations to this service reduction are yet to be identified and young people and families must search for alternative activities.
- Reductions in grants offered to VCS organisations will have a negative impact on residents due to reductions in services where alternatives cannot be found. These organisations support some of the most vulnerable in our communities, including those from ethnically diverse communities and those with long term health conditions and disabilities. There are limited mitigation options and organisations will have to seek alternative funding elsewhere. However, we will continue to provide direct funding to VCS through commissioned services and grant funding for projects.
- A reduction in the rent subsidy offered to VCS groups leasing spaces from the Council. This proposal again has the potential to negatively impact on residents where alternative funding cannot be found. These organisations support some of the most vulnerable and diverse communities and once the consultation is complete mitigations will be developed as part of the ongoing process.

1.5 These proposals will have a disproportionate impact on vulnerable residents and deprived communities. Therefore, they will require close monitoring of the impact of these decisions should further mitigations need to be introduced to support these communities.

2. Introduction

2.1 This paper sets out the equality implications for the Council's 2026/27 growth and savings proposals which have supported the setting of a balanced budget for the Council for the next financial year. It outlines the anticipated impact of budget proposals on residents who share protected characteristics as defined in the Equality Act 2010.

2.2 Every proposal for service change that results in significant alterations to services needs to be accompanied by an Equality Impact Assessment (EqIA). The purpose of an EqIA is to ensure that our services meet the needs of our local community and to show the likely impact of a proposal on the Council's continuing duty to comply with the Public Sector Equality Duty (PSED).

2.3 The Council Plan lays out our ambition to becoming the best Council for a borough that is greener, safer, and fairer. This commitment includes making life fairer for residents in the borough who face the greatest disadvantages and challenges and making sure equality, diversity and inclusion are at the heart of what we do, so that services are designed to meet the specific needs of residents and can be accessed in different ways. Therefore, our commitment goes beyond complying with our statutory duties and is integral to everything we do as a Council.

2.4 Furthermore, the Council's Equality Objective sets out to take targeted action to tackle the causes of inequality and deprivation, focusing on areas such as health inequalities, employment, and education where the Council can make the biggest difference.

2.5 As the Council's budgetary pressures become even more challenging in the coming years, continuing to understand the equalities considerations of future savings proposals will be important as the Council continues to deliver savings over the medium term.

3. Context of Budget Pressure

3.1 The government is implementing a new funding formula for Local Government from 2026/27. It is expected to have an adverse impact of £17.9m in 2026/27.

3.2 Along with the anticipated impact of funding reform, the Council's financial plans currently budget for inflation to be around 3.8% in 2026/27 (above the Bank of England's 2% target), budget pressures of around £9.7m, and additional borrowing costs relating to the Council's capital programme of £2m. Before any savings proposals or decisions on Council Tax a budget gap of £36.5m is anticipated for the Council in 2026/27.

3.3 The sheer scale of the financial challenge and measures needed to meet it to deliver a balanced budget presents significant difficulties in maintaining and protecting services for residents and service users. In this context, there is renewed importance in ensuring that equality implications are considered thoroughly, both in relation to individual proposals and in the cumulative impact of the Council's overall financial strategy.

3.4 As resources become more constrained, it is vital that decisions are made with a clear understanding of how they may affect different groups, particularly those who may be more vulnerable to changes in service provision. This will help ensure the Council continues to meet its statutory duties and upholds its commitment to fairness and equality.

4. Public Sector Equality Duty

4.1 The purpose of an Equality Impact Assessment is to show the likely implications of a proposed decision or activity on groups with protected characteristics. The Public Sector Equality Duty places a statutory duty on the Council to have due regard to equalities implications in all decisions.

4.2 The PSED is included in Section 149 of the Equality Act (2010), and places a duty on councils to specifically have due regard to:

- Eliminate discrimination, harassment and victimisation and any other conduct prohibited under the Act.
- Advance equality of opportunity between people who share the protected characteristics and those who do not.
- Foster good relations between people who share the protected characteristics and those who do not.

4.3 The Equality Act protects against discrimination based on nine characteristics: age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex, and sexual orientation. The Council also needs to have due regard to the need to eliminate unlawful discrimination against someone because of their marriage or civil partnership status. This means that the first aim of the duty applies to this characteristic but that the other aims (advancing equality and fostering good relations) do not apply.

4.4 The Council's approach to equality, diversity, and inclusion (EDI) is central to everything we do; whether it is in how we work with our residents, in the services we provide or through the recruitment of our workforce**.** Our commitments are outlined in the Council's Fairer Action Plan 2025 – 2029.

5. Borough Profile and Local Context

5.1 Kensington and Chelsea is a diverse and unique central London borough, which is rich in culture and heritage. With a population of almost 144,000 residents, the borough is home to residents of over 50 different nationalities who speak over 80 languages. A summary of data collected from the 2021 census on protected characteristics as well as the latest joint strategic needs assessment is summarised below.

5.2 **Age:** The 2021 census shows that the average age of residents in Kensington and Chelsea is 40.45 years, making it the fourth oldest population in London, with 21.2% of our residents aged 35-49 years and 20.5% of our residents aged 50 -64 years. Life expectancy for women in RBKC is the highest in the country, for men it is the fifth highest. However, this varies between the north and the south of the borough, between people from different ethnic minorities, and between homeowners, private renters, and those in social housing. Life expectancy for men in South Kensington is 11 years higher than it is for men in Ladbroke Grove. For women in Hans Town, it is 10 years higher than it is for women in Ladbroke Grove. 7,800 adults over 65 are estimated to need help with at least one self-care activity e.g. getting in and out of bed whilst 1 in 12 of our older population are living with dementia, and our diagnosis rates are below the London average.

5.3 **Disability:** Whilst life expectancy is high, residents spend around a fifth of their lives in poor health. In the 2021 census, 12.8% of residents in the borough said they had a long-term condition or disability that limited their life in some way. In the academic year 2024/25, there were 2,688 pupils attending RBKC state funded schools with special educational needs, 937 had an education, health and care (EHC) plan, and 1,751 were receiving special educational needs (SEN) support.

5.4 **Race:** Data from the 2021 census shows the population of Kensington and Chelsea represents a rich mix of ethnicities. The broad ethnic breakdown of the borough's population is White at 70.6%; Asian, Asian British at 11.8%; Black, Black British at 7.9%; Mixed or multiple ethnicities at 6.6%; and Other at 9.9%. 3 in 10 residents have a long-term condition with those of black ethnic groups having almost twice the rate of hypertension.

5.5 **Sex:** According to the 2021 census the Kensington and Chelsea population is 53.2% Female and 46.8% Male.

5.6 **Religion:** The 2021 census outlined that Kensington and Chelsea is home to people of many beliefs. Around 48% of our residents describe themselves as Christian, making it the largest faith group in the borough. This is followed by 'No religion' at 25% and Muslim at 12%. All other religious groups including, Buddhist, Hindu, Jewish, Sikh and other religion make up around 5% of the population in the borough. Those who identified as Muslim or 'Other religion' are more likely to say their health is bad or very bad.

5.7 **Gender reassignment:** Information on gender reassignment is only captured for people aged 16 and above. Of those who answered this question approximately 90% of our residents stated that their sex is the same as it was at birth. Nearly 9% of residents did not answer the question, but the remaining identified themselves as follows; 0.2% said that their sex is different to that of their sex registered at birth, 0.1% identify as Trans woman, 0.1% as Trans man, less than 0.1% identify as non-binary and then 0.1% identify as other.

5.8 **Marriage/Civil Partnership:** Kensington and Chelsea has a high proportion of single residents, at 49%. Nearly 35% of residents are married to someone of the opposite sex and 0.5% are married to someone of the same sex. Also 0.15% of our residents are in a civil partnership with someone of the opposite sex and 0.39% are in a civil partnership with someone of the same sex.

5.9 **Pregnancy/Maternity:** In 2024, there were 1,290 live births in RBK. The total fertility rate for RBKC was 1.09 in 2024, below the London (1.35), and England (1.41) rates.

5.10 **Sexual Orientation**: Information on sexual orientation is only captured for people aged 16 and above. The residents in Kensington and Chelsea identify themselves in the following way, approximately 85% identify as Heterosexual, nearly 3% identify as Gay or Lesbian, 1.3% as Bisexual and 0.3% as other.

5.11 **Socioeconomic:** The 2021 Census highlights certain socio-demographic factors that are linked to increased risk of specific types of deprivation in the borough and indicate areas that we need to pay particular attention to. For example, single-parent households are twice as likely to experience deprivation in the employment domain, while households paying social rent are 4.5 times more likely to face employment-related deprivation. Similarly, households where the lead resident cannot speak English well are 3.5 times more likely to be deprived in the education domain, and those with at least one disabled member are 4.5 times more likely to experience deprivation overall. Kensington and Chelsea have the second highest rate of housing deprivation for people with disabilities across London. In addition, Muslim households are 2.2 times more likely to be deprived in the employment domain and Black Households are 2.3 times more likely to be deprived in the employment domain. The borough has a significant wealth disparity among residents; household income in Golborne after housing costs is estimated at £22,600. This is almost three times less than the equivalent figure for the Brompton and Hans Town area (£63,900).

6. Feedback from the Budget Consultation

6.1 An online public consultation was held between 13th November 2025 and 9th January 2026. During this period, residents were invited to comment on the proposed savings and provide feedback on how the changes might affect them. In total, 433 responses were received. We have provided an initial analysis of some of the equalities impacts from the consultation below. Further work is being undertaken to understand the equalities implications across all questions, and this may alter the findings of this EqIA.

6.2 A third (33%) of respondents disagreed with the proposed 5% increase in Council Tax with affordability and fairness emerging as the most common themes in the comments. This feedback reinforces the assessment that residents on low incomes, who are disproportionately represented among certain protected groups may be adversely affected by the proposals, particularly those relating to council tax, digital inclusion, and changes to financial support.

6.3 Respondents were asked about savings proposals related to reviewing the level and range of services. The proposals included: Reducing funding to the Voluntary and Community Sector (separate consultation), opportunities to streamline services for young people (saving £100k), stopping delivery of the victim advocacy service, redirecting some public health funding and acquisitions and development of properties to support service needs in temporary accommodation and adult's and children's supported living.

6.4 Over half of respondents (54%) supported to some extent, the savings proposals put forward to review the level and range of services. 21% opposed to some extent, the proposals. The most common theme for opposing these proposals was protecting vulnerable and disadvantaged groups, with emphasis on safeguarding services for vulnerable populations including children, youth, victims, and disadvantaged residents with a focus on funding voluntary and community sectors and youth services to prevent future social inequalities and costs. Opposition to cuts to public health funding, community wellbeing activities, and non-statutory services due to their long-term health benefits, cost savings, and importance for community life and cultural events.

6.5 This feedback highlights a clear expectation from residents that vulnerable groups should be protected, even in the context of financial pressures. It also shows strong recognition of the role the voluntary and community sector plays in supporting those at risk and preventing longer-term inequalities. Concerns raised about reductions to public health and community wellbeing activities suggest that residents understand the wider health impacts and potential future costs associated with cutting preventative non-statutory services.

6.6 Respondents were also asked to highlight any ways the proposed budget might adversely or unfairly impact people and how these impacts could be reduced. The most common theme was the need to protect vulnerable and

disadvantaged groups, including disabled residents, older adults, low-income households, ethnic minority communities, and young people.

6.7 Residents clearly expect the Council to prioritise those who are most at risk of being disproportionately affected by budget changes. Their comments highlight a strong emphasis on protecting vulnerable and disadvantaged groups and ensuring that essential services remain accessible and fair. The suggestions for alternative revenue-raising approaches also indicates that residents are willing to consider different solutions if it helps safeguard vital support for those who need it most.

7. Cumulative Impact of Budget Proposals (2026/27)

7.1 The table below outlines the impact of the proposals against each protected characteristics giving examples of the proposals that have the most significant impacts.

Age	**Cumulative impact: Negative**
The cumulative impact of the budget proposals on age is assessed as negative. Although there are proposals expected to have a positive effect on service support for residents across different age groups, particularly older and younger people, there are also significant proposals that are assessed as having a negative impact. The proposals include the following that benefit older residents in RBKC: • Additional investment will enable Adult Social Care to manage significant financial and operational pressures without reducing services. It ensures the Council can continue fulfilling Care Act responsibilities and maintain the high standards that recently earned an 'Outstanding' rating from the Care Quality Commission (CQC). For older residents, this means continued access to high-quality, reliable care that promotes independence and wellbeing. **(98. Adult Social Care: Demographic Pressures)** • The Lots Road development represents a significant positive impact for older residents because it will deliver purpose-built, accessible accommodation designed to meet the needs of an ageing population. By offering independent living and extra care options, it enables older residents to maintain autonomy and wellbeing while accessing tailored support as their needs change. The scheme adopts a person-centred approach, focusing on outcomes that prevent or delay the need for residential care. **(2. Adult Social Care: Sheltered Housing: Extra Care)** • The continuation of prevention initiatives saving will have a positive impact on older residents by embedding a strengths-based approach into annual reviews. By focusing on individuals' aspirations and desired outcomes, the approach supports older people to live more independently and achieve better quality of life. It promotes autonomy and wellbeing while ensuring care planning is tailored to personal goals. **(4. Adult Social Care: Continuation of Prevention Initiatives)** The following proposals are some of those with positive impacts on younger residents in RBKC.	

- This proposal involves commissioning a new supported accommodation service for 16–17-year-old care leavers, located within 30 minutes of the borough. This site is significantly closer than current privately procured placements, improving access to local services and helping young people build community networks before moving into permanent housing. The arrangement will provide 24/7 staffed support in a purpose-built setting, ensuring safety and stability. **(17. Children's Services: SIL for 16+).**
- In line with other boroughs across London, RBKC has seen an increasing number of children and young people who enter care in adolescence who have contextual safeguarding risks. Contextual safeguarding is the exploitation and abuse of children, young people and adults where the exploitation comes from outside the home. The programme aims to explore alternative ways to best meet these young people's care needs. The programme aims to make a positive impact on young people by preventing care episodes, reducing the time spent in care and ensuring placements better meet their needs with clear outcomes and goals identified and reviewed. **(14. Children's Services: Contextual Safeguarding).**
- Increasing access to final stage accommodation (social housing) for care leavers will benefit young people in care by providing stable accommodation in the borough for them to transition to. **(13. Children's Services: Children and Housing Alignment)**

The following proposals are expected to adversely impact staff but will not negatively impact service delivery:

- **81. Chief Executives: Design Team**
- **12. Children's Services: Bi-borough Family Services**
- **85. Children's Services: Creation of an integrated children with disabilities service**
- **87. Children's Services: Virtual School & School Standards**
- **35. Resources and Customer Delivery: Honoraria**
- **36. Resources and Customer Delivery: Starting Salaries**
- **37. Resources and Customer Delivery- HR Travel Card**
- **38. Resources and Customer Delivery - Voluntary Redundancy**
- **72. Resources and Customer Delivery: Council Staff – Internal Flu Jabs**

These proposals have been assessed as having a negative impact on residents:

- The introduction of a self-funder administration fee will have a negative impact on older residents. The Care Act permits councils to charge a fee to broker, organise, and monitor care packages. This proposal involves developing a fee-based offer for those not eligible for care under the Care Act or those self-funding their care who wish to use the Councils brokerage service. Given the nature of the service 96% of self-funders are aged 65+. This group could be negatively affected by a new charge, but they will still pay less for their care overall than if they arranged services on the open market. This will be mitigated through significant support that will be available to service users, and they are encouraged to approach the

Council if their financial situation changes. **(39. Adult Social Care: Self-funder Administration Fee)**

- The proposed budget reduction for the Digital Inclusion programme is expected to have a significant negative impact on older residents. The majority of individuals who access digital inclusion services are older residents, and discontinuing the programme will remove a key source of assistance, increasing the risk of digital exclusion among this group. **(97. Resources and Customer Delivery - Digital Inclusion)**
- The Youth proposal involves reviewing statutory and non-statutory services for young people across the Council to identify opportunities to streamline or reduce provision. The review will cover commissioned services, internal teams, and capital investment. Any reduction could negatively impact vulnerable and disadvantaged young people by limiting access to activities and support in areas of high deprivation, meaning some families may need to seek alternative provision. **(89. Children's Services: Youth)**
- The proposal to review the contract for a programme of air quality audits within state schools and nurseries in Kensington and Chelsea has been assessed as having a negative impact against age. By the end of the contract, measures will not yet have been installed to improve air quality in schools and nurseries that need it so there will be no improvement for young people in state education settings where there is currently poor air quality. **(59. Environment and Neighbourhoods: Air Quality Project)**

Disability	**Cumulative impact: Negative**

The overall cumulative impact of the proposed budget changes is assessed as negative. Although mitigations are being put in place where possible, the negative impacts are expected to be significant and wide-reaching. There are 12 proposals with anticipated positive outcomes, however, these benefits do not fully offset the disproportionate impact of the negative proposals.

The below proposals benefit residents with disabilities:

- Modernising short break facilities for adults with learning disabilities, alongside the development of seven supported living units and one staff flat, will deliver significant benefits for service users, all of whom have a learning disability. **(7. Adult Social Care: Specialist accommodation - Kingsbridge Road and St Helen's Gardens)**
- Transition to adult services for young people with Special Educational Needs and Disabilities (SEND) are often delayed due to unclear legal responsibilities and fragmented processes. This saving aims to deliver a clear transitions protocol and transparent funding arrangements ensuring accountability across services and partners. By strengthening joint planning and funding care packages, it will create a smoother, more coordinated transition, positively impacting SEND young people as they transition to adulthood. **(16. Children's Services: Pathway for Disabilities)**
- The short breaks service is being redesigned to better meet the Care Act requirements for adults with learning disabilities with a greater focus on planned respite and reduced reliance on unplanned arrangements. The new model will provide a local facility, ensuring service users can access support close to their networks without needing to travel out of the borough. This

change will deliver a clear positive impact for adults with learning disabilities by improving accessibility to respite services. **(78. Adult Social Care: Flexible model for short breaks for mental health and learning disability service users)**

- The procurement of a pilot concessionary contract to provide additional enforcement services will supplement the Street Enforcement Team and is expected to reduce the environmental and highways-related offences across the borough. These offences obstruct pavements, creating barriers for residents with disabilities that may impact their mobility. **(89. Environment and Neighbourhoods: Street Enforcement - Concession Contract)**
- Similarly, the growth bid for cleaner streets aims to enhance waste collection and street cleaning standards, making the streets cleaner and safer for residents with disabilities that may impact their mobility. (**102. Environment and Neighbourhoods: Cleanest Streets)**
- 25.3% of residents in temporary accommodation have a long-term disability or health condition. The proposal to agree minimum 10-year leases on Private Sector Lease (PSL) temporary accommodation will provide greater stability and certainty for households awaiting rehousing. This stability will positively impact residents with disabilities by reducing the risk of being moved from accommodation that meets their needs and preventing disruption to established support linked to disability or health. **(24. Housing and Social Investment: Maximising Housing Income)**

These proposals have been assessed as having a negative impact against disability.

The following proposals have a negative impact on staff:

- **81. Chief Executives: Design Team**
- **12. Children's Services: Bi-borough Family Services**
- **85. Children's Services: Creation of an integrated children with disabilities service**
- **87. Children's Services: Virtual School & School Standards**
- **35. Resources and Customer Delivery: Honoraria**
- **36. Resources and Customer Delivery: Starting Salaries**
- **37. Resources and Customer Delivery - HR Travel Card**
- **38. Resources and Customer Delivery - Voluntary Redundancy**
- **72. Resources and Customer Delivery: Council Staff – Internal Flu Jabs**

The following proposals have a negative impact on residents:

- Two proposals have a negative impact on residents including the introduction of a self-funder administration fee. The Care Act permits Councils to charge a fee to broker, organise, and monitor care packages. This proposal involves developing a fee-based offer for those not eligible for care under the Care Act or those self-funding their care who wish to use the Councils brokerage service. Given the nature of the service most service users are in need of either physical or learning disability support. This group could be negatively affected by a new charge, but they will still pay less for

their care overall than if they arranged services on the open market. Significant support will be available to service users, and they are encouraged to approach the Council if their financial situation changes. **(39. Adult Social Care: Self-funder Administration Fee)**

- The second is the review of the Working Age Council Tax Reduction Scheme. This proposal involves reviewing the current CTRS for working-age residents. We have not yet identified the data on the number of residents with disabilities who currently receive CTRS and may lose eligibility under the revised scheme. However, given the nature of the support provided, we anticipate a negative impact on residents with disabilities. **(76. Resources and Customer Delivery: Review of the Working Age Council Tax Reduction Scheme (CTRS))**
- The proposal to review the contract for air-quality auditing in state nurseries and schools in Kensington and Chelsea is likely to have a negative impact on young people with disabilities, whose conditions may be worsened by poor air quality in education settings. Ending the contract means that recommended air quality improvements cannot be implemented, halting the ability to address identified risks. **(59. Environment and Neighbourhoods: Air Quality Project)**

Gender Reassignment	**Cumulative impact: Neutral**

No proposals identified will have any impact to people with this protected characteristic. There has been limited data collected on this characteristic. Therefore, based on the data and information available the Council has assumed that the savings outlined in this EqIA will have a neutral impact on residents and service users from this protected characteristic. We have also highlighted the information gap with services, and they have agreed to keep this under review and improve data collection on this characteristic in future.

Marriage and Civil Partnership	**Cumulative impact: Neutral**

No proposals identified will have any impact to people with this protected characteristic. There has been limited data collected on this characteristic. Therefore, based on the data and information available the Council has assumed that the savings outlined in this EqIA will have a neutral impact on residents and service users from this protected characteristic. We have also highlighted the information gap with services, and they have agreed to keep this under review and improve data collection on this characteristic in future.

Pregnancy and Maternity	**Cumulative impact: Negative**

The cumulative impact of the proposed budget changes on pregnancy and maternity is assessed as negative. Most of the anticipated negative impacts relate to staff during pregnancy or maternity leave; however, one proposal, the review of the Council Tax Reduction Scheme, also has a potential negative impact on residents who are pregnant or on maternity leave. While there are some positive outcomes for residents, these do not fully offset the risks identified.

The following proposals are expected to have a negative impact on staff:

- Roles will now be advertised with an expectation that candidates start at the first pay spine point, except in exceptional cases. This could disadvantage

women returning from maternity leave seeking new roles. **(36. Resources and Customer Delivery: Starting Salaries)**

- There is a potential negative impact against the protected characteristic of pregnancy and maternity with voluntary redundancy if measures are not in place to ensure employees who are pregnant or on maternity leave do not feel pressured or disadvantaged during organisational change, particularly in redundancy or voluntary redundancy processes. (**38. Resources and Customer Delivery - Voluntary Redundancy)**
- The Honoraria proposal seeks to reduce the application of honoraria within the organisation and ensure a more robust and consistent approach to their use. This change is assessed as having a negative impact on staff during pregnancy and maternity. **(35. Resources and Customer Delivery: Honoraria)**
- This proposal involves removing the Zone 1 and Zone 2 Travel Card, which currently forms part of an employee benefit and is claimed based on the number of days an employee attends the office. While further analysis is required to understand the full impact on pregnant employees using current travel card data, this change is assessed as having a negative impact on staff during pregnancy and maternity. **(37. Resources and Customer Delivery - HR Travel Card)**
- The Council Tax Reduction Scheme (CTRS) proposal seeks to reduce the CTRS offer to residents meaning some households that currently pay no council tax will be required to contribute a proportion of the charge. While specific data on households with pregnant individuals or those who have recently given birth is not yet available, the expected impact on residents under the pregnancy and maternity protected characteristic is assessed as negative. Further research will be undertaken to better understand the scale of the impact. **(76. Resources and Customer Delivery: Review of the Working Age Council Tax Reduction Scheme (CTRS))**
- The proposal to cease the provision of the free internal flu vaccination service for RBKC staff is expected to have a negative impact on staff who are pregnant or on maternity leave. While planned mitigations include a communications programme to ensure pregnant staff are aware that they are eligible for a free flu jab through the NHS, this does not support those who are unaware of their pregnancy at the time of vaccination or those who have recently given birth and are on maternity leave post-partum. The current internal offer also enables pregnant staff to receive a vaccination conveniently at their workplace, avoiding the need to travel. Removing this option may create an additional barrier for some staff, who will now need to attend external NHS providers to access their free jab. (**72. Resources and Customer Delivery: Council Staff – Internal Flu Jabs)**

Despite these challenges there are proposals that will deliver benefits for residents during pregnancy and maternity.

- The proposal to secure longer leases on temporary accommodation is assessed as having a positive impact on residents under the pregnancy and maternity protected characteristic, ensuring families have access to stable accommodation. **(24. Housing and Social Investment: Maximising housing income)**

- The investment in temporary accommodation from the RBKC pension fund will increase the supply and quality of temporary accommodation, reducing the reliance on short-term housing arrangements improving stability of housing for residents who are pregnant or have young children. **(25. Housing and Social Investment: Investment in TA from pension fund)**

Greater stability in temporary accommodation will benefit mothers who have recently given birth by lowering the risk of being moved from properties that meet their needs and preventing disruption to established support linked to maternity.

Race	**Cumulative impact: Negative**

The cumulative impact of the proposed budget changes on race is assessed as negative. While there are some anticipated positive outcomes, particularly through growth proposals that respond to demographic pressures, these do not outweigh the negative impacts identified, most of which impact staff.

The following growth proposals are expected to have a positive impact on race by addressing demographic pressures and improving service delivery for diverse communities.

- Additional investment will help meet the needs of an increasingly diverse population requiring adult social care services. A higher proportion of racially diverse residents access adult social care compared to their overall representation in the borough, meaning the growth in funding allowing services to continue will directly benefit these communities. **(98. Adult Social Care: Demographic Pressures)**
- The Social Services Customer Service Team is supporting vulnerable residents by managing all incoming contacts for Adults' and Children's Social Services. Rising demand threatens service quality and safeguarding, requiring additional resources to maintain efficiency and protect residents. This proposal will have a positive impact on race as over half of the borough's looked after children are from black or mixed ethnic backgrounds meaning investment will directly benefit racially diverse communities who rely on these services. **(100. Children's Services: Customer Delivery Social Services Line)**
- Growth funding will support services for children and families. As with adult social care, children's services see an overrepresentation of racially diverse families accessing support compared to their proportion in the borough's population, so this investment will help ensure equitable access and improved outcomes. **(101. Children's Services: Demographic Pressures)**

Most proposals assessed as having a negative impact on race relate to staff such as:

- **81. Chief Executives: Design Team**
- **12. Children's Services: Bi-borough Family Services**
- **85. Children's Services: Creation of an integrated children with disabilities service**
- **87. Children's Services: Virtual School & School Standards**
- **35. Resources and Customer Delivery: Honoraria**
- **36. Resources and Customer Delivery: Starting Salaries**

- **37. Resources and Customer Delivery: HR Travel Card**
- **38. Resources and Customer Delivery: Voluntary Redundancy**

These proposals have a negative impact on residents:

- The review of the Working Age Council Tax Reduction Scheme will have a negative impact against the protected characteristic race; whilst the specific data on the racial background of residents currently benefitting from the scheme is not available, it is anticipated that changes could disproportionately affect racially diverse households. Further analysis will be undertaken to better understand the scale of this impact. **(76. Resources and Customer Delivery: Review of the Working Age Council Tax Reduction Scheme (CTRS))**
- The Youth services proposal seeks to identify opportunities to streamline or reduce the offer of youth services across the borough. The specific data on the race of young people who may be impacted is not currently available the impact has been assessed as negative. Funding for voluntary sector organisations working with young people is generally focused on supporting vulnerable and disadvantaged children, young people and their families in areas of high deprivation within the borough where there is a high up take from residents from global majority backgrounds. **(89. Children's Services: Youth)**

Religion/ Belief	**Cumulative impact: Neutral**

The cumulative impact of the proposed budget changes on religion and belief are assessed as neutral. While there are some anticipated positive impacts, particularly within Adult Social Care proposals, there are also some negative impacts, most of which impact staff.

The following proposals outline a positive impact on religion and belief. In Adult Social Care services, most users are either Christian or Muslim, with Muslim service users slightly overrepresented. The following proposals will therefore have a positive impact on religion and belief:

- Through annual reviews and strengths-based approach, the continuation of prevention initiatives will support service users to live more independently and achieve better outcomes, which will benefit communities who are over-represented in adult social care. **(4. Adult Social Care: Continuation of Prevention Initiatives)**
- Enhancing integration with Housing will make more appropriate and flexible housing available at the point of discharge, creating options for people with learning and physical disabilities and mental health needs, including diverse service users. **(79. Adult Social Care: Increased nominations to general needs housing)**
- Capital works will modernise the existing in-borough offer and create more accommodation options for service users who want to live in RBKC but are currently placed outside the borough. **(7. Adult Social Care: Specialist accommodation -Kingsbridge Road and St Helen's Garden)**
- Additional resources will help meet demographic pressures and ensure services remain responsive to the needs of diverse communities, improving

access and outcomes for residents. **(98. Adult Social Care: Demographic Pressures)**

Most proposals with a negative impact staff rather than residents including:

- **35. Resources and Customer Delivery: Honoraria**
- **36. Resources and Customer Delivery: Starting Salaries**
- **37. Resources and Customer Delivery - HR Travel Card**
- **38. Resources and Customer Delivery - Voluntary Redundancy**

Sex	**Cumulative impact: Neutral**

Overall, the impact of proposals on the protected characteristic sex has been assessed as neutral.

Most proposals that have an assessed negative impact staff rather than residents.

The following proposals have a negative impact on staff:

- **12. Children's Services: Bi-borough Family Services**
- **85. Children's Services: Creation of an integrated children with disabilities service**
- **87. Children's Services: Virtual School & School Standards**
- **35. Resources and Customer Delivery: Honoraria**
- **36. Resources and Customer Delivery: Starting Salaries**
- **37. Resources and Customer Delivery - HR Travel Card**
- **38. Resources and Customer Delivery - Voluntary Redundancy**

The proportion of adult social care service users who are female (64%) is significantly higher than the proportion of women in the borough's population (53.2%, Census). As a result, the introduction of the self-funder administration fee is likely to have a greater negative impact on women than men, given their overrepresentation among service users. **(39. Adult Social Care: Self-funder Administration Fee)**

The following Children's Services proposals have an assessed positive impact in relation to sex. Currently, 71% of our looked after children are male, and these proposals are expected to benefit this group by addressing their specific needs and improving outcomes.

- Increasing the number of final stage offers made annually to reduce the disparity between demand and supply of final stage accommodation will reduce the wait time for care leavers who are ready to live independently and in turn, reduce accommodation costs to the Council. **(13. Children's Services: Children and Housing Alignment)**
- The newly identified site for accommodating 16 and 17 year olds is within 30 minutes of the borough and is closer to the borough than where they are living in privately commissioned semi-independent living (SIL). **(17. Children's Services: SIL for 16+)**
- This proposal will ensure continued access to the customer service line, which is integral for residents who need to contact Children's Services. Maintaining this provision is essential to ensuring families can seek support. **(100. Children's Services: Customer Delivery Social Services Line)**

- Growth funding will support services for children and families. A higher proportion of young male looked after children access support than the borough average, so this investment will help ensure equitable access and improved outcomes. **(101. Children's Services: Demographic Pressures)**

Sexual Orientation	**Cumulative impact: Neutral**

No proposals identified will have any impact to people with this protected characteristic. There is limited data collected on this characteristic by the services outlining budget proposals. Therefore, based on the data and information available the Council has assumed that the savings outlined in this EqIA will have a neutral impact on residents and service users from this protected characteristic. We have also highlighted the information gap with services, and they have agreed to keep this under review and improve data collection on this characteristic in future.

Socio-economic and Geographical	**Cumulative impact: Negative**

The overall cumulative impact of the proposed budget changes in relation to both socioeconomic status and geographical position is assessed as negative. While some proposals may deliver positive outcomes, particularly in relation to socioeconomic status, a significant proportion of impacts are negative, impacting both staff and residents.

Proposals with a negative impact on residents against the protected characteristics socioeconomic and geographical position include:

- Reducing investment in digital inclusion initiatives may disproportionately affect residents on lower incomes who lack access to devices or reliable internet. It may also impact those who rely on local drop-in sessions delivered across the borough, creating barriers to accessing online services and information, increasing the risk of digital exclusion. **(97. Resources and Customer Delivery - Digital Inclusion)**
- The Council is looking to drive down the number of printed assets as part of its design and communications approach. While this supports efficiency and sustainability, it may negatively impact residents who are digitally excluded and rely on printed materials to access important information from the Council. This could disproportionately impact individuals with limited access to digital devices or internet connectivity, as well as those who rely on printed information from the Council that is distributed through community hubs and local spaces. **(81. Chief Executives: Design Team)**
- Reductions in youth services across the borough may negatively impact young people from disadvantaged backgrounds who rely on these services and targeted interventions. Reduced provision may limit access for those unable to travel to alternative locations, particularly in areas with higher levels of deprivation. **(89. Children's Services: Youth)**
- The review of the Working Age CTRS will result in reduced eligibility or support for low-income households. This change is likely to have a direct negative impact on residents experiencing financial hardship as well as residents living in more deprived areas of the borough, increasing financial inequality across wards. **(76. Resources and Customer Delivery: Review of the Working Age Council Tax Reduction Scheme (CTRS))**
- Introducing a fee for self-funders who use the Council's brokerage service may negatively impact residents with limited financial resources who are not

eligible for Care Act support. While the fee is lower than market rates, it introduces an additional cost for individuals already managing care expenses, which could disproportionately affect residents on lower incomes. **(39. Adult Social Care: Self-funder Administration Fee)**

- With the information currently available, the results of the air-quality audits and the associated recommendations for individual schools are not known. However, halting the contract is likely to have a disproportionate impact against socio-economic and geographical, as schools will no longer receive the recommended measures needed to improve air quality. Schools serving children from parts of the borough that already experience poor air quality will be particularly disadvantaged, as pupils may continue to be exposed to poor air quality without any mitigation. **(59. Environment and Neighbourhoods: Air Quality Project)**

8. Conclusion and recommendations

8.1 This report has concluded that the cumulative impact of budget savings for 2026/27 will have a negative impact on residents of the borough and staff.

8.2 Services will be expected to monitor the anticipated outcomes of these proposals as the initiatives and services develop. This will include updating the EqIA and regular equalities monitoring and analysis to evaluate trends and identify actions as part of implementing the budget. Lead members and senior managers will have responsibility for overseeing this as decisions are made and service changes take place.

8.3 The following approach is therefore recommended:

- Given the significant financial challenges and the potential for negative impacts services should closely monitor the EqIA. It should be reviewed regularly and updated it to ensure any negative impacts are mitigated or services changes are made to reduce the negative impact.
- Early engagement with EqIA completion – services should clearly identify and consider the specific needs of different groups at an early stage of implementing their proposals to support effective decision making.
- Data gaps – where services have identified data gaps in the EqIA process, steps should be taken to address these in the forthcoming year. This will enable better modelling of potential impacts and assessments in the future.
- Engagement – the Council should continue engagement with all residents and service users to identify ways in which services can be improved and meet diverse needs and are culturally appropriate.
- Review EqIAs as activities are delivered and savings are realised and implement necessary changes as identified through equalities monitoring.

Appendix

The table below outlines:

- Each proposal under its saving theme.
- The initial equalities assessment (Positive, Negative, Neutral) for each proposal by protected characteristic provided by the service area.
- A high-level summary of the rationale for this assessment by the service area.
- Where further activity is required to better understand the equalities implications of a proposal.

Proposals have been grouped under four main themes that summarise the ambition of the proposals. The first is, ***Better Ways of Working***, these savings relate to initiatives that aim to increase development of specialised housing options for a range of residents, support residents to live more independently, better working practices across departments to support residents more holistically and tighter workforce controls and reductions of some staff benefits.

The second theme is to use these proposals to ***Be More Businesslike*****.** These mostly relate to opportunities to raise income via advertising, museums and culture income opportunities, whilst ensuring they do not become inaccessible to low-income residents, or increases in fees such as parking, in line with London market rates.

The third theme is achieving ***Service Change,*** outlining proposals for how services can and will be delivered differently to deliver savings.

The final theme focuses on proposals intended to ***Generate Extra Income***. This will be achieved by reducing funding for selected services, implementing new charges to generate revenue, or pursuing alternative funding sources, whilst some proposals include direct reductions to grants.

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
Better ways of working				
1. Adult Social Care: Ongoing review of processes and ways of working through recruitment panel	Saving	**Overall: Neutral** Age: Neutral Disability: Neutral Race: Neutral Religion/ Belief: Neutral Sex: Neutral	The impact is neutral as the work does not directly affect residents. Regular recruitment and performance discussions will ensure there is sufficient capacity to continue delivering timely, responsive, and safe statutory adult social care services to residents with Care Act eligible needs.	No further action required at this stage.
2. Adult Social Care: Sheltered Housing: Extra Care	Saving	**Overall: Positive** Age: Positive	The equalities implications are positive because the proposal is focused on improving	No further action

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
		Disability: Positive Race: Positive Sex: Positive	outcomes and delivering high-quality care for the cohort of service users. Having the facility in the borough also ensures people can access support locally.	required at this stage.
3. Adult Social Care: Strategic review of workforce	Saving	**Overall: Neutral** Age: Neutral Disability: Neutral Race: Neutral Religion: Neutral Sex: Neutral	This has been assessed as neutral because this work does not directly affect residents. The roles in question are only being changed following staff departures, meaning there is no impact on current employees.	No further action required at this stage.
4. Adult Social Care: Continuation of Prevention Initiatives	Saving	**Overall: Positive** Age: Positive Disability: Positive Race: Positive Religion/ Belief: Positive Sex: Positive	The proposal has positive equalities implications as this work is expected to maintain or enhance outcomes for service users.	No further action required at this stage.
5. Adult Social Care: Digital Transformation in ASC	Saving	**Overall: Neutral** Age: Neutral Disability: Neutral Race: Neutral Religion/ Belief: Neutral Sex: Neutral	The impact is neutral because these changes do not affect service users or staff in terms of access or delivery of services. They simply streamline the digital management of appointments—encouraging timely cancellations to avoid unnecessary costs—and enhance signposting to community or online support via the contact centre. Crucially, users retain the ability to contact the council directly if alternative options don't meet their needs, ensuring no reduction in support or accessibility.	No further action required at this stage.
6. Adult Social Care: Contract efficiencies	Saving	**Overall: Neutral** Age: Neutral Race: Neutral Religion/ Belief: Neutral Sex: Neutral	The impact is neutral as the review of contracts will not have an impact on the service or the scope of work undertaken by services. Once specific contracts are identified each procurement will have an EqIA to assess the impact.	No further action required at this stage.
7. Adult Social Care: Specialist accommodation - Kingsbridge Road and St Helen's Gardens	Capital	**Overall: Positive** Age: Positive Disability: Positive Race: Positive	The equalities implications are positive as the proposal will modernise the existing in-borough offer and will help create more in-borough accommodation options for	No further action required at this stage.

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
		Religion/ Belief: Positive Sex: Positive	service users who want to live in RBKC but are currently living outside the borough.	
8. Chief Executive: Leaders Office Restructure	Saving	**No impact on equalities**	This saving will have no impact on staff or services delivered to residents.	No further action required at this stage.
9. Chief Executive: Corporate Strategy Team	Saving	**No impact on equalities**	This saving is as a result of holding vacancies that have arisen with the team. There are no anticipated equalities impacts from a workforce perspective.	No further action required at this stage.
10. Children's Services: Reductions in functions supporting the directorate	Saving	**No impact on equalities**	The saving for functions supporting the directorate has been achieved through managing vacancies and substituting grant funding, ensuring there is no negative impact on staff or the service residents receive.	No further action required at this stage.
11. Children's Services: Repurposing accommodation to best support care leavers	Saving	**Overall: Positive** Age: Positive Geographical: Positive Race: Positive Socioeconomic: Positive	Most young people benefit most from living in their local communities where they have established networks. Preparing for a successful transition to independence in their own tenancies is enabled by accessing familiar support locally e.g., independent living skills, self-care, keeping safe, how to access extra support. RBKC currently has some in-house semi-independent living units within borough but these are not sufficient to meet demand. The proposal here is for an expansion in this offer by procuring a minimum of 24 additional units of semi-independent accommodation, which will increase the number of care leavers who can live locally and reduce our reliance on accommodation delivered by third parties out of borough.	EqIA to be reviewed once properties identified.
12. Children's Services: Bi-borough Family Services	Saving	**Overall: Negative** Negative for all Protected characteristics.	The implications are assumed to be negative but at this stage the specific posts which will be affected is unclear, and we are therefore unable to assess fully the equalities impact. However, achieving the proposed level of staffing saving will inevitably result in job losses, which will	EqIA to be produced and reviewed once specific proposals

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
			have a negative impact on those affected. There will also be a cost of change associated with the implementation of new structures and a period of destabilisation which may affect staff morale. As such, overall, we expect the impact to be negative. We will conduct a full EqIA as part of any proposed restructure enabling us to identify whether there will be a disproportionate impact on any particular groups and the actions we can take to mitigate this.	are identified.
13. Children's Services: Children and Housing Alignment	Saving	**Overall: Positive** Age: Positive Sex: Positive Race: Positive	The implications of this proposal are positive as it aims to increase access to final stage accommodation for care leavers. This means that the overall impact on care leavers is positive as it will have benefits such as providing more stable accommodation in the borough, reducing housing costs.	No further action required at this stage.
14. Children's Services: Contextual safeguarding	Saving	**Overall: Positive** Age: Positive Geographical: Positive Race: Positive	By undertaking this review, we expect to be able to make positive impacts on the lives of these children by preventing care episodes, reducing the time spent in care episodes or where this can't be avoided, ensuring placements better meet their needs with clear outcomes and goals identified and reviewed with the providers. We also seek to improve the way in which we engage with families where there is a risk of care entry by developing an intensive offer which supports de-escalation of issues and provides ongoing support to sustain this with the child or young person staying within their family home.	No further action required at this stage.
15. Children's Services: High-cost placement panel	Saving	**Unknown**	The impact on equalities is currently unclear. The panel is expected to make decisions in the best interests of the young people involved. If a more strategic decision is made that	No further action required at this stage.

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
			affects a specific cohort or a larger group of young people, an Equality Impact Assessment would be completed to reflect and assess that impact.	
16. Children's Services: Pathway for Disabilities	Saving	**Overall: Positive** Age: Positive Disability: Positive	This initiative is expected to have a positive impact on young people, particularly those with disabilities and complex needs, by improving service coordination and ensuring smoother, more equitable transitions into adulthood.	No further action required at this stage.
17. Children's Services: SIL for 16+	Saving	**Overall: Positive** Age: Positive Race: Positive Sex: Positive	The newly identified site for accommodating 16- and 17-year-olds is within 30 minutes of the borough and is closer to the borough than where young people are currently living in privately commissioned Semi Independent Living. Bringing these young people closer to the borough will be positive in terms of supporting their engagement with local services and establishing local networks prior to moving into local final stage accommodation. We will also have greater control and oversight on the quality of the support offer. We will work with young people identified to move into the property to enable them to feed in views on what the service should look like and gather their feedback on experiences as part of ongoing monitoring. and 17-year-olds semi-independent living	No further action at this stage.
18. Children's Services: Social Work for Families	Saving	**Overall: Neutral** Age: Neutral Disability: Neutral Race: Neutral Sex: Neutral	This proposal has been assessed as neutral because decisions about individual placement moves will continue to be driven by the needs of the child and no placement moves will be made unless we are assured that a move will offer appropriate stability and at least the same quality of provision.	No further action required at this stage.
19. Housing and Social Investment: Managing high cost TA placements	Saving	**No impact on equalities**	There are no equalities implications identified. The workstream aims to move households to alternative	No further action required at this stage.

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
			housing or more affordable temporary accommodation to reduce the temporary accommodation (TA) budget. There will be no changes to the offers or services provided to residents. If a new offer is developed in the future, residents will be consulted at that stage.	
20. **Housing and Social Investment:** Business Rates Review	Saving	**No impact on equalities**	This activity consists of ensuring that the Council has not overpaid any business rates and reviewing whether any council properties quality for business rates exemption. There is no equalities impact due to the nature of this activity as it does not impact on service delivery or the workforce.	No further action required at this stage.
21. **Housing and Social Investment:** Commercial Review	Saving	**No impact on equalities**	No equalities implications for workforce or residents, as this proposal involves reviewing commercial property income and service charge arrangements, with no impact on service delivery or the workforce.	No further action required at this stage.
22. **Housing and Social Investment:** LED Lighting Install at Kensington Town Hall Complex	Saving	**No impact on equalities**	Upgrading the lighting at the Town Hall will have no impact on residents or staff. It's a facilities improvement that doesn't affect services, access, or working conditions — so there are no equalities implications.	No further action required at this stage.
23. **Housing and Social Investment:** Additional Letting Income	Saving	**No impact on equalities**	Renting out current office space will not result in staff losing places to work. Suitable alternative workspaces will be provided, ensuring no disruption to staff or services. Therefore, there are no equalities implications.	No further action required at this stage.
24. **Housing and Social Investment:** Maximising housing income	Saving	**Overall: Positive** Age: Positive Disability: Positive Pregnancy and Maternity:	Greater stability in temporary accommodation is expected to have a positive impact on households with children, new mothers, and residents with disabilities by reducing the risk of disruptive moves and	No further action required at this stage.

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
		Positive	supporting access to suitable accommodation.	
25. Housing and Social Investment: Investment in TA from pension fund	Saving	**Overall: Positive** Age: Positive Disability: Positive Pregnancy and maternity: Positive	This decision will enable the Council to enter an arrangement with the RBKC Pension Fund to acquire properties for use as Temporary Accommodation. This will positively impact households with children, residents with disabilities, and mothers who have recently given birth by improving access to stable, suitable housing.	No further action required at this stage.
26. Housing and Social Investment: Chelsea Old Town Hall Chelsea Manor Street	Saving	**No impact on equalities**	The relocation will not affect staff roles or responsibilities, and there is no expected impact on the quality or continuity of service provided to residents.	No further action required at this stage.
27. Housing and Social Investment: Kensington Central Library	Saving	**No impact on equalities**	The relocation will not affect staff roles or responsibilities, and there is no expected impact on the quality or continuity of service provided to residents.	No further action required at this stage.
28. Resources and Customer Delivery: Customer Relationship Management (CRM) and website enhancement	Saving	**Overall Neutral: for all characteristics**	Overall better online service with no reduction in other means of accessing support services that may impact on those who are older, have a disability or where English is not their first language.	No further action required at this stage.
29. Resources and Customer Delivery: Financial Management and HR – Service Review	Saving	**Unknown**	The new Oracle system has enabled greater self-serve for managers and therefore allowing business partnering teams in Finance and HR to be able to reduce the level of support and therefore deliver a saving, which is required as part of the impact of the Fair Funding Review being implemented by Government. The scope of this proposal is currently being developed and a full assessment will be undertaken once this proposal has been scoped out.	EqIA to be produced and reviewed once project has progressed.
30. Resources and Customer Delivery: Reception and security	Saving	**Unknown**	No EqIA completed therefore implications unknown as scope of work currently being developed.	EqIA to be produced and reviewed once

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
				project has progressed.
31. **Resources and Customer Delivery:** HR – Training Budget	Saving	**No impact on equalities**	The reduction in the HR central training budget from £200k to £165k is not expected to have a significant equalities impact. Training will continue to be available through both the remaining central budget and individual business area budgets. As access to training will be maintained for all staff, no protected groups are expected to be disproportionately affected.	No further action required at this stage.
32. **Resources and Customer Delivery:** Operational Technology	Saving	**No impact on equalities**	There are no equalities implications in this case because the change relates solely to IT services. It does not affect the way residents access or receive services, nor does it impact staff working conditions. It's a technical update that supports internal processes without altering service delivery.	No further action required at this stage.
33. **Resources and Customer Delivery:** Honoraria	Saving	**Overall: Negative** Age: Negative Disability: Negative Pregnancy and maternity: Negative Race: Negative Religion/ belief: Negative Sex: Negative	This proposal is expected to have negative equalities implications, as it involves the removal or reduction of payments that recognise additional responsibilities or contributions. This may affect staff morale and perceived fairness, particularly where honoraria have been used to acknowledge extra duties.	No further action required at this stage.
34. **Resources and Customer Delivery:** Starting Salaries	Saving	**Overall: Negative** Age: Negative Disability: Negative Pregnancy and maternity: Negative Race: Negative Religion: Negative Sex: Negative Sexual orientation: Neutral Socio-economic: Negative	The aim of this workstream is to ensure that RBKC is operating in the most efficient and cost-effective way from a people perspective and contribute to the savings that need to be made within the Council by the next financial year. Higher starting salary – where we will now advertise roles with an expectation explained that candidates start at the first pay spine point apart from where there are exceptions.	No further action required at this stage.

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
35. **Resources and Customer Delivery:** HR - Travel Card	Saving	**Overall: Negative** Age: Negative Disability: Negative Geographical: Negative Pregnancy and maternity: Negative Race: Negative Religion/ belief: Negative Sex: Negative Sexual Orientation: Negative Socio-economic: Negative	The removal of the Zone 1–2 Travel Card benefit may have negative implications across several protected characteristics. A range of mitigations will be put in place to address this, with clear communication and sufficient notice ahead of the change being one example. The process will be managed fairly and transparently for all affected staff.	No further action required at this stage.
36. **Resources and Customer Delivery:** Voluntary Redundancy	Saving	**Overall: Negative** Age: Negative Disability: Negative Pregnancy and maternity: Negative Race: Negative Religion/ belief: Negative Sex: Negative Sexual Orientation: Negative Socioeconomic: Negative	At the early stages of the BEVR programme, we identified the potential for negative impact across several protected characteristics. Mitigations to address included communications using a range of media and channels, including visits at various Council sites. There was an overrepresentation of several protected characteristics among the BEVR applicants as compared to the workforce. Decisions are being finalised, but current indications show that approval rates appear uniform across all protected characteristics when comparing numbers of BEVR applicants with numbers of applications recommended for approval. The exact position will be confirmed in November.	EqIA to be reviewed once project has progressed.
Being more business like				
37. **Adult Social Care:** Self-funder Administration Fee	Saving	**Overall: Negative** Age: Negative Disability: Negative Race: Negative Religion/ Belief: Negative Sex: Negative	This proposal has been assessed as having a negative impact. Self-funders' savings levels are too high to be eligible for council-funded care, but they can ask the Council to set up and monitor their care arrangements. Although other councils have introduced a charge for this under the Care Act 2014, the Council does not	No further action required at this stage.

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
			have one in place. Subject to consultation, this could entail recovering the cost of arranging and monitoring self-funders' care. However, this impact is mitigated by the fact that residents may still pay less overall than if they were arranging their care directly with care agencies. Further, people will be able to request another financial assessment from the Council if they believe their financial situation has changed and are eligible for council-funded care.	
38. Adult Social Care: Enhanced LD Void Management	Saving	**Overall: Neutral** Age: Neutral Disability: Neutral Race: Neutral Religion/ Belief: Neutral Sex: Neutral	The impact is neutral as it is improving efficiency in the use of voids. It does not impact the service residents receive.	No further action required at this stage.
39. Chief Executive: New advertising sites	Saving	**No impact on equalities**	An Equality Impact Assessment will be required for the virgin sites advertising proposal, as new locations are identified for the installation of advertising boards. The EqIA will be updated throughout the progression of the project to ensure that any potential impacts on residents or communities are appropriately considered and addressed as site selection and implementation plans develop.	EqIA to be produced and reviewed once project has progressed
40. Chief Executive: Street based advertising	Saving	**No impact on equalities**	An Equality Impact Assessment will be required at a later stage for the guerrilla advertising proposal, once the concept is further developed and specific sites or locations are identified. This will ensure that any potential impacts on residents or communities are appropriately considered and addressed.	EqIA to be produced and reviewed once project has progressed.
41. Chief Executive: Building Wraps	Saving	**No impact on equalities**	It has been assessed as no equalities impact as the initiative does not affect staff roles or working conditions, nor does the proposal disproportionately impact	EqIA to be produced and reviewed once

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
			residents. The proposal relates to external advertising and income generation, with no service delivery implications. The need for an EqIA will continue to be reviewed throughout the project as it progresses.	project has progressed.
42. Chief Executive: Events in Parks	Saving	**No impact on equalities**	No anticipated equalities implications as the events are held outside regular park hours ensuring no adverse impact on any group.	No further action required at this stage.
43. Chief Executive: Museums and culture income opportunities	Saving	**Overall: Neutral** Neutral for all protected characteristics	The equalities implications have been assessed as neutral across protected characteristics. The initiative seeks to generate additional income through activity at Leighton House and Sambourne House Museums, Registration Services and Parks event opportunities. EqIAs will be developed as proposals and approaches are developed.	EqIA to be produced and reviewed once project has progressed.
44. Children's Services: K+C Co Works	Saving	**Overall: Neutral** Age: Neutral Disability: Neutral Gender reassignment: Neutral Geographical: Positive Marriage and Civil partnership: Neutral Pregnancy and maternity: Neutral Race: Neutral Religion/ belief: Neutral Sex: Neutral Sexual Orientation: Neutral Socio-economic: Positive	Overall the equalities impact is neutral across protected characteristics. The proposal expands co-working provision already available in other borough libraries, using currently staff-only space rather than displacing free public areas. It has potential positive impacts for socioeconomic and geographical equality by offering affordable workspace and digital access to residents on low incomes or in underserved areas.	EqIA to be reviewed once project has progressed.
45. Environment and Neighbourhoods: Bus Shelter Advertising	Saving	**No impact on equalities**	These are minor alterations to existing infrastructure and contractual terms, there is no change to the level or type of service provided to residents or	No further action required at this stage.

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
			direct impact or change to staff, therefore, there are no equalities implications.	
46. Environment and Neighbourhoods: Parks and Ecology service offer	Saving	**No impact on equalities**	There are no anticipated equality implications to the proposed budget cuts, as the savings do not impact delivery of the Public Health-funded School Food Growing or Gardening for Wellbeing programmes, which target schools at the top of the deprivation scale and residents in the six priority wards. The budget cuts will impact capacity to deliver biodiversity enhancements and expand/maintain food growing sites across the whole borough equally. Additional funding to support this work will be sought from external grants and S106 where appropriate.	No further action required at this stage.
47. Environment and Neighbourhoods: Improved performance in Commercial Waste service.	Saving	**No impact on equalities**	There are no equality implications associated with this proposal. These changes do not impact service received by residents.	No further action required at this stage.
48. Environment and Neighbourhoods: Parking Income alignment following national revision of PCN levels.	Saving	**No impact on equalities**	This is simply a reallocation of funding, identifying a lawful opportunity to use Parking income for General Fund items. It's an accounting adjustment with no policy or service delivery implications.	No further action required at this stage.
49. Housing and Social Investment: Old Brompton and Cremorne Road	Saving	**No impact on equalities**	No Equalities implications have been determined at this stage for the re-procurement of the Old Brompton and Cremorne Road advertising sites. However, the need for an EqIA will continue to be reviewed and updated as the project progresses to ensure any potential impacts on residents or communities are appropriately considered.	EqIA to be produced and reviewed once project has progressed.
50. Resources and Customer Delivery: Consistent approach to statutory fees and new commercial opportunities	Saving	**Unknown**	This is a council-wide budget item still in development. No staffing changes are proposed. While there may be future impacts on residents if fees are introduced or increased, it is	EqIA to be reviewed once project has progressed.

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
			not yet clear which groups may be affected. Further EqIAs will be completed once the proposal is fully developed.	
Generating Extra Income				
51. Adult Social Care: Care Home Pilot	Saving	**Overall: Neutral** Age: Neutral Disability: Neutral Race: Neutral Religion/ Belief: Neutral Sex: Neutral	The Council's commissioned care home services help meet resident's Care Act eligible needs and the lessons learned from the pilot will help adapt the future offer for service users.	No further action required at this stage.
52. **Adult Social Care:** Learning and Development	Saving	**No impact on equalities**	This work does not directly affect residents. Regular training, supervision and monitoring of complaints, compliments and performance will ensure staff have the tools necessary to deliver strengths-based preventative care for residents with Care Act eligible needs.	No further action required at this stage.
53. Adult Social Care: Ensure eligible residents receive NHS continuing healthcare (CHC) funding	Saving	**Overall: Neutral** Age: Neutral Disability: Neutral Race: Neutral Religion/ Belief: Neutral Sex: Neutral	This impact is neutral as the proposal does not introduce changes to how the service meets the needs of adults with Care Act-eligible needs. This group could include older adults and people with learning disabilities. Rather, it is focussed on agreeing responsibility for funding with NHS partners and ensuring residents receive the funding for which they eligible. Because it will not introduce any changes to service delivery, no negative impacts are expected.	No further action required at this stage.
54. Adult Social Care: Telecare	Saving	**Overall: Neutral** Age: Neutral Disability: Neutral Race: Neutral Religion/ Belief: Neutral Sex: Neutral	The equalities implications are neutral because the proposal will not change any service delivery, it will just change the budget that funds the service.	No further action required at this stage.
55. Chief Executive: Changing funding arrangements for City Living Local Life	Saving	**Overall: Neutral** Neutral across all protected	There are no expected equalities implications as the proposal does not reduce funding available for ward	No further action

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
		characteristics.	allocations in the short to medium term. There will be no immediate changes to services or allocations are proposed, and future decisions about reinstating the General Fund contribution will determine any longer-term impact.	required at this stage.
56. Chief Executive: Economic Development	Saving	**No impact on equalities**	The proposal does not involve changes to employee roles or the services provided to residents, only a change in the funding source for those roles. Therefore, there are no equalities implications.	No further action required at this stage.
57. Chief Executive: Employment Initiatives	Saving	**No impact on equalities**	This was a time limited programme that's come to an end. No programmes had been identified from 2026/27 therefore won't affect any groups.	No further action required at this stage.
58. Chief Executive: VCS Public Health Programme Staff	Saving	**Overall: Negative** Geographical: Negative Race: Negative Socioeconomic: Negative	The VCS Public Health programme funds community-based interventions focused on mental health and lung and heart health, particularly supporting ethnic minority residents in the north of the borough and West Chelsea, areas with higher poverty and deprivation. Cutting this funding would eliminate the role responsible for delivering these interventions, effectively ending the programme. This is likely to disproportionately harm ethnic minority communities, reversing progress already made and reducing access to vital health support.	No further action required at this stage.
59. Environment and Neighbourhoods: Air Quality Project	Saving	**Overall: Negative** **Age: Negative** Disability: Negative Geographical: Negative Socioeconomic: Negative	The Council appointed a contractor to undertake a programme of air quality audits within state schools and nurseries in Kensington and Chelsea over a four year period. We are coming towards the end of year 2 of the contract. By the end of the contract, 90% of audits will have been completed but measures will not yet have been installed so to halt the programme at that stage will not provide the reduction in	No further action required at this stage.

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
			exposure to poor air quality that is important. This could disproportionately impact young people particularly those that may have a disability. It is also likely to have wider implications against the protected characteristics socio-economic and geographical.	
60. Environment and Neighbourhoods: LED Street Lighting upgrade	Saving	**No impact on equalities**	This proposal is not expected to have equalities implications, as it involves a technical upgrade to street lighting that does not alter service access, provision, or physical infrastructure in a way that would affect protected groups	No further action required at this stage.
61. Environment and Neighbourhoods: Planning CiL Charging and improved fee income.	Saving	**No impact on equalities**	As this is a technical budget adjustment with no changes to staffing levels, service delivery, or access to services, there are no anticipated equalities implications.	No further action required at this stage.
62. Housing and Social Investment: West London Partnership	Saving	**Unknown**	The equalities implications are unknown until further work and consultation is completed with partners.	EqiA to be produced and reviewed once project has progressed.
63. Housing and Social Investment: Social Investment	Saving	**No impact on equalities**	The proposal does not involve changes to employee roles or the services provided to residents, only a change in the funding source for those roles. Therefore, there are no equalities implications.	No further action required at this stage.
64. Housing and Social Investment: Targeted Domestic Violence Support	Saving	**Overall: Negative** Age: Negative Socioeconomic: Negative	The current Healthy Schools, Healthy Early Years and Domestic Abuse Prevention service is due to end in August 2026. The proposed saving will result in the programme ceasing from August 2026. Ending the grant element of this service will reduce health and wellbeing opportunities for children in schools and early years settings. Mitigations will be put in place to review options such as deploying more capacity in house to deliver the service or to explore other mandated public health services for children and young people.	No further action required at this stage.

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
65. **Housing and Social Investment:** Council Staff – Internal Flu Jabs	Saving	**Overall: Negative** Age: Negative Disability: Negative Geographical: Negative Pregnancy/ maternity: Negative Socioeconomic: Negative	The proposed saving from discontinuing internal flu vaccinations will have a negative impact. Ending this service would remove access to flu jabs for staff who currently rely on it. In 2025, 1033 people accessed the flu jab in either vouchers or clinic. Of those that accessed the jab through the clinic only 20.5% are eligible to receive the free NHS vaccine.	No further action required at this stage.
66. **Resources and Customer Delivery:** Introduction of a Council Tax Second Homes Premium	Saving	**Unknown**	The impact is currently unclear due to a lack of data to assess any disproportionate effect. The EqIA will be reviewed following the consultation on this specific proposal to further understand the equalities implications.	EqIA to be reviewed once the consultation has been completed.
67. **Resources and Customer Delivery:** Review of the Working Age Council Tax Reduction Scheme (CTRS)	Saving	**Overall: Negative** Age: Negative Disability: Negative Geographical: Negative Race: Negative Sex: Negative Socioeconomic: Negative	Following the consultation, an updated EqIA will be completed that provides a more robust analysis of the impact on residents, particularly those with protected characteristics. This will form a central part of the final decision on whether to move forward with any changes to the scheme.	No further action required at this stage.
68. **Resources and Customer Delivery:** Capital Slippage	Saving	**No impact on equalities**	There is no direct impact or change to staff, residents or services because of this saving and therefore, no equalities implications.	No further action required at this stage.
Service Change				
69. **Adult Social Care:** Flexible model for short breaks for mental health and learning disability service users	Saving	**Overall: Positive** Disability: Positive	The impact is positive as the offer will help ensure that resident service users have a local facility to attend for respite. This will also help with ensuring that they do not need to travel far from their network/ out of the borough to access this.	No further action required at this stage.
70. **Adult Social Care:** Increased nominations to general needs housing	Saving	**Overall: Positive** Age: Positive Disability: Positive Race: Positive	The impact is positive as it seeks to ensure that their accommodation is appropriate for their needs and can help achieve their health and wellbeing outcomes. This	No further action required at this stage.

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
		Religion/ Belief: Positive Sex: Positive	would reduce the number of residents remaining in supported living schemes longer than the planned two-year period, increase the local supply and decrease out-of-area placements.	
71. Adult Social Care: Specialist cleaning	Saving	**Overall: Neutral** Age: Neutral Disability: Neutral Race: Neutral Sex: Neutral	The equalities implications are neutral, the work will ensure residents continue to receive the services they need resulting in no change or impact to the service.	No further action required at this stage.
72. Chief Executive: Design Team	Saving	**Overall: Negative** Age: Negative Disability: Negative Race: Negative Religion/ Belief: Negative Pregnancy and Maternity: Negative Socioeconomic: Negative	This is likely to have a negative impact on some groups as we will be moving away from print products, and this may impact on those who are digitally excluded. We will be reviewing what other approaches we can take to mitigate this impact.	EqIA to be produced and reviewed once project has progressed.
73. Chief Executive: Community Partnerships (Grants)	Saving	**Overall: Negative** across all protected characteristics.	This proposal is expected to have negative equalities implications, as it may reduce the capacity of voluntary and community organisations to support residents. The specific impacts are currently uncertain and will depend on how services adapt to the funding change.	EqIA to be reviewed once project has progressed and consultation complete.
74. Chief Executive: Communities Staffing	Saving	**No impact on equalities**	This proposal is not expected to have equalities implications, as the role has been vacant for four months and its removal does not affect current staff or service delivery.	No further action required at this stage.
75. Chief Executives: Community Partnerships	Saving	**Overall: Unknown** across all protected characteristics.	The equalities impact of this proposal is currently unclear, as final decisions on implementation and support measures are yet to be made. Further assessment will be needed once details are confirmed to understand how it may affect organisations and the communities they serve.	EqIA to be reviewed once project has progressed and consultation complete.
76. Children's Services: Creation of an integrated Children with Disabilities Service	Saving	**Overall: Negative** Age: Negative	Some staff members with specific protected characteristics have been disproportionately impacted,	No further action required at this stage.

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
		Disability: Neutral Race: Negative Religion/ Belief: Neutral Sex: Negative Sexual Orientation: Neutral	resulting in a negative effect. Mitigations have been implemented to reduce this impact, and a staff consultation has been conducted to inform the process. This will not result in a reduction of service for disabled children or their families.	
77. Children's Services: Transfer responsibility to local primary schools (and reduce overheads) for delivering affordable childcare at two in-house north Kensington day nurseries	Saving	**Unknown**	The proposal will have an impact on 23 staff who will transfer under school management as part of this proposal. It will be necessary to conduct a full EQIA as part of the transfer process. It is not possible to complete this until the transfer dates are finalised with the school. At the point of transfer, there will be no staff redundancies. If, during the transitions period, redundancies are required, this will be the responsibility of the school who will need to conduct their own consultation and complete appropriate EQIAs as part of the formal staff consultation process. The transfer of the nurseries to the schools will have no direct impact on the nursery offer at the point of transfer and schools are required to maintain fee levels over a three year period post transfer. Beyond this date, there may be changes to the offer and charges. This will be the responsibility of schools to lead the consultation and complete appropriate EQIAs. It is our expectation that we will work in partnership with schools during this process. Recent experiences with similar transfers in other nurseries have been positive with no drop in quality or offer. Our expectation is that this offer would be the same.	EqIA to be produced and reviewed once project has progressed.
78. Children's Services: Virtual School & School Standards	Saving	**Overall: Negative**	This saving will be achieved through the reduction in some vacant posts and also a restructure which may	EqIA to be reviewed once

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
		Negative for all Protected characteristics.	involve the introduction of new roles and Job Descriptions. As we are not fully clear on all the posts which will be affected, we are assessing the staffing equalities impact as unclear at this time. Given there will be job losses, overall, we expect the impact to be negative for those affected. A full EqiA will be conducted as part of any proposed restructure enabling us to identify whether there will be a disproportionate impact on any groups and the actions, we can take to mitigate this.	project has progressed.
79. Children's Services: Youth	Saving	**Overall: Negative** Age: Negative Race: Negative Socio-economic: Negative Geographical: Negative	The equalities implications are negative. Although the specific services have not been identified. We do know that funding for voluntary sector organisations working with young people is focused on offering support, services, projects and activities to vulnerable and disadvantaged children, young people and families in areas of high deprivation within the borough. Reduction in provision may mean that activities would cease and families would not be able to access the provision and would need to find alternative support in the borough.	EqIA to be reviewed once project has progressed.
80. Environment and Neighbourhoods: Street Enforcement – Concession Contract	Saving	**Overall: Positive** Disability: Positive Age: Positive	An Equality Impact Assessment has been completed, identifying a positive impact on disabled people and older residents, as the initiative is expected to lead to cleaner streets and pathways, reducing the risk of trips and falls.	No further action required at this stage.
81. Environment and Neighbourhoods: Leisure Contract Concession Model	Saving	**No impact on equalities**	There are no equalities implications arising from this proposal. The changes relate solely to a contractual variation with GLL, moving to an Agency Model for the delivery of leisure services. This change is administrative in nature and does not affect service delivery	No further action required at this stage.

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
			or access for residents. It has been made to align with updated HMRC guidance on the VAT treatment of leisure services provided by local authorities, with the aim of improving VAT efficiency.	
82. **Environment and Neighbourhoods:** Victims Advocacy Service	Saving	**Overall: Neutral** Neutral for all protected characteristics	The loss of the dedicated local service provided by Victim Support could risk negative implications for individuals with protected characteristics. However, this has been mitigated through a robust exit plan, engagement with stakeholders and practitioners, and the continuation of support via the MOPAC-funded London-Wide Victim Service (LWVS) provided by Victim Support, resulting in a neutral impact as support is maintained for residents.	No further action required at this stage.
83. **Housing and Social Investment:** Hard FM Savings	Saving	**No impact on equalities**	The proposal does not involve changes to core services delivered. While some non-essential service requests may be impacted mitigations are in place to minimise any impact and the overall service will continue to be delivered efficiently.	No further action required at this stage.
84. **Housing and Social Investment:** Grenfell Housing Services	Saving	**Overall Positive**	Reduction in staffing costs through removing a layer of management. This has allowed investment in additional frontline resource to support key areas identified through resident feedback.	No further action required at this stage.
85. **Housing and Social Investment:** Supported Housing Review	Saving	**Overall: Neutral** Neutral for all protected characteristics	The proposal is assessed as having a neutral impact across all protected characteristics. While there may be operational risks linked to reduced supported housing provision, these are mitigated in part by alternative temporary accommodation and potential improvements through recommissioning. The changes aim to support more effective pathways to independence for vulnerable residents.	No further action required at this stage.

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
86. Resources and Customer Delivery: Savings in Mayoral, Governance and Scrutiny team	Saving	**No impact on equalities**	There will be no reduction of service delivery and no impact on staff.	No further action required at this stage.
87. Resources and Customer Delivery: Insurance Service Resource Review	Saving	**No impact on equalities**	This process will be fair, transparent, and open to all impacted staff and will not impact the services residents receive. Support will be available to staff throughout, helping ensure the transition is managed fairly.	No further action required at this stage.
88. Resources and Customer Delivery: Digital Inclusion	Saving	**Overall impact: Negative** **Age: Negative** Disability: Negative Geographic: Negative Pregnancy/ Maternity: Negative Race: Negative Religion/ Belief: Negative Socioeconomic: Negative	The equalities implications are negative. Although the specific elements of the programme have not yet been individually identified, the Digital Inclusion Programme is known to provide targeted support aimed at improving accessibility and inclusion for disadvantaged groups particularly older residents. Ending or reducing this provision would mean that essential digital support may cease, leaving older residents without access to the help they need and forcing them to seek alternative assistance elsewhere in the borough. As there is currently no mitigation in place, discontinuing the service would widen the existing inequalities for already disadvantaged groups	No further action required at this stage.
Growth Proposals				
89. Adult Social Care: Demographic Pressures	Growth	**Overall: Positive** Age: Positive Disability: Positive Race: Positive Religion/ Belief: Positive Sex: Positive	The impact is positive for service users because this will ensure that the directorate has the funding it requires to continue delivering services for residents with Care Act eligible needs.	No further action required at this stage.
90. Chief Executive: Savings and Transformation Team	Growth	**No impact on equalities**	This growth proposal relates solely to internal staffing capacity and does not involve any changes to policies, services, or employment terms. Recruitment for these roles will follow the Council's established HR and equalities procedures,	No further action required at this stage.

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
			which ensure fair and inclusive practice in line with the Equality Act 2010.	
91. Children's Services: Customer Delivery Social Services Line	Growth	**Overall: Positive** Geographical: Positive Race: Positive Sex: Positive Socio-economic: Positive	The proposal here is to ensure that there is sufficient resource to respond to the rising demand for services. This will positively impact those who require support from social care services. Given the overrepresentation of some protected characteristics in this cohort, the equalities impact of this proposal is positive.	No further action required at this stage.
92. Children's Services: Demographic Pressures	Growth	**Overall: Positive** Age: Positive Disability: Positive Geographical: Positive Race: Positive Sex: Positive Socio-economic: Positive	The proposal here is to grow the family services budget to respond to pressures enabling a safe statutory service to continue to be delivered. This will positively impact those who are currently, or will in future become, LAC. Given the overrepresentation of some protected characteristics in this cohort, the equalities impact of this proposal is positive.	No further action required at this stage.
93. Environment and Neighbourhoods: Parks maintenance (Cremorne Wharf)	Growth	**No impact on equalities**	There are no equalities impact and no adverse impacts on services provided to residents.	No further action required at this stage.
94. Environment and Neighbourhoods: Cleanest Streets	Growth	**Overall: Positive** Positive for all Protected characteristics	This proposal aims to enhance the standards for elements of the waste collection and street cleansing service. Any improvement will have a direct positive outcome for all of our community regardless of their characteristics, protected or otherwise.	No further action required at this stage.
95. Environment and Neighbourhoods: Tree Service Contract	Growth	**No impact on equalities**	The proposal has been assessed as having no equalities implications because the tree contract does not have any direct or indirect impact on individuals or groups protected under equality legislation. Additionally, the scope and nature of the activity do not present any foreseeable risk of discrimination or inequality.	No further action required at this stage.

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
96. Environment and Neighbourhoods: Emergency response on call roles - move to 'Green Book' (The National agreement on pay and conditions of service for local government services)	Growth	**No impact on equalities**	By adopting the Green Book framework, the proposal introduces a fairer and more transparent structure for on-call pay. It is expected to have a positive impact on the workforce and does not present any negative equalities implications. On the contrary, it strengthens the Council's position as a fair and equitable employer, ensuring legal compliance and promoting consistency across services.	No further action required at this stage.
97. Environment and Neighbourhoods: CCTV Fibre Contract	Growth	**No impact on equalities**	The proposed change has no equalities implications, as it will not affect residents, nor will it compromise the quality or safety standards required for CCTV operations. Additionally, there will be no changes to the roles of staff involved in managing or operating the CCTV system.	No further action required at this stage.
98. Environment and Neighbourhoods: CCTV Programme Manager Post	Growth	**No impact on equalities**	The proposed change has no equalities implications, as it will not affect residents disproportionately and no impact on current staff.	No further action required at this stage.
99. Environment and Neighbourhoods: Sustaining/ Maintaining the Prevent Service	Growth	**No impact on equalities**	The Prevent service does not have the potential to disproportionally impact any of the protected characteristics. Prevent is a safeguarding service. The service specification is aimed at all residents, who are at risk of radicalisation irrespective of their beliefs, race, gender, sexual orientation, disability, age and depravation. Tailored support and interventions will be decided based on the individual's ideology and if deemed necessary the intervention provider will be from the relevant community / background /beliefs to be as effective as possible when countering the harmful narrative or ideology in question.	No further action required at this stage.
100. Environment and Neighbourhoods:	Growth	**No impact on equalities**	This proposal is not expected to have negative equalities implications. It represents a	No further action

Programme	Budget Proposal	Impact	Analysis by Service Area	Rationale/ Further Action
Waste and Recycling Container Crew Growth			service improvement, aiming to enhance street cleanliness and the overall experience for residents. No adverse impact on protected groups is anticipated.	required at this stage.
101. Housing and Social Investment: Temporary Accommodation Pressures	Growth	**No impact on equalities**	There is no identified impact associated with this growth proposal. The additional funding reflects the current cost of delivery and will enable statutory services to continue as normal, meaning there will be no change to the services residents receive or to what officers deliver.	No further action required at this stage.
102. Resources and Customer Delivery: Customer Access Strategy - Resident Connect Future Funding	Growth	**No impact on equalities**	This proposal is not expected to have equalities implications, as it maintains and continues the existing customer access service.	No further action required at this stage.
103. Resources and Customer Delivery: Cyber Security	Growth	**No impact on equalities**	The proposed programme will affect all residents, service users, clients, staff or other data subjects in the same way: the personal data held on them will be better protected, including from unauthorised access and from cyber attacks, or any other security event which can lead to an inability of the council to deliver statutory services.	No further action required at this stage.
104. Resources and Customer Delivery: Cyber Security Zero Trust Architecture	Growth	**No impact on equalities**	The proposal will improve service resilience in the event of a cyber event or attack. The proposed programme will impact all residents, service users, or other data subjects in the same way improving the protection of their data. Meaning no disproportionate impact to any protected characteristics and no equalities implications.	No further action required at this stage.
105. Resources and Customer Delivery: Oracle	Growth	**No impact on equalities**	This proposal is not expected to have equalities implications, as it maintains the existing Oracle HR service and fulfils a contractual commitment. It does not affect service access, delivery, or staff experience in a way that would impact protected groups.	No further action required at this stage.

Appendix 15

Schedule of Draft Fees and Charges 2026/27

This document includes fees and charges that have been proposed for 2026/27 and in some cases 2027/28 for services which need to facilitate advance bookings.

The proposed fees and charges are presented by directorate for the purposes of this report.

There are increases that broadly follow the 5% increase set out in the covering budget report with some small deviation either in percentage or absolute terms. For example, where the fee or charge is only a few pence, a small change appears as a larger % increase.

Fee Description	2025-26 Fee (£)	2026-27 Fee (£)	% Increase/ (Decrease)
Temporary Structures			
Section 30 Charge - Fee type (VATable, fee excludes VAT)			
Section 10(3) of the Local Authorities Act 2004 provides for the recovery of reasonable incurred expenses from a person on whom a notice under Section 30 of the London Buildings Act (Amendment) Act 1935 is served. **HOURLY CHARGE.**	125.00	131.30	5.0%
Demolition Notices - Fee type (VAT exempt)			
Small Site	374.00	392.70	5.0%
Medium Site	623.00	654.20	5.0%
Large Site	1,120.00	1,176.00	5.0%
Building Control Fees - Fee type (VATable, fee excludes VAT)*			
Building Control surveying rate for non-Higher Risk Building (HRB), including consultancy advice. **HOURLY RATE.**	125.00	131.30	5.0%
Building Control surveying rate for Higher Risk Building (HRB), including consultancy advice. **HOURLY RATE.**	197.00	206.90	5.0%

* Building Control fees are set against a 'cost recovery' basis and will be tailored to meet the scope of the project. Our fees are determined by making use of the LABC (Local Authority Building Control) risk assessment principles in the LABC Service Plan models (per hour). These fees are published under the Building Regulations charges regime.

Explanatory Notes

Clarification on the cost of traffic orders

Traffic order changes that have been requested for commercial purposes will be charged for.

For permanent traffic order changes included in the four monthly Miscellaneous Parking Amendment Order: for items to count as one change the following conditions will need to be met:

- items should be linked, e.g. if a pay-by-phone visitor parking bay is converted to a resident bay to make up for the conversion of a resident space to another use; and

- items should fit on the same street notice when the map is at the scale of 1:625.

Occasionally more than one change will fit on the same street notice. In such cases, each set of linked items will be charged as one change.

Where a scheme involves conversion of a number of bays for the same reason, e.g. a new car club operator joins the market, each bay will be charged for as a separate change.

The cost of parking suspensions is charged separately to the cost of making a temporary or emergency temporary traffic regulation order or the cost of closing a road for a relevant (special) event.

The cost of suspensions will apply on every day that public access to the site is physically possible, i.e. the road is not securely fenced off.

SERVICE: PARKING

All charges provided below relate to the amount of money that the Council receives, i.e. if a charge is applied by the customer's bank for making a payment, e.g. in the case of cheques or transfers from foreign banks (where accepted), then this charge is payable by the customer in addition to the charges below. It should be noted that:

- if the charges are not paid in full, the application will not proceed until the full amount is received by the Council; and
- any false claims will not be refunded.

In previous years, the cost of parking permits, visitor parking, suspensions and dispensations were increased in line with the September Retail Price Index (RPI), which this year was 4.5 per cent. Parking permit increases are proposed at 5% in line with RPI (rounded).

The Council sets parking charges in order to balance the needs of local residents, visitors and local business, whilst ensuring that charges reflect the cost of investing in and delivering essential services for our community. Visitor parking charges are proposed to increase by 10%.

Charges for parking suspensions and dispensations are linked to visitor parking charges and so are also proposed to increase by 10%.

Prices are rounded to the nearest £1 and therefore in some cases the percentage increase is higher or lower than the inflationary figure given above. The percentage

increase in the cost of a resident's parking permit will vary according to the vehicle's CO2 emissions (see Explanatory Notes).

Explanatory notes:

Resident permit charges

The charge for residents' parking permits has two elements:

- base permit price
- surcharge per gramme of CO2 per km

When we changed to the emissions-based resident parking permit structure, the base permit price was the same for all permit duration periods, i.e. 3 month, 6 month and 12 month and reflected the cost of issuing a permit.

From 1 April 2025, the base permit price was £63 and the annual cost per gramme of CO2 per km was £1. The average cost of an annual residents' permit, including

the base price, was £205. A five per cent inflationary increase in the average cost of a residents' permit is therefore £10.

Diesel surcharge

In April 2021, we changed the resident parking permit structure to provide a greater incentive for residents to choose a cleaner vehicle. Further details can be found in the Key Decision Report link below.

https://www.rbkc.gov.uk/howwegovern/keydecisions/decision.aspx?DecisionID=5520

One of the recommendations of the report was that the diesel surcharge be increased at a rate above the general rate of inflation from 2022/23 onwards to encourage residents to choose petrol or electric vehicles. Therefore the 12-month diesel surcharge has been increased by more than other fuel sources and rounded to the nearest pound. The six month and three-month diesel surcharge price are a half and a quarter of the annual cost respectively.

Visitor motorcycle parking tariff

Although we charge residents to park motorcycles in standard residents' bays, we do not charge residents to park in resident permit motorcycle bays.

When proof of payment for visitor parking required a Pay-and-Display ticket, motorcycles were made exempt due to their not having a secure mechanism for displaying such tickets. That limitation does not apply now that payment is made by Pay-by-phone so we proposed to charge in April 2023. Charging for visitor motorcycle parking will reduce the incidence of motorcycles being left in bays for long periods of time, thereby releasing more space for daily visitors. We have not yet implemented this charge for visitor motorcycle parking.

Electric motorcycles will continue to park for free in visitor motorcycle bays, as will motorcycles with a valid residents' motorcycle permit.

All visitor motorcycle bays have the same Pay-by-phone location code and so motorcyclists are able to park in multiple visitor motorcycle bays on the same day without having to pay again.

From 1 April 2023, all our motorcycle bays became shared use bays (subject to the usual consideration of traffic order objections) so can be used by visitors (who pay) and residents (who can park for free with a permit). This provides a total of 312 bays available to motorcyclists.

Visitor parking tariffs

We link visitor parking tariffs to our inflation measure to ensure that they keep pace with inflation. In this way, parking tariffs discourage non-essential trips and increase

the opportunity for motorists to find a vacant space without excessive searching. We review charges each year, taking account of the change in RPI since the previous increase, but it does not necessarily mean we increase them every year.

We last increased visitor parking tariffs, across all tariff bands in April 2025, following the change introduced in April 2023 when the base price for visitor parking became the electric vehicle tariff, to make it easier to maintain a differential of circa £1 per hour between the four tariff areas. The petrol tariff is now set to be 33 per cent more than the electric vehicle tariff (rounded to the nearest 10p) and the diesel tariff is now set to be 50 per cent more than the electric vehicle tariff (rounded to the nearest 10p).

The actual charges are based on applying the four per cent inflationary increase to the electric vehicle price for each of the four tariff areas.

Tariff Area	Fully Electric vehicle or zero emissions vehicle (including fully fuel cell (hydrogen))	Price per hour (£) Petrol/Hybrid-Petrol/Electric-Petrol/Hybrid-Electric/ Gas/Gas-Petrol/Other/Emissions unknown	Diesel/ Hybrid-Diesel/ Electric-Diesel/Gas-Diesel/*
Basic	1.90	2.50	2.90
Low	3.10	4.10	4.70
Medium	4.40	5.90	6.60
High	5.60	7.40	8.40

**in the event that we were to decide to reinstate the use of pay and display machines, the tariff would be equivalent to the diesel rate*

Suspension and dispensation charges

Suspension and dispensation charges are based on the tariff in the high tariff area for petrol vehicles and are calculated as follows:

i) Fewer than six chargeable days (per space per chargeable day) – this is 11 times the cost of the hourly petrol tariff in the high tariff area, rounded to the nearest pound;

ii) Six to 42 chargeable days inclusive (per space per chargeable day) – this is 1.5 times the cost of the multiple of the petrol tariff outlined in (i);

iii) 43 chargeable days or more (per space per chargeable day) – this is twice the cost of the multiple of the petrol tariff outlined in (i).

As the cost of the petrol tariff in the high tariff area has increased this year, so too has the cost of suspensions and dispensations.

Express suspension charge

On 1 April 2023, we introduced an express suspension charge which requires five working days' notice rather than the standard ten working days' notice. This is a one-off cost per application and was priced at five times the "fewer than six chargeable days" charge in that year. From 1 April 2026, this cost will be increased by 10% (rounded where appropriate).

Clarification of the cost of suspensions

It has come to officers' attention that some customers are swapping the applicant names on suspension bookings so that they avoid the higher charges for longer suspensions. For clarification, we apply the higher charge for suspensions when the cumulative days relate to the same planning permission rather than by applicant for suspensions which have an associated planning permission. We also reserve the right to apply the higher charge where it has evidence of swapping between applicants, or other behaviour, to avoid the higher charge. Suspensions for bays behind hoardings will be charged for every day that the bay is unusable.

Administrative charges

We do not levy an administration charge for residents transferring a private number plate to a different vehicle.

The administrative charge for antique dealer permits was last increased in April 2025. From 1 April 2026, this charge will rise by 10%.

DIRECTORATE: ADULT SOCIAL CARE & PUBLIC HEALTH
DEPARTMENT: ADULT SOCIAL CARE

SERVICE: ADULT SOCIAL CARE

Councils are required to have a client contribution policy that is demonstrably fair and does not undermine the overall objectives of social care – to promote both independence and social inclusion of individuals. A Contributions Policy is in place. A financial assessment is undertaken in line with the Contributions Policy and determines for each individual, the financial contribution that they are asked to make towards the cost of their care. The amount an individual contributes must be an 'affordable' amount, based on their ability to pay. The table below sets out the fees and charges for Adult Social Care services. Within Adult Social Care there are some charges for which the charging framework is set nationally, such as residential and nursing care. These are excluded from the fees and charges set out below.

Fee Description	2025-26 Fee (£)	2026-27 Fee (£)	% Increase/ (Decrease)
Home Care Services (the charge for home care services is set at the average of rates charged by the Council's main home care contractors)	20.83	21.50	3.2%
6 Week Reablement Care (a local authority is not allowed to charge for the first 6 weeks of intermediate care)	No Charge	No Charge	
Day Care (per half day session) Standard	21.71	22.40	3.2%
Day Care (per half day session) Complex Needs	28.78	29.60	2.8%
Transport - A charge for each round trip to and from a day centre	11.92	12.30	3.2%
Deferred Payment Agreements - One off set up charge	500.00	515.00	3.0%
Deferred Payment Agreements - Ongoing annual maintenance charge	100.00	103.00	3.0%
Self-funder Administration Fee	N/A	Subject to Consultation	N/A

SERVICE: CONFERENCE & EVENTS

Fees for the Conference & Events Service are set one year in advance due to the requirement to enable pre-bookings. The 2025-26 charges have therefore already been agreed. These are included for completeness here for the 2025-26 Fees and Charges Schedule, and the 2026-27 Fees & Charges are proposed for decision.
